*It is hereby ordered,* That all of this decision except the agreement amending the amended marketing agreement be published in the FEDERAL REGISTER. The regulatory provisions of the said agreement amending the amended marketing agreement are identical with those contained in the attached order amending the amended order which will be published with this decision.

Dated: June 22, 1956.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

*Order[1] Amending the Amended Order Regulating the Handling of Peaches Grown in the County of Mesa in the State of Colorado*

§ 940.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of this order; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to Public Act No. 10, 73rd Congress (May 12, 1933), as amended and as re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and the applicable rules of practice and procedure governing proceedings to formulate the marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Palisade, Colorado, on March 15, 1956, upon proposed amendments to the Amended Marketing Agreement No. 88 and Amended Order No. 40 (7 CFR Part 940), regulating the handling of peaches grown in the County of Mesa in the State of Colorado. Upon the basis of evidence introduced at such hearing and the record thereof, it is found that:

(1) The said amended order, as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said amended order, as hereby further amended, regulates the handling of peaches grown in the County of Mesa in the State of Colorado in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity specified in, the marketing agreement upon which hearings have been held;

(3) The said amended order, as hereby further amended, is limited in its application to the smallest regional production area that is practicable, consistently with carrying out the declared policy of the act; and the issuance of several orders applicable to subdivisions of such production area would not effectively carry out the declared policy of the act; and

(4) There are no differences in the production and marketing of peaches grown in the production area covered by the said amended order, as hereby further amended, that make necessary different terms and provisions applicable to different parts of such area.

*It is, therefore, ordered,* That, on and after the effective date hereof, the handling of peaches grown in the County of Mesa in the State of Colorado as is in the current of commerce between the State of Colorado and any point outside thereof shall be in conformity to, and in compliance with, the terms and conditions of the aforesaid amended order, as hereby further amended; and such amended order is hereby further amended to read as follows:

1. Redesignate §§ 940.8, 940.9 and 940.10 as 940.9, 940.10, and 940.11, respectively, and insert the following new section:

§ 940.8 *Varieties.* "Varieties" means and includes all classifications and subdivisions, including customary and trade names thereof, of peaches according to those definitive characteristics now or hereafter recognized by the United States Department of Agriculture or the Colorado State Department of Agriculture, or such groupings of peaches according to such characteristics or types as may be established by the Committee with the approval of the Secretary.

2. Delete §§ 940.20 through 940.23 and substitute therefor the following:

§ 940.20 *Establishment and membership.* An Administrative Committee is hereby established consisting of nine members, each of whom shall have an alternate. Five of the members, one for each district, shall represent producers; three of the members shall represent cooperative associations that are handlers; and one of the members, hereinafter referred to as "independent" member, shall represent producers and handlers other than cooperative associations and members of such associations. The members of the committee and their respective alternates shall be nominated and selected, for the terms of office subsequent to February 28, 1957, in accordance with the provisions of §§ 940.21 through 940.24.

§ 940.21 *Nomination and selection of producer members.* (a) Nomination of producer members and their respective alternates shall be made at meetings of producers for each such district, at such times (on or before February 1 of each year) and places as the Administrative Committee shall designate. At each such meeting, the producers eligible to participate therein shall select a chairman and a secretary therefor. In the election of nominees, each producer shall be entitled to vote in accordance with the provisions of paragraph (b) of this section. The chairman of each meeting shall announce at such meeting the name of each person for whom votes have been cast, and the number of votes cast for each such person; and the chairman or the secretary of the meeting shall forthwith transmit such information to the Secretary.

(b) Only producers shall participate in the nomination of producer members and their alternates, and a producer may participate only in the meeting held for the district in which the produces

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and orders have been met.

peaches. No producer shall participate in the nomination of producer members and their alternates for more than one district in any fiscal year. Each producer shall be entitled to cast but one vote on behalf of himself, his agents, partners, and representatives. Proxy voting shall be prohibited.

(c) At least twice as many persons shall be nominated as there are positions to be filled. Such nominees shall be ranked in the order of votes cast for each, and such ranking shall determine their standing in the order of importance of the positions to be filled. Member positions shall be considered of first importance. The Secretary shall select one member and one alternate from the nominees thus elected and ranked.

§ 940.22 *Nomination and selection of independent member.* (a) Nomination of an independent member and his alternate shall be made at a meeting of producers and handlers other than cooperative associations or members of such associations, at such time (on or before February 1 of each year) and place as the Administrative Committee shall designate. At each such meeting, the persons eligible to participate therein shall select a chairman and a secretary therefor.

(b) Only producers and handlers who are not cooperative associations nor members of such associations shall be eligible to participate in the nomination of the independent member and his alternate. Proxy voting shall be prohibited, but independent handlers having permanent facilities in Mesa County for the handling of peaches and having bona fide agents designated for carrying on business activities for such handlers may be represented at such nomination meetings by such agents and such agents may vote and be nominated; and, in a similar manner, such handlers may designate employees who may vote and be nominated. In the election of nominees for the independent member and his alternate, each person eligible to participate therein shall be entitled to cast but one vote on behalf of himself, his agents, partners, affiliates, subsidiaries, and representatives. The Administrative Committee, with the approval of the Secretary, may make rules and regulations defining permanent facilities and what shall constitute bona fide agents and employees for the purposes of this section, and in like manner may change such rules and regulations from time to time.

(c) At least twice as many persons shall be nominated as there are positions to be filled. Such nominees shall be ranked in the order of the votes cast, and such ranking shall determine their standing in the order of importance of the positions to be filled. Member positions shall be considered of first importance. The Secretary shall select a member and an alternate member from the nominees thus elected and ranked.

(d) The chairman of the meeting shall announce at such meeting the name of each person for whom votes have been cast, and the number of votes cast for each such person; and the chairman or the secretary of the meeting shall forthwith transmit such information to the Secretary.

§ 940.23 *Nomination and selection of cooperative handler members.* (a) Each of the two cooperative associations qualifying as a handler during the fiscal year beginning March 1, 1956, shall be entitled to nominate one member and one alternate member of the committee; and, in alternate years, each such association shall make an additional nomination for either a member or alternate member. The cooperative association represented by two cooperative handler members during the fiscal year beginning March 1, 1956, shall nominate one member and two alternates for the next succeeding fiscal year. The cooperative association represented by one cooperative handler member during the fiscal year beginning March 1, 1956, shall nominate two members and one alternate for the next succeeding fiscal year.

(b) Nomination of cooperative handler members and their respective alternates shall be made at a meeting or meetings of the members of such cooperative associations at such times (on or before February 1 of each year) and places as the respective associations shall designate with the concurrence of the Administrative Committee. At each such meeting, the association members eligible to participate therein shall select a chairman and secretary therefor unless such officers regularly serving the association are in attendance. In the election of nominees, each member of a cooperative association shall be entitled to cast but one vote on behalf of himself, his agents, partners, and representatives, for each member nominee to be elected. Proxy voting shall be prohibited.

(c) At least twice as many persons shall be nominated as there are positions to be filled. Such nominees shall be ranked in the order of votes cast for each, and such ranking shall determine their standing in the order of importance of the positions to be filled. Member positions shall be considered of first importance. The Secretary shall select the required number of members and alternates from the nominees thus elected and ranked.

(d) The chairman of each meeting shall announce at such meeting the name of each person for whom votes have been cast, and the number of votes cast for each such person; and the chairman or the secretary of the meeting shall forthwith transmit such information to the Secretary.

(e) The committee, with the approval of the Secretary, may provide for the reapportionment of the cooperative handler membership of the committee so as to more equitably provide representation to present and future cooperative associations engaged in handling Mesa County peaches should the need for such reapportionment of present cooperative handler positions arise. Any such reapportionment should be based, so far as practicable, upon the volume of peaches handled by the respective associations.

3. Delete paragraph (c) of § 940.24 and substitute therefor the following:

(c) The independent member of the Administrative Committee and the alternate for such member to be selected from the nominees of producers and handlers other than cooperative associations and members of such associations must be a producer or handler (including employees and bona fide agents designated for carrying on business activities for such handler) and shall not be a member or an employee of a cooperative association.

4. Delete § 940.30 and substitute therefor the following:

§ 940.30 *Compensation and expenses.* The members and alternate members of the Administrative Committee shall serve without salary but may be compensated for attendance at meetings at a rate not to exceed $5.00 per meeting plus mileage at not to exceed 10 cents per mile. Such members and alternates also may be reimbursed for reasonable expenses necessarily incurred by them in the performance of duties, specifically assigned by the committee, other than attendance at meetings.

5. Redesignate paragraphs (g), (h), (i), and (j) of § 940.32 as paragraphs (h), (i), (j), and (k), respectively, and insert the following new paragraph (g):

(g) To consult, cooperate, and exchange information with committees administering other marketing agreements and orders, with other governmental agencies, and with industry groups in connection with all proper committee activities and objectives under this part.

6. Delete §§ 940.50 and 940.52 and substitute therefor the following:

§ 940.50 *Regulation of shipments.* Whenever the Administrative Committee deems it advisable to regulate, during any period or periods, the shipment of one or more varieties of peaches by grades or sizes, or both, or by minimum standards of quality or maturity, or both, it shall so recommend to the Secretary.

§ 940.52 *Establishment of regulations*—(a) *By grades and sizes.* Whenever the Secretary finds, from any such recommendations and information or other available information, that to limit the shipment of the total quantity of any variety or varieties of peaches to particular grades or sizes, or both, thereof would tend to effectuate the declared policy of the act, he shall so limit the shipment of such variety or varieties during a specified period or periods. The Secretary shall promptly notify the committee of each such regulation; and the committee shall promptly give adequate notice thereof to handlers and producers.

(b) *By minimum standards of quality and maturity.* Whenever the Secretary finds, from any such recommendation and information or other available information, that to establish minimum standards of quality or maturity, or both, and to limit the shipment of any variety or varieties of peaches during any period or periods to those meeting such minimum standards would be in the public interest and would tend to effectuate the declared policy of the act, he shall so limit the shipment of such variety or varieties during a specified period or periods. The Secretary shall promptly notify the committee of each such regulation; and the committee shall promptly give adequate notice thereof to handlers and producers.

7. After deleting the provisions of paragraph (b) of § 940.53 and redesignating paragraphs (c) and (d) of such section as paragraphs (e) and (f), respectively, insert the following:

(b) In the event the Secretary issues a regulation pursuant to § 940.52, the committee shall determine the percentage which each variety of peaches permitted to be shipped under the regulation bears to the total production of such variety; and the committee shall forthwith announce such percentage. The committee shall thereafter issue one or more exemption certificates to any producer who furnishes evidence satisfactory to the committee that, by reason of conditions beyond the control of a prudent grower and beyond his reasonable expectations, he will be prevented because of the regulation issued from shipping or having shipped as large a proportion of a particular variety of his peaches as the average proportion of all such peaches which may be so shipped. Causes regarded as within the control of a prudent grower include, but are not necessarily limited to, failure properly and adequately to prune, irrigate, thin, fertilize, spray, and cultivate according to accepted practices. Causes regarded as beyond the control of a prudent grower and beyond his reasonable expectation include, but are not necessarily limited to, exceptionally late spring and early frosts, ditch breaks, water shortages, general shortage of labor during the growing season, or illness of a kind causing inability to carry out the management of his crop in the manner of a prudent grower.

(c) The committee, with the approval of the Secretary, may include in the rules and regulations adopted pursuant to (a) of this section such refinement of definition as is deemed necessary with respect to causes beyond the control of a prudent grower and beyond a grower's reasonable expectation.

(d) The exemption certificates issued pursuant to this section shall permit the respective grower to whom the certificate is issued to ship or have shipped a percentage of his crop of a particular variety of peaches equal to the percentage determined pursuant to paragraph (b) of this section; but such exemption may be limited to the specific damage by reason of which the exemption is claimed, and the committee may establish special requirements with respect to the minimum grade, quality, size, and maturity which must be met by peaches shipped under such certificates.

8. Add after § 940.55 the following new section, preceded by a main heading entitled "Research and Development:"

§ 940.60 *Marketing Research and Development.* The committee, with the approval of the Secretary, may provide for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of peaches. In a similar manner any such project may be modified, suspended, or terminated.

9. Immediately preceding the closing of the parenthesis at the end of § 940.2 *Act*, insert the following: "; 68 Stat. 906, 1047."

[F. R. Doc. 56–5090; Filed, June 27, 1956; 8:46 a. m.]

## [ 7 CFR Part 957 ]

[Docket No. AO–150 A–2]

### IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

### DECISION WITH RESPECT TO PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER AS AMENDED

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended, 7 U. S. C. 601 et seq; 68 Stat. 906, 1047), and the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Pocatello, Idaho, on January 19–21, 1956, pursuant to notice thereof, which was published December 21, 1955, in the FEDERAL REGISTER (20 F. R. 9825), upon proposed amendments to Marketing Agreement No. 98 and Marketing Order No. 57, as amended, regulating the handling of Irish potatoes grown in Malheur County, Oregon, and the counties of Adams, Valley, Lemhi, Clark, and Fremont in the State of Idaho, and all of the counties in Idaho lying south of the aforesaid counties in Idaho.

Upon the basis of the evidence introduced at the aforesaid hearing, and the record thereof, the Deputy Administrator, Agricultural Marketing Service, on May 18, 1956, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision in this proceeding. The notice of the filing of such recommended decision, affording opportunity to file written exceptions thereof, was published May 23, 1956, in the FEDERAL REGISTER (21 F. R. 3421). No exceptions to the recommended decision have been filed.

*Findings and conclusions.* The material issues, the findings and conclusions, and the general findings of the recommended decision set forth in the FEDERAL REGISTER (F. R. Doc. 56–4047; 21 F. R. 3421) are hereby approved and adopted as the material issues, findings, and conclusions, and general findings of this decision as if set forth in full herein except that the last paragraph appearing at page 3423 of the FEDERAL REGISTER daily issue of May 23, 1956 (F. R. Doc. 56–4047), is modified to read as follows:

The proposed order contains revised definitions of the terms "handler" and "handle" or "ship." With respect to the definition of the term "handler," merely a conforming change is made which utilizes the synonym for the word "ship" as used in the second definition. Regarding the term "handle," its definition should expressly indicate that it covers not only the actual sale and transportation of potatoes, but also the causing thereof. The latter coverage should be made a part of the "handle" definition so as to include all persons responsible for the initiation and carrying out of the activities covered by that term. Those persons, in addition to owners and officers of a firm handling potatoes, should include individuals who, in a supervisory capacity, are directly responsible for the sale or transportation of potatoes. Hence, the term handler would mean any person (except a common or contract carrier of potatoes owned by another person) who handles potatoes or causes potatoes to be handled; and such term should not be limited to any particular handler. In other words, the term "handler" should include not only those persons who themselves sell or transport potatoes, but also persons, who, although they do not themselves sell or transport potatoes, nevertheless cause their sale or transportation. All persons coming within the meaning of such term should be responsible for complying with the obligations imposed by or pursuant to the proposed order so as to assure that all potatoes will be handled in accordance therewith.

*Marketing agreement, as amended, and order, as amended.* Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, as Amended, Regulating the Handling of Irish Potatoes Grown in Certain Designated Counties in Idaho and Malheur County, Oregon," and "Order, as Amended, Regulating the Handling of Irish Potatoes Grown in Certain Designated Counties in Idaho and Malheur County, Oregon," which have been decided upon as the appropriate and detailed means of effectuating the foregoing conclusions. The aforesaid marketing agreement, as amended, and the aforesaid order, as amended, shall not become effective unless and until the requirements of § 900.14 of the aforesaid rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

*It is hereby ordered,* That all of this decision, except the marketing agreement, as amended, be published in the FEDERAL REGISTER. The regulatory provisions of the said marketing agreement, as amended, are identical with those contained in the annexed order, as amended, which will be published with this decision.

Done at Washington, D. C., this 25th day of June 1956.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

*Order, as Amended,*[1] *Regulating the Handling of Irish Potatoes Grown in Certain Designated Counties in Idaho and Malheur County, Oregon*

Sec.
957.0 Findings and determinations.

[1] This order, as amended, shall not become effective unless and until the requirements of section 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

AUTHORITY: §§ 957.0 to 957.92 issued under 48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047.

§ 957.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to Public Act No. 10, 73d Congress (May 12, 1933), as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and in accordance with the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and orders (7 CFR Part 900), a public hearing was held at Pocatello, Idaho, on January 19–21, 1956, upon proposed amendments to Marketing Agreement No. 98 and Order No. 57, as amended (7 CFR Part 957), regulating the handling of Irish potatoes grown in Malheur County, Oregon, and the Counties of Adams, Valley, Lemhi, Clark, and Fremont in the State of Idaho, and all of the counties in Idaho lying south of the aforesaid counties in Idaho. Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act with respect to potatoes produced in the production area (i) by establishing and maintaining such orderly marketing conditions therefor as will tend to establish, as prices to the producers thereof, parity prices, and by protecting the interest of the consumer (*a*) by approaching the level of prices which it is declared in the act to be the policy of Congress to establish by gradual correction of the current level of prices at as rapid a rate as the Secretary deems to be in the public interest and feasible in view of the current consumptive demand in domestic and foreign markets, (*b*) by authorizing no action which has for its purpose the maintenances of prices to producers of such potatoes above the parity level, and (c) by authorizing the establishment and maintenance of such minimum standards of quality and maturity, and such grading and inspection requirements as may be incidental thereto, as will tend to effectuate such orderly marketing of such potatoes as will be in the public interest;

(2) The said order, as amended, and as hereby further amended, regulated the handling of potatoes grown in the production area in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which hearings have been held;

(3) The said order, as amended, and as hereby further amended, is limited in application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act; and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The said order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms, applicable to diffreent parts of the production area, as are necessary to give due recognition to the difference in the production and marketing of potatoes grown in the production area; and

(5) All handling of potatoes grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

*Order relative to handling.* It is, therefore, ordered that on and after the effective time hereof, the handling of potatoes grown in Malheur County, Oregon, and in the Counties of Adams, Valley, Lemhi, Clark, and Fremont in the State of Idaho, and all counties in Idaho lying south thereof shall be in conformity to and in compliance with, the terms and conditions of the aforesaid order as amended, and as hereby further amended; and such terms and conditions are as follows:

DEFINITIONS

§ 957.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ 957.2 *Act.* "Act" means Public Act No. 10, 73rd Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047).

§ 957.3 *Person.* "Person" means an individual, partnership, corporation, association, or any other business unit.

§ 957.4 *Production area.* "Production area" means all territory included within Malheur County, Oregon, and the counties of Adams, Valley, Lemhi, Clark, and Fremont in the State of Idaho, and all of the counties in Idaho lying south of the aforesaid counties in Idaho.

§ 957.5 *Potatoes.* "Potatoes" means all varieties of Irish potatoes grown within the production area and does not include any products thereof.

§ 957.6 *Varieties.* "Varieties" means and includes all classifications or subdivisions of Irish potatoes according to those definitive characteristics now or hereafter recognized by the United States Department of Agriculture.

§ 957.7 *Certified seed potatoes.* "Certified seed potatoes" means and includes all potatoes officially certified and tagged, marked or otherwise appropriately identified, under the supervision of the official seed potato certifying agency of the State in which the potatoes are grown, or other seed certification agencies which the Secretary may recognize and approve.

§ 957.8 *Handler.* "Handler" is synonymous with "shipper" and means any person (except a common or contract carrier of potatoes owned by another person) who handles potatoes.

§ 957.9 *Handle.* "Handle" is synonymous with "ship" and means to sell or transport potatoes, or cause potatoes to be sold or transported, within the production area or between the production area and any point outside thereof: *Provided,* That such term shall not include the movement of potatoes within the production area for the purpose of having such potatoes prepared for market, stored, or planted within such area.

§ 957.10 *Producer.* "Producer" means any person engaged in the production of potatoes for market.

§ 957.11 *Committee.* "Committee" means the administrative committee, called the Idaho-Eastern Oregon Potato Committee, established pursuant to § 957.25.

§ 957.12 *Fiscal period.* "Fiscal period" means the period beginning and ending on the dates approved by the Secretary pursuant to recommendations by the committee.

§ 957.13 *Prepare for market.* "Prepare for market" means to sort or separate potatoes into grades, sizes, qualities, or packs, or any combination thereof, for market purposes.

§ 957.14 *Grade and size.* "Grade" means any one of the officially established grades of potatoes, and "size" means any one of the officially established sizes of potatoes, as defined and set forth in:

(a) United States Standards for Potatoes issued by the United States Department of Agriculture (§§ 51.1540 to 51.1559 of this title), or amendments thereto, or modifications thereof, or variations based thereon;

(b) United States Consumer Standards for Potatoes issued by the United States Department of Agriculture (§§ 51.1575 to 51.1587 of this title), or amendments thereto, or modifications thereof, or variations based thereon; and

(c) Standards for potatoes issued by the State of Idaho or Oregon or amendments thereto, or modifications, or variations based thereon.

§ 957.15 *Pack.* "Pack" means a unit of potatoes in any type of container and which falls within specific weight limits or within specific grade limits, or both, recommended by the committee and approved by the Secretary.

§ 957.16 *Container.* "Container" means a sack, box, bag, crate, hamper, basket, carton, package, barrel, or any other type of unit used in the packaging, transportation, sale, shipment or handling of potatoes.

§ 957.17 *Export.* "Export" means shipment of potatoes beyond the boundaries of continental United States.

§ 957.18 *District.* "District" means each one of the geographical divisions of the production area established pursuant to § 957.27 or as reestablished pursuant to § 957.28.

§ 957.19 *Marketing season.* "Marketing season" is synonymous with "season" and means the period July 1 of any year to and including June 30 of the following year.

§ 957.20 *Process.* "Process" means to manufacture or convert potatoes into any of the products thereof.

COMMITTEE

§ 957.25 *Establishment and membership.* (a) The Idaho-Eastern Oregon Potato Committee consisting of eleven members, of whom seven shall be producers and four shall be handlers (including one handler from any district within the production area who may be a processor), is hereby established. For each member of the committee there shall be an alternate who shall have the same qualifications as the member.

(b) Each person selected as a producer member or alternate shall be an individual who (1) is a producer in the district for which selected or an officer or employee of a producer in such district, and (2) is also a resident of such district. A producer who handles potatoes other than of his own production shall qualify as a producer under this section, and §§ 957.29, 957.30, 957.32, and 957.34, only if the potatoes of his own production constituted 51 percent or more of the total quantity of potatoes handled by him during the portion of the then current season preceding his nomination.

§ 957.26 *Term of office.* (a) The term of office of committee members and alternates shall be for two years beginning June 1 and ending May 31. After June 1, 1956, and on an alternating basis in succeeding years, the terms of office shall be so determined that the tenure of three producer members and two handler members, and their respective alternates, shall terminate as of May 31 of one year and the tenure of four producer members and two handler members, and their respective alternates, shall terminate as of May 31 of the following year.

(b) Committee members and alternates shall serve during the term of office for which they are selected and have qualified, or during that portion thereof beginning on the date on which they qualify and continuing until the end of the term for which selected, and until their successors are selected and have qualified.

§ 957.27 *Districts.* For the purpose of selecting committee members, the following districts of the production area are hereby established:

(a) *District No. 1.* The counties of Oneida, Power, Bingham, Butte, Clark, and all counties lying east thereof in Idaho;

(b) *District No. 2.* Malheur County, Oregon, and counties of Owyhee, Elmore, Boise, Valley, and all counties lying west thereof in Idaho;

(c) *District No. 3.* The remaining designated counties in Idaho included in the production area, and not included in District No. 1 or District No. 2.

§ 957.28 *Redistricting.* The committee may recommend, and pursuant thereto the Secretary may approve, the reapportionment of members among districts, and the reestablishment of districts, set forth in § 957.27, within the production area. In recommending any such changes, the committee shall give consideration to: (a) Shifts in potato acreage within districts and within the production area during recent years; (b) the importance of new potato production in its relation to existing districts; (c) the equitable relationship between the committee membership and districts; (d) economies to result for producers in promoting efficient administration due to redistricting or reapportionment of members within districts; and (e) other relevant factors. No change in districting or in apportionment of members within districts may become effective within less than 60 days prior to the beginning of a fiscal period; and no recommendations for such redistricting or reapportionment may be made less than four months prior to such date.

§ 957.29 *Selection.* Members and alternates shall be selected on the following basis (unless otherwise apportioned pursuant to § 957.28): (a) Three producer members and two handler members, with their respective alternates, from District No. 1; (b) one producer member and one handler member, with their respective alternates from District No. 2; and (c) three producer members and one handler member, with their respective alternates, from District No. 3.

§ 957.30 *Nominations.* (a) The Secretary may select the members and alternates of the Idaho-Eastern Oregon Potato Committee from nominations which may be made in the following manner, or from other eligible persons; and nominations for members and alternates may be submitted by producers or handlers, including processors, as the case may be, or groups of either thereof, on an elective basis or otherwise:

(b) In order to provide nominations for committee members and alternates:

(1) The committee shall hold or cause to be held prior to April 1 of each year, one or more meetings of producers and of handlers in each of the districts designated in § 957.27, or pursuant to § 957.28, in which the then current terms of office will expire the following May 31; and

(2) In arranging for such meetings, the committee may, if it deems desirable, utilize the services and facilities of existing organizations and agencies, and may combine its meetings with others.

(c) Nominations shall be supplied to the Secretary, in such manner and form as he may prescribe, not later than 30 days prior to the expiration of the terms of office.

(d) Only producers may participate in designating nominees for producer members and alternates and only handlers, including those who are also processors, may participate in designating nominees for handler members and alternates.

(e) Regardless of the number of districts in which a person produces or handles potatoes, such person is entitled to cast only one vote on behalf of himself, his agents, subsidiaries, affiliates, and representatives, in designating nominees for committee members and alternates: *Provided,* That in the event a person is engaged in producing or handling potatoes in more than one district, such person shall elect the district within which

he may participate as aforesaid in designating nominees: *Provided further*, That an eligible voter's privilege of casting only one vote, as aforesaid, shall be construed to permit such voter to cast one vote for each position to be filled in the district in which he elects to vote.

§ 957.31 *Failure to nominate.* If nominations are not made within the time and in the manner and form specified by the Secretary pursuant to § 957.30, the Secretary may, without regard to nominations, select the committee members and alternates: *Provided*, That such selection shall be on the basis of the representation prescribed in this subpart.

§ 957.32 *Acceptance.* Any person selected by the Secretary as a committee member or as an alternate shall qualify by filing a written acceptance with the Secretary within ten days after being notified of such selection.

§ 957.33 *Vacancies.* To fill any vacancy occasioned by the failure of any person selected as a committee member or as an alternate to qualify, or in the event of the death, removal, resignation, or disqualification of any qualified member or alternate, a successor for his unexpired term may be selected by the Secretary from nominations made in the manner specified in § 957.30, or the Secretary may select such committee member or alternate from previously unselected nominees on the current nominee list from the district involved. If the names of nominees to fill any such vacancy are not made available to the Secretary within 30 days after such vacancy occurs, the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of the representation provided for in § 957.29.

§ 957.34 *Alternate members.* An alternate member of the committee shall act in the place and stead of the member for whom he is an alternate during such member's absence; and an alternate member may perform such other duties as assigned or requested by the committee. In the event of the death, removal, resignation, or disqualification of a member his alternate shall act for him until a successor to such member is selected and has qualified.

§ 957.35 *Procedure.* (a) Seven members of the committee shall be necessary to constitute a quorum; and at least seven concurring votes shall be required to pass any motion or approve any committee action. At any assembled meeting, all votes shall be cast in person.

(b) The committee may provide for meetings, by telephone, telegraph, or other means of communication and any vote cast at such meeting shall be confirmed promptly in writing.

§ 957.36 *Expenses and compensation.* Committee members and their respective alternates shall be reimbursed for reasonable expenses necessarily incurred by them in the performance of their duties and in the exercise of their powers under this subpart, and shall receive compensation at a rate to be determined by the committee and approved by the Secretary, not to exceed $10.00 for each day, or portion thereof, spent in attending to committee business: *Provided*, That at its discretion the committee may request the attendance of one or more alternates at any or all meetings, notwithstanding the expected or actual presence of the respective members, and may pay expenses and compensation, as aforesaid.

§ 957.37 *Powers.* The committee shall have the following powers:

(a) To administer the provisions of this subpart in accordance with its terms;

(b) To make rules and regulations to effectuate the terms and provisions of this subpart;

(c) To receive, investigate, and report to the Secretary complaints of violation of the provisions of this subpart; and

(d) To recommend to the Secretary amendments to this subpart.

§ 957.38 *Duties.* It shall be the duty of the committee:

(a) To act as intermediary between the Secretary and any producer or handler;

(b) To select a chairman and such other officers as may be necessary, to select subcommittees of committee members, and to adopt such rules and regulations for the conduct of its business as it may deem advisable;

(c) To appoint such employees, agents, and representatives as it may deem necessary and to determine the salaries and define the duties of each such person;

(d) To investigate, from time to time, and to assemble data on the growing, harvesting, shipping and marketing conditions with respect to potatoes;

(e) To furnish to the Secretary such available information as he may request;

(f) To keep minutes, books, and records which clearly reflect all of the acts and transactions of the committee and such minutes, books, and records shall be subject to examination at any time by the Secretary or his authorized agent or representative;

(g) To make available to producers and handlers the committee voting record on recommended regulations and on other matters of policy;

(h) At the beginning of each fiscal period, to submit to the Secretary a budget of its expenses for such fiscal period, together with a report thereon;

(i) To cause the books of the committee to be audited by a competent accountant at least once each fiscal period; and at such other time as the committee may deem necessary or as the Secretary may request; the report of such audit shall show the receipt and expenditure of funds collected pursuant to this subpart; a copy of each such report shall be furnished to the Secretary and a copy of each such report shall be made available at the principal office of the committee for inspection by producers and handlers; and

(j) To consult, cooperate, and exchange information when deemed desirable by the committee with other potato marketing committees and other individuals or agencies in connection with all proper committee activities and objectives under this subpart.

### EXPENSES AND ASSESSMENTS

§ 957.40 *Expenses.* The committee is authorized to incur such expenses as the Secretary may find are reasonable and likely to be incurred during each fiscal period for its maintenance and functioning, and for such purposes as the Secretary, pursuant to this subpart, determines to be appropriate. Handlers shall share expenses upon the basis of a fiscal period. Each handler's share of such expense shall be proportionate to the ratio between the total quantity of potatoes handled by him as the first handler thereof during a fiscal period and the total quantity of potatoes handled by all handlers as first handlers thereof during the same period.

§ 957.41 *Budget.* At the beginning of each fiscal period, and as may be necessary thereafter, the committee shall prepare a budget of estimated income and expenditures necessary for the administration of this part. The committee may recommend a rate of assessment calculated to provide adequate funds to defray its proposed expenditures. The committee shall present such budget promptly to the Secretary with an accompanying report showing the basis for its calculations.

§ 957.42 *Assessments.* (a) The funds to cover the committee's expenses pursuant to § 957.40 shall be acquired by the levying of assessments upon handlers as provided in this subpart. Each handler who ships potatoes as the first handler thereof shall pay assessments to the committee upon demand, which assessments shall be in payment of such handler's pro rata share of such expenses.

(b) Assessments shall be levied upon handlers at rates established by the Secretary, but not to exceed $1.00 per carload. Such rates may be established upon the basis of the committee's recommendations or other available information.

(c) At any time during or subsequent to a given fiscal period, the committee may recommend the approval of an amended budget and an increase in the rate of assessment. Upon the basis of such recommendation, or other available information, the Secretary may approve an amended budget and increase the rate of assessment. Such increase shall be applicable to all potatoes which were regulated under this part and which were shipped by the first handler thereof during such fiscal period.

§ 957.43 *Accounting.* (a) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified in this part.

(b) The Secretary may at any time require the committee, its members and alternates, employees, agents, and all other persons to account for all receipts and disbursements, funds, property, or records for which they are responsible. Whenever any person ceases to be a member or alternate of the committee, he shall account for all receipts, disbursements, funds, and property (including but not being limited to books and other records) pertaining to the committee's activities for which he is responsible, and deliver all such property and funds in his hands to such successor, agency, or person as may be designated by the Secretary, and shall execute such assignments and other instruments as may be necessary or appropriate to vest in such successor, committee, or designated person, the right to all of such property and funds and all claims vested in such person.

(c) The committee may make recommendations to the Secretary for one or more of the members thereof, or any other person, to act as a trustee for holding records, funds, or any other committee property during periods of suspension of this part, or during any period or periods when regulations are not in effect; and if the Secretary determines such action appropriate, he may direct that such person or persons shall act as trustee or trustees for the committee.

§ 957.44 *Refunds.* Monies arising from the excess of assessments over expenses shall be accounted for as provided in this section. Each handler entitled to a proportionate refund of the excess assessments at the end of a fiscal period shall be credited with such refund against the operations of the following fiscal period unless he demands payment thereof, in which event such proportionate refund shall be paid to him. However, the Secretary, upon recommendation of the committee, may determine that it is appropriate for the maintenance and functioning of the committee that some of the funds remaining at the end of a fiscal period which are in excess of the expenses necessary for committee operations during such period may be carried over into following periods as a reserve for possible liquidation. Upon approval by the Secretary, such reserve may be used upon termination of this part to liquidate the affairs of the committee: *Provided*, That upon termination of this part any monies in the reserve for liquidation which are not required to defray the necessary expenses of committee liquidation shall, to the extent practical, be returned upon a pro rata basis to all persons from whom such funds were collected.

### RESEARCH AND DEVELOPMENT

§ 957.47 *Research and development.* The committee, with the approval of the Secretary, may provide for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of potatoes.

### REGULATION

§ 957.50 *Marketing policy—(a) Preparation.* Prior to or at the same time as recommendations are made pursuant to § 957.51, the committee shall consider and prepare a proposed policy for the marketing of potatoes. In developing its marketing policy the committee shall investigate relevant supply and demand conditions for potatoes. In such investigations the committee shall give appropriate consideration to the following:

(1) Market prices for potatoes, including prices by grade, size, and quality in different packs, and in different containers;

(2) Supplies of potatoes by grade, size, and quality in the production area and in other production areas;

(3) The trend and level of consumer income;

(4) Establishing and maintaining orderly marketing conditions for potatoes;

(5) Orderly marketing of potatoes as will be in the public interest; and

(6) Other relevant factors.

(b) *Reports.* (1) The committee shall promptly submit a report to the Secretary setting forth the aforesaid marketing policy and shall notify producers and handlers of the contents of such report.

(2) In the event it becomes advisable to shift from such marketing policy because of changed supply and demand conditions, the committee shall prepare a new or revised marketing policy in the manner set forth in paragraph (a) of this section and this paragraph. The committee shall promptly submit a report thereon to the Secretary and notify producers and handlers of the contents of such report on the new or revised marketing policy.

§ 957.51 *Recommendation for regulations.* Whenever the committee deems it advisable that the handling of potatoes be regulated pursuant to § 957.52 or § 957.53, or both, it shall recommend such regulations to the Secretary, or amendment, thereto, or modification, suspension or termination thereof, whenever it finds that such regulations will tend to effectuate the declared policy of the act.

§ 957.52 *Issuance of regulations.* (a) The Secretary shall limit the handling of potatoes whenever he finds from the recommendations and information submitted by the committee, or from other available information, that such regulation would tend to effectuate the declared policy of the act. Such limitation may:

(1) Regulate in any or all portions of the production area, the handling of particular grades, sizes, qualities, or maturities, or any combination thereof, of any or all varieties of potatoes during any period;

(2) Regulate the handling of particular grades, sizes, qualities, or maturities of potatoes differently, for different varieties, for certified seed potatoes and other potatoes, for different outlets, for different portions of the production area, for different packs, for different containers, or for any combination of the foregoing, during any period.

(3) Provide a method, through rules and regulations issued pursuant to this part, for fixing the size, capacity, weight, dimensions, or pack of the container, or containers, which may be used in the packaging or handling of potatoes, or both;

(4) Regulate the handling of potatoes by establishing, in terms of grades, sizes, or both, minimum standards of quality and maturity; or

(5) Prohibit the handling of potatoes during a specified period or periods. No regulation issued pursuant to this subparagraph shall be applicable to the handling of potatoes (i) for processing, (ii) that were already loaded at the beginning of such period, or (iii) during any period other than between July 15 and September 15 of any marketing season. No such prohibition shall be deemed to limit the right of any person to sell or contract to sell any potatoes which are in conformity with the then current regulations, if any, that are in effect under this part. Further, no such prohibition shall be effective for more than 96 consecutive hours and at least 72 hours shall elapse between the termination of any such period of prohibition and the beginning of the next such period.

(b) In the event the handling of potatoes is regulated pursuant to § 957.52 (a) (5), no handler shall, except as otherwise permitted by said § 957.52 (a) (5), handle any potatoes that were prepared for market or loaded during the effective period of such regulation.

(c) The Secretary may amend any regulation issued under this part whenever he finds that such amendment would tend to effectuate the declared policy of the act. The Secretary may also terminate or suspend any regulation or amendment thereof whenever he finds that such regulation or amendment obstructs or no longer tends to effectuate the declared policy of the act.

§ 957.53 *Modification, suspension, or termination.* Whenever the Secretary finds, upon the basis of the recommendations and information submitted by the committee, or from other available information, that it will tend to effectuate the declared policy of the act, he shall modify, suspend, or terminate regulation under or pursuant to § 957.42, § 957.52, or § 957.65, or any combination thereof, in order to facilitate the handling of potatoes for the following purposes:

(a) Export;

(b) Relief or charity;

(c) Livestock feed within the production area;

(d) Certified seed potatoes;

(e) Processing into specified products; and

(f) Such other purposes which may be specified by the committee, with approval of the Secretary.

§ 957.54 *Minimum quantity exemption.* The committee, with the approval of the Secretary, may establish, for any or all portions of the production area, minimum quantities below which shipments will be free from regulations issued or in effect pursuant to §§ 957.40 to 957.65, inclusive, or any combination thereof.

§ 957.55 *Notification of regulation.* The Secretary shall notify the committee of any regulations issued or of any modification, suspension, or termination thereof. The committee shall give reasonable notice thereof to handlers.

§ 957.56 *Safeguards.* (a) The committee, with the approval of the Secretary, may prescribe adequate safeguards to prevent shipments pursuant to § 957.53 and other outlets from entering channels of trade for other than the specific purpose authorized therefor.

(b) Safeguards, as provided by this section, may include requirements that handlers:

(1) Shall obtain the inspection required by § 957.65 or pay the assessment provided by § 957.42, or both, in connection with the potato shipments effected in accordance with § 957.53; and

(2) Shall obtain certificates of privilege from the committee for shipments of potatoes effected or to be effected under provisions of § 957.53.

(c) The committee, with the approval of the Secretary, shall prescribe rules governing the issuance and the contents of certificates of privilege.

(d) The committee may rescind or deny to any handler certificates of privilege if proof satisfactory to the committee is obtained that potatoes shipped by him for the purposes stated in § 957.53 were handled contrary to the provisions of this part.

(e) The Secretary shall have the right to modify, change, alter, or rescind any safeguards prescribed and any certificates issued by the committee pursuant to the provisions of this section.

(f) The committee shall make reports to the Secretary, as requested, showing the number of applications for such certificates, the quantity of potatoes covered by such applications, the number of such applications denied and certificates granted, the quantity of potatoes shipped under duly issued certificates and such other information as may be requested by the Secretary.

INSPECTION AND CERTIFICATION

§ 957.65 *Inspection and certification.* (a) During any period in which regulations are issued pursuant to §§ 957.52, 957.53, or any combination thereof, no handler shall handle potatoes unless such potatoes are inspected by an authorized representative of the Federal-State Inspection Service, or such other inspection service as the Secretary may designate, and is covered by a valid inspection certificate, except when relieved from such requirements pursuant to recommendation by the committee and approval by the Secretary.

(b) Regrading, resorting, or repacking any lot of potatoes shall invalidate any prior inspection certificates covering such potatoes insofar as the requirements of this section are concerned. During any period in which shipments of potatoes are regulated, as aforesaid, no handler shall handle potatoes after they have been regraded, resorted, repacked, or in any way further prepared for market, unless such potatoes are inspected and covered by a valid inspection certificate as required in paragraph (a) of this section.

(c) Insofar as the requirements of this section are concerned, the length of time for which an inspection certificate shall be valid may be established by the committee with the approval of the Secretary; and such length of time may be different for shipments for different purposes.

(d) When potatoes are inspected in accordance with the requirements of this section, a copy of each inspection certificate issued shall be made available promptly to the committee by the inspection service.

EXEMPTIONS

§ 957.70 *Procedure.* The committee may adopt, subject to approval of the Secretary, the procedures pursuant to which certificates of exemption will be issued to producers or handlers.

§ 957.71 *Granting exemptions.* (a) The committee may issue certificates of exemption to any producer who applies for such exemption and furnishes adequate evidence to the committee: (1) That by reason of a regulation issued pursuant to § 957.52 or § 957.53, or both, he will be prevented from handling as large a proportion of his production as the average proportion of production handled by all producers in said applicant's immediate production area, and (2) that the grade, size, or quality of the applicant's potatoes have been adversely affected by acts beyond the applicant's control and by acts beyond reasonable expectation. Each certificate shall permit the producer to handle the amount of potatoes specified thereon. Such certificate shall be transferred with such potatoes at time of handling.

(b) The committee may issue certificates of exemption to any handler who applies for such exemption and furnishes adequate evidence to the committee: (1) That by reason of a regulation issued pursuant to § 957.52 or § 957.53, or both, he will be prevented from handling as large a proportion of his storage holdings of ungraded potatoes, acquired during or immediately following the digging season, as the average proportion of ungraded storage holdings handled by all handlers in said applicant's immediate shipping area, and (2) that the grade, size, or quality of the applicant's potatoes have been adversely affected by acts beyond the applicant's control and by acts beyond reasonable expectation. Each certificate shall permit the handler to handle the amount of potatoes specified thereon. Such certificate may be transferred with such potatoes at time of handling.

(c) The committee shall be permitted at any time to make a thorough investigation of any producer's or handler's claim pertaining to exemptions.

§ 957.72 *Appeal.* If any applicant for exemption certificates is dissatisfied with the determination by the committee with respect to his application, said applicant may file an appeal with the committee. Such an appeal must be taken promptly after the determination by the committee from which the appeal is taken. Any applicant filing an appeal shall furnish evidence satisfactory to the committee for a determination on the appeal. The committee shall thereupon reconsider the application, examine all available evidence, and make a final determination concerning the application. The committee shall notify the appellant of the final determination, and shall furnish the Secretary with a copy of the appeal and a statement of considerations involved in making the final determination.

§ 957.73 *Records, reports, and review of exemptions.* (a) The committee shall maintain a record of all applications submitted for exemption certificates, a record of all exemption certificates issued and denied, the quantity of potatoes covered by such exemption certificates, a record of the amount of potatoes shipped under exemption certificates, a record of appeals for reconsideration of applications, and such information as may be requested by the Secretary. Periodic reports on such records shall be compiled and issued by the committee upon request of the Secretary.

(b) The Secretary shall have the right to modify, change, alter, or rescind any procedure and any exemptions granted pursuant to §§ 957.70 to 957.73, inclusive.

MISCELLANEOUS PROVISIONS

§ 957.80 *Reports.* Upon the request of the committee, with approval of the Secretary, every handler shall furnish to the committee, in such manner and at such time as may be prescribed, such information as will enable the committee to exercise its powers and perform its duties under this subpart. The Secretary shall have the right to modify, change, or rescind any requests for reports pursuant to this section.

§ 957.81 *Compliance.* Except as provided in this part, no handler shall handle potatoes, the handling of which has been prohibited by the Secretary in accordance with provisions of this part, and no handler shall handle potatoes except in conformity to the provisions of this part.

§ 957.82 *Right of the Secretary.* The members of the committee (including successors and alternates), and any agent or employee appointed or employed by the committee, shall be subject to removal or suspension by the Secretary at any time. Each and every order, regulation, decision, determination or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of the said committee shall be deemed null and void, except as to acts done in reliance thereon or in compliance therewith prior to such disapproval by the Secretary.

§ 957.83 *Effective time.* (a) The provisions of this subpart shall become effective at such time as the Secretary may declare above his signature attached to this subpart, and shall continue in force until terminated in one of the ways specified in this subpart.

(b) All rules and regulations issued by the Secretary pursuant to this part (Order No. 57, as amended), which are in effect immediately prior to the date of this amendment shall continue in effect under this subpart as originally issued, or subsequently modified, until such rules and regulations are changed, modified, or suspended in accordance with this subpart.

§ 957.84 *Termination.* (a) The Secretary may, at any time, terminate the provisions of this subpart by giving at least one day's notice by means of a press release or in any other manner which he may determine.

(b) The Secretary may terminate or suspend the operation of any or all of the provisions of this subpart whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(c) The Secretary shall terminate the provisions of this subpart at the end of any season whenever he finds that such termination is favored by a majority of producers who, during the preceding season, have been engaged in the production for market of potatoes: *Provided,* That such majority has, during such season, produced for market more than fifty percent of the volume of such potatoes produced for market; but such termination shall be effective only if announced on or before April 30 of the then current season.

(d) The provisions of this subpart shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

§ 957.85 *Proceedings after termination.* (a) Upon the termination of the provisions of this subpart the then functioning members of the committee shall continue as trustees, for the purpose of liquidating the affairs of the committee, of all the funds and property then in the possession of or under control of the committee, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(b) The said trustees shall continue in such capacity until discharged by the Secretary; shall, from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and of the trustees, to such person as the Secretary may direct; and shall upon request of the Secretary execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the committee or the trustees pursuant thereto.

(c) Any person to whom funds, property, or claims have been transferred or delivered by the committee or its members, pursuant to this section, shall be subject to the same obligations imposed upon the members of the committee and upon the said trustees.

§ 957.86 *Effect of termination or amendments.* (a) Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant to this subpart, or the issuance of any amendments to either thereof, shall not (1) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued under this subpart, or (2) release or extinguish any violation of this subpart or of any regulation issued under this subpart, or (3) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

(b) Each person who is a committee member or alternate on the effective date of this subpart shall continue in office under this subpart until the end of such person's term of office, and until his successor has been selected and has qualified; and all effective rules and regulations issued pursuant to this subpart shall continue in effect until modified, suspended, or terminated by the Secretary in accordance with the provisions of this subpart.

§ 957.87 *Duration of immunities.* The benefits, privileges, and immunities conferred upon any person by virtue of this subpart shall cease upon the termination of this subpart, except with respect to acts done under and during the existence of this subpart.

§ 957.88 *Agents.* The Secretary may, by designation in writing, name any person, including any officer or employee of the United States, or name any agency in the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this subpart.

§ 957.89 *Derogation.* Nothing contained in this subpart is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 957.90 *Personal liability.* No member or alternate of the committee, nor any employee or agent thereof, shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any handler or to any person for errors in judgment, mistakes, or other acts, either of commission or omission as such member, alternate, employee, or agent, except for acts of dishonesty.

§ 957.91 *Separability.* If any provision of this subpart is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this subpart, or the applicability thereof to any other person, circumstance, or thing, shall not be affected thereby.

§ 957.92 *Amendments.* Amendments to this subpart may be proposed, from time to time, by the committee or by the Secretary.

[F. R. Doc. 56-5132; Filed, June 27, 1956; 8:55 a. m.]

## [ 7 CFR Part 957 ]

[Docket No. AO 150 A-2]

IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

ORDER DIRECTING THAT A REFERENDUM BE CONDUCTED AMONG PRODUCERS; DESIGNATING AGENTS TO CONDUCT SUCH REFERENDUM; AND DETERMINATION OF A REPRESENTATIVE PERIOD

Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), it is hereby directed that a referendum be conducted among producers who, during the period July 1, 1955, through June 30, 1956 (which period is hereby determined to be a representative period for the purpose of such referendum), were engaged, in the production area comprising certain designated counties in Idaho and Malheur County, Oregon, in the production of potatoes for market, to determine whether such producers approve or favor the issuance of amendments to Order 57 (7 CFR Part 957) regulating the handling of Irish potatoes grown in Malheur County, Oregon, and the Counties of Adams, Valley, Lemhi, Clark, and Fremont in the State of Idaho, and all of the counties in Idaho lying south of the aforesaid counties in Idaho; and said amendatory order is annexed to the decision of the Secretary of Agriculture filed [1] simultaneously herewith.

The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda Among Producers in Connection with Marketing Orders (except those applicable to milk and its products) to become effective pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (15 F. R. 5176).

R. H. Eaton, E. E. Gallahue, Allan Henry, and R. L. Hawes of the Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, are hereby designated as agents of the Secretary of Agriculture to conduct said referendum jointly or severally.

Copies of the text of the aforesaid annexed order, of Order No. 57, as amended, of the aforesaid procedure (15 F. R. 5176), and of this order may be examined in the office of the Hearing Clerk, United States Department of Agriculture, Room 112, Washington, D. C., and at those places within the said production area announced by the referendum agents.

Ballots to be cast in the referendum and copies of the text of the said amendatory order may be obtained from any referendum agent and any appointee hereunder.

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047)

Done at Washington, D. C., this 25th day of June 1956.

[SEAL] TRUE D. MORSE, *Acting Secretary.*

## [ 7 CFR Part 940 ]

HANDLING OF PEACHES GROWN IN COUNTY OF MESA IN COLORADO

ORDER DIRECTING THAT REFERENDUM BE CONDUCTED; DESIGNATION OF REFERENDUM AGENTS TO CONDUCT SUCH REFERENDUM; AND DETERMINATION OF REPRESENTATIVE PERIOD

Pursuant to the applicable provisions of the Agricultural Marketing Agreement

[1] See F. R. Doc. 56-5132, supra.

Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), it is hereby directed that a referendum be conducted among the producers who, during the period March 1, 1955, through February 29, 1956 (which period is hereby determined to be a representative period for the purpose of such referendum), were engaged, in the County of Mesa in the State of Colorado, in the production of peaches for market, to ascertain whether such producers favor the issuance of an order amending amended Order No. 40 (7 CFR Part 940), regulating the handling of peaches grown in the County of Mesa in the State of Colorado, which order is annexed to the decision of the Secretary of Agriculture filed simultaneously herewith. J. W. Gannaway and Roland G. Harris, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, are hereby designated agents of the Secretary to conduct said referendum severally or jointly.

The procedure applicable to this referendum shall be the "Procedure for the Conduct of Referenda Among Producers in Connection With Marketing Orders (Except Those Applicable to Milk and its Products) to Become Effective Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended" (15 F. R. 5176).

Copies of the aforesaid annexed order, of amended Order No. 40, of the aforesaid referendum procedure (15 F. R. 5176), and of this order may be examined in the Office of the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D. C.

Ballots to be cast in the referendum, and other necessary forms and instructions, may be obtained at the said office, or from any appointee hereunder.

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047)

Dated: June 22, 1956.

### Food and Drug Administration

### [ 21 CFR Part 120 ]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITIONS FOR ESTABLISHMENT OF EXEMPTIONS FROM NECESSITY OF TOLERANCES FOR CARBON DISULFIDE, CARBON TETRACHLORIDE, ETHYLENE DIBROMIDE, AND ETHYLENE DICHLORIDE

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

Petitions have been filed by the following listed firms:

Olin Mathieson Chemical Corporation, Mathieson Building, Baltimore 3, Maryland.

Carbide and Carbon Chemicals Company, 30 East 42d Street, New York 17, New York.

Diamond Alkali Company, 300 Union Commerce Building, Cleveland, Ohio.

Dow Chemical Company, Midland, Michigan.

Food Machinery and Chemicals Corporation, 161 East 42d Street, New York 17, New York.

Stauffer Chemical Company, 380 Madison Avenue, New York 17, New York.

Union Carbide and Carbon Corporation, 30 East 42d Street, New York 17, New York.

These petitions propose that the pesticide chemicals carbon disulfide, carbon tetrachloride, ethylene dibromide, and ethylene dichloride be exempted from the requirement of a tolerance when used as fumigants for the following grains: Barley, corn, oats, popcorn, rice, rye, sorghum (milo), wheat.

The following methods are set forth in the petitions for determining residues of the chemicals:

*Determination of carbon tetrachloride.* The sample is added to acidified water and the mixture vigorously refluxed under a hot condenser. The carbon tetrachloride is swept from the boiling suspension by a gentle current of air and absorbed in acetone. The isolated carbon tetrachloride is determined colorimetrically by the Fujiwara reaction, essentially as modified in the method of Rogers and Kay (Journal of Industrial Hygiene and Toxicology, Vol. 29, pages 229–232 (1947)).

*An organic chlorine method for the determination of carbon tetrachloride and ethylene dichloride.* The carbon tetrachloride and ethylene dichloride are isolated from the sample, using the same general technique and the same apparatus as described in the method outlined above for the determination of carbon tetrachloride. However, the absorber solvent is a mixture of dioxane and ethanolamine, 5:1, instead of acetone. Carbon tetrachloride and ethylene dichloride trapped in this solvent are decomposed and determined according to the method of Winteringham, Journal of the Society of Chemical Industry (London), Volume 61, pages 186–192 (1942), by refluxing the solution at first directly, then with sodium. The resulting inorganic chloride is measured by the Volhard titration.

*Determination of ethylene dibromide.* The ethylene dibromide is isolated from the sample and decomposed, together with carbon tetrachloride and ethylene dichloride if present, using the same procedure described in the preceding paragraph. The solvent is evaporated, and the organic matter is destroyed by ashing. The resulting inorganic bromide is oxidized to bromate and measured by a modified Kolthoff titration, ("Analytical Methods for Methyl Bromide," by V. R. Stenger, S. A. Shrader, and A. W. Beshgetoor, in Industrial and Engineering Chemistry, Analytical Edition, Volume 11, page 121 (1939), and Official Methods of Analysis of the Association of Official Agricultural Chemists, 7th Edition (1950), page 279, sec. 16.16 (f), (g), (k), (l), and (n).)

*Colorimetric determination of carbon bisulfide.* The carbon bisulfide is aspirated from a boiling suspension of the sample in 1:1 HCl and absorbed in Viles reagent, with which it reacts to produce cupric diethyldithiocarbamate. This compound forms an intense yellow solution suitable for colorimetric measurement. The apparatus and technique in general are those described by Lowen for the dithiocarbamates, which are estimated by the quantity of CS, liberated upon decomposition with acid. (Analytical chemistry, Vol. 23, pages 1846–1850 (1951))

Dated: June 22, 1956.

[SEAL] GEO. P. LARRICK,
*Commissioner of Food and Drugs.*

COLORADO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

JUNE 21, 1956.

The United States Forest Service of the Department of Agriculture has filed an application, Serial No. 011662, for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the general mining laws but not the mineral

leasing laws, subject to existing valid claims.

The applicant desires the land for use either as administrative sites, camp grounds or recreational areas, within Routt National Forest.

For a period of thirty (30) days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 357 New Custom House, P. O. Box 1018, Denver 1, Colorado.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

SIXTH PRINCIPAL MERIDIAN, COLORADO

ROUTT NATIONAL FOREST

Lynx Pass Administrative Site:
T. 2 N., R. 83 W.,
Sec. 27: NE¼.
Crosho Lake Recreation Area:

## Office of the Secretary

[Order 2640, Amdt. 10]

NATIONAL PARK SERVICE

POLICE PROTECTION OVER AGRICULTURAL PARK SERVICE

Order No. 2640, as amended (16 F. R. 5846, 11934; 17 F. R. 482, 964; 18 F. R. 2832, 6789; 19 F. R. 1327, 1937; 20 F. R. 657; 21 F. R. 3067), is further amended by the addition of a new section, numbered 39 and reading as follows:

SEC. 39. *Police protection over Agricultural Research Center.* (a) The Director, National Park Service, is authorized, subject to the provisions of paragraph (b) of this section, to provide protection, through the United States Park Police, over the Agricultural Research Center, bisected by the Baltimore-Washington Parkway, as requested by the Department of Agriculture in a letter dated November 4, 1955.

(b) The authority granted in paragraph (a) of this section shall be exercised in accordance with the act of March 17, 1948 (62 Stat. 81), authorizing policing of Federal reservations in the environs of the District of Columbia with the concurrence of the agency having jurisdiction or control over such a reservation, and in accordance with the applicable regulations promulgated by this Department for National Capital Parks as contained in Chapter 1, Part 3, of National Park Service regulations

published in Title 36 of the Code of Federal Regulations.

FRED A. SEATON,
*Secretary of the Interior.*

JUNE 21, 1956.

[F. R. Doc. 56-5104; Filed, June 27, 1956; 8:50 a. m.]

## DEPARTMENT OF COMMERCE

### Maritime Administration

LYKES BROS. STEAMSHIP CO., INC.

NOTICE OF APPLICATION

Notice is hereby given of the application of the Lykes Bros. Steamship Co., Inc., for written permission of the Maritime Administrator under section 805 (a) of the Merchant Marine Act, 1936, as amended, 46 U. S. C. 1223, to permit said Company to load on or about July 9, 1956, on one voyage, approximately 2,500 long tons of cement at Ponce, Puerto Rico for discharge at Port Everglades, or Miami, Florida.

Any person, firm, or corporation having any interest in such application and desiring a hearing on issues pertinent to section 805 (a) should within three (3) days from the date of publication of this notice in the FEDERAL REGISTER notify the Secretary, Maritime Administration, and file petition for leave to intervene in accordance with the rules of practice and procedure of the Maritime Administration.

If no request for hearing and petition for leave to intervene is received within the specified time, the application will be processed without a hearing.

By order of the Maritime Administrator.

Dated: June 26, 1956.

[SEAL] A. J. WILLIAMS,
*Secretary.*

## GENERAL SERVICES ADMINISTRATION

[Project 3-DC-01]

FEDERAL OFFICE BUILDINGS

PROSPECTUS FOR PROPOSED BUILDINGS IN SOUTHWEST REDEVELOPMENT AREA OF DISTRICT OF COLUMBIA

EDITORIAL NOTE: This prospectus of proposed Project Number 3-DC-01 is published pursuant to section 412 (f) of the Public Buildings Purchase Contract Act of 1954 as amended by Public Law 150, 84th Congress, which requires publication in the FEDERAL REGISTER, for a period of ten consecutive days from date of submission to the Committees on Public Works of the Senate and House of Representatives.

Project Number 3-DC-01 (Revised)

MARCH 14, 1956.

FORMAL PROSPECTUS FOR PROPOSED BUILDING UNDER TITLE I PUBLIC LAW 519, 83D CONGRESS, 2D SESSION

FEDERAL OFFICE BUILDING, WASHINGTON, D. C.

1. *Brief description of proposed building.* The project contemplates the erection of a group of three Federal Office Buildings on a site to be acquired by the Government facing on the proposed Tenth Street Mall in the southwest redevelopment area of Washington, D. C. Each building will be multistoried. An aggregate of approximately 643,000 square feet of net assignable space will be provided.

2. *Estimated maximum cost and financing.* a. Maximum cost of site and buildings, $25,250,000.

b. Proposed contract term, 30 years.

c. Maximum rate of interest on purchase contract, 4 percent.

3. *Certificates of need.* As the project is intended to provide relocation of numerous Federal agencies now in temporary buildings, no specific allocation of space can be made at this time. Upon completion of the facility, assignment and reassignment will be made in accordance with existing law. Therefore, requirement for Certificate of Need otherwise required by section 411 (e) of the Public Buildings Purchase Contract Act of 1954 was waived in Public Law 150, 84th Congress. Certification is hereby made as to the need for service and garage space.

4. *Non-availability of existing space.* Suitable space owned by the Government is not available; and suitable rental space is not available at a price commensurate with that to be afforded through the contract proposed.

5. *Estimated annual managerial, custodial, heat, and utility costs.* (Services to be supplied by Government), $675,000.

6. *Estimated annual tax liability, upkeep and maintenance.* a. Taxes, post construction (contract period), $321,625.

b. Upkeep and maintenance (to be provided by Government), $96,000.

7. *Current annual housing costs.* Rents and other housing costs currently paid by the Government for agencies to be housed in the building to be erected, $509,000 p. a.

*Determination of need.* It has been determined that (1) the needs for space for the permanent activities of the Federal Government in this particular area cannot be satisfied by utilization of any existing suitable property now owned by the Government, and (2) the best interests of the United States will be served by taking action hereunder.

Submitted at Washington, D. C., on June 1, 1956.

Approved:

FRANKLIN G. FLOETE,
*Administrator of General Services.*

8. *Statement of Director, Bureau of the Budget.* Reflected in letter (copy attached).

EXECUTIVE OFFICE OF THE PRESIDENT

BUREAU OF THE BUDGET

WASHINGTON 25, D. C.

JUNE 13, 1956.

Project 3-DC-01 (Revised 3-14-56).
3 Multi-storied Federal Office Buildings.
Southwest Redevelopment Area, Washington, D. C.

MY DEAR MR. FLOETE: Pursuant to section 411 (e) (8) of the Public Buildings Purchase Contract Act of 1954 (Public Law 519), the (Revised March 14, 1956) proposal for a group of three Federal Office Buildings, transmitted with your letter of June 1, 1956, has been examined and in my opinion "is necessary and in conformity with the policy of the President." This approval is given with the following understanding:

1. Revision reflects the application of more definite plans for integration of the facility with the proposed Tenth Street Mall developed subsequent to approval of the project last July. Effective integration requires construction of three building units in lieu of one, as originally proposed. Garage space of 134,250 square feet not contemplated in original project is provided. Number of employees, utilization of space and cost factors are relatively the same.

2. That the stated project cost of $25,250,000 (including $2,500,000 for a site to be acquired) is a maximum figure.

3. That the reported annual operating cost of existing Tempos 4, 5, and T; i. e., $1.00 per square foot, represents minimum maintenance in anticipation of demolition, and that temporary Government buildings actually cost more to maintain than the proposed new buildings.

4. That the proposed buildings will house approximately 10% of Federal employees presently housed in temporary buildings, and that the specific allocation of agencies in the proposed buildings is to be determined later by General Services Administration.

5. That every effort will be made to design and construct space conducive to maximum efficient utilization of both site and buildings and to take advantage of any revision of cost downward which may be found possible as the plans develop and negotiations are advanced.

6. That this approval supersedes Mr. Hughes' letter of July 22, 1955.

You appreciate, of course, that this project will receive a more detailed review as to cost and space utilization prior to the approval of the lease-purchase agreement.

Sincerely yours,

(Signed) PERCIVAL BRUNDAGE,
*Director.*

Hon. FRANKLIN G. FLOETE,
*Administrator,*
*General Services Administration,*
*Washington 25, D. C.*

[Docket No. 11743; FCC 56-572]

CONFEDERATE RADIO CO. (WPGA)

MEMORANDUM OPINION AND ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Confederate Radio Company (WPGA), West Point, Georgia, for modification of construction permit; Docket No. 11743, File No. BMP-7066.

1. The Commission has before it for consideration the above-captioned application by Confederate Radio Company for a modification of permit to change the antenna-transmitter-studio location of Station WPGA to 0.35 mile north of the city limits of West Point, Georgia, from Avenue B, West Point, Georgia, as authorized in construction permit BP-9883 for a new standard broadcast station to operate on 910 kilocycles with a power of 500 watts, daytime only, granted on October 19, 1955.[1]

2. WPGA is technically and otherwise qualified, except as may appear from the issues specified below, to operate its station as proposed but because of alleged misrepresentations and non-disclosures of material facts in its above-referenced application for construction permit; its application, File No. BMP-7014, for modification of permit, granted on November 15, 1955; and in affidavits to the Commission, dated January 27 and February 25, 1956, substantial questions of fact are raised as to whether WPGA is legally qualified to become a licensee and whether WPGA is financially qualified to construct and operate its proposed station. A brief history of the subject application follows: Section 309 (c) protests by the licensee of WRLD [2] to grants of the construction permit (October 19, 1955) and modification of permit to change type of transmitter (November 15, 1955) for WPGA were dismissed by the Commission in separate Memorandum Opinion and Orders.[3] In the latter, the Commission stated that it would direct a letter to WPGA to inquire into the allegations in the WRLD protests that WPGA made misrepresentations and non-disclosures in the above-referenced applications in order to make a showing that it was financially qualified to construct and operate the proposed station. Such a letter was directed to WPGA on January 13, 1956.

3. On January 9, 1956, WRLD filed a "Petition To Designate (subject) Application For Hearing" on substantially the same grounds of misrepresentations and lack of financial qualifications by WPGA as was alleged in the WRLD protests.[4]

4. In substance, it is alleged by WRLD in the above-described pleadings that WPGA made misrepresentations and non-disclosures in its application for construction permit to mislead the Commission into a finding that it was financially qualified to receive the grant and that, because of these misrepresentations and non-disclosures and others made in the WPGA application for modification of permit (BMP-7014) and letters dated January 27, February 25 and April 4, 1956, under oath, to the Commission, serious questions are raised as to the legal qualifications of WPGA to receive a grant of the subject application; and that WPGA was not, and is not, financially qualified to construct and operate the proposed station. Although WRLD alleges numerous misrepresentations by WPGA, the core of WRLD's contentions can be summarized as follows: That to construct and operate the station with its capital of $10,000, WPGA showed that it would (1) lease its land and building for $150 per month; (2) use a tower which it had on hand; and (3) use other equipment which it had on hand and which was valued at $7,000 and allegedly purchased from WRLD. However, WRLD claims that (1) the land was available only at a purchase price of $10,000, and, since there was no building on the land, a suitable structure would cost WPGA an additional $5,000; (2) the tower on hand was not usable for the frequency specified and an additional $3,000 would be required to provide a usable tower; and (3) that WRLD has sold no equipment to WPGA.

5. Specifically, WRLD alleges that WPGA, in its application for construction permit, misrepresented that it would lease land and buildings for its station for $150 per month, whereas the land was available only at a purchase price of $10,000 and there was no building on the land. WPGA stated, in its affidavit of January 27, 1956, that its three stockholders had planned to purchase the land for $10,000 as individuals, have a building constructed thereon for $3,500 and to lease the land and building to WPGA for $150 per month. In WRLD's pleading filed on February 15, 1956 it is stated that this is a further misrepresentation by

[1] WPGA has also requested a waiver of § 3.30 (a) of the Commission rules to identify the station as "West Point, Georgia", although the station is located outside the city limits. However, § 3.30 (a) provides, in pertinent part, that "each station shall maintain a studio * * * in the place where the station is located: *Provided*, That the main studio may be located at the transmitter site whether or not the transmitter site is in the place where the station is located." Since the WPGA studio would be located at the transmitter site, no waiver of § 3.30 (a) appears necessary.

[2] WRLD, Lanett, Alabama-West Point, Georgia, is licensed to Valley Broadcasting Company, Inc.

[3] WRLD's protest to the WPGA construction permit (File No. BP-9883) was tendered after 5 p. m. of the last day for filing. The Commission ordered that it was accepted for filing as of the following day (Order adopted November 23, 1955). In a Memorandum Opinion and Order adopted on December 21, 1955, the WRLD protest was dismissed as not timely filed. WRLD's petition for reconsideration of the Commission's Order of November 23, 1955, was denied in a Memorandum Opinion and Order adopted on January 4, 1956 in which the Commission also dismissed WRLD's protest to WPGA's modification of permit (File No. BMP-7014) on the ground that no injury resulted to WRLD from WPGA's changing type of transmitter. WRLD appealed the Commission's dismissals of its protests.

[4] WPGA, on January 23, 1956, filed a "Motion To Dismiss [WRLD petition]" on the grounds that WRLD had no standing to oppose the subject application and that WRLD's allegations would be answered by WPGA in its response to the Commission's letter of January 13, 1956, relative thereto. WPGA replied to the Commission's letter on January 27, 1956. In response to this reply, WRLD filed on February 15, 1956 a "Supplement To Petition To Designate For Hearing". A further reply was filed by WPGA on February 25, 1956. In a section 309 (b) letter dated March 8, 1956, WPGA was notified that its replies to the Commission's letter of January 13, 1956 did not appear to satisfactorily resolve the questions raised therein with respect to whether WPGA had made misrepresentations of material facts and that additional information was necessary to determine whether WPGA is financially qualified. WPGA replied to the 309 (b) letter on April 4, 1956 and also tendered an amendment to its original application, its application for modification of permit (BMP-7014) and the subject application. WRLD filed comments to this reply on April 30, 1956.

WPGA because the attorney for the land owners recited in a letter to WRLD on November 28, 1955 that negotiations for the land were by WPGA and not the stockholders as individuals; that the option to purchase the land was drawn by WPGA's attorney in favor of WPGA, and not the stockholders as individuals; and that a part of the security for the property was to be equipment belonging to WPGA and not to the stockholders as individuals. WRLD contends that if WPGA's explanation were to be accepted, a further misrepresentation was made by WPGA when it answered "no", under oath, to the question in paragraph 22 (g), page 5, section II of the application on whether there were any contracts or understandings relative to ownership of the facilities proposed; and that such an understanding by WPGA should also have been disclosed in response to paragraph 4, page 2, section II of the application which required a detailed statement from all persons who were to furnish anything of value to the station or who were to assist in any manner in financing the station. WPGA submitted an affidavit from its local attorney stating that two copies of the option agreement had been drawn, one in favor of WPGA and another in favor of the three stockholders as individuals, and that the copy in favor of WPGA had been submitted to the landowners. WRLD further contends that regardless of how many other proposed options had been drawn up by the attorney for WPGA, it was the copy drawn in favor of WPGA and submitted to attorneys for the land owners on which all parties were relying and on which negotiations proceeded. WRLD claims, further, that the negotiations were in fact between the land owners and WPGA, and not the three stockholders as individuals, inasmuch as part of the security for the property was to have been equipment owned by WPGA and not by the stockholders as individuals.

6. Moreover, WRLD alleges that although WPGA stated in its application for construction permit that its power was "on hand", the tower was not usable for the frequency specified and that an additional $3,000 would be required to get a usable tower. WPGA explained that the tower was usable for the frequency first specified, but after amending to a different frequency, it was undecided whether to add to the height of the tower "on hand" or buy another. However, it is noted that no additional expense for either plan was listed by WPGA.

7. WRLD further alleges that if WPGA has the equipment which it listed in its application as purchased from WRLD, it was obtained by WPGA without the knowledge of any responsible official of WRLD and that, certainly, no money was ever received by WRLD for such equipment. In an affidavit of February 25, 1956, Clement J. Murphy, Jr., President and 45% stockholder of WPGA, stated that while he was manager of WRLD he sold various items of "junk equipment" to Albert Stancel, who was then chief engineer at WRLD, for $240 and gave other items, "which had no sale value", to Mr. Stancel. In an affidavit of February 25, 1956 Albert Stancel, Secretary-treasurer and 35% stockholder of WPGA, stated that he repaired said equipment and later "sold Mr. Murphy a half interest in all the equipment * * * for the total price of $300." It is to be noted that WPGA issued stock to Mr. Murphy and Mr. Stancel in the amount of $7,000 on said equipment, and it is stated in the application that the value of the equipment is $7,000. WRLD submitted with its supplemental petition of February 15, 1956 affidavits by its secretary-auditor and by an independent certified public accountant that the corporate books of WRLD show no entry for money paid to it by Mr. Murphy for the equipment he claims to have sold Mr. Stancel. Also submitted was an affidavit by the president of WRLD that no authorized official of the company gave Mr. Murphy permission to sell the equipment in question. WRLD filed a detinue action in the Circuit Court of Chambers County, Alabama, for recovery of the equipment from Albert Stancel. Mr. Stancel requested that a jury hear the case, and judgment was rendered in favor of Mr. Stancel. However, WRLD has filed an appeal from this judgment on the ground, inter alia, that the verdict of the jury is not sustained by the great preponderance of evidence. No date to hear the appeal has been set by the Court. In an affidavit of April 28, 1956 by the president of WRLD it is stated that Mr. Stancel testified at the above trial that the equipment in question was junk and worthless when he got it and most of it still is. A copy of the transcript of the trial is submitted in support of the statement. In the affidavit, it is pointed out that, although Mr. Stancel claimed in his testimony that the equipment in question is junk and worthless, this is equipment with which WPGA proposes to operate its station; on which it placed a market value of $7,000 in its application for construction permit; and for which it issued $7,000 in stock to Mr. Murphy and Mr. Stancel.

8. WRLD further alleges that WPGA misrepresented in its affidavit dated April 4, 1956 to the Commission that $5,000 shown in Mr. Stancel's balance sheet was acquired from savings. WRLD points out that during the year 1955 Mr. Stancel borrowed $500 from WRLD after a showing to WRLD "that no funds were available to him from any other source and that he needed the sum of $500 under an arrangement whereby it was to be repaid to [WRLD] at the rate of $10 a week." Affidavits filed by WPGA on June 6, 1956 indicate that Mr. Stancel acquired his $5,000 from savings and that Mr. Murphy, Jr., acquired his $5,000 from sale of property given him by his mother.

9. In an affidavit of April 28, 1956 by J. C. Henderson, president of WRLD, it is stated that "the stockholders [of WPGA] have veiled their intentions by misrepresentations to the Commission * * * by repeated denials that they had any intention of operating a radio station, regardless of their application before the Commission, because they did not feel that the market area was sufficient to support two stations"; that, after the WPGA construction permit was granted, Mr. Murphy and Mr. Stancel made a proposal to Mr. Henderson "to 'buy out' WRLD and they would then forget about their own application before the Commission"; that Mr. Murphy and Mr. Stancel said, to do this, they could borrow $12,000 among the three stockholders; and that Mr. Stancel stated he had no cash in the bank and that Mr. Murphy and Mr. Mize would have to raise the money to buy WRLD.

10. In the Commission's section 309 (b) letter of March 8, 1956 WPGA was requested to justify its unusually low estimated cost of construction and yearly operating expenses for the type of station proposed, $10,784.40 and $22,400, respectively. In its reply of April 4, 1956, WPGA stated that "[WPGA] erred in reporting to the Commission only $10,784.40 as the approximate construction cost"; that "in its simplest form, the $10,784.40 was the additional cost to be incurred by [WPGA] in addition to what was expended and what was already owned by [WPGA]." With its reply of April 4, 1956 WPGA tendered an amendment to its original application (BP–9883), modification of permit (BMP–7014) and subject application, in which the cost of construction is estimated at $25,012.63. Also, in its reply of April 4, 1956 WPGA stated that its yearly operating expenses were estimated at only $22,400 because salaries of the employees (a staff of 8 were proposed in the application for construction permit) would be held to $10,320 yearly; that Mr. Murphy would manage the station for no weekly salary but receive a yearly bonus of 25 percent of the net profit of the station; that Mr. Stancel would serve as chief engineer for $40 per week; that Mr. Mize would serve as commercial manager for $25 per week plus 10 percent commission on all advertising he sold; that the program director would be paid $30 per week; that an engineer-announcer would be hired for $55 per week; and that a part-time copywriter would be hired for $20 per week. WRLD contends, in its comments submitted on April 30, 1956, that this proposal by WPGA is completely unrealistic; that a qualified engineer-announcer cannot be obtained for $55 a week because the "going rate" in the area for such personnel is $75 for a 40 hour week; that a qualified program director cannot be obtained for $30 per week; that there is no assurance that WPGA will show a profit on which Mr. Murphy would receive his compensation; that the plan whereby the working wives of the three stockholders would combine their salaries with what their husbands make from WPGA, and that Mr. Murphy would move in with his father-in-law, Mr. Mize, and receive his rent free, points out that WPGA is financially not capable of operating the station. Moreover, WRLD claims in its said letter that WPGA's estimated operating expenses do not take into consideration such items as: advertising (for promotion and "logs" in the newspaper); auto; dues; programming (packaged shows such as WPGA proposes); music, records, transcriptions; office supplies; technical supplies and maintenance; telephone and telegraph. WRLD estimates, from the operation of its own station, that these expenses would total approximately $971 a month for WPGA and leave WPGA with a net loss of $255.34 per month; and that WPGA does not have enough money to sustain such a monthly loss. WRLD points out that WPGA, in its reply of April 4, 1956, lists $9,035.80 as the total construction costs not paid, and cash on hand and in banks totalling $9,811.69, a balance of $775.89, which is insufficient to meet the WPGA payroll for the first month's operation of the station.

11. Further examination of the application by WPGA for construction permit, filed on May 23, 1955, reveals that in response to Table II, Section II, it is stated that Clement J. Murphy, Jr., was employed as General Manager of Station WRLD from August 1951 to April 1955, and that Albert L. Stancel, Jr. was employed as Chief Engineer of Station WRLD from July 1953 to April 1955; whereas in affidavits of February 25, 1956, to the Commission Mr. Murphy and Mr. Stancel state that the above employment continued at WRLD until November of 1955. Furthermore, in response to paragraph 19, section II of the WPGA application for construction permit, a negative answer was given to the question of whether any party to the applicant has, or had, a connection with a standard broadcast, FM, or television station, whereas both were then employed by WRLD.

12. WRLD alleges in its above-described petition that the Lanett, Alabama-West Point, Georgia market cannot support two radio stations because of the limited amount of advertising revenue available in the market. We have carefully considered this matter as raised in WRLD's petition. We do not, however, believe that a showing has been made therein that the public interest would not be served by the granting of an application for a construction permit for a second station in the market in question. The Communications Act contemplates the free entry into the radio broadcasting field by persons legally, technically, financially and otherwise qualified to construct and operate stations even where competition from such stations might have an adverse economic effect upon existing stations or other media of mass communications. See Federal Communications Commission v. Sanders Bros., 309 U. S. 470. Certainly, no persuasive showing has been made by WRLD that the competition between the two stations would result in both stations ceasing operation or deprivation of total programing service to the area. In re Voice of Cullman 6 RR 164.

13. We think it is clear from the foregoing that there are substantial questions of fact as to whether WPGA has made misrepresentations and nondisclosures in its above-described applications and letters filed with the Commission which questions have not been resolved by the aforementioned affidavits and letters.[6]

[6] Pursuant to section 309 (b) of the Communications Act of 1934, as amended, the subject applicant was advised by letter dated March 8, 1956, of these questions and that the Commission was unable to conclude that a grant of the subject application would be in the public interest. The applicant filed a timely reply on April 4, 1956. Comments on WPGA's said reply were filed by WRLD on April 30, 1956.

14. Accordingly, *It is ordered*, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-captioned WPGA application is designated for hearing, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine whether Confederate Radio Company misrepresented or failed to disclose to the Commission in its application for construction permit, File No. BP–9883; its application for modification of permit, File No. BMP–7014; and its letters of January 27, February 25, and April 4, 1956, material facts; including but not limited to such matters as its leasing of land and building at Avenue B, West Point, Georgia; its having on hand a tower which could be used on the frequency specified without incurring additional expense; its having on hand usable equipment purchased from Valley Broadcasting Company, Inc.; and the $5,000 listed in the balance sheet of Albert J. Stancel, Jr., as acquired from savings.

2. To determine whether, in light of the evidence adduced pursuant to the foregoing issue, the officers, directors, and stockholders of the Confederate Radio Company possess the necessary character and other qualifications to be the licensee of a standard broadcast station.

3. To determine whether the Confederate Radio Company is financially qualified to construct and operate its proposed station.

4. To determine whether, in light of the evidence adduced pursuant to the foregoing issues, a grant of the subject application would serve the public interest.

*It is further ordered*, That Valley Broadcasting Company, Inc., licensee of Station WRLD, Lanett, Alabama-West Point, Georgia, is made a party to the proceeding.

Adopted: June 20, 1956.

Released: June 25, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

[F. R. Doc. 56–5124; Filed, June 27, 1956; 8:54 a. m.]

[Docket No. 11744; FCC 56–575]

## W. WRIGHT ESCH ET AL.

### MEMORANDUM OPINION AND ORDER DESIGNATING APPLICATION FOR ORAL ARGUMENT

In the matter of W. Wright Esch, et al. (transferor), and WCOA, Inc. (transferee), Docket No. 11744, File No. BTC–2175; for transfer of control of Telrad, Inc., Permittee of Station WESH-TV, Daytona Beach, Florida.

1. The Commission has before it for consideration (a) a "Protest" filed on May 21, 1956, pursuant to section 309 (c) of the Communications Act of 1934, as amended, by Theodore Granik and William H. Cook, directed against the Commission's action of April 25, 1956 granting without hearing the above-entitled application; (b) an "Opposition to Protest" filed on May 31, 1956 by WCOA, Inc., and Telrad, Inc.; (c) a letter dated June 5, 1956, submitted by counsel for Granik and Cook, requesting that the Commission "stay the effectiveness of the transfer of control" and withdraw any authorizations issued to Telrad, Inc., while under the control of the transferee; and (d) a letter of opposition thereto, filed under date of June 7, 1956 by counsel for WCOA, Inc., and Telrad, Inc.

2. On July 8, 1954, the Commission issued a construction permit to Telrad, Inc., for a new television station to be located at Daytona Beach, Florida. The application for construction permit, as amended, indicated that W. Wright Esch owned two shares (40 percent) of the then five issued and outstanding shares of stock of Telrad, Inc., and had subscribed for 120 of the 495 authorized additional shares. Mr. Esch was also the licensee of Station WMFJ, Daytona Beach, Florida, and on June 29, 1955, the Commission granted an application (BAL–2029) for its consent to the assignment of the license of Station WMFJ from W. Wright Esch to WMFJ, Inc. Thereafter, Messrs. Granik and Cook filed a protest against said grant in which they alleged, in substance, that on October 20, 1954, they entered into a written agreement with Mr. Esch whereby they acquired an option to purchase Station WMFJ and to obtain the assignment to them of the station's license, but that Mr. Esch had breached the option agreement. By action of August 29, 1955, the Commission denied said protest on the ground that protestants were not parties in interest. However, an appeal was taken and the Commission's action was reversed, the Court holding that protestants had established standing to protest. Theodore Granik and William H. Cook v. Federal Communications Commission, Docket No. 12909, U. S. App. D. C., decided May 31, 1956.[1] The above-entitled application requests Commission consent to a transaction whereby WCOA, Inc., will acquire control of Telrad, Inc., through the issuance to WCOA, Inc., of 495 shares of Telrad stock. It was granted on April 25, 1956, and on May 2, 1956, the Commission was notified that the transfer of control authorized by its grant had been consummated on April 28, 1956. On May 29, 1956, the Commission issued a Special Temporary Authorization to Telrad, Inc., to operate Station WESH–TV temporarily on a commercial basis for the period ending June 30, 1956, said operation to be in accordance with the station's construction permit. The Commission was advised by letter of June 12, 1956 from the attorneys for the permittee that, pursuant to the said authorization, regular commercial program service was commenced on June 11, 1956.

[1] See footnote 4, *infra*.

3. In the instant protest, Messrs. Granik and Cook allege, in substance, that also under the above option agreement of October 20, 1954, W. Wright Esch agreed to cause Telrad, Inc., permittee of Station WESH–TV, to assign the construction permit for that station to Granik and Cook; that on December 15, 1954, Granik and Cook exercised said option; that Esch, however, attempted to abrogate the agreement although it contained no provision for unilateral abrogation; that by a letter to the Commission dated June 2, 1955, counsel for Esch denied the existence of a valid agreement between Esch and the protestants; that the protestants have instituted a pending lawsuit in the Florida Courts to protect their rights under the agreement; that the Supreme Court of Florida has affirmed an interlocutory decision of the trial court that Granik and Cook had stated a proper cause of action against Esch; that a grant of the above-entitled application will affect the protestants' interests and rights derived from the agreement; and that the protestants will suffer substantial and irreparable injury from a grant of the above-entitled application and are therefore parties in interest under section 309 (c) of the Communications Act. Moreover, the protestants charge that Esch intentionally and wilfully broke the agreement, disregarding his legal and moral obligations, and that Esch's actions therefore demonstrate that he is lacking in the character qualifications necessary to be a broadcast licensee.

4. The protestants assert further that in connection with the application for the construction permit for Station WESH–TV, Esch represented to the Commission that he was to be the majority stockholder of Telrad, Inc.; that after the construction permit was granted, Esch represented to Granik and Cook that he was the "principal stockholder" thereof; that the application for a construction permit contemplated that all the funds for the construction of Station WESH–TV would come from Esch; and that Esch did in fact assume control of Telrad, Inc. However, the protestants point out that the above-entitled application for transfer of control indicated that at the time of the Commission's grant, Esch owned only two shares (40 percent (out of a total of the five issued and outstanding shares of stock of Telrad, Inc.; and that on February 16, 1956, Esch surrendered his rights to subscribe for an additional 120 shares. The protestants contend that an unauthorized transfer of control of Telrad, Inc., thereby resulted in that control was no longer in Esch, but in three persons; namely, Adelaide B. Esch, Louis Ossinsky, Sr., and W. Wright Esch, and no prior consent of the Commission as required by section 310 (b) of the Communications Act of 1934, as amended, was requested or obtained. The protestants state that the surrender of the subscription rights and the transfer of control are being used in the Florida Court action to lend color to Esch's defense that he did not have authority to bind Telrad, Inc., on October 20, 1954; and that the surrender of subscription rights and transfer of control constitute fraudulent acts designed to circumvent the rights of the petitioners. The protestants request that the Commission postpone the effective date of its grant and designate the above-entitled application for hearing.

5. In their "Opposition to Protest" WCOA, Inc., and Telrad, Inc., allege, in substance, that on March 31, 1956, the Circuit Court of Volusia County, Florida, entered an order disallowing an application of Granik and Cook for a temporary injunction against the transfer of control of Telrad, Inc., to WCOA, Inc.; that the first among several reasons given by the Court for its action was that "the [October 20, 1954] document was not signed by Telrad, Inc., or a majority of its directors or stockholders"; that subsequently, the Supreme Court of Florida denied a motion by Granik and Cook for issuance of a Constitutional Stay Writ on appeal from the action of the Circuit Court disallowing the application for a temporary injunction; that the Commission's grant of the above-entitled application was purely permissive rather than mandatory or self-executing and the protestants can in no way be legally injured or hurt by an action of the Commission which is purely permissive and compels nothing; that because the document relied upon by the protestants shows on its face that Telrad, Inc., is not bound thereby, protestants have no standing to protest the issuance of the 495 shares of Telrad stock to WCOA, Inc.; that the protestants' claim rests upon an attempt to gain recognition by the Commission of their third-party rights to the WESH–TV construction permit, whereas section 310 (b) of the Communications Act provides that the "Commission may not consider whether the public interest, convenience or necessity might be served by the transfer, assignment or disposal of the permit or license to a person other than the proposed transferee or assignee"; and that in view of the foregoing, the protestants are not parties in interest under section 309 (c) of the Communications Act.

6. With respect to the alleged unauthorized transfer of control, the applicants point out that full information regarding Mr. Esch's ownership interest in Telrad, Inc., has been continuously on file with the Commission. Moreover, it is argued, the Esch subscription to Telrad stock was one in which the Board of Directors of the corporation was given the discretion and right to determine how much stock, if any, and when, the subscriber would be called upon to purchase; that such a subscription is a unilateral offer and is distinguishable from a subscription in which the subscriber and the corporation are by mutual promises bilaterally bound; that in any event, the status of a stockholder and a subscriber are not the same since the stockholder is entitled to all the rights pertaining to that status, whereas the subscriber is entitled to none, not even voting rights; and that without the authority to exercise voting rights, there could be no control of the corporation. Finally, the opposition attacks the propriety and pertinency of the issues, and requests that the grant remain in effect and that the request for a stay be denied.[2]

7. In the letter of June 5, 1956, counsel for Granik and Cook argue that by virtue of the decision of the Court of Appeals in the WMFJ case, protestants are parties in interest to the transfer of control of Telrad, Inc., and their protest is required to be granted; that no special circumstances are present in this case which would warrant refusal to stay the effectiveness of the Commission's grant of the transfer application; that this case is identical with the Camden case[3] in which the Commission stayed the effectiveness of a similar transfer; and that under the circumstances, the Commission must withdraw the Special Temporary Authorization which has been issued to Telrad, Inc.

8. In their opposing letter of June 7, 1956, counsel for WCOA, Inc., and Telrad, Inc., argue that the filing of the protestants' letter of June 5, 1956 was irregular and contrary to proper procedure in that it was filed after the expiration of the 30-day protest period provided for by statute and was, consequently, untimely if intended to raise a new question concerning the subject application or to supplement or enlarge the statement made in the protest; that the protest failed to state grounds for staying the effective date of the grant of the application and the letter of June 5, 1956 is intended to cure that deficiency; that this case is distinguishable from the WMFJ case; that the Camden case is not in point because it was controlled by the provisions of section 309 (c) of the Communications Act prior to its amendment on January 20, 1956, by Public Law 391, 84th Congress, 2d session; that WESH–TV provides an existing service; and that the protestants have not shown how anyone other than WCOA, Inc., could legally own Telrad, Inc., or be in a position to continue the present operation of the station.

[2] Attached to the Opposition is a copy of the Circuit Court's "Order Disallowing Injunction" and an affidavit of John H. Perry, Jr. In his affidavit Mr. Perry discusses the extent of Telrad's construction and alleges, in substance, that at the time of the transfer, the studio transmitter building was completed, that the base and anchor station for the tower had been installed and seasoned, and the steel for the tower was on hand; and that the balance of the equipment had been ordered from RCA but no shipment had been made. Since the transfer was consummated, Mr. Perry affirms, WCOA, Inc., or its affiliated companies have made loans to Telrad, Inc., totaling more than $34,000, of which amount $25,000 has been applied as a down payment on the equipment ordered from RCA; the RCA contract has been activated and all equipment has been delivered or is en route to the station; installation of all equipment was expected to be complete by June 1, 1956; progress has been made towards staffing of the station; a film contract involving $8,775 has been signed, with negotiations under way for additional film contracts; and negotiations are in progress for a network affiliation with NBC and for a possible affiliation with ABC. Mr. Perry states that since April 28, 1956, Telrad, Inc., has made expenditures of more than $13,700, exclusive of expenditures under the RCA contract, expenses of the company's officers and others in connection with the transfer, construction and legal matters, salaries of certain of the technical personnel working at the station, and substantial indebtedness incurred for which invoices have not been received.

[3] Presumably, reference is made to the case of Camden Radio, Inc., v. Federal Communications Commission, 220 F. 2d 191.

9. We have given careful consideration to the arguments of the applicants that the instant case, as compared with the WMFJ case, presents stronger circumstances for a finding that protestants are not parties in interest. We are of the opinion that the differences in the two factual situations are not such as to bring the instant case outside the holding of the Court of Appeals in the WMFJ case. There, Esch transferred the station itself. Here, there is being transferred control of the corporation which holds the construction permit. The following language of the Court of Appeals in the WMFJ case is equally applicable to the facts before us:

> We think Granik and Cook had standing to protest under section 309 (c) and to petition for reconsideration under section 405. By contract, they had secured an interest in Esch's ownership of the license. The proceedings on Esch's application to the Commission were calculated to lead to Commission action inconsistent with appellants' interests, which were known to the Commission • • •

In light of the above, we find that protestants are "parties in interest" within the meaning of section 309 (c) of the Act. Granik, et al., v. FCC, supra; [4] FCC v. Sanders, 309 U. S. 470. We find further that the protestants have specified with particularity the facts upon which they rely to show that the Commission's grant was not in the public interest. A question is thus presented as to the type of hearing which is required with respect to protestants' issues. In this connection, section 309 (c) of the Communications Act of 1934, as amended, states as follows:

> The Commission shall, within thirty days of the filing of the protest, render a decision making findings as to the sufficiency of the protest in meeting the above requirements; and, where it so finds, shall designate the application for hearing upon issues relating to all matters specified in the protest as grounds for setting aside the grant, except with respect to such matters as to which the Commission, after affording protestant an opportunity for oral argument, finds, for reasons set forth in the decision, that, even if the facts alleged were to be proven, no grounds for setting aside the grant are presented.

The instant protest contains allegations of fact, and conclusions drawn therefrom by the protestants. The facts alleged are, in substance, the same as facts which were alleged in pleadings and correspondence filed by the protestants prior to the Commission's grant of the above-entitled application. Upon consideration of these facts, the Commission then found that a grant of the application would be in the public interest. We have given further consideration to the facts alleged in the protest and upon such consideration, it appears that even if those facts were proven, no grounds would be presented for setting aside our grant. Therefore, we shall afford the parties an opportunity at oral argument to discuss the question of how those facts may bear upon the public interest in a grant. With respect to the litigation in the Florida Courts, it has been the general policy of the Commission not to deny applications because of the pendency of litigation involving private disputes, subject to the rights of the parties as subsequently determined by the state courts. As to the alleged unauthorized transfer of control, we pointed out in a letter to the protestants, dated April 25, 1956, that the Commission's records indicate that full information regarding Esch's ownership interest in Telrad, Inc., has been continuously on file with the Commission; that there is no evidence that Esch attempted to conceal from the Commission any pertinent facts concerning the ownership of the permittee corporation; that although Esch owned only 40% of the stock of the permittee and surrendered his rights to subscribe for a majority interest, all of the remaining shares of stock continued to be held by Esch's wife and attorney; and that, consequently, although a technical transfer of control may have taken place, there was not a violation of the Communications Act or the Commission's Rules sufficiently serious to warrant designating the application for hearing. These questions should be among those to which the parties should address themselves in the argument, as well as any others they deem relevant.

10. Protestants' Issue Number 5 reads as follows: "To determine all the matters and facts incident to the agreement of February 16, 1956 between W. Wright Esch and WCOA, Inc., for transfer of control of Telrad, Inc." No facts are alleged in the protest in support of the above issue. However, since we are designating the application for oral argument, we are including protestants' Issue Number 5 for the purpose of affording the parties an opportunity for argument as to its pertinency.

11. A final question is presented as to whether we should stay the effective date of our grant of the above-entitled application. In this connection, we believe it relevant to point out that the only television service available in Daytona Beach is that provided by Station WESH–TV. On April 25, 1956, the date of the grant of Commission consent, WESH–TV was not on the air. The Commission's records indicate that subsequent to the transfer of control to WCOA, Inc., Station WESH–TV has commenced operation. At the time of the grant of the transfer of control application, the Commission's records indicated that while the studio-transmitter building was complete and the tower foundations had been installed, the tower had not been erected and the transmitter and studio equipment had not been delivered to the station. It is apparent, therefore, that the installation of the necessary equipment to put the station on the air has taken place since WCOA, Inc., assumed control of the permittee. If we were to postpone the effective date of our grant of the transfer of control application, it is extremely doubtful whether the transferors would be in a position to continue operation of the station with facilities installed by the transferees.

12. In view of our finding that a stay of the effective date of our grant of the above-entitled application is not warranted, no basis exists for withdrawing the Special Temporary Authorization which has been issued to Telrad, Inc.

13. In view of the foregoing, *It is ordered*, That, pursuant to section 309 (c) of the Communications Act of 1934, as amended, the above-entitled application is designated for oral argument at the offices of the Commission in Washington, D. C., on the question whether, if the facts alleged in the protest were to be proven, grounds have been presented for setting aside the grant of said application.

14. *It is further ordered*, That the protestants and the Chief, Broadcast Bureau, are hereby made parties to the proceedings herein and that:

(1) The oral argument shall commence at 10:00 a. m. on the 16th day of July, 1956, and shall be held before the Commission en banc;

(2) The parties intending to participate in the oral argument shall file their appearances not later than July 9, 1956;

(3) The parties to the proceeding have until the date of oral argument to file briefs or memoranda of law.

15. *It is further ordered*, That protestants' request for withdrawal of the Special Temporary Authorization issued to Telrad, Inc., on May 29, 1956, is denied.

Adopted: June 20, 1956.

Released: June 25, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

[F. R. Doc. 56–5125; Filed, June 27, 1956; 8:54 a. m.]

[4] The time to seek certiorari in that case has not expired. We note therefore that our application of the decision here does not necessarily mean that further review by the Supreme Court of the Court of Appeals' decision will not be sought.

## FEDERAL POWER COMMISSION

[Docket No. E–6683]

LOWER COLORADO RIVER AUTHORITY

NOTICE OF DECLARATION OF INTENTION

JUNE 22, 1956.

Public notice is hereby given that lower Colorado River Authority (Declarant), of Austin, Texas, as agency and political sub-division of the state of Texas, filed on May 24, 1956, a declaration of intention pursuant to section 23 (b) of the Federal Power Act (16 U. S. C. 817) to construct two hydroelectric developments on the Lower Colorado River in Colorado County, Texas. The Columbus development proposed by declarant is to be located at river mile 139, four miles upstream from the City of Columbus, Texas, and would consist of a concrete gravity dam 700 feet long with a maximum height of 84 feet, comprising a gated spillway section, non-overflow sections, and a power intake section; two

earth dike abutment structures with a total length of 8,500 feet; a reservoir with total storage capacity of 130,400 acre feet and an area of 11,600 acres at pool elevation 216 feet; a canal about 12,250 feet long extending from the dam to a forebay; and a power house with two generating units each having a capacity of 20,000 KVA, operating at a head of 58 feet. The Altair development proposed by declarant is to be located at river mile 119, approximately 16 miles downstream from the City of Columbus, and would consist of a concrete gravity dam 630 feet long with a maximum height of 46 feet comprising a gated spillway section, non-overflow sections and an intake section; a reservoir with total storage capacity of 9,200 acre feet and an area of 940 acres; and a powerhouse with two generating units each having a capacity of 5,000 KVA, operating at a head of 16 feet. The Commission will investigate the proposed construction and determine whether a license under the Federal Power Act is required or whether the hydroelectric developments may be constructed merely upon compliance with State laws. Any communication from persons interested in this matter may be submitted on or before July 31, 1956, to the Federal Power Commission, Washington 25, D. C. The declaration of intention is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket No. G-10101, etc.]

MILLS BENNETT ESTATE ET AL.

NOTICE SETTING DATE OF HEARING

JUNE 22, 1956.

In the matters of Mills Bennett Estate, Docket No. G-10101; Edwin W. Pauley, Operator, Docket No. G-10109; Renwar Oil Corporation, et al., Docket No. G-10112; Roy H. Bettis and G. Frederick Shepherd d. b. a. Bettis and Shepherd, Docket No. G-10120; George R. Brown, Docket No. G-10124; Hidalgo Gas Production Corporation, Docket No. G-10132; Heep Oil Corporation, Docket No. G-10140; George W. Graham, et al., Docket No. G-10178; Arkansas Fuel Oil Corporation, Docket Nos. G-10186 through G-10190, inclusive; Forest Oil Corporation, Docket Nos. G-10225 and G-10226; L. A. Douglas, Operator, Docket No. G-10229; Sinclair Oil and Gas Corporation, Docket No. G-10269; Panhandle Oil Corporation, Docket No. G-10312.

Take notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on July 10, 1956, at 9:30 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the respective applications in the above-entitled matters: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Due notice of the applications filed herein has been published in the Federal Register on May 22, 1956 (21 F. R. 3397-98). No protests or petitions to intervene have been received.

[Docket Nos. G-3471, G-9275]

PHILLIPS PETROLEUM CO. AND PACIFIC NORTHWEST PIPELINE CORP.

NOTICE OF APPLICATIONS AND DATE OF HEARING

JUNE 22, 1956.

Take notice that Phillips Petroleum Company (Phillips), a Delaware corporation with principal place of business at Bartlesville, Oklahoma, filed, on September 27, 1954, as amended December 1, 1954, and as further amended August 30, 1955, an application for a certificate of public convenience and necessity, pursuant to section 7 (c) of the Natural Gas Act, authorizing Phillips to sell natural gas as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Concurrently with the aforesaid filing of August 30, Pacific Northwest Pipeline Corporation (Pacific Northwest), a Delaware corporation with principal place of business at 905-A M & M Building, Houston 2, Texas, filed, on August 30, 1955, an application for a certificate of public convenience and necessity, pursuant to section 7 (c) of the Natural Gas Act, authorizing Pacific Northwest to sell natural gas as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Phillips sells natural gas in interstate commerce from certain block-type units and spacing units in the San Juan Basin Area, San Juan and Rio Arriba Counties, New Mexico, to El Paso Natural Gas Company (El Paso) for resale subject to a contract between Phillips and Pacific Northwest dated January 9, 1953 providing for the assignment of said acreage together with operating rights therein to Pacific Northwest upon (a) Pacific Northwest obtaining a certificate of public convenience and necessity in Docket No. G-1429 for the construction and operation of a pipeline from San Juan Basin Area to the Pacific Northwest Area of the United States and (b) Pacific Northwest obtaining financing for this project. Phillips interests in this acreage was pledged to Pacific Northwest's project in Docket No. G-1429.

By Commission order of June 16, 1954, Opinion No. 271, Docket No. G-1429, Pacific was authorized to construct and operate the aforesaid pipeline. On May 4, 1955, Pacific acquired a substantial portion of the required financing and commitments for the balance.

In the last amendment to its application, viz., August 30, 1955, Phillips states that the transfer and assignment to Pacific Northwest of the aforesaid acreage, as described in Phillips' application and first amendment, was completed on May 5, 1956, as provided in the aforesaid contract of January 9, 1953.

Phillips, by letter dated August 26, 1955, transmitted for filing notices of cancellation of certain of its FPC Rate Schedules covering the aforesaid gas sales to El Paso. Subsequently, by letter dated October 13, 1955, these notices were accepted for filing by the Commission to be effective upon the date of termination authorization at Docket No. G-3471.

By letter dated October 13, 1955, the Commission authorized Pacific Northwest, pending the final disposition of its application as required by the record, to sell natural gas in interstate commerce to El Paso for resale as proposed in Docket No. G-9275 until commencement of operation of Pacific Northwest's interstate pipeline system authorized in Docket No. G-1429. This authorization covered, inter alia, the same sales heretofore made by Phillips to El Paso as hereinbefore described under the blanket authority of § 157.23 (a) of the Commission's regulations providing for service pending action by the Commission upon an application.

Pacific Northwest proposes to sell natural gas from certain block-type units and spacing units[1] in the San Juan Basin Area, San Juan and Rio Arriba Counties, New Mexico, under contracts dated July 15, 1955, and July 25, 1955, to El Paso for resale on a temporary basis pending completion of Pacific Northwest's interstate pipeline system as authorized in Docket No. G-1429.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on Monday, July 23, 1956, at 9:30 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before July 10, 1956. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 56-5108; Filed, June 27, 1956; 8:50 a. m.]

[1] Pacific Northwest's predecessors in interest in these properties were: (a) prior to May 4, 1955, Sinclair Oil and Gas Company, Colorado Oil and Gas Corporation and Skelly Oil Company; (b) prior to May 5, 1955, Phillips Petroleum Company; (c) prior to July 1, 1955, Stanolind Oil and Gas Company and (d) prior to November 3, 1954 in the Dena Riddle Well No. 1, Sinclair Oil and Gas Company and Colorado Oil and Gas Company.

---

[Docket No. G-10020]

PHILLIPS PETROLEUM CO.

NOTICE OF APPLICATION AND DATE OF HEARING

JUNE 22, 1956.

Take notice that Phillips Petroleum Company (Applicant), a Delaware corporation with principal place of business at Bartlesville, Oklahoma, filed, on February 29, 1956, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas in interstate commerce from production of its undivided 24.46 percent interest in the Erath Field Unit,[1] Erath Field, Vermilion Parish, Louisiana, to United Fuel Gas Company for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing will be held on Monday, July 23, 1956, at 9:30 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before July 10, 1956. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[Docket No. G-10213]

ALGONQUIN GAS TRANSMISSION CO.

NOTICE OF APPLICATION AND DATE OF HEARING

JUNE 22, 1956.

Take notice that Algonquin Gas Transmission Company (Applicant), a Delaware corporation with principal place of business at 25 Faneuil Hall Square, Boston 9, Massachusetts, filed, on April 9, 1956, an application for a certificate of public convenience and necessity, pursuant to section 7 (c) of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell and deliver, in addition to the presently authorized volume of 8,300 Mcf per day, an additional volume of natural gas (viz., 700 Mcf per day) in interstate commerce to Brockton Taunton Gas Company (Brockton) for resale for the purpose of meeting the increased natural gas requirements of Brockton.

The application states that no additional natural gas facilities will be required in order to enable Applicant to make the proposed additional sale and that prior to the deduction of the 700 Mcf required by the present application, Applicant at present has an unallocated sales capacity in the amount of 3,404 Mcf per day based upon the assumption that all of Applicant's customers request their maximum authorized quantities on the same day. Applicant will enter into a new service agreement with Brockton as of September 1, 1956 to supply Brockton up to a maximum daily quantity of 9,000 Mcf under Applicant's existing F-1 Rate Schedule on file with the Commission.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on Monday, July 23, 1956, at 9:30 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* that the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before July 10, 1956. Failure of any party to appear at and participate in the hearing shall be construed as waiver of a concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 56-5110; Filed, June 27, 1956; 8:51 a. m.]

---

[Docket Nos. G-1142, G-2210, G-9547]

UNITED GAS PIPE LINE CO.

ORDER CONSOLIDATING PROCEEDINGS FOR PURPOSE OF ORAL ARGUMENT AND FIXING DATE THEREOF

Tyler Gas Service Company (Tyler Gas), an intervener in the proceedings, on May 15, 1956, filed a motion for an order of the Commission "directing United Gas Pipe Line Company to refund to Tyler Gas Service Company all of the increased rates and charges made effective as of December 25, 1953 in Docket No. G-2210 not heretofore refunded pursuant to paragraph (D) of the ordering portion of Opinion and Order No. 277, issued November 2, 1954, with interest at the rate of 6 percent per annum from date of payment until refunded, and further directing United to bear all costs incident to the making of said refund."

After reciting the history and circumstances under which Tyler Gas has purchased and now purchases natural gas from United Gas Pipe Line Company (United), Tyler Gas alleges that United's increased rate filings in Docket No. G-2210 were unilaterally made in violation of United's existing contract with Tyler Gas, and that the rule of Federal Power Commission v. Mobile Gas Service Corporation, 350 U. S. 332, is applicable here. Tyler Gas states that under that rule United's increased rates are a nullity insofar as they purport to change the rates established in the contract between Tyler Gas and United.

It appears from the May 15, 1956, motion that Tyler Gas seeks to recover the difference between the rates payable to United under the applicable rate schedules for gas delivered to Tyler Gas for resale for other than industrial use only as set forth in United's conversion tariff filed in 1952 and which were effective on December 24, 1953, and the rates col-

lected by United under the applicable rates set forth in Rate Schedule DG–C of United's FPC Gas Tariff, First Revised Volume No. 1. The latter rates were filed pursuant to the order accompanying Opinion No. 277 in the proceedings in Docket Nos. G–1142 and G–2210. They were prescribed and filed in lieu of rates proposed by United in Docket No. G–2210, which became effective, under bond and subject to refund, on December 25, 1953. Tyler Gas seeks recovery for payments made by it for natural gas received from United in the period commencing December 25, 1953 and continuing through January 1956, which payments, as noted, were in excess of rates in effect on December 24, 1953. It appears that for gas received in February 1956 and thereafter Tyler Gas has tendered payment on the basis of its contract with United and has demanded refund, with interest at 6 percent per annum, of all amounts paid in excess of amounts said to be due under the contract. Tyler Gas states that United has returned such tenders, and has requested immediate payment on the basis of rate on file with the Commission; that is, those previously mentioned rates filed pursuant to the order accompanying Opinion No. 277, and on the basis of billings pursuant to rates proposed by United in Docket No. G–9547, in which proceeding United filed a motion on March 20, 1956, to make the rates effective.

United, on May 23, 1956, filed its answer to the May 15, 1956 motion of Tyler Gas. In support of its answer, United avers that the facts and circumstances underlying the sale of natural gas by United to Tyler Gas require the latter to pay the filed and legal rate. United states that the contract relied upon by Tyler Gas has been adjudicated to have been superseded and replaced by the conversion tariff and the applicable rate schedules contained therein and superseding schedules now on file with the Commission. It points to the decisions in Tyler Gas Service Company v. United Gas Pipe Line, C. A. No. 1622, United States District Court for the Eastern District of Texas, Tyler Division, decided December 29, 1953, and Tyler Gas Service Company v. United Gas Pipe Line Company, 217 F. 2d 73, wherein the United States Court of Appeals for the Fifth Circuit affirmed the District Court's judgment. It appears from the pleadings filed with the Commission that the litigation involved a suit brought by Tyler Gas and the City of Tyler, Texas, also an intervener in these proceedings before the Commission, to enjoin United from making effective the rates suspended in Docket No. G–2210. United contends that these judgments are final and such decisions are obligatory upon Tyler Gas and United.

Further, United avers that the Mobile decision does not assist Tyler Gas. United concludes with a request that the Commission sustain the answer of United; that the motion of Tyler Gas be in all things denied; that Tyler Gas be forthwith ordered and directed to pay the full amount of the billings of United in accordance with the filed rates until such time as such rates may be superseded and replaced by rates filed with the Commission as required and permitted by the Natural Gas Act.

Tyler Gas, in its May 15, 1956, motion also alludes to the fact that in its petition to intervene in Docket No. G–2210 it "challenged the legality of United's proposed rate increases on the ground that they were in violation of the obligations of United under contracts among it, Tyler Gas, and the City of Tyler, Texas."

As noted previously, the proceedings in Docket Nos. G–1142 and G–2210 resulted in the Commission's Opinion No. 277. By the order accompanying the aforesaid Opinion we provided that the rate investigation proceeding in Docket No. G–1142 remain open insofar as it related to the rates and charges of United applicable to Tyler Gas. Further, we provided in such order that the proceeding in Docket No. G–2210 remain open, because of the appeal of Tyler Gas then pending in the United States Court of Appeals for the Fifth Circuit, for a determination of the issues raised by the petitions to intervene of Tyler Gas and the City of Tyler, Texas.

On September 30, 1955, United filed other increased rate, including increased rates and charges applicable to the sales of gas to Tyler Gas. These increased rates and charges were suspended until April 1, 1956, by order of the Commission issued in Docket No. G–9547, except insofar as they related to the sale of gas for resale for industrial use only. Tyler Gas, on October 21, 1955, filed a motion for an order of the Commission rejecting United's increased rates in Docket No. G–9547 relating to sales of natural gas to Tyler Gas. In support of the motion, Tyler Gas again relies upon the Mobile case and upon the decision of the United States Supreme Court in Federal Power Commission v. Sierra Pacific Power Company, 350 U. S. 348.

United, on October 26, 1955, filed a motion to dismiss and answer to Tyler Gas' motion in Docket No. G–9547.

It appears abundantly clear from the various pleadings of Tyler Gas and United in the proceedings in Docket Nos. G–1142, G–2210, and G–9547 that the underlying facts and circumstances are largely without dispute. Tyler Gas and United differ only as to the legal significance to be placed upon such facts and circumstances. The pleadings referred to raise questions which are not completely resolved.

Moreover, inasmuch as the pleadings of Tyler Gas and United raise substantially the same question in each of these proceedings, it is appropriate that the matters involved and the issues presented by such pleadings be resolved at the same time.

The Commission finds: It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and for the proper administration thereof that oral argument be had concerning the matters involved and the issues presented by the May 15, 1956, motion of Tyler Gas and the answer of United in the proceedings in Docket Nos. G–1142 and G–2210, the petitions to intervene of Tyler Gas and the City of Tyler, Texas, in such proceedings, and by the October 21, 1955 motion of Tyler Gas and the answer of United in the proceeding in Docket No. G–9547; and that the proceeeding in Docket No. G–9547 be consolidated with the proceedings in Docket Nos. G–1142 and G–2210 solely for purpose of oral argument upon the pleadings described above.

The Commission orders:

(A) The proceeding in Docket No. G–9547 be and it is hereby consolidated with the proceedings in Docket Nos. G–1142 and G–2210 solely for the purpose of the oral argument provided for in Paragraph (B) hereof.

(B) Oral argument be had before the Commission on July 13, 1956, at 10:00 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning only the matters involved and the issues presented by the pleadings of Tyler Gas Service Company, City of Tyler, Texas, and United Gas Pipe Line Company in the proceedings in Docket Nos. G–1142, G–2210, and G–9547.

(C) Parties to the proceedings who intend to participate in the oral argument shall notify the Secretary of the Commission on or before July 3, 1956, of such intention and the time requested for presentation of their arguments.

Issued: June 22, 1956.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70–3315]

LOUISIANA POWER & LIGHT CO. AND LOUISIANA GAS SERVICE CORP.

ORDER AUTHORIZING THE PAYMENT OF LEGAL FEES AND EXPENSES

JUNE 22, 1956.

Louisiana Power & Light Company ("Louisiana Power"), a public utility subsidiary of Middle South Utilities, Inc. ("Middle South"), a registered holding company, and Louisiana Gas Service Corporation ("Louisiana Gas"), a subsidiary of Louisiana Power, have heretofore made a joint filing with this Commission under the Public Utility Holding Company Act of 1935 ("act") concerned in large part with the sale by Louisiana Power and the acquisition by Louisiana Gas of all the non-electric properties of Louisiana Power and thereafter the issuance and private sale by Louisiana Gas, to The Connecticut Mutual Life Insurance Company of Hartford, Connecticut ("Connecticut Mutual"), of up to $6,500,000 aggregate principal amount of first mortgage bonds.

On December 13, 1954, this Commission issued a Notice of Filing in respect of these and the related transactions embraced in said filing. Thereafter, during the period of notification provided for in said notice, Louisiana Public Service Commission ("Public Service Commission") filed a petition which, among other things, requested that a public hearing be held in respect of the proposals of Louisiana Power and Louisiana Gas. Additionally, Public Service Commission petitioned this Commission to reopen the record in a previous proceeding which had resulted in a directive of this Commission requiring Louisiana Power to divest itself of all nonelectric properties. On September 13, 1955, after the filing of an Offer of Proof and a brief in support thereof by Public Service Commission and answering briefs by the staff of the Division of Corporate Regulation and Jefferson Parish, Louisiana, both latter briefs being in opposition to the petition to reopen the previous record, and hearing oral argument in the matter, this Commission denied the request of Public Service Commission to reopen the record. Thereafter, Public Service Commission filed a petition for review of this Commission's order of September 13, 1955, in the United States Court of Appeals for the Fifth Circuit. That matter is still pending.

In connection with the proposed sale of mortgage bonds by Louisiana Gas, representatives of that company undertook to pay the fee of counsel for Connecticut Mutual, such counsel being Robinson, Robinson and Cole, Hartford, Connecticut. The contract between Louisiana Gas and Connecticut Mutual expired by its terms on August 15, 1955. Robinson, Robinson and Cole have submitted a bill for fees of $2,250.00 and expenses of $43.95, the total aggregating $2,293.95; representatives of Louisiana Gas have stated that they believe the fee is fair and reasonable under the circumstances and have urged that an appropriate order be adopted by this Commission permitting Louisiana Gas to pay such fees and expenses.

The Commission has considered the matter, including the statement from Robinson, Robinson & Cole in respect of its activities in this matter, the general complexity of the problems considered by the firm, and the time expended by members and associates of the firm in connection with the performance of these duties, and on the basis of all the factors considered in respect thereof the Commission finds that the proposed fees and expenses are not unreasonable;

*It is therefore ordered,* That the request of representatives of Louisiana Gas seeking authorization of this Commission for the payment of the above-described fees and expenses be, and hereby is, granted.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 812–1016]

CANADIAN INTERNATIONAL GROWTH FUND LTD.

NOTICE OF APPLICATION BY CANADIAN INVESTMENT COMPANY FOR ORDER PERMITTING ITS REGISTRATION AND SALE OF ITS SECURITIES IN UNITED STATES

JUNE 22, 1956.

Notice is hereby given that Canadian International Growth Fund Limited ("Applicant"), an investment company proposed to be chartered under The Companies Act of Canada, has filed an application under section 7 (d) of the Investment Company Act of 1940 (the "act") and Rule N–7D–1 thereunder, seeking an order of the Commission permitting Applicant to register as an investment company under the act and to make a public offering of its securities in the United States.

Section 7 (d) of the act prohibits a foreign investment company from selling its securities to the public through the mails or any means or instrumentalities of interstate commerce unless the Commission issues a conditional or unconditional order permitting such company to register under the act and to make a public offering of its securities in the United States. To issue such an order the Commission must find that, by reason of special circumstances or arrangements, it is both legally and practically feasible effectively to enforce the provisions of the act against such company and that the issuance of such order is otherwise consistent with the public interest and the protection of investors.

Applicant was organized on June 14, 1956, for the purpose of carrying on business as an investment company, concentrating its investments in securities of issuers whose interests are in Canada and other countries of the Free World outside the United States. Its authorized capital stock consists of 5,000,000 Common Shares of $1 par value and 100 Deferred Shares of $1 par value. Common Shares and Deferred Shares have the same rights except that Deferred Shares have no redemption rights. Applicant does not intend to issue its Deferred Shares. Applicant intends to make an initial public offering of its Common Shares to realize in excess of $1,000,000. Within sixty days following the date upon which $1,000,000 has been received by the Applicant for the issuance of its shares, the Common Shares will become redeemable pursuant to Applicant's letters Patent ("Charter") and Applicant proposes then to operate as a diversified open-end management investment company.

The application contains certain undertakings and agreements, all as specified in Rule N–7D–1, which together with the provisions of the Applicant's Charter and By-Laws, are proposed by the Applicant as "special circumstances and arrangements" justifying the entry of the requested order.

Applicant's Charter and By-Laws contain, in substance and effect, the substantive provisions of the act applicable to open-end investment companies, which provisions the Applicant has agreed may be enforced as a matter of contract right in the United States or Canada by Applicant's shareholders.

Applicant's By-Laws also contain, among other things, provisions summarized as follows: (1) That all of its securities and cash, other than cash in an amount necessary to meet Applicant's current administrative expenses, will be maintained in the sole custody of a bank in the United States; (2) that at least a majority of Applicant's directors and of its officers will be citizens of the United States of whom a majority will be residents of the United States; (3) that Applicant will retain an independent public accountant with a permanent office and place of business in the United States; (4) that Applicant's investment adviser will maintain its books and records relating to Applicant in the United States; and (5) that Applicant's principal underwriter will be a resident and citizen of the United States and a member of a securities association registered under the Securities Exchange Act of 1934.

Applicant has undertaken and agreed in its application, among other things, (i) that its Charter and By-Laws will not be amended in material respects without authorization of the Commission; (ii) that Applicant's present and future officers, directors, investment advisers, principal underwriters and custodian will enter into agreements to comply with the Act, Applicant's Charter, By-Laws, and the undertakings and agreements contained in the instant application; (iii) that Applicant's agreements shall inure to the benefit of Applicant's shareholders as parties and beneficiaries; (iv) that breach of the aforesaid agreements or violation of the Act by any of the contracting parties will permit revocation of the requested order and the liquidation and distribution of Applicant's assets; and (v) that the original or duplicate copy of its books and records will be maintained in the United States.

Other agreements and undertakings contained in the application are designed to facilitate the enforcement of the act by the Commission or Applicant's shareholders. To that end each of the contracting parties who are not citizens and residents of the United States will appoint, irrevocably, an agent within the United States for service of process. To ensure the applicability of the act to purchase and sales of portfolio securities not made on established securities exchanges, Applicant has agreed that its custodian will consummate such transactions only in the United States and that the mails or means of interstate commerce will be employed.

Notice is further given that any interested person may, not later than July 5, 1956, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing

thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

LABORATORY OF ELECTRONIC ENGINEERING, INC.

ORDER VACATING ORDER OF SUSPENSION

JUNE 22, 1956.

Laboratory of Electronic Engineering, Inc., a Maryland corporation, with principal offices located at 413 L Street NW., Washington, D. C., filed with the Commission on November 25, 1953, a Notification on Form 1-A and an Offering Circular, and subsequently filed amendments thereto, relating to a proposed offering of 17,523 shares of $10 par Class A common stock at par, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

The Commission on June 5, 1956 ordered, pursuant to Rule 223 (a) of the general rules and regulations under said act, that the conditional exemption under Regulation A be temporarily suspended on the grounds that said issuer had failed to file reports of sales on Form 2-A as required by Rule 224 of Regulation A and had ignored requests by the Commission's staff for such reports.

The issuer, having, subsequent to the action temporarily suspending the exemption under Regulation A, filed reports as required by Rule 224 and having amended the filing to reduce the offering by the amount of the unsold portion of securities under said filing; and

It appearing to the Commission that a hearing is not necessary or appropriate in the public interest or for the protection of investors and that the basis for said temporary order for suspension, as aforesaid, no longer exists;

*It is ordered*, Pursuant to Rule 223 (b) of the general rules and regulations under the Securities Act of 1933, as amended, that said temporary order for suspension be, and it hereby is, vacated.

*It is further ordered*, That this order shall be served upon Laboratory of Electronic Engineering, Inc., and Mr. Carl Mayfield, 23 Riggs Road NE., Washington, D. C., personally or by registered mail or by confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

## TITLE 3—THE PRESIDENT

### PROCLAMATION 3144

ENLARGING THE ROCKY MOUNTAIN NATIONAL PARK—COLORADO

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS the act of June 21, 1930, 46 Stat. 791 (16 U. S. C. 192b), authorizes the President of the United States, upon the recommendation of the Secretary of the Interior, to add to the Rocky Mountain National Park, in the State of Colorado, by Executive proclamation, certain lands described in such act; and

WHEREAS the Secretary of the Interior has recommended the addition to such park of certain lands described in such act; and

WHEREAS it appears to be in the public interest that such lands be included in the park for future preservation and administration as a part of the park:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, do proclaim that the lands hereinafter described are hereby added to the Rocky Mountain National Park, in the State of Colorado, and shall, upon acquisition of title thereto by the United States, become subject to the provisions of the act entitled "An Act to establish a National Park Service, and for other purposes," approved August 25, 1916, 39 Stat. 535 (16 U. S. C. 1–3), and all acts supplementary thereto and amendatory thereof, and all other laws and rules and regulations applicable to such park:

SIXTH PRINCIPAL MERIDIAN

T. 5 N., R. 73 W.,
Sec. 33, S½NE¼, SE¼SE¼, and N½SE¼;
Sec. 34, N½SW¼NE¼, N½SE¼NW¼, SW¼NW¼, and NW¼SW¼.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this 27th day of June in the year of our Lord nineteen hundred and fifty-six, and of the Independence of the United States of America the one hundred and eightieth.

[SEAL]

DWIGHT D. EISENHOWER

By the President:

JOHN FOSTER DULLES,
*Secretary of State.*

[F. R. Doc. 56-5233; Filed, June 28, 1956; 10:10 a. m.]

## TITLE 5—ADMINISTRATIVE PERSONNEL

### Chapter III—Foreign and Territorial Compensation

[Departmental Reg. 108.291]

PART 325—ADDITIONAL COMPENSATION IN FOREIGN AREAS

DESIGNATION OF DIFFERENTIAL POSTS

Section 325.11 *Designation of differential posts* is amended as follows, effective on the dates indicated:

1. Effective as of the beginning of the first pay period following June 30, 1956, paragraph (b) is amended by the deletion of the following post:

Ascension Island.

2. Effective as of the beginning of the first pay period following April 7, 1956, paragraph (d) is amended by the deletion of the following:

Libya, all posts except Barce, Cirene, Derna, El Aweila, Garian, Homs, Misurata, Tripoli, Wheelus Field, Zavia, Zliten and Zuara.

3. Effective as of the beginning of the first pay period following June 30, 1956, paragraph (d) is amended by the deletion of the following post:

Vieux Fort, St. Lucia, B. W. I.

4. Effective as of the beginning of the first pay period following March 24, 1956, paragraph (a) is amended by the addition of the following post:

Keren, Eritrea, Ethiopia.

5. Effective as of the beginning of the first pay period following June 30, 1956,

## TITLE 6—AGRICULTURAL CREDIT

### Chapter III—Farmers Home Administration, Department of Agriculture

**Subchapter B—Farm Ownership Loans**

[FHA Instruction 401.2]

PART 311—BASIC REGULATIONS

SUBPART B—LOAN LIMITATIONS

AVERAGE VALUES OF FARMS; TENNESSEE

On June 18, 1956, for the purposes of title I of the Bankhead-Jones Farm Tenant Act, as amended, average values of efficient family-type farm-management units for the counties identified below were determined to be as herein set forth. The average values heretofore established for said counties, which appear in the tabulations of average values under § 311.29, Chapter III, Title 6 of the Code of Federal Regulations, are hereby superseded by the average values set forth below for said counties.

TENNESSEE

| County | Average value | County | Average value |
|---|---|---|---|
| Anderson | $20,000 | Jefferson | $23,000 |
| Bedford | 20,000 | Johnson | 19,000 |
| Benton | 16,000 | Knox | 25,000 |
| Bledsoe | 18,000 | Lake | 30,000 |
| Blount | 23,000 | Lauderdale | 25,000 |
| Bradley | 19,000 | Lawrence | 19,000 |
| Campbell | 18,000 | Lewis | 16,000 |
| Cannon | 20,000 | Lincoln | 21,000 |
| Carroll | 20,000 | Loudon | 20,000 |
| Carter | 20,000 | McMinn | 19,000 |
| Cheatham | 20,000 | McNairy | 18,000 |
| Chester | 18,000 | Macon | 16,000 |
| Claiborne | 18,000 | Madison | 20,000 |
| Clay | 18,000 | Marion | 19,000 |
| Cocke | 20,000 | Marshall | 20,000 |
| Coffee | 18,000 | Maury | 23,000 |
| Crockett | 22,000 | Meigs | 18,000 |
| Cumberland | 18,000 | Monroe | 19,000 |
| Davidson | 25,000 | Montgomery | 20,000 |
| Decatur | 20,000 | Moore | 19,000 |
| De Kalb | 20,000 | Morgan | 20,000 |
| Dickson | 18,000 | Obion | 24,000 |
| Dyer | 25,000 | Overton | 18,000 |
| Fayette | 20,000 | Perry | 16,000 |
| Fentress | 18,000 | Pickett | 18,000 |
| Franklin | 20,000 | Polk | 19,000 |
| Gibson | 22,000 | Putnam | 19,000 |
| Giles | 22,000 | Rhea | 18,000 |
| Grainger | 19,000 | Roane | 19,000 |

### Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

**Subchapter B—Loans, Purchases, and Other Operations**

[1956 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Barley]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1956-CROP BARLEY LOAN AND PURCHASE AGREEMENT PROGRAM

SUPPORT RATES

The 1956 C. C. C. Grain Price Support Bulletin 1, (21 F. R. 3997), issued by Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1956 was supplemented by 1956 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Barley, (21 F. R. 4004), containing specific requirements applicable to price support operations on the 1956 barley crop. These regulations are further supplemented by the addition of paragraph (d) to § 421.1683 as follows:

(d) *Support rates.* Basic support rates for barley placed under loan and for barley delivered under purchase agreement are set forth in this paragraph.

(1) *Basic support rates at designated terminal markets.* Basic support rates per bushel for barley of the Classes Barley, and Western Barley grading No. 2 or better, and stored in approved warehouses at the terminal markets listed below are as follows:

| Terminal market: | Rate per bushel |
|---|---|
| Albany, N. Y. | $1.34 |
| Astoria, Oreg. | 1.27 |
| Baltimore, Md. | 1.34 |
| Chicago, Ill. | 1.25 |
| Duluth, Minn. | 1.24 |
| Galveston, Tex. | 1.31 |
| Houston, Tex. | 1.31 |
| Kansas City, Mo. | 1.23 |
| Longview, Wash. | 1.27 |
| Los Angeles, Calif. | 1.27 |
| Memphis, Tenn. | 1.25 |
| Milwaukee, Wis. | 1.25 |
| Minneapolis, Minn. | 1.24 |
| New Orleans, La. | 1.31 |
| New York, N. Y. | 1.34 |
| Norfolk, Va. | 1.34 |
| Oakland, Calif. | 1.27 |

| Terminal market—Continued | Rate per bushel |
|---|---|
| Omaha, Nebr | $1.23 |
| Philadelphia, Pa | 1.34 |
| Portland, Oreg | 1.27 |
| Saint Joseph, Mo | 1.23 |
| Saint Louis, Mo | 1.25 |
| San Francisco, Calif | 1.27 |
| Seattle, Wash | 1.27 |
| Sioux City, Iowa | 1.23 |
| Stockton, Calif | 1.27 |
| Superior, Wis | 1.24 |
| Tacoma, Wash | 1.27 |
| Vancouver, Wash | 1.27 |

(2) *Basic county support rates.* (i) The following basic county support rates per bushel are established for barley of the Classes Barley, and Western Barley grading No. 2 or better. Farm-storage loans and county warehouse-storage loans, except as otherwise provided in paragraph (b) of this section, will be based on the support rate established for the county in which the barley is stored:

(ii) If two or more approved warehouses are located at the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(iii) Where the State Committee determines that State or district weed control laws affect the barley crop, the support rate will be 10 cents below the applicable county support rate set forth in the schedule in this subparagraph. If, upon delivery of the barley to CCC, the producer supplies a certificate indicating that the barley complies with the weed control laws, the producer will be

credited with the amount of the differential in determining the settlement value.

(3) *Discounts.* The discount for barley which grades No. 3 shall be 3 cents per bushel, and for No. 4, 6 cents per bushel. The support rates for barley of the class "Mixed Barley" shall be 2 cents per bushel less than the support rates for barley of the Classes Barley, and Western Barley. In addition to any other applicable discounts, a discount of 10 cents per bushel shall be applied to barley grading "Garlicky."

(Sec. 4, 62 Stat. 1070 as amended; 15 U. S. C. 714b. Interprets or applies sec. 5, 62 Stat. 1072; sec. 401, 63 Stat. 1054; sec. 308, 70 Stat. 206; 15 U. S. C. 714; 7 U. S. C. 1421)

Issued this 25th day of June 1956.

[SEAL] WALTER C. BERGER,
*Acting Executive Vice President,*
*Commodity Credit Corporation.*

[F R. Doc. 56-5160; Filed, June 28, 1956; 8: 50 a. m.]

[1956 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Grain Sorghums]

## PART 421—GRAINS AND RELATED COMMODITIES

### SUBPART—1956-CROP GRAIN SORGHUMS LOAN AND PURCHASE AGREEMENT PROGRAM

#### SUPPORT RATES

The 1956 C. C. C. Grain Price Support Bulletin 1 (21 F. R. 3997), issued by Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1956 was supplemented by 1956 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Grain Sorghums (21 F. R. 4248), containing specific requirements applicable to price support operations on the 1956 grain sorghum crop. These regulations are further supplemented by the addition of paragraph (d) to § 421.1833 as follows:

(d) *Support rates.* Basic support rates for grain sorghums placed under loan or delivered under a purchase agreement will be as set forth in this section.

(1) *Basic support rates at designated terminal markets.* Basic support rates per 100 pounds for grain sorghums of the Classes I to IV inclusive, grading No. 2 or better, and containing not in excess of 13 percent moisture, stored in approved warehouses at the terminal markets listed below are as follows:

| Terminal market: | Rate per hundredweight |
|---|---|
| Omaha, Nebr | $2.34 |
| Sioux City, Iowa | 2.34 |
| Kansas City, Mo | 2.42 |
| Saint Joseph, Mo | 2.42 |
| Corpus Christi, Tex | 2.50 |
| Galveston, Tex | 2.50 |
| Houston, Tex | 2.50 |
| New Orleans, La | 2.50 |
| Port Arthur, Tex | 2.50 |
| St. Louis, Mo | 2.57 |
| Memphis, Tenn | 2.57 |
| Los Angeles, Calif | 2.84 |
| San Francisco, Calif | 2.84 |

(2) *Basic county support rates.* (i) The following basic county support rates are established per 100 pounds of grain sorghums of the Classes I to IV, inclusive, grading No. 2 or better and containing not in excess of 13 percent moisture. Both farm-storage and country warehouse-storage loans, except as otherwise provided in paragraph (b) of this section will be based on the support rate established for the county in which the grain sorghums are stored.

(ii) If two or more warehouses are located in the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(iii) Where the State committee determines that State or district weed control laws affect the grain sorghums crop, the support rate will be 15 cents per hundredweight below the applicable county support rate set forth in the schedule in this subparagraph. If, upon delivery of the grain sorghums to CCC, the producer supplies a certificate indicating that the grain sorghums comply with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(3) *Discounts.* (i) The discount for grain sorghums which grade No. 3 and contain not in excess of 13 percent moisture shall be 8 cents per 100 pounds; and for grain sorghums which grade No. 4 and contain not in excess of 13 percent moisture, 16 cents per 100 pounds.

(ii) Grain sorghums which grade "Smutty" shall be discounted 5 cents per 100 pounds.

(iii) Grain sorghums which grade "Discolored" shall be discounted 7 cents per 100 pounds.

(iv) The support rates for mixed grain sorghums (Class V) shall be 3 cents per 100 pounds less than the support rates for grain sorghums of the classes I to IV inclusive.

(v) The discounts in this subparagraph shall be cumulative.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interprets or applies sec. 5, 62 Stat. 1072; secs. 301, 401, 63 Stat. 1053, 1054, as amended, sec. 308, 70 Stat. 206; 15 U. S. C. 714c, 7 U. S. C. 1447, 1421)

Issued this 25th day of June 1956.

[SEAL] WALTER C. BERGER,
*Acting Executive Vice President,*
*Commodity Credit Corporation.*

[F. R. Doc. 56-5154; Filed, June 28, 1956; 8:49 a. m.]

[1956 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Oats]

## PART 421—GRAINS AND RELATED COMMODITIES

### SUBPART—1956-CROP OATS LOAN AND PURCHASE AGREEMENT PROGRAM

#### BASIC COUNTY SUPPORT RATES

The 1956 C. C. C. Grain Price Support Bulletin 1, (21 F. R. 3997), issued by Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1956 was supplemented by 1955 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Oats (21 F. R. 4007), containing specific requirements applicable to price support operations on the 1956 oats crop. These regulations are further supplemented by the addition of paragraph (c) to § 421.1883 *Determination of support rates,* as follows:

(c) Basic county support rates. (1) Basic county support rates for oats placed under loan and for oats delivered under purchase agreement are set forth in this paragraph. Farm-storage and warehouse-storage loans, and purchases of oats under purchase agreements, will be made at the support rate established for the county in which the oats are produced.

(2) Basic county support rates for oats grading No. 3 or better, are set forth below:

[1956 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Rye]

## PART 421—GRAINS AND RELATED COMMODITIES

### SUBPART—1956-CROP RYE LOAN AND PURCHASE AGREEMENT PROGRAM

### SUPPORT RATES

The 1956 C. C. C. Grain Price Support Bulletin 1, (21 F. R. 3997), issued by Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1956 was supplemented by 1956 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Rye, (21 F. R. 4040), containing specific requirements applicable to price support operations on the 1956 rye crop. These regulations are further supplemented by the addition of paragraph (d) to § 421.1983 *Determination of support rates*, as follows:

(d) *Support rates.* Basic support rates for rye placed under loan or delivered under purchase agreements will be as set forth in this paragraph.

(1) *Basic support rates as designated terminal markets.* Basic support rates per bushel for rye grading No. 2 or better, or grading No. 3 on the basis of test weight only, but otherwise grading No. 2 or better, stored in approved warehouses at the terminal markets listed below are as follows:

| Terminal market: | Rate per bushel |
|---|---|
| Omaha, Nebr | $1.48 |
| Sioux City, Iowa | 1.48 |
| Duluth, Minn | 1.50 |
| Minneapolis, Minn | 1.50 |
| Superior, Wis | 1.50 |
| Kansas City, Mo | 1.51 |
| St. Joseph, Mo | 1.51 |
| Chicago, Ill | 1.55 |
| Milwaukee, Wis | 1.50 |
| Memphis, Tenn | 1.56 |
| St. Louis, Mo | 1.56 |
| Galveston, Tex | 1.59 |
| Houston, Tex | 1.59 |
| Astoria, Oreg | 1.51 |
| Longview, Wash | 1.51 |
| Terminal market—Continued | |
| Los Angeles, Calif | 1.61 |
| Portland, Oreg | 1.61 |
| San Francisco, Calif | 1.61 |
| Seattle, Wash | 1.61 |
| Tacoma, Wash | 1.61 |
| Vancouver, Wash | 1.61 |
| Albany, N. Y | 1.70 |
| Baltimore, Md | 1.70 |
| New York, N. Y | 1.70 |
| Norfolk, Va | 1.70 |
| Philadelphia, Pa | 1.70 |

(2) *Basic county support rates.* (i) The following basic county support rates per bushel are established for rye grading No. 2 or better, or rye grading No. 3 on the factor of test weight only, but otherwise grading No. 2 or better. Both farm-storage and country warehouse-storage loans, except as otherwise provided in paragraph (b) of this section will be made at the support rate established for the county in which the rye is stored.

(ii) If two or more approved warehouses are located at the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(iii) Where the State Committee determines that State or district weed control laws affect the rye crop, the support rate will be 10 cents below the applicable county support rate set forth in the schedule in this subparagraph. If, upon delivery of the rye to CCC the producer supplies a certificate indicating that the rye complies with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(3) *Discount for ergot.* Rye containing more than 3/10 of 1 percent, but not more than 1 percent ergot, shall be discounted 1 cent per bushel for each 1/10 of 1 percent in excess of 3/10 of 1 percent ergot.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, sec. 401, 63 Stat. 1054; sec. 308, 70 Stat. 206; 15 U. S. C. 714c, 7 U. S. C. 1421)

Issued this 26th day of June 1956.

[SEAL] EARL M. HUGHES,
*Executive Vice President,*
*Commodity Credit Corporation.*

[F. R. Doc. 56-5173; Filed, June 28, 1956; 8:53 a. m.]

## TITLE 7—AGRICULTURE

### Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

### PART 717—HOLDING OF REFERENDA ON MARKETING QUOTAS

#### MISCELLANEOUS AMENDMENTS

*Basis and purpose.* The amendments contained herein are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, for the purpose of clarification of the regulations governing the holding of referenda on marketing quotas contained in §§ 717.1 to 717.14, each inclusive, issued June 5, 1956 and published June 9, 1956 (21 F. R. 3960). In order that these amendments may become effective on the same date as the regulations and because a referendum for marketing quotas for wheat is scheduled to be held July 20, 1956, it is essential that these amendments be made effective on July 9, 1956. Accordingly, it is hereby determined and found that compliance with the notice and public procedure thereon and the 30-day effective date requirements of section 4 of the Administrative Procedure Act is impracticable, unnecessary and contrary to the public interest and the amendments

[1956 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Rye]

## PART 421—GRAINS AND RELATED COMMODITIES

### SUBPART—1956-CROP RYE LOAN AND PURCHASE AGREEMENT PROGRAM

### SUPPORT RATES

The 1956 C. C. C. Grain Price Support Bulletin 1, (21 F. R. 3997), issued by Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1956 was supplemented by 1956 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Rye, (21 F. R. 4040), containing specific requirements applicable to price support operations on the 1956 rye crop. These regulations are further supplemented by the addition of paragraph (d) to § 421.1983 *Determination of support rates*, as follows:

(d) *Support rates.* Basic support rates for rye placed under loan or delivered under purchase agreements will be as set forth in this paragraph.

(1) *Basic support rates as designated terminal markets.* Basic support rates per bushel for rye grading No. 2 or better, or grading No. 3 on the basis of test weight only, but otherwise grading No. 2 or better, stored in approved warehouses at the terminal markets listed below are as follows:

| Terminal market: | Rate per bushel |
|---|---|
| Omaha, Nebr. | $1.48 |
| Sioux City, Iowa | 1.48 |
| Duluth, Minn. | 1.50 |
| Minneapolis, Minn. | 1.50 |
| Superior, Wis. | 1.50 |
| Kansas City, Mo. | 1.51 |
| St. Joseph, Mo. | 1.51 |
| Chicago, Ill. | 1.55 |
| Milwaukee, Wis. | 1.50 |
| Memphis, Tenn. | 1.56 |
| St. Louis, Mo. | 1.56 |
| Galveston, Tex. | 1.59 |
| Houston, Tex. | 1.59 |
| Astoria, Oreg. | 1.61 |
| Longview, Wash. | 1.61 |

| Terminal market—Continued | Rate per bushel |
|---|---|
| Los Angeles, Calif. | $1.61 |
| Portland, Oreg. | 1.61 |
| San Francisco, Calif. | 1.61 |
| Seattle, Wash. | 1.61 |
| Tacoma, Wash. | 1.61 |
| Vancouver, Wash. | 1.61 |
| Albany, N. Y. | 1.70 |
| Baltimore, Md. | 1.70 |
| New York, N. Y. | 1.70 |
| Norfolk, Va. | 1.70 |
| Philadelphia, Pa. | 1.70 |

(2) *Basic county support rates.* (i) The following basic county support rates per bushel are established for rye grading No. 2 or better, or rye grading No. 3 on the factor of test weight only, but otherwise grading No. 2 or better. Both farm-storage and country warehouse-storage loans, except as otherwise provided in paragraph (b) of this section will be made at the support rate established for the county in which the rye is stored.

(ii) If two or more approved warehouses are located at the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(iii) Where the State Committee determines that State or district weed control laws affect the rye crop, the support rate will be 10 cents below the applicable county support rate set forth in the schedule in this subparagraph. If, upon delivery of the rye to CCC the producer supplies a certificate indicating that the rye complies with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(3) *Discount for ergot.* Rye containing more than 3/10 of 1 percent, but not more than 1 percent ergot, shall be discounted 1 cent per bushel for each 1/10 of 1 percent in excess of 3/10 of 1 percent ergot.

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, sec. 401, 63 Stat. 1054; sec. 308, 70 Stat. 206; 15 U. S. C. 714c, 7 U. S. C. 1421)

Issued this 26th day of June 1956.

[SEAL] EARL M. HUGHES,
*Executive Vice President,*
*Commodity Credit Corporation.*

[F. R. Doc. 56-5173; Filed, June 28, 1956; 8:53 a. m.]

## TITLE 7—AGRICULTURE

### Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

### PART 717—HOLDING OF REFERENDA ON MARKETING QUOTAS

#### MISCELLANEOUS AMENDMENTS

*Basis and purpose.* The amendments contained herein are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, for the purpose of clarification of the regulations governing the holding of referenda on marketing quotas contained in §§ 717.1 to 717.14, each inclusive, issued June 5, 1956 and published June 9, 1956 (21 F. R. 3960). In order that these amendments may become effective on the same date as the regulations and because a referendum for marketing quotas for wheat is scheduled to be held July 20, 1956, it is essential that these amendments be made effective on July 9, 1956. Accordingly, it is hereby determined and found that compliance with the notice and public procedure thereon and the 30-day effective date requirements of section 4 of the Administrative Procedure Act is impracticable, unnecessary and contrary to the public interest and the amendments

contained herein shall be effective on July 9, 1956.

The regulations governing the holding of referenda on marketing quotas (21 F. R. 3960) are amended as follows:

1. Section 717.1 is amended by adding at the end thereof the following additional paragraphs:

(j) *Upland Cotton.* Any cotton other than extra long staple cotton.

(k) *Extra Long Staple Cotton.* American-Egyptian, Sea Island and Sea-land cotton and all other varieties of the Barbadense species and any hybrid thereof, and any other cotton in which one or more of these varieties predominates.

(l) *Tobacco.* Each one of the kinds of tobacco listed below comprising the types specified as classified in Service and Regulatory Announcement Numbered 118 of the Bureau of Agricultural Economics of the Department:

Flue-cured tobacco, comprising types 11, 12, 13, and 14;
Fire-cured tobacco, comprising types 21, 22, 23, and 24;
Dark air-cured tobacco, comprising types 35 and 36;
Virginia sun-cured tobacco, comprising type 37;
Burley tobacco, comprising type 31;
Maryland tobacco, comprising type 32;
Cigar-filler and cigar-binder tobacco, comprising types 42, 43, 44, 45, 46, 51, 52, 53, 54, and 55;
Cigar-filler tobacco, comprising type 41.

2. Section 717.3 (b) (1) is amended by adding at the end thereof the following: "In addition if a person engages in the production of a commodity as guardian, administrator, executor, or trustee in such a manner as to qualify as a voter, as for example, as a landlord of a share tenant, he will be eligible to vote in the capacity of guardian, administrator, executor, or trustee. In such cases the persons for whom he is acting in a fiduciary capacity will not be eligible to vote. An individual may if otherwise eligible cast a ballot in his individual capacity although he may also cast a ballot as a guardian, administrator, executor, or trustee. An individual who holds more than one fiduciary position may vote as a fiduciary in each case in which he is otherwise eligible, as for example, if John Doe is administrator of estate X he may cast a ballot as administrator of estate X, and if he is also administrator of estate Y he may cast another ballot as administrator of estate Y."

3. Section 717.3 (b) (2) is amended by adding at the end thereof the following: "Whether a husband or wife is entitled to vote does not depend upon whether the other spouse is entitled to vote. Each individual's right to vote whether single or married depends upon his or her own qualifications. A minor is not disqualified from voting solely because of his minority if otherwise eligible."

4. Section 717.9 is amended by deleting the words "by the county committee" from the first sentence thereof so that the first sentence reads as follows: "The community referendum committee, or at least one member thereof in case there are two or more polling places in the community, shall open the polling place for the issuance of ballot forms and the casting of ballots at the time designated and shall thereafter, until the time when the polls are required to be closed and the casting of ballots discontinued, issue a ballot to each person who is eligible to vote and applies for a ballot and to each person who claims to be eligible to vote and insists upon voting even though his eligibility to vote is challenged by a member of the committee."

Done at Washington, D. C., this 26th day of June 1956.

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375)

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

PART 730—RICE

SUBPART—1956-57 MARKETING YEAR

INCREASED STATE ALLOTMENTS AND APPORTIONMENT OF INCREASED ACREAGE TO PRODUCERS AND FARMS

The amendments herein are issued pursuant to section 304 of the Agricultural Act of 1956 to increase the State rice acreage allotments hertofore proclaimed (21 F. R. 71) and provide for the apportionment of such increased allotments among producers and farms.

Since rice farmers at the present time are in the process of planting their 1956 crop of rice, it is imperative that they be notified of these amendments as soon as possible. Therefore, it is hereby found that compliance with the notice, procedure, and effective date provisions of section 4 of the Administrative Procedure Act (5 U. S. C. 1003) is impracticable and contrary to the public interest, and the amendments herein shall become effective upon filing with the Director, Division of the Federal Register.

1. Section 730.704 is amended by inserting immediately after the section headnote the designation "(a)", and by adding a new paragraph (b), as follows:

(b) The State acreage allotments in paragraph (a) of this section, as increased pursuant to section 304 of the Agricultural Act of 1956, are as follows:

| State: | *Acres* |
|---|---|
| Arkansas | 399,084 |
| California | 299,820 |
| Louisiana | 475,094 |
| Texas | 422,390 |
| Mississippi | 46,683 |
| Arizona | 229 |
| Florida | 957 |
| Illinois | 20 |
| Missouri | 4,580 |
| North Carolina | 29 |
| Oklahoma | 149 |
| South Carolina | 2,847 |
| Tennessee | 517 |

2. Section 730.717 of the farm acreage allotment regulations for the 1956 crop of rice is amended by changing the period at the end of paragraph (b) thereof to a comma and adding the language "plus the increase in the State allotment, if any, as provided in paragraph (b) of § 730.704."

3. Section 730.725 of the farm acreage allotment regulations for the 1956 crop of rice is amended by changing the period at the end of paragraph (b) thereof to a comma and adding the language "plus the increase in the county allotment, if any, as a result of the increase in the state allotment, if any, as provided in paragraph (b) of § 730.704."

(Sec. 375, 52 Stat. 66; 7 U. S. C. 1375. Interpret or apply secs. 301, 353, 52 Stat. 38, 61, as amended, Pub. Law 540, 84th Cong.; 7 U. S. C. 1301, 1353)

Done at Washington, D. C., this 26th day of June 1956. Witness my hand and the seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

[F. R. Doc. 56-5174; Filed, June 28, 1956; 8:53 a. m.]

## Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 989—RAISINS PRODUCED FROM RAISIN VARIETY GRAPES GROWN IN CALIFORNIA

ADMINISTRATIVE RULES AND PROCEDURES

Notice was published in the March 23, 1956, issue of the FEDERAL REGISTER (21 F. R. 1801) that the Secretary of Agriculture was considering the approval of proposed rules and procedures for use in connection with the operation of Marketing Agreement No. 109, as amended, and Marketing Order No. 89, as amended (20 F. R. 6435), regulating the handling of raisins produced from raisin variety grapes grown in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). It was also proposed that the existing general rules and regulations (19 F. R. 3443; 20 F. R. 738) and the special regulations (17 F. R. 10441; 20 F. R. 1795) relating to minimum grade requirements for natural condition raisins, minimum grade requirements for processed raisins, and the schedule of payments to handlers for receiving, storing, and handling reserve and surplus tonnage raisins will be terminated, inasmuch as all necessary matters are now provided for in the amended raisin order, new special regulations, and these general rules and procedures. In said notice opportunity was afforded all interested persons to file any data, views, or arguments pertaining thereto. Data, views, and arguments were filed by the Raisin Administrative Committee with respect to the proposed rules and procedures.

After consideration of all relevant matters, including the data, views and arguments filed by the committee and other available information, it was deemed advisable to modify the proposed administrative rules and procedures in a number of respects. It is concluded that the administrative rules and procedures as so modified, and as set forth below, would tend to effectuate the declared policy of the act and should be approved, and that the aforesaid existing general rules and procedures and the aforesaid special regulations should be

terminated: *It is therefore ordered,* That:

(1) The existing general rules and regulations (19 F. R. 3443; 20 F. R. 738) and the special regulations (17 F. R. 10441; 20 F. R. 1795) relating to minimum grade requirements for natural condition raisins, minimum grade requirements for processed raisins and the schedule of payments to handlers for receiving, storing, and handling reserve and surplus tonnage raisins shall be, and they hereby are, terminated.

(2) The administrative rules and procedures shall, on and after the effective date of this order, be as follows:

DEFINITIONS

Sec.
989.101 Order.
989.102 Inspection agency.
989.103 Terms in the order.
989.104 Lot.
989.105 Inspection point for incoming raisins.

RAISIN ADVISORY BOARD

989.129 Voting at nomination meetings.

RAISIN ADMINISTRATIVE COMMITTEE

989.152 Mail or telegraphic votes.

GRADE AND CONDITION STANDARDS

989.158 Natural condition raisins.
989.159 Regulation of the handling of raisins subsequent to their acquisition.
989.160 Storing, pooling, and disposition of storable off-grade raisins.
989.161 Acquisition of off-grade raisins by processors.

VOLUME REGULATION

989.166 Reserve, surplus, and storable off-grade tonnage generally.
989.167 Reserve tonnage.
989.168 Disposition of surplus tonnage raisins for distillation or for uses other than human consumption.
989.169 Substitution for layer muscats.

REPORTS AND RECORDS

989.173 Reports.
989.176 Records.

AUTHORITY: §§ 989.101 to 989.176 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c.

DEFINITIONS

§ 989.101 *Order.* "Order" means Marketing Agreement No. 109, as amended, and Order No. 89, as amended (20 F. R. 6435), regulating the handling of raisins produced from raisin variety grapes grown in California, or as the same may be amended further hereafter.

§ 989.102 *Inspection agency.* The "inspection agency" shall be the Processed Products Standardization and Inspection Branch of the United States Department of Agriculture.

§ 989.103 *Terms in the order.* Terms defined in the order shall have the same meaning when used in this subpart.

§ 989.104 *Lot*—(a) *Natural condition raisins.* For purposes of incoming or outgoing inspection of natural condition raisins, "lot" means any quantity of such raisins of the same varietal type or of differing varietal types when commingled within their containers (including sweat and picking boxes), which does not exceed a car, truck, or truck-trailer load, and which is submitted for inspection at one time and in the same place: *Provided,* That (1) where a portion of the quantity submitted for inspection meets the minimum grade and condition standards and has been separated from the remainder of the raisins failing to meet grade, that portion shall be one lot and the portion failing to meet grade shall be another lot, (2) if a quantity of raisins which are not in units of a car, truck, or truck-trailer load are submitted for inspection, the quantity may, at the discretion of the inspector, be separated into such portions, either prior to or in the course of inspection, as can be properly inspected, and each such portion shall be a lot, and (3) raisins which are resubmitted for inspection after reconditioning (such as sorting or drying) shall be a new lot.

(b) *Packed raisins.* For the purpose of outgoing inspection of packed raisins, "lot" means any quantity of packed raisins of the same varietal type and style or of differing varietal types or styles when commingled within their containers, which are in containers of the same size and type, and which are located in the same or adjacent warehouses or storage areas and are available for inspection at any one time: *Provided,* That (1) any of such raisins which are in a separate pile or piles and which differ from the other raisins as to grade or other factors may be deemed to be a separate lot, (2) any portion of the raisins in a particular pile which bear an identification mark on the containers different from the marks of other raisins in that pile may be deemed to be a separate lot if determined to be of lower grade or different in other factors, or (3) if applicant requests more than one inspection certificate covering different portions of such raisins, the quantity of the raisins covered by each certificate shall be deemed to be a separate lot.

§ 989.105 *Inspection point for incoming raisins.* An inspection point shall be any plant or receiving station of a handler, and any other place where raisins are normally and usually received by him in any considerable volume, at which there are reasonably adequate facilities (not necessarily scales) for receiving, weighing of samples, and inspecting raisins, and which will permit the practical administration of this part. In order that the committee may properly supervise the movement of natural condition raisins into handlers' inspection points, each handler shall submit promptly to the committee a description, including the boundaries and other pertinent detail, of each of his inspection points. Each such inspection point so defined by a packer shall be binding, until notice of any modification thereof is received by the committee, on the packer and the committee for purposes of the administration of this part if the designated inspection point complies with this definition. In the event the committee determines that an inspection point designated by a packer does not comply with this definition, it may refuse to consider such point as an inspection point and, in case of refusal, shall advise the packer of how it may be modified so as to comply.

RAISIN ADVISORY BOARD

§ 989.129 *Voting at nomination meetings.* Any person (defined in § 989.3 as an individual, partnership, corporation, association, or any other business unit) who is engaged, in a proprietary capacity, in the production of raisin variety grapes and who qualifies under the provisions of § 989.29 (b) (2) shall be eligible to cast one vote for a nominee for each producer member position and one vote for a nominee for each producer alternate member position on the board which is to be filled for his district. Such person must be the one who or which: (a) Owns and farms land resulting in his or its ownership of the raisin variety grapes produced thereon; (b) rents and farms land, resulting in his or its ownership of all or a portion of the raisin variety grapes produced thereon; or (c) owns land which he or it does not farm and, as rental for such land, obtains the ownership of a portion of the raisin variety grapes produced thereon or of raisins obtained therefrom. In this connection, a partnership shall be deemed to include two or more persons (including a husband and wife) with respect to land the title to which, or lease-hold interest in which, is vested in them as tenants in common, joint tenants, tenants by the entirety, or, under community property laws, as community property. In a landlord-tenant relationship, wherein each of the parties is a producer, each such producer shall be entitled to one vote for a nominee for each producer member position and one vote for each producer alternate member position. Hence, where two persons operate land as landlord and tenant on a share-crop basis, each person is entitled to one vote for each such position to be filled. Where land is leased on a cash rental basis, only the person who is the tenant or cash renter (producer) is entitled to vote. A partnership or corporation, when eligible, is entitled to cast only one vote for a nominee for each producer position to be filled in its district.

RAISIN ADMINISTRATIVE COMMITTEE

§ 989.152 *Mail or telegraphic votes.* Whenever a mail or telegraphic vote is taken, every reasonable effort shall be made to communicate with and obtain a vote from each committee member. If a committee member is unavailable and cannot be reached by telephone, telegraph or mail, such member's alternate shall be requested to vote.

GRADE AND CONDITION STANDARDS

§ 989.158 *Natural condition raisins*—(a) *Incoming inspection.* (1) Each handler shall, at his expense, provide at each inspection point reasonably adequate facilities for receiving, weighing of samples, and inspecting natural condition raisins. At the time of inspection of any lot, the handler shall, at his expense, provide the inspector with any assistance necessary in the inspection of the raisins, including the dumping of the containers. The weight of raisins tendered for receiving, storage or acquirement shall be substantiated by an official "State Certificate of Weights and Measures" issued by a public weigh-

master whether located at the inspection point or otherwise.

(2) No handler other than a processor shall receive natural condition raisins from a tenderer, either for acquirement, for storage, or for inspection, at points other than a designated inspection point.

(3) For each lot of natural condition raisins tendered to a handler for acquirement, reconditioning, or storage, the handler shall, immediately upon physical receipt and tentative acceptance thereof, issue a prenumbered (numbered serially in advance) door receipt or weight certificate showing the name and address of the tenderer, the weight of the lot, the number and type of containers in the lot, and any other information necessary to identify the lot. For purpose of identifying incoming lots of raisins, a handler, if it is impracticable for him to issue immediately a door receipt or weight certificate, may issue for temporary use only a prenumbered "Request for USDA Inspection" on a form furnished by the committee. Any raisins so received by a handler shall, prior to their acceptance, be inspected at an inspection point during the unloading process, and if certified as standard raisins shall, upon acceptance by the handler, either be acquired by him or received by him for storage on memorandum receipt, as the case may be: *Provided*, That in the absence of an inspector to perform inspection during unloading, the handler shall not permit unloading to occur unless such absence is during normal business hours and the handler has a written statement from the inspection agency to the effect that inspection service cannot be furnished within a reasonable time: *And provided further*, That the raisins so unloaded shall be inspected promptly upon an inspector being available. It shall be the handler's responsibility in any case to arrange for the inspection and to furnish weight certificates promptly. The inspection certificates covering any lot of off-grade raisins shall state whether or not such off-grade raisins are storable. One of the tenderer's or handler's options (as referred to in § 989.58 (e)), with respect to any raisins which do not meet the applicable minimum grade standards, shall be exercised within five business days after inspection or three business days after issuance of the inspection certificate, whichever is later: *Provided*, That these time limits may be extended by the committee under such conditions as it may deem necessary in the circumstances. Any such lot of off-grade raisins shall, pending the exercise of one of the options, be identified by fixing to each pellet a prenumbered RAC control card (to be furnished by RAC), and kept separate and apart from any other raisins in the handler's possession. In the event the handler does not normally use pellets in his operation the RAC control card shall be affixed to one or more of the containers in each lot. The RAC control card shall remain fixed to each pellet or containers as the case may be, until such raisins have been reconditioned, or have been delivered to the handler for the account of the committee, or have been returned to the person making the tender.

(4) If any lot of natural condition raisins tendered to a handler is separated into two or more lots because a portion of the original lot failed to meet minimum grade requirements, the handler shall issue a prenumbered weight certificate for each such lot not returned to tenderer, showing the name and address of the tenderer, the weight of the lot, and the number and type of containers in the lot.

(5) An appeal inspection shall be made by the inspection agency upon the request of any interested party and upon the payment of any fees assessed by the inspection agency for such appeal inspection. No appeal inspection shall be made unless the raisins in their original containers are identifiable and shall not have been removed from the original inspection point.

(6) Raisins produced by a handler (i. e. handler-owned tonnage) shall, upon being hauled to an inspection point of a handler (either the same or another handler), be treated the same as provided in subparagraphs (3) and (4) of this paragraph for any other raisins received by the handler. Also, raisins produced by a handler by drying in a dehydrator located in an inspection point of the handler shall, immediately upon completion of the dehydration operation, be treated the same as provided in subparagraphs (3) and (4) of this paragraph for raisins received by the handler.

(7) Where lots of natural condition raisins which are comprised of raisins of different varietal types commingled within their containers are presented for inspection, each varietal type shall be inspected separately. Based upon such inspection, the inspection agency shall issue an inspection certificate showing the percentage which the raisins of each varietal type is of the total raisins contained in the lot and whether each varietal type meets the minimum grade standards established for such type. In the event that the raisins of any one varietal type contained in a lot should fail to meet the minimum grade standards established for the varietal type, none of the lot shall be certified as meeting the minimum grade standards unless it is found to be practicable to separate the raisins into new lots of standard and off-grade raisins, respectively.

(b) *Submission of inspection certificates to the committee.* A copy of each inspection certificate which a handler is required to submit to the committee pursuant to § 989.58 (d) shall be submitted within five business days after it is issued. This may be accomplished by authorizing the inspection agency to submit a copy of each such inspection certificate directly to the committee. A copy of such authorization shall be furnished to the committee.

(c) *Off-grade raisins*—(1) *Temporary holding.* Each lot of off-grade raisins held by a handler for reconditioning and subsequent inspection, or which are in his possession pending exercise of one of the options provided for in § 989.58 (e), shall be stored and/or marked in such a manner as to maintain its identity to the satisfaction of the inspector, which requirement shall be in addition to those requirements set forth in paragraph (a) (3) and (4) of this section.

(2) *Storage of storable off-grade raisins for the account of the committee.* All off-grade raisins received by a handler which have been certificated by an inspector as storable and which are held by the handler for the account of the committee shall be identified as such and shall be stored separate and apart by varietal types from all other raisins in such a manner as to be accessable to the committee: *Provided*, That any lots of off-grade raisins which consist of different varietal types commingled within their containers shall be identified as such and stored separate and apart from all other raisins.

(3) *Reconditioning of off-grade raisins.* Each handler shall furnish to the committee, within five business days after the issuance of the inspection certificate for any lot of off-grade raisins held for reconditioning, a copy of the written agreement entered into between the handler and the tenderer of the raisins for such reconditioning. This may be accomplished by submitting a copy of the agreement to the inspection agency for transmittal to the committee. If such raisins are produced by the handler, he shall within the same period notify the committee, in writing, of his intention to recondition such raisins. Also, the handler shall notify the inspection agency at least one business day in advance of the time he plans to begin reconditioning each lot of raisins unless a shorter period is acceptable to the inspection agency. Natural condition raisins which have been reconditioned under subparagraph (3) of § 989.58 (e) shall continue to be considered natural condition raisins for purposes of reinspection after such reconditioning has been completed, if no water or moisture has been added; otherwise, such raisins shall meet the minimum grade standards for packed raisins. If, after reconditioning, such raisins meet the minimum grade standards but no longer are natural condition raisins as defined in § 989.9, any handler who acquires such raisins shall meet his reserve and surplus obligations from natural condition standard raisins of the same varietal type acquired by him. The weight of the reconditioned raisins acquired shall be adjusted to natural condition weight by the use of factors established by the committee, applicable to the various degrees of processing accomplished. The inspector of the reconditioned raisins shall select from among the factors fixed by the committee the factor applicable to the lot. In reconditioning off-grade raisins, different off-grade lots may be run consecutively or simultaneously if (i) done in a manner which enables the inspection agency to determine whether the reconditioned raisins of any lot meet the minimum grade and condition standards and (ii) the reconditioned raisins of any lot which fail to meet such standards are kept separate from other raisins. No off-grade lots may be reconditioned by blending them with raisins acquired as standard raisins. Reconditioned raisins of different lots which meet the minimum standards may be commingled if such is not contrary to any agreement entered into by the handler. Reconditioning of off-grade raisins by a handler shall be done in accordance with such procedure as will enable the inspector to observe any lot of off-grade raisins at anytime and to make a proper inspection. A handler may recover raisins from residual raisins obtained from his reconditioning operations in conformity with the applicable provisions of § 989.159 (g). Any handler who has reconditioned off-grade raisins shall report such reconditioning to the committee as required in § 989.173 (c) (3).

(4) *Return of off-grade raisins to tenderers.* Any off-grade raisins which are to be returned to the tenderers pursuant to subparagraph (1) as set forth in § 989.58 (e), including residual off-grade raisins accumulated in the course of reconditioning pursuant to subparagraph (3) of § 989.58 (e), shall be physically returned within five business days after the issuance of the inspection certificate or five days after completion of the reconditioning, as the case may be: *Provided*, That these time limits may be extended by the committee as justified by extenuating circumstances. The handler shall file with the committee a report of the returned raisins as required in §§ 989.173 (b) (4) and (c) (3).

(d) *Reinspection of raisins held more than one hundred and twenty days on memorandum receipt.* No handler shall acquire raisins held on memorandum receipt for a period longer than one hundred and twenty (120) days unless such raisins have been reinspected and certified immediately prior to acquirement as meeting the minimum requirements for standards raisins: *Provided*, That the committee at any time may require such reinspection and certification of raisins held on memorandum receipt as a prerequisite to acquisition if it has reason to believe that the raisins do not meet such requirements.

§ 989.159 *Regulation of the handling of raisins subsequent to their acquisition*—(a) *Inspection facilities.* Each handler shall, at his expense, provide at each place where packed raisins are to be inspected reasonably adequate space and facilities for inspecting such raisins.

(b) *Identification of inspected raisins.* (1) Each handler shall mark each shipping container with a legible code or other identification satisfactory to the committee and the inspector, which shall indicate the date that the raisins in such shipping container were packed.

(2) Each handler shall furnish promptly to the committee through the inspector, a report showing the handler's count and weight of the raisins of each pack and varietal type packed each day.

(c) *Outgoing inspection.* (1) Outgoing inspection of raisins as required by § 989.59 (d) shall be made as set forth in this paragraph.

(2) Such inspection of natural condition raisins shall be made prior to shipment or other disposition.

(3) Such inspection of packed raisins shall be made prior to shipment or other final disposition and unless made during the final processing or packing operations so as to facilitate proper sampling, the inspector shall perform the inspection on the basis of samples drawn from representative containers of the packed raisins. It shall be the responsibility of the handler to arrange with the inspection agency for an inspector to be present when the inspection is needed.

(4) Where a lot of packed raisins is comprised of raisins of different varietal types or styles commingled within their containers and is presented for inspection, each varietal type or style shall be inspected separately. Based upon such inspection, the inspection agency shall issue an inspection certificate showing the percentage which the raisins of each varietal type or style is of the total of the lot and whether each varietal type or style meets the minimum grade standards established therefor. In the event that the raisins of any one varietal type or style contained in a lot should fail to meet the applicable minimum grade standards established for the varietal type or style, none of the lot shall be certified as meeting the minimum grade standards unless it is found to be practicable to separate the raisins into new lots which meet and which fail to meet the applicable minimum standards, respectively.

(d) *Submission of inspection certificates to the committee.* A copy of each inspection certificate which a handler is required to submit to the committee pursuant to § 989.59 (d) shall be submitted within five business days after it is issued. This may be accomplished by authorizing the inspection agency to submit a copy of each such inspection certificate directly to the committee. A copy of such authorization shall be furnished to the committee.

(e) *Term of inspection certificate.* Any handler who fails to ship or make other disposition of any lot of raisins within 21 calendar days after the date of the last inspection of the lot made in connection with the proposed disposition thereof shall, before making such shipment of other disposition, have the raisins inspected for condition and furnish promptly to the committee (which may be through the inspector) a copy of the inspection certificate showing that the raisins meet the applicable minimum grade standards.

(f) *Exemption of gift and specialty packs*—(1) *Shipment under exemption.* Upon obtaining approval of the committee as provided in this paragraph, any handler may ship or dispose of raisins in gift or specialty packs without regard to the provisions of § 989.59 (a), (b) and (d). For the purpose of these exceptions: "Gift packages" means raisins specially packaged for gift purposes, composed either wholly of raisins or raisins in combination with other fruit, which are either (i) given or donated by a handler to others or (ii) sold by a handler for final or ultimate disposition as gifts; and "specialty packs" means raisins of special processing either as to moisture or coating and which may or may not be packed in tin or materials other than those employed in normal industrial or consumer packs.

(2) *Application for exemption.* Applications for exemption shall be filed with the committee in triplicate. The application shall contain information as to: (i) The name and address of the handler; (ii) the estimated quantity of each varietal type of raisins that will be shipped or disposed of under the exemption during the crop year; (iii) whether any special processing of the raisins is involved; (iv) each type of package or packages in which the raisins will be packed and the net weight content of each type of container; (v) the outlets in which disposition of the gift packages or specialty packs will be made, i. e., whether disposition will be made direct to consumers, to wholesalers or retailers for resale, or to persons or organizations for distribution as gifts, and any special uses expected to be made of the raisins; and (vi) the general quality, style and condition of the raisins expected to be shipped under exemption.

(3) *Committee action on application.* The committee, in its discretion, shall approve applications for exemption of any varietal type of raisins where the value of the raisins (or raisin products in case the form of the raisins is not changed) by virtue of their processing or packaging exceeds the value of normally processed or packaged raisins of comparable varietal type and where it can conclude that such exemption will not jeopardize the quality control or price objectives of the marketing order program. The committee shall notify the handler promptly in writing of its approval or disapproval of his application, and if the application is approved, the maximum quantity for which approval is granted. If the application is disapproved, the committee shall inform the handler of the reasons therefor.

(4) The handler shall report shipments or other dispositions under an approved exemption as required pursuant to § 989.173 (f).

(g) *Disposition of off-grade raisins, stemmer waste and raisin offal accumulated by handlers.* For the purposes of § 989.59 (f), a handler may recover raisins from: (1) Residual raisins obtained from his processing of standard raisins; (2) any raisins acquired as standard raisins by a handler which fail to meet the applicable outgoing grade standards for shipment or final disposition as raisins; and (3) residual raisins obtained from the reconditioning of off-grade raisins: *Provided*, That such recovery under subparagraph (3) of this paragraph must occur without blending with standard raisins, and the weight of standard raisins in such residual shall be credited on the basis of the original inspection certificate or recovery, to the same lot or lots from which the residual was obtained. The provisions of this paragraph are not intended to excuse any failure to comply with all applicable food and sanitary rules and regulations of city, county, state, federal or other agencies having jurisdiction.

§ 989.160 *Storing, pooling and disposition of storable off-grade raisins*—(a) *Obligation of handlers.* Each handler

shall hold in storage all storable off-grade raisins received by him for the account of the committee until he has been relieved of the responsibility by the committee. The handler shall store such off-grade raisins without the addition of moisture and in such manner as will maintain the raisins in the same condition as when they were received except for normal and natural deterioration and shrinkage and except for loss through fire, acts of God, force majeure, or other conditions beyond the handler's control.

(b) *Disposition.* All off-grade raisins held for the account of the committee shall be physically disposed of by the committee on or before June 30 of each crop year: *Provided,* That any of such off-grade raisins received between June 1 and August 31 shall be physically disposed of within 30 days after they are received.

(c) *Payment for receiving, storing, handling, and inspection.* (1) Each handler shall be compensated at the rate of $3.95 per ton (natural condition weight at time of acquisition) for receiving, storing and handling storable off-grade raisins: (i) Received during the period September 1–May 31 of a particular crop year and held for the account of the committee during all or any part of the same crop year; or (ii) received during the period June 1–August 31 of a particular crop year and held for the account of the committee during all or any part of the period from June 1 to September 30 of the succeeding crop year.

(2) Each handler shall be reimbursed by the committee for inspection costs applicable to storable off-grade raisins received and held by him for the account of the committee. Such payment shall be made on a weekly basis at the applicable rate per ton paid by such handler to the inspection agency and on the quantity reported by the handler for the applicable week.

(d) *Payment for other services.* (1) In addition to the payments provided for in paragraph (c) of this section, each handler shall be compensated only for such other services performed by him with respect to off-grade raisins as are set forth in this paragraph.

(2) The committee may arrange with handlers for the transportation of off-grade raisins held for its account. Payment for any such transportation shall be based on prevailing transportation rates for the type of service to be performed.

(3) Handlers shall be compensated in an amount determined by the committee, for placing in sacks or other containers off-grade raisins held for its account, which amount shall be specified in the offer made by the committee to handlers for such services.

(4) In the event the committee determines from time to time that it is necessary that handlers fumigate off-grade raisins held for its account, handlers shall be compensated for the reasonable costs therefor at a specified rate or rates per ton.

(e) *Distribution to equity holders of net proceeds from sale of off-grade raisins held for the account of the committee.* All expenses of the off-grade raisin pool shall be paid from the proceeds of that pool. The net proceeds shall be distributed by the committee to the respective producers, or their successors in interest thereto, on the basis of the volume of their respective contributions to the off-grade pool. Distribution of proceeds in connection with off-grade raisins contributed by non-profit cooperative marketing associations which have authority to market the raisins of their members and to allocate the proceeds therefrom to such members shall be made to such associations. Advance or progress payments may be made as sufficient funds become available.

§ 989.161 *Acquisition of off-grade raisins by processors.* Any processor may acquire off-grade raisins for the purpose of distillation, animal feed, or any use other than for human consumption, without regard to the provisions of §§ 989.58 and 989.59. Processors shall report such acquisitions and make such other reports as are or may be required pursuant to §§ 989.73 and 989.173.

VOLUME REGULATION

§ 989.166 *Reserve, surplus, and storable off-grade tonnage generally*—(a) *Shrinkage allowance for normal and natural shrinkage in weight.* For each crop year each handler shall be entitled to a shrinkage allowance for normal and natural shrinkage in weight of one percent of the original natural condition weight on those reserve tonnage raisins, surplus tonnage raisins, and storable off-grade raisins acquired by him during the crop year and held by him for the account of the committee on the Saturday nearest to May 1 of the same crop year. The handler shall be entitled to no other allowance for normal and natural shrinkage in weight for any of such raisins acquired during the crop year: *Provided,* That the committee shall grant an additional allowance for any normal and natural shrinkage in weight of any of such raisins held for the account of the committee beyond the end of the crop year of acquisition upon submission by the handler of satisfactory proof of such shrinkage during the period the raisins were so held.

(b) *Satisfaction of reserve and surplus obligation with residual Muscat raisins from layering operations.* Any handler who desires to satisfy his reserve or surplus tonnage obligations referable to his acquisitions of Layer Muscat raisins with residual Muscat raisins obtained by him in layering operations shall, prior to setting aside such raisins for the account of the committee, have them dried to a moisture content not exceeding 16 percent, inspected and obtain from the inspection agency a certificate, a copy of which shall be submitted to the committee (which may be through the inspection agency) within five business days after it is issued, showing that the raisins meet the minimum grade and conditions standards for natural (sun-dried) Muscat raisins (those standards for natural condition Muscat raisins other than Layer Muscat and Valencia Muscat raisins). The inspection of the residual raisins shall be made at the expense of the handler. The handler shall file with the committee on forms furnished by it, within seven days (exclusive of Saturdays, Sundays, and legal holidays) after setting aside the raisins, a certified report with respect to such use of the residual raisins, including the name of the producer of the Layer Muscat raisins and the quantity of the residual raisins so used. Also, he shall obtain a written statement from the producer evidencing agreement for the residual tonnage to be used to meet such obligation, and shall retain it for at least two years after the termination of the crop year in which the raisins were acquired.

(c) *Setaside obligations referable to acquisition of mixed varietal types of raisins.* A handler who acquires any lot of natural condition raisins of mixed varietal types (commingled within their containers) shall meet his reserve and surplus tonnage setaside obligations for each varietal type contained in the mixed lot separately and with raisins of the particular varietal type unmixed with raisins of other varietal types. The obligation as to each varietal type shall be computed according to the reserve and surplus percentages established by the Secretary and the percentage of the varietal type contained in the lot as shown by the incoming inspection certificate.

(d) *Storage requirements as to reserve and surplus raisins.* Each handler shall store separate and apart from other raisins and from each other, each varietal type of reserve tonnage raisins held by him for the account of the committee. Each handler shall store separate and apart from other raisins and from each other each varietal type of surplus tonnage raisins held by him for the account of the committee. Raisins shall be considered as stored separate and apart from other raisins when they are indentifiable from other raisins. Handlers shall store reserve and surplus tonnage raisins in sweat boxes, picking boxes, or such other containers as may be authorized by the committee subject to the disapproval of the Secretary. Handlers shall be allowed three calendar days (exclusive of Saturdays, Sundays and legal holidays) after acquiring any reserve or surplus tonnage raisins, or after the establishment of reserve and surplus percentages by the Secretary, whichever occurs later, to segregate and properly stack each varietal type.

(e) *Deferment of obligation.* (1) Any handler who desires to defer the meeting of his reserve and surplus tonnage obligations pursuant to § 989.66 (c) shall file with the committee on a form furnished by it a certified application for deferment of his reserve and surplus tonnage obligations, containing: (i) The date of the application and the name and address of the handler; (ii) the period for which deferment is requested; (iii) with respect to each varietal type, the total reserve and the total surplus tonnage on which deferment is requested, segregated as to his current holdings and his expected acquisitions during the deferment period; (iv) a full description of the surety bond offered; and (v) the reasons why deferment is desired.

(2) The committee shall grant such an application upon a showing by the handler that he has a need for the deferment and meets the requirements as to the written undertaking and bond which are prescribed in § 989.66 (c). The committee shall notify the applicant promptly of its decision with regard to his application, including the amount of the bond required by the terms of § 989.66 (c). The amount of said bond for a varietal type of raisins shall be the product obtained by multiplying the quantity for which deferment is granted by the then current field price for free tonnage raisins of the same varietal type. At any time during the period for which a deferment has been granted, the handler may request the committee to increase or decrease the amount of his deferment and the committee shall grant the revision after the necessary increase or decrease, as the case may be, is made in the amount of the bond. Also, at the request of the handler the committee may extend the deferment beyond the original period (not beyond November 15 of the crop year) for such a quantity as is specified in the request provided the bond is extended in the necessary amount.

(3) No handler shall use any of such reserve or surplus tonnage raisins as free tonnage raisins until he shall have received written approval of his application from the committee and shall have filed the required bond with the committee.

(f) *Remedey in the event of failure to deliver reserve, surplus, or off-grade raisins.* Except as provided otherwise in connection with a deferment granted pursuant to § 989.66 (c) and paragraph (e) of this section, a handler who fails to deliver to the committee, upon request, any reserve, surplus or off-grade tonnage raisins in the quantity or of a quality for which he has become obligated (after any shrinkage allowances which may then be in effect are applied and allowances for any deterioration due to conditions beyond his control are made), shall compensate the committee for the amount of the loss that is occasioned by his failure to so deliver. The amount of compensation for any shortage of tonnage shall be determined by multiplying the quantity of reserve, surplus, or off-grade raisins not delivered by the latest weighted average price per ton received by producers during the particular crop year for free tonnage raisins of the particular varietal type or types, plus any charges already paid or credited to the handler and any costs to the committee which is caused by the handler's failure to deliver. Such sales on which such weighted average price is computed shall include those during the particular crop year up to the time such cash payment is requested by the committee or up to the end of the particular crop year, whichever date may be earlier. The amount which a handler shall compensate the committee for any raisins (off-grade, reserve or surplus) which have deteriorated in quality during storage for reasons within his control, shall be the latest weighted average price received by the committee for the applicable varietal type of the particular reserve, surplus, or off-grade pool raisins, as the case may be, less the amount received by the committee in the disposition of the raisins delivered by the handler (or the reasonable value of such raisins, as determined by the committee, if not sold). Any amounts paid to the committee in satisfaction of such deficiencies shall be considered as being part of the particular reserve, surplus or off-grade tonnage pools involved. The remedies provided in this paragraph shall be in addition to and not exclusive of, any of the remedies or penalties prescribed in the act with respect to the failure on the part of the handler to comply with the applicable provisions of the act or this part.

(g) *Payments to handlers for services performed with respect to reserve and surplus tonnage raisins*—(1) *Payments for crop year of acquisition.* (i) Each handler shall, beginning with the crop year which began September 1, 1955, be compensated at the rate of $3.95 per ton (natural condition weight at the time of acquisition) for receiving, storing and handling reserve and surplus tonnage raisins acquired during a particular crop year and held by him for the account of the committee during all or any part of the same crop year.

(ii) Each handler shall, beginning with September 1, 1955, be reimbursed by the committee for inspection costs applicable to the reserve and surplus pool raisins received and held by him for the account of the committee. Such payment shall be made on a weekly basis at the applicable rate per ton paid by such handler to the inspection agency, and on the quantity for the particular week reported by the handler. The committee shall pay the cost of any inspection required by it of any such pool raisins while they are being held for its account or are delivered in accordance with its request: *Provided,* That the cost of inspection of any raisins which a handler substitutes for raisins in the reserve or surplus pools or which he received by transfer from another handler pursuant to paragraph (j) (3) of this section shall be borne by the handler.

(iii) Each handler shall, beginning with the crop year which began on September 1, 1955, be paid an allowance for fumigation of $1.50 per ton of reserve and surplus tonnage raisins received during the crop year of acquisition and held by him for the account of the committee during all or any part of such crop year.

(2) *Additional payment for surplus tonnage raisins held beyond the crop year of acquisition.* Each handler who holds surplus tonnage raisins for the account of the committee on September 1 of any crop year (beginning with September 1, 1955) which were also held on August 15 of the preceding crop year, shall be compensated: (i) For storing and handling such raisins at the rate of $1.00 per ton for the period ending November 30, or any part thereof, 50¢ per ton for the next three months or any part thereof, 15¢ per ton for the next three months, or any part thereof, and 15¢ per ton for the last three months of the crop year, or any part thereof; and (ii) for fumigation services at the rate of 15¢ per ton for each fumigation required to maintain such raisins in good condition.

(h) *Payment of rental on boxes containing surplus pool raisins held beyond the crop year of acquisition.* Each handler and each producer, dehydrator or other person who furnishes boxes in which surplus pool raisins are held for the account of the committee on September 1 of any crop year (beginning with September 1, 1955) which were also held on August 15 of the preceding crop year, shall be compensated for the use of such boxes at the rate of 15 cents for each 160 pounds of raisins so held. No further compensation shall be paid unless the boxes are held on the succeeding September 1.

(i) *Payment for other services.* (1) In addition to the payments provided in paragraphs (g) and (h) of this section, handlers shall be compensated only for those services performed with respect to reserve and surplus tonnage raisins as are set forth in this paragraph.

(2) The committee may arrange with any handlers for transporting reserve or surplus tonnage raisins. Payment for such transportation shall be in an amount based on prevailing haulage rates for the type of transportation required.

(3) A handler who accepts an offer by the committee to pack surplus tonnage raisins for its account shall be compensated for such packing in an amount determined by or acceptable to the committee. In considering the amount of compensation to be paid, the committee shall take into account, among other factors, the particular varietal type of raisins to be packed, the particular pack or package required, and the quantity and quality of the raisins to be packed.

(4) In the event that the committee removes surplus tonnage raisins of a previous crop year from a handler upon request as provided in § 989.66 (f) and such handler subsequently desires redelivery to it of surplus tonnage raisins for contract packing or otherwise, such handler shall reimburse the committee for the net costs to it of the removal, storage, and re-delivery of such raisins as a condition precedent to such redelivery: *Provided,* That the committee may waive payment by the handler of part or all of such costs if it determines that such waiver is necessary in order to facilitate disposition of the raisins.

(j) *Offers of surplus tonnage raisins to handlers for sale in export.* (1) Whenever the committee offers surplus tonnage raisins to handlers for sale in export, the committee shall specify, among other terms of the offer: (i) The period within which each handler shall be given the opportunity to purchase his share of the offer; (ii) the additional period during which, if any of the offer then remains unpurchased, a handler may purchase from his holdings surplus tonnage raisins in excess of his share; and (iii) the further additional period during which, if any of the offer then remains unpurchased, a handler may purchase surplus tonnage raisins in excess of his share and in excess of his holding. Approvals of handlers' applications to purchase during the periods

specified in subdivisions (ii) and (iii) of this subparagraph shall be made in the same order in which the applications are filed with the committee. The committee shall fix the length of each of the three periods so as to facilitate disposition of surplus tonnage raisins.

(2) The determination of handlers' shares of offers of surplus tonnage raisins for sale in export shall be as set forth in this subparagraph. Each handler's share of the initial offer shall be determined as the same proportion of the quantity offered that the surplus tonnage raisins acquired by him is of the surplus tonnage acquired by all handlers. Likewise, each handler's share of the second and each subsequent offer shall be determined by first computing his share of the total quantity offered as of that date (the then current offer plus all prior offers), and subtracting therefrom the total of his shares of all prior offers: *Provided*, That when a significant volume of the previous offer is not purchased during the share reservation period specified pursuant to subparagraph (1) (i) of this paragraph, the committee may make an offer without regard to handlers' shares, in which case applications to purchase shall be approved in the same order in which the applications are filed with the committee. Whenever the quality of surplus tonnage raisins held by a handler for the account of the committee exceeds the quantity of such raisins to be offered to him by less than one ton, or whenever the quantity of surplus tonnage raisins to be offered to a handler exceeds the quantity of such raisins held by him for the account of the committee by less than one ton, the committee may in either case, to avoid the physical transfer of raisins, adjust the quantity offered to such handler to conform with his holdings. With respect to any reserve tonnage raisins which become surplus on July 1 pursuant to § 989.67 (c), the committee shall allocate such surplus to handlers in the same manner as other surplus. Whenever essentially all of the surplus tonnage raisins for the crop year which are acquired as surplus have been offered on a share basis, and any unpurchased tonnage of such surplus is offered to handlers, approval of applications may be made in the same order in which the applications are filed with the committee, and the same shall apply to reserve tonnage which becomes surplus on July 1 pursuant to § 989.67 (c).

(3) If, prior to the expiration of the period specified in subparagraph (1) (i) or (ii) of this paragraph, a handler has need for more surplus tonnage than is available to him on the basis of his allocation or his holdings, as the case may be, he may, pursuant to the provisions of this subparagraph, negotiate with another handler for uncommitted tonnage. During the period specified in said subparagraph (1) (i), he may negotiate with another handler for the transfer to him of any unpurchased portion of the other handler's share of an offer. Any such transfer shall not be deemed to reduce the transferring handler's share or to increase the transferee handler's share, for the purpose of determining shares of subsequent offers. During the period specified in said subparagraph (1) (ii) and while part of the offer remains unpurchased, he may negotiate with another handler for all or any part (not more than the unpurchased portion of the offer) of the other handler's uncommitted holdings. Any such transfer shall be permitted by the committee only upon receipt of written authorization, on a form furnished by the committee, by the transferring handler. All limitations applicable to the transferred surplus tonnage shall continue to apply. Such surplus tonnage raisins will be released by the committee to the transferee handler upon submission of his completed application(s) and full payment for such raisins, and such transferee handler shall be responsible to the committee for the documents required under such sale(s). Any cost involved in such transfers shall be borne by the handlers concerned.

§ 989.167 *Reserve tonnage*—(a) *Determination of current field price.* Whenever (1) the outlook for the next crop year or other factors have caused a downward trend in the price received by producers for free tonnage raisins (as evidenced by field or f. o. b. prices for such raisins), (2) the committee determines to offer reserve tonnage raisins to handlers at the current field price for free tonnage raisins as provided in § 989.67 (b), and (3) raisins are not being sold by producers in sufficient volume to establish a current field price for free tonnage raisins, the committee may use a current field price computed by deducting from the current f. o. b. price for free tonnage packed raisins of the varietal type to be offered, the normal packing and handling costs.

(b) *Reserve tonnage raisins which become off-grade.* Any reserve tonnage raisins held by or for the account of the committee which have been inspected by the inspection agency and found to be off-grade shall, as the committee determines, either be reconditioned or disposed of or marketed by the committee for distillation, animal feed, or uses other than for human consumption.

§ 989.168 *Disposition of surplus tonnage raisins for distillation or for uses other than human consumption.* Any surplus tonnage raisins held by or for the account of the committee which have been inspected by the inspection agency and found to be off-grade shall, as the committee determines, either be reconditioned or disposed of or marketed by the committee for distillation, animal feed, or uses other than for human consumption. In the event that the committee has been unable to dispose of standard quality surplus tonnage raisins at more remunerative prices in one of the other outlets authorized by the order for disposition of surplus tonnage raisins, it may, subject to the Secretary's disapproval, offer to sell, and sell, such surplus tonnage raisins for distillation: *Provided*, That no such offer or sale shall be made during the period August 1 to October 15 of any calendar year. Whenever the committee proposes to offer to sell standard surplus tonnage raisins for distillation, animal feed, or uses other than for human consumption, it shall file with the Secretary complete information with respect thereto and the basis therefor. The Secretary shall have the right to disapprove, within seven calendar days, the making of such an offer or any term or condition thereof.

§ 989.169 *Substitution for Layer Muscats.* A handler who substitutes natural (sun-dried) Muscat or Valencia raisins for Layer Muscat raisins (as provided in § 989.69) shall file with the committee on forms furnished by it, within seven days (exclusive of Saturdays, Sundays and legal holidays) after making the substitution, a certified report with respect to such substitution, including the name of the producer of the Layer Muscat raisins for which the substitution was made, and the quantity of such Layer Muscat raisins. He shall obtain a written statement from the producer evidencing agreement to the substitution and shall retain it for at least two years after the termination of the crop year in which the substitution occurred.

REPORTS AND RECORDS

§ 989.173 *Reports*—(a) *Inventory reports.* Each handler shall file with the committee as of the close of business of the last day of February and of August 31 of each crop year, and not later than the following March 6 and September 6, respectively, an inventory report which shall show, with respect to each varietal type of raisins: (1) The quantity of free tonnage raisins held by him, segregated as to locations where they are stored and whether they are natural condition or packed; and (2) the quantities of reserve tonnage, surplus tonnage, and off-grade raisins, respectively, held for the account of the committee. Upon request by the committee, each handler shall file at other times and as of other dates any of the said information which may reasonably be necessary for the determination or revision of marketing policy and which the committee shall specify in its request.

(b) *Weekly reports of raisins received and/or acquired*—(1) *General.* Each handler shall file with the committee for each week and not later than the following Wednesday reports (on forms furnished by the committee) which shall show for each varietal type of raisins the information which is specified in subparagraphs (2), (3), (4), and (5) of this paragraph. With each report, other than the report prescribed in subparagraph (4) of this paragraph the handler shall submit a copy of the door receipt or weight certificate for each lot of raisins acquired by him during the week and for each lot of raisins held on memorandum storage which was returned to the tenderer during the week, which shall show the information to be contained on such receipts or certificates as specified in § 989.158 (a) (3).

(2) *Acquisition of standard raisins.* Each handler shall report: (i) The total net weight of the standard raisins acquired during the week, segregated when appropriate as to reserve and surplus tonnage; (ii) the locations of the reserve and surplus tonnage raisins; and (iii) the cumulative totals of such acquisitions (as so segregated) from the beginning of the then current crop year.

(3) *Storable off-grade raisins acquired for the account of the committee.* Each handler shall report: (i) The net weight of the storable off-grade raisins acquired by the handler for the account of the committee during the week; (ii) the locations of such storable off-grade raisins; and (iii) the cumulative totals at the end of the week of such acquisitions from the beginning of the then current crop year.

(4) *Off-grade raisins returned to tenderers (producers or dehydrators).* Each handler shall report with respect to each lot of off-grade raisins which the handler returned during the week to the tenderer pursuant to subparagraph (1) of § 989.58 (e): (i) The inspection certificate number; (ii) the net weight as indicated on the inspection certificate; and (iii) the name and address of the tenderer; and (iv) the date the lot was returned to the tenderer.

(5) *Standard raisins received for memorandum storage.* Each handler shall report: (i) The net weight of the standard raisins received by the handler during the week for memorandum receipt, storage, bailment, or warehousing (raisins received other than by acquisitions or by interhandler transfers); (ii) the net weight of raisins acquired during the week from his holdings of such raisins so received, and included with the acquisitions required to be reported pursuant to subparagraph (2) of this paragraph; (iii) the net weight of such raisins so received which he returned during the week to the persons from whom they were received; and (iv) the net weight(s) and location(s) of such raisins so received which at the end of the week were in the handler's possession or control.

(c) *Special off-grade raisin reports*—(1) *Monthly report of off-grade raisins acquired by processors under exemption.* Each processor who avails himself of the exemption provided in § 989.161 and acquires off-grade raisins (as the first handler thereof) shall file with the committee on or before the fifth day of each month a report of all such raisins acquired during the preceding month. Such report shall show for each varietal type and each acquisition: (i) the name and address of the person from whom the off-grade raisins were acquired; (ii) the date of the acquisition; (iii) the net weight of each acquisition; and (iv) the ultimate disposition made or to be made of such raisins.

(2) *Disposition reports by processors.* Each processor shall file with the committee, upon its request, such of the following information and for such period as the committee shall specify: (i) The quantity of raisins and raisin material used by the processor in his processing operations, segregated as to the processing outlets and the kinds of raisins or raisin material which the committee shall specify; and (ii) the quantity of raisins or raisin material sold or otherwise disposed of by the processor, segregated as to specified outlets and kinds of raisins or raisin material.

(3) *Off-grade raisins received under agreements with the tenderers (producers or dehydrators) for reconditioning.* Each handler who has received off-grade raisins pursuant to subparagraph (3) of § 989.58 (e), shall file with the committee on or before the fifteenth day of each month a report of all such raisins reconditioned by him during the preceding month. Each such report shall contain the following information: (i) The name and address of the person from whom the off-grade raisins were received for reconditioning; (ii) the net weight of the off-grade raisins; (iii) the net weight of the standard raisins after reconditioning; (iv) inspection certificate number covering the recovered standard raisins; (v) whether the standard raisins were acquired by the handler or returned to the tenderer; (vi) net weight of the residual matter after reconditioning; and (vii) disposition of such residual matter.

(4) *Disposition by handlers (other than processors) of off-grade raisins, stemmer waste, or raisin offal.* Each handler who is not a processor shall report to the committee upon its request all sales and other dispositions of off-grade raisins, stemmer waste, or raisin offal resulting from his sorting and/or packing operations, made during such period as is specified in the request. Such report shall be filed on a form furnished by the committee and shall include the following information: (i) Date of sale or other disposition; (ii) name and address of buyer; and (iii) description and weight of material sold.

(d) *Monthly report of dispositions of free tonnage raisins.* Each handler who is not a processor shall file with the committee on or before the fifth day of each month a report for the preceding month showing the aggregate quantity of each varietal type of free tonnage packed raisins and standard natural condition raisins which were shipped (exclusive of interhandler or interplant transfers within the State of California) or otherwise disposed of by him during the month. Such information shall be segregated as to (1) domestic outlets (exclusive of Federal Government purchases) according to consumer and bulk packs, (2) Federal Government purchases, (3) export outlets according to consumer and bulk packs, and (4) each of any other outlets for such raisins (other than interhandler or interplant transfers) in which the handler has made disposition of such raisins. For the purposes of this paragraph, Canada shall be considered as a domestic outlet and not an export outlet.

(e) *Reports of interhandler transfers.* Any handler who transfers free tonnage raisins to another handler within the State of California shall file with the committee, not later than five calendar days following such transfer a report showing: (1) The date of transfer; (2) the name(s) and address(es) of the handler or handlers and the locations of the plants; (3) the varietal type, net weight and condition of the raisins transferred; and (4) if packed, the inspection certificate number in the event such raisins had been inspected prior to such transfer. Two copies of such report shall be forwarded to the receiving handler at the time the report is submitted to the committee, on one of which the receiving handler shall certify to the receipt of such raisins and submit it to the committee within five calendar days after the raisins or the copies of such report have been received by him, whichever is later.

(f) Each handler who obtains an exemption pursuant to § 989.159 (f) for the shipment of gift or specialty packs of raisins shall file with the committee on a copy of the approved application for exemption a report showing the quantity of raisins shipped or disposed of under such exemption. The handler shall file the report promptly after the end of the crop year or after completion by him of all shipments of such exempted raisins, whichever is earlier.

(g) *Reports pertaining to the release of reserve tonnage and marketing policy information.* Upon request of the committee, each handler shall file with the committee on forms furnished by it a report containing such of the following information for each specified varietal type of raisins as the committee may request: (1) The quantity of free tonnage raisins held by him in and outside California as of the date specified in the committee's request, segregated by the portion sold and the portion not sold; (2) the total quantity of raisins expected to be acquired by him subsequent to the date specified by the committee, pursuant to purchase contracts with producers and dehydrators, which are in effect as of the date specified by the committee; (3) the weighted average price paid by him to producers and dehydrators for free tonnage raisins, natural condition basis, during the period specified by the committee and the quantity of raisins for which such average was computed; (4) the quantity of free tonnage raisins sold or sold and shipped (as specified by the committee) by him during a period specified by the committee, segregated to show the quantities sold or sold and shipped in (i) domestic markets, including Canada, and (ii) foreign markets, detailed by country; (5) the average weighted f. o. b. sales prices received from sales during a period specified by the committee of raisins in 30 pound fibre cases in domestic markets (including Canada) and the quantity of raisins for which such average prices were computed. Each such report shall be filed not later than the end of the fifth calendar day following either the date of the request by the committee or the ending date of the period to be covered by the report, whichever is later.

(h) *Certification of reports.* All reports submitted to the committee pursuant to this part shall be dated, and certified to the United States Department of Agriculture and to the Raisin Administrative Committee as to the truthfulness, accuracy and completeness of the information shown thereon.

(i) *Reporting by non-profit cooperative associations.* Non-profit cooperative associations need not submit door tags, door receipts, weight certificates or other similar documents with its reports as to raisins received or acquired from its members.

§ 989.176 *Records.* Each handler shall maintain complete, accurate, and current records of all of his business affairs concerning which he is required to

file reports with the committee, and shall maintain such records for at least two years after the termination of the crop year in which the transaction occurred.

It is hereby found and determined that good cause exists for not postponing the effective date of this order later than the fourth day after its publication in the FEDERAL REGISTER (see § 4 (c) of the Administrative Procedure Act; 5 U. S. C. 1001 *et seq.*) in that: (1) These administrative rules and procedures are designed to permit more effective administration of this part and should become effective as soon as practicable; (2) these administrative rules and procedures are quite complicated and have necessitated considerable discussion between this Department and the raisin industry; (3) such discussion has involved a thorough consideration of the known aspects in which differences of opinion or views have occurred; (4) also, notice of proposed rule making in this connection was published in the FEDERAL REGISTER issue of March 23, 1956, and no written data, views or comment have been received from any interested person other than the Raisin Administrative Committee; (5) the said rules and procedures were proposed by the Raisin Administrative Committee, on which raisin handlers and other industry groups are represented, their substance has been made known to the raisin industry generally, and hence handlers and other members of the raisin industry have general knowledge of these rules and procedures; and (6) any preparation necessary for compliance should not require more than three days.

Issued this 26th day of June 1956, to become effective on the fourth day after publication in the FEDERAL REGISTER.

[SEAL] ROY W. LENNARTSON,
*Deputy Administrator,*
*Marketing Services.*

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

#### Subchapter A—Civil Air Regulations

[Supp. 6]

#### PART 20—PILOT CERTIFICATES

#### PREREQUISITES FOR TAKING INSTRUMENT RATING WRITTEN EXAMINATION

The recent significant increase in the number of pilots making application for instrument ratings has resulted in numerous requests to take the instrument rating written examination before the completion of 30 hours of instrument time. The present instrument time requirement was established to provide suitable preparation for the examination by all applicants since no certificated instrument flight ground school is operated independently from an approved instrument flying course.

It now appears that instrument flight ground schools are active in many parts of the country, and recent instrument publications and study guides make the preparation for the written examination practicable without an appreciable amount of instrument flight instruction and practice.

Accordingly, this supplement is issued to delete the requirement for instrument time as a prerequisite of the instrument rating written examination. An applicant for the instrument rating written examination will hereafter be required only to present evidence of 150 hours of flight time as pilot-in-command, including 50 hours of cross-country flying; or the written recommendation of the chief flight instructor of a certificated instrument flying school in which he is enrolled.

Section 20.42–2, as published in 21 F. R. 888 on February 9, 1956, is revised to read as follows:

§ 20.42–2 *Prerequisites for taking the instrument rating written examination (CAA policies which apply to § 20.42 (a)).* The applicant for the instrument rating written examination will be required to show (a) that he meets the experience requirements of § 20.42 (b) (1); or (b) if enrolled in an instrument flight course in a certificated instrument flying school, the written recommendation of the chief flight instructor of that school.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interprets or applies secs. 601, 602, 52 Stat. 1007, 1008, as amended; 49 U. S. C. 551, 552)

This supplement shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] C. J. LOWEN,
*Administrator of Civil Aeronautics.*

## TITLE 19—CUSTOMS DUTIES

### Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 54118]

#### PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

#### MISCELLANEOUS AMENDMENTS

The Bureau has approved the recommendations of the Hoover Task Force Commission on Paperwork Management to consolidate certain customs forms listed below:

1. Customs Forms 3309, 3319, and 3343 will be consolidated with customs Form 3307, and the consolidated form will be entitled "Declaration for Free Entry of Works of Art, Artistic Antiquities, Original Paintings, Statuary, Etc.," and designated as customs Form 3307.

2. Custom Forms 3333 and 3335 will be consolidated with customs Form 3325, and the consolidated form will be entitled "Declaration on Entry of Theatrical Effects for Temporary Use or of Works of Art, Etc., for Temporary or Permanent Exhibition," and designated as customs Form 3325.

Part 10, Customs Regulations, is accordingly amended as follows:

1. Section 10.34 is amended by substituting form number "3325" for "3333."

2. Section 10.48 (b) (3) is amended by substituting form number "3307" for "3309."

3. Section 10.49 (a) is amended by substituting form number "3325" for "3335".

4. Section 10.50 is amended by substituting form number "3307" for "3319".

5. Section 10.53 (b) and (c) is amended by substituting form number "3307" for "3343" each time that it appears.

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624)

The foregoing amendments, which contemplate the use of consolidated customs Forms 3307 and 3325, shall become effective September 1, 1956, at which time such forms will be printed and available for distribution. The present issues of all the forms involved shall continue to be used until the consolidated forms are available.

Collectors of customs shall order necessary quantities of the consolidated forms from the Section of Forms in New York, and when supplies are received, the numbers and titles of Forms 3309, 3319, 3333, 3335, and 3343, shall be deleted from official copies of the Catalogue of Customs Forms, and the new titles of Forms 3307 and 3325 shall be inserted therein.

[SEAL] RALPH KELLY,
*Commissioner of Customs.*

Approved: June 22, 1956.

DAVID W. KENDALL,
*Acting Secretary of the Treasury.*

[F. R. Doc. 56-5177; Filed, June 28, 1956; 8:54 a. m.]

## TITLE 20—EMPLOYEES' BENEFITS

### Chapter II—Railroad Retirement Board

#### PART 200—PROCEDURE AND FORMS

#### MISCELLANEOUS AMENDMENTS

1. Paragraph (b) of § 200.1 of Part 200, Subchapter A, Chapter II, Title 20, is amended to read as follows:

(b) *Unemployment, sickness, and maternity benefits.* (1) Claims for unemployment benefits are handled by a comprehensive organization set up in the field. Under agreements between the Railroad Retirement Board and covered employers, the employers select employees of theirs to act as unemployment claims agents. These agents perform their services, specified in the agreement, in accordance with instructions issued by the Board but under general supervision and control of the employer. In accordance with the agreements, employers are reimbursed for such services at the rate of 50 cents for each claim taken by an unemployment claims agent and transmitted to the Board. There are some 30,000 such contract claims agents. An unemployed person who wishes to file a claim for unemployment benefits need only consult his recent railroad employer to be directed to the unemployment claims agent with whom he may file his claim.

(2) When an employee makes his first claim in any benefit year, he identifies himself and fills out an application for unemployment benefits (UI–1), an application for employment service (Form ES–1), and a pay rate report (Form UI–1a) to be used in determining the rate at which benefits may be paid. The employee is given an informational booklet UB–4 and an Unemployment Bulletin No. UB–3 informing him of his responsibilities and explaining the statements to which he is required to certify and to which he does certify when he registers for benefits. When the applications and pay rate report are completed, the unemployment claims agent sends them to the nearest district or branch office of the Board. That office inspects the applications to detect errors and omissions and to note items requiring investigation. The office also attempts to verify the employee's statement about his pay rate unless the unemployment claims agent has already done so. The application for unemployment benefits and the pay rate report are then sent to the appropriate regional office of the Board. The application for employment service is retained in the district or branch office for use in referring the claimant to suitable job openings. On the basis of the information furnished on the application for unemployment benefits, the regional office determines whether the applicant is a qualified employee (that is, whether he earned $400 or more from covered employment in the base year). The applicant is notified by letter if he is found to be not qualified.

(3) In addition to the application forms and pay rate report, the claimant executes a registration and claim for unemployment insurance benefits (Form UI–3). In substance, registration consists of his appearing before an unemployment claims agent during the agent's working hours and signing his name on the registration and claim form for the days he wishes to claim as days of unemployment. Registration for any day must be made on the day or not later than the sixth calendar day thereafter, except that, if such calendar day is not a business day, the claimant may make his registration on the next following business day. In other words, a claimant must ordinarily appear for registration at seven-day intervals. Under certain circumstances, such as illness, employment, looking for employment, etc., an employee may make a delayed registration for any day for which he is unable to register within the time limit mentioned above. The unemployment claims agent sends the claim to the nearest district or branch office where it is inspected with a view to calling the claimant in for interview or referral to job openings, detecting errors and omissions, and noting items requiring investigation. The claim is then forwarded to the regional office.

(4) Claims for sickness benefits are handled by the field organization of the Board. An employee need not register in person for sickness benefits but claims for such benefits must be made on the forms prescribed by the Board and executed by the individual claiming benefits except that, if the Board is satisfied that an employee is so sick or injured that he cannot sign forms, the Board may accept forms executed by someone else in his behalf. Forms used in connection with claims for sickness benefits may be obtained from a railroad employer, a railway labor organization, or any Board office. An application for sickness benefits (Form SI–1a) and the required statement of sickness (Form SI–1b) may be mailed to any office of the Board (see Part 335 of this chapter). It is important that a statement of sickness be filed promptly, for no day can be considered as a day of sickness unless a statement of sickness with respect to such day is filed at an office of the Board within ten days. The application and statement of sickness are forwarded to a regional office where they are examined. If it appears that the employee is entitled to benefits, the regional office will send him a claim form covering a 14-day registration period, and a pay rate report (Form SI–1d). The employee completes the forms, indicating on the claim form the days during the period he claims as days of sickness and returns both forms to the regional office to which the claim form is preaddressed. When additional medical information is needed, a form for supplemental doctor's statement is sent to the employee. This should be filled out by a doctor and returned to the Board.

(5) Maternity benefits must be applied for on a form prescribed by the Board. A statement of maternity sickness, executed by a person authorized to execute statements of sickness (see Part 335 of this chapter), is required also. The necessary forms may be obtained from a railroad employer, a railway labor organization, or any Board office. An application for maternity benefits (Form SI–101) and the statement of maternity sickness (Form SI–104) may be filed in person or by mail with any Board office. It is important that the statement of maternity sickness be filed promptly since no day can be considered as a day of sickness in a maternity period unless a statement of maternity sickness with respect to the day is filed at an office of the Board within ten days. As in the case of claims for sickness benefits, the forms are forwarded to a regional office. Claim forms are mailed to the claimant and are pre-addressed for return to the regional office.

(6) Whether benefits are payable to a claimant and, if so, the amount of benefits payable, is determined, with respect to claims for unemployment, sickness, and maternity benefits, by the regional office. The names and addresses of claimants to whom benefits are found payable, and the amounts payable to them, are certified to the local disbursing office of the Treasury Department which mails the benefit checks to the claimants. If a claim is denied in whole or in part, an explanation is given to the claimant by letter.

(7) The rate at which benefits are payable is determined from the claimant's railroad wages earned in a base year period or from his daily pay rate for his last railroad employment in the base year period, whichever will result in the higher benefit rate. His daily benefit rate will be at least half as much as his daily pay rate for his last railroad employment in the base year period, but not exceeding $8.50.

(8) Any qualified employee whose claim for benefits under the Railroad Unemployment Insurance Act has been denied in whole or in part may, within one year from the date such denial is communicated to him, appeal from the initial determination, and such appeal will be heard before an impartial referee. An unsuccessful claimant in an appeal before such referee may appeal to the Board. (For further details of appeals procedure by claimants for benefits and for appeals procedure by employers, see Parts 319 and 320 of this chapter.)

Any claimant, or any railway labor organization organized in accordance with the provisions of the Railway Labor Act, of which the claimant is a member, or any other party aggrieved by a final decision pursuant to the Railroad Unemployment Insurance Act, may, only after all administrative remedies within the Board will have been availed of and exhausted, obtain a review of such final decision of the Board by filing a petition for review within 90 days after the mailing of notice of such decision to the claimant or other party, or within such further time as the Board may allow, in the United States court of appeals for the circuit in which the claimant or other party resides or will have had his principal place of business or principal executive office, or in the United States Court of Appeals for the Seventh Circuit, or in the United States Court of Appeals for the District of Columbia Circuit.

2. Section 200.2 is amended to read as follows:

§ 200.2 *Description of forms and instructions.* (a) Following are listed descriptions of forms and instructions as to the scope and content of papers, reports, or examinations used in the Board's functioning. The forms are grouped on a functional basis. Items (1) through (88) deal with railroad retirement activities. Items (89) through (96) concern employment service program, and items (96) through (124) concern the sickness and unemployment insurance program. Forms may be secured upon application in person or by mail at any of the Board's offices.

(1) *Form AA-1, Application for Employee Annuity under The Railroad Retirement Act.* This form must be executed by each individual who wishes to file claim for an employee annuity under the Railroad Retirement Act. Information to be included on the form consists of data required to identify the employee on the records of the Board and on the employer's pay roll or other records; statements as to whether or not credit for military service and disability are claimed; present employment status; and the date on which the individual wishes to have the annuity begin. Form AA–1 must be signed by the individual in accordance with § 210.4 of this chapter.

(2) *Form AA–1a, Request for Supplemental Information when Annuitant or Pensioner Attains Age 65.* This form would provide supplementary information required for Board records. Information requested includes the claimant's social security account number, his mar-

ital status in some detail, and whether he has children who are under age 18 or disabled.

(3) *Form AA–1b, Application for Recomputation of Employer Annuity under The Railroad Retirement Act.* This form is for use of annuitants who wish to apply for a recomputation of an annuity to include service rendered after the annuity beginning date.

(4) *Form AA–2P, Record of Employee's Prior Service.* This is a form requiring a statement of the employee's service and compensation prior to January 1, 1937, to be prepared by the employer from his records for each individual who on August 29, 1935, was an employee. The employer is also required to report on this form information concerning the employee's date of birth as shown on employer records and the employee's status on August 29, 1935.

(5) *Form AA–2P–Bro., Supplemental Data Concerning Occupation of Employee During Base Period (Board Request).* This is a form, to be completed by an employer, requiring a statement of an employee's occupations during each year or period for which compensation prior to January 1, 1937, is reported. Requested by the Board when data is required to supplement report furnished on AA–2P or AA–2P–Opt.

(6) *Form AA–2P–Brs., Supplemental Section 7 of Form AA–2P (Board Request).* This is a form requiring a statement of compensation by an employer when employee's compensation initially reported by the employer for the period January 1, 1924, to December 31, 1931, is insufficient to permit a determination of monthly compensation for service prior to January 1, 1937.

(7) *Form AA–2P Opt., Optional Section 7 of Form AA–2P.* This form provides for statement of employee's compensation during the period 1924 through 1931 to be used in lieu of section 7 of Form AA–2P by employers whose pay rolls were prepared on a weekly basis during the period covered by report.

(8) *Form AA–3, Application of Wife for Spouse's Annuity.* This form must be executed by the wife of an annuitant in filing claim for a spouse's annuity under the Railroad Retirement Act. The form requires information needed to determine a wife's eligibility for a spouse's annuity.

(9) *Form AA–3a, Supplement to Application for Wife's Annuity.* This form is to be completed by a wife, who has filed a claim for a spouse's annuity, to provide supplemental information to enable the Board to detremine if the wife may have eligibility on the basis of having in her care a disabled child who is 18 years of age or older.

(10) *Form AA–4, Application of Husband for Spouse's Annuity.* This form must be executed by the husband of a female annuitant in filing claim for a spouse's annuity under the Railroad Retiement Act. This form requires information required by the Board to determine a husband's eligibility for a spouse's annuity.

(11) *Form AA–5, Application for Substitution of Payee for Employee or Spouse Annuitant.* This form is to be used where a guardian or other legal representative is appointed, or a substitute payee under section 19 (a) of the Railroad Retirement Act is requested, for an employee or a spouse after the award of an annuity to him or her. The form requires information needed to show the authority of the legal representative, or the basis for recognizing the substitute payee to receive payment on behalf of the employee or the spouse and requires the signature of the person applying. The form also lists the conditions under which an annuity is not payable and includes a form of agreement concerning the payment of the annuity and for the reporting of events which would affect such payment.

(12) *Form AA–11a, Designation or Change of Beneficiary.* This is a form prescribed in accordance with subsection (f) (2) of section 5 of the Railroad Retirement Act, as amended, on which an individual who was an employee after December 31, 1936, may designate the person or persons whom he wishes to receive any death benefits payable under such paragraph. The form is also to be used to change a designation of beneficiary made on a Form AA–11a previously filed with the Board. It must be signed by the individual and witnessed by two persons who are not designated on the form as beneficiaries.

(13) *Form AA–12, Notice of Death and Statement of Compensation.* This form is to be used by an employer in giving the Board the notice of death of an employee required by § 250.2 of this chapter and for reporting compensation for the deceased in specified periods.

(14) *Form AA–12a, Notice of Death and Statement of Compensation.* This form is to be used by an employer to report service and compensation of a deceased employee when requested by the Board. If Form AA–12 has been furnished when the request is received Form AA–12a need not be furnished.

(15) *Form AA–15, Employee's Statement of Compensated Service Rendered Prior to January 1, 1937, to Employers Under the Railroad Retirement Act of 1937.* This form is for a statement to be submitted by employees who wish to claim credit for service performed before 1937.

(16) *Form AA–17, Application for Widow's or Widower's Insurance Annuity.* This is the form of application for insurance annuity and lump-sum benefits by the widow or widower of a deceased employee; it may be considered as an application also for any insurance benefits payable under Title II of the Social Security Act as amended.

(17) *Form AA–17a, Application for Widow's or Widower's Insurance Annuity.* This form is to be used where an applicant for widow's or widower's insurance annuity has previously filed an application for a lump-sum death payment or a widow's current insurance annuity; it may be considered as an application also for any insurance benefits payable under Title II of the Social Security Act as amended. Where the applicant has not previously filed an application for a widow's current insurance annuity, Form AA–17 is to be filed.

(18) *Form AA–18, Application for Widow's and Child's Insurance Annuities.* This is the form of application for insurance annuity benefits by the widow on her own behalf and on behalf of the children of a deceased employee; it may be considered as an application also for any insurance benefits payable under Title. II of the Social Security Act as amended.

(19) *Form AA–19, Application on Behalf of Child for Child's Annuity.* This is the form of application for insurance annuity benefits on behalf of a child; it may be considered as an application also for any insurance benefits payable under Title II of the Social Security Act as amended.

(20) *Form AA–19a, Supplement to Application for Widow's and/or Child's Insurance Annuity.* This form is to be used in providing information to permit the Board to determine whether a child age 18 or older who is alleged to be disabled would meet the eligibility requirements for a child's insurance annuity, other than that of disability. A widow caring for an incompetent disabled child age 18 or over and claiming initial entitlement on that basis or a widow claiming continued entitlement on the same basis are to use this form.

(21) *Form AA–20, Application for Parent's Insurance Annuity.* This is the form to be used in applying for parents' insurance annuity benefits; it may be considered as an application also for any insurance benefits payable under Title II of the Social Security Act as amended.

(22) *Form AA–21, Application for Lump-Sum Death Payment and Annuities Unpaid at Death.* This is the form of application for lump-sum death payments due with respect to an employee's death and for annuities due the employee but unpaid at his death and may be considered as an application also for any insurance benefits payable under Title II of the Social Security Act as amended.

(23) *Form AA–22, Application for Substitution of Payee for Survivor Annuitant.* This form is to be used, in applying for payment of a survivor annuity previously awarded, by either a legal representative of a survivor annuitant or a person requesting to be recognized under section 19a of the act as substitute payee of the annuity of such annuitant.

(24) *Form AC–1, Appeal from Initial Decision of Bureau of Retirement Claims.* This is a form prescribed for filing of an appeal from an initial decision of the Bureau of Retirement Claims with respect to a determination made by that Bureau in connection with an application for annuity or death benefits in accordance with § 260.2 of this chapter.

(25) *Form AC–2, Appeal from Decision of The Appeals Council.* This is the form prescribed for filing from a decision of the Appeals Council with respect to a determination made in connection with an application for annuity or death benefits in accordance with §§ 260.3 and 260.4 of this chapter.

(26) *Form AC–6, Appeal from Initial Determination as to Service and Compensation Prior to January 1, 1937.* This form is prescribed for filing an appeal to the Appeals Council from the initial decision of the Bureau of Retirement Claims with respect to an individual's record of service or compensation prior to January 1, 1937, as established, or failure to establish such record, in the absence of an application for benefits under the Railroad Retirement Act based on such service.

(27) *Form AC–8, Appeal from Decision of The Appeals Council (Record of Prior Service).* This is the form for an individual's final appeal to the Board from any decision of the Appeals Council which was made in response to filing Form AC–6

(28) *Form BA–3, Quarterly Report of Creditable Compensation.* This is to be used by employers in reporting the compensation paid to each employee in each month in a calendar quarter as required to be submitted under § 250.3 of this chapter.

(29) *Form BA–3a, Annual Report of Creditable Compensation.* This form is to be used by employers authorized by the Board to report on an annual basis to report for each employee the service months in which an individual worked, the total service months earned, and the total creditable compensation paid during the year as is required to be submitted under § 250.3 of this chapter.

(30) *Form BA–4, Report of Creditable Compensation Adjustments.* This form is to be prepared and submitted each month by employers to report any adjustment in creditable compensation which has been made by the employer and which would affect the amount of an employee's benefits under either the Railroad Retirement Act or the Railroad Unemployment Insurance Act.

(31) *Form BA–5, Summary Report of Compensation of Employees.* Employers reporting creditable compensation are also required to prepare and submit this form which is a quarterly summary of all compensation paid and any adjustments made during the quarter.

(32) *Form BA–6, Certificate of Service Months and Wages.* This form, which notifies employees of the retirement and unemployment insurance credits established in their accounts, is to be submitted when filing for unemployment, sickness or maternity benefits.

(33) *Form BA–12a, Advice of Multiple Account Members.* This form is to be used by an employer to notify the Board that an employee has more than one account number.

(34) *Form BA–12b, Advice of Name Corrections.* This form is to be used by an employer to notify the Board of a correction that should be made in an employee's name as it is entered on Form CER–1, Employee Registration.

(35) *Form CER–1, Employee Registration.* This form must be executed by each individual entering, for the first time, employment covered by the Railroad Retirement and Railroad Unemployment Insurance Acts and is to be forwarded to the Board through the employer. The identifying information included on this form is for the purpose of enabling the Board to assign the individual an account number and to establish an individual account to which service and compensation under the Acts may be credited.

(36) *Form DC–1, Employer's Quarterly or Annual Report of Contributions Under The Railroad Unemployment Insurance Act.* This is a form prescribed by § 345.5 of this chapter to be filed by an employer under the Railroad Unemployment Insurance Act to show the amount of contributions being remitted for the period covered.

(37) *Form DC–2, Employee Representatives Report of Compensation.* This form is used by an individual serving as an employee representative under the Railroad Retirement Act for reporting employee representative service and compensation and is to be filed annually or upon termination of employee representative service.

(38) *Form DC–2a, Employee Representative's Status Report.* This form provides for a statement to be made at the request of the Board by an individual claiming credit for service under the Railroad Retirement Acts as an employee representative to enable the Board to determine if the service is creditable under those acts.

(39) *Form DC–3, Claim for Abatement or Refund of Contributions, Interest, Penalty.* This form is to be used by employers in claiming abatement or refund of contributions, interest or penalty under the Railroad Unemployment Insurance Act.

(40) *Form ERR–8, Employment Relation Questionnaire.* This is a form on which an employer provides information concerning an applicant for an annuity who was not in compensated service on August 29, 1935, and did not perform six months of service after August 29, 1935, and prior to January 1, 1946.

(41) *Form G–3, Report of Physical Examination.* This form is to be used by a doctor of medicine to report his findings when requested by the Board to make a physical examination of an applicant for benefits under the Railroad Retirement and Railroad Unemployment Insurance Acts. It is used also to report the continuance of the disability of an annuitant previously awarded a dsability annuity under the Railroad Retirement Act.

(42) *Form G–3EMP., Report of Physical Examination.* This form is to be used by an employer in supplying medical evidence in a disability annuity case. The form may also be used by an applicant whose claim for a disability annuity has been denied, and who is dissatisfied with the decision on his claim, for the purpose of supplying additional medical evidence from his own physician, or any other physician of his choice. Such evidence must be obtained and submitted at no expense to the Board.

(43) *Form G–3x, Claim for Reimbursement for Medical Examination.* This form, prescribed by the Comptroller General, is to be used in claiming reimbursement for services rendered in performing physical examinations.

(44) *Form G–4, Authorization to Furnish Medical Examination.* This form is to be used by an applicant for a disability annuity to authorize the Board to obtain from an employer medical evidence regarding the applicant's physical condition.

(45) *Form G–19, Declaration of Person Receiving Annuity Payments under The Railroad Retirement Act.* This form is to be completed by beneficiaries in foreign countries to provide information of work and earnings which might affect payment of benefits. It is released through the Department of State to all survivor annuitants, all retirement and spouse annuitants whose annuities have been increased under the Social Security Act minimum provision of the Act, and all disability annuitants under age 65, who reside outside of the United States.

(46) *Form G–19a, Annual Report of Person Receiving Insurance Annuity Payments under The Railroad Retirement Act.* This form is to be completed by survivor annuitants to provide information on work and earnings which might affect payment of benefits. The form is released annually.

(47) *Form G–19b, Annual Report of Person Receiving a Retirement or Spouse Annuity under The Railroad Retirement Act.* This form is to be completed by all retirement and spouse annuitants, who are under age 72 as of January 1, and whose annuities have been increased under the Social Security Act minimum guarantee, and to such persons whose annuities were adjusted during the year because of earnings. The form is released annually.

(48) *Form G–19c, Annual Report of Disabled Child.* This form is to be completed by the beneficiary, the mother, or the guardian to provide information about the disabled physical condition and the work and earnings of a child eligible otherwise for a child's annuity.

(49) *Form G–45, Employee Status Questionnaire.* This form is to be used by employers under the Railroad Retirement Act to provide information necessary for determining whether a claimant is the employee of the employer.

(50) *Form G–60, Application for Benefits upon Death of Employee, Applicant, or Annuitant.* This form is to be executed by an individual who wishes to apply for death benefits payable under the Railroad Retirement Act of 1935, and by a legal representative applying for death benefits under the Railroad Retirement Act of 1937 in accordance with Part 236 of this chapter.

(51) *Form G–70, Protest of Record of Service Months and Wages.* This form is to be used by an employee in protesting the Board's record of his service months and wages, unless he is applying for benefits under the Railroad Unemployment Insurance Act. This form provides for showing the employee's claim of the amount of wages he earned in each month of the year or years, the name of the employer from which they were earned, and the place of employment.

(52) *Form G–74, Insurance Annuitant's Report to Railroad Retirement Board.* This form is to be used by a survivor insurance annuitant to report earnings or other events which might preclude payment of the survivor annuity.

(53) *Form G–78, Statement of Remarriage of Widow and Acknowledgment of Ineligibility for Monthly Insurance Benefits at Age 60.* This form is to be used by a remarried widow to enable payment to her of the residual lump sum without the expense of submitting formal proof of the remarriage.

(54) *Form G–87, Report of Employee Representative Service and Compansation.* This form is to be used to report service and compensation of employee representatives.

(55) *Form G–88, Certificate of Termination of Service and Relinquishment of Rights.* This form is to be used by an applicant for a retirement annuity to certify that he has ceased working for an employer and, except for an applicant under age 65 for a disability annuity, has relinquished all rights to return to service of his last employer, whether or not covered by the Railroad Retirement Act.

(56) *Form G–88a, Employer's Supplemental Report of Service and Compensation.* This is a form appearing on the reverse of Form G–88, Employee's Certificate of Termination of Service and Relinquishment of Rights, and is to be completed by an employer in respect to service rendered between the period covered by the employer's last report of service and compensation and the date of the employee's termination of service.

(57) *Form G–89, Authority for Change of Effective Date.* This is the form to be used by an applicant for a retirement annuity to authorize a change in or clarifying his annuity beginning date, or to set a beginning date upon reinstating a canecelled application. The form must be signed before and by two witnesses.

(58) *Form G–108, Request for Supplemental Service Information.* This form is for use by an annuity applicant in claiming service which has been reported by the employer but not previously claimed or to furnish additional information for service previously claimed but not verified by the employer. Detailed information such as exact name of carrier, exact pay-roll name, for each such period of service is to be shown.

(59) *Form G–118, Applicant's Statement Regarding Alleged Adoption.* This form is to be executed by an applicant filing for a child's insurance annuity on behalf of a child, where adoption by the deceased employee is alleged but no formal adoption proceedings occurred.

(60) *Form G–124, Statement of Marital Relationship.* This is a form to be used, upon request, to supply information concerning marital status by a woman claiming to be the wife of an employee by other than a ceremonial marriage.

(61) *Form G–126, Election to Receive a Residual Payment Instead of Future Monthly Insurance Benefits Based on Service under the Railroad Retirement Act.* This form is to be used by a widow or parent to make an irrevocable election, under section 5 (f) (2) of the Railroad Retirement Act of 1937, as amended, to receive the lump sum payment provided by that section in lieu of future monthly benefits which might otherwise become payable.

(62) *Form G–129, Waiver of Annuity or Pension Payments under The Railroad Retirement Act.* This form is to be used by annuitants or pensioners under the Railroad Retirement Act who wish to waive payment of all or part of their benefits in accordance with section 20 of the act as amended.

(63) *Form G–130, Waiver of all Claims Against the Estate of a Deceased.* This form is to be used by an individual desiring to waive a claim against an estate to permit the payment of benefits under the Railroad Retirement Act to the estate without the requirement of formal administration (see Part 236 of this chapter). In executing the form the individual waives all of his claim against the estate and releases and discharges the United States and the Railroad Retirement Board from any and all obligations by reason of payment to the estate of the full amount due.

(64) *Form G–131, Authorization of Payment and Release of all Claims to Death Benefits and Annuity Payments.* This form is to be used by an individual entitled to share in a benefit payable under the Railroad Retirement Act to an estate, to authorize payment to some other person.

(65) *Form G–133, Revocation of Election Made to Provide Survivor Annuity for Spouse.* This form is to be used by any annuitant or employee under the Railroad Retirement Act who has elected a joint-and-survivor annuity and wishes to revoke the election.

(66) *Form G–154, Authorization to Furnish Information.* This form is to be completed in authorizing the Board to furnish information from its records.

(67) *Form G–157, Certification of Expenses Incurred in the Performance of Express Service.* This form is to be used by an applicant for an annuity who performed service for an express company on a commission basis during the test period (1924–1931) to show the expenses he incurred in the work.

(68) *Form G–176a, Annuitant's Report to Railroad Retirement Board.* This form, notifying disability annuitants of the work deduction provisions of the Railroad Retirement Act, is to be signed by the annuitant to certify that he understands the explanation of the provisions of the law and is to be returned to the Board.

(69) *Form G–179, Annuitant's Report to Railroad Retirement Board.* This form is to be used by a retirement annuitant and a spouse annuitant whose annuities are increased under the "social security minimum" provision of section 3 (a) of the Railroad Retirement Act, to report excess earnings or other events which might effect payment of the annuity.

(70) *Form G–345, Wife's Certification.* This form is to be used by women retirement annuitants, whose husbands apply for spouse's annuities, to provide information concerning their marriage and living together.

(71) *Form G–346, Husband's Certification.* This form is to be used by male retirement annuitants, whose wives apply for spouse's annuities, to provide information concerning their marriage and living together.

(72) *Form G–372a, Request for Additional Information Concerning Deceased Employee.* This form is used to secure information when the original notice of the death of an employee does not contain sufficient information to identify the deceased individual on the Board's records.

(73) *Form G–377, Report Concerning Employment.* This form is for use by survivor annuitants, whose annuities have been suspended because of a report of expected annual earnings in excess of $1200, or of employment in the railroad industry, in reporting a change in the annuitant's situation to enable the Board to prevent unnecessary withholding of payments.

(74) *Form G–377a, Report Concerning Employment Outside United States.* This form is for use of survivor annuitants, whose annuities have been suspended because of a report that the annuitant is working outside the United States on seven or more days per month, to report that he has stopped such work. It includes an agreement to report any such work in the future and to return any check for any month of such work.

(75) *Form G–466, Husband's or Widower's Certificate of Support.* This form is to be used by a husband or widower of a female annuitant under the Railroad Retirement Act, when applying for an annuity, to certify that he was receiving at least one-half of his support from his wife.

(76) *Form G–467, Parent's Certificate of Dependency and Support.* This form is used by a claimant in furnishing information relative to a determination of status as a dependent parent of a deceased employee for the purpose of receiving a parent's annuity.

(77) *Form G–468, Certificate of Responsibility of Minor Applicant.* This is a form on which applicant for benefits who is still a minor is to provide information to support a request that benefits be paid without the appointment of a guardian and requires in addition, a statement by two adults that they are personally acquainted with the applicant and that to the best of their knowledge and belief the applicant's statements are true and complete.

(78) *Form G–469, Certificate of Guardian-In-Fact or Person In Loco Parentis.* Form to be used by a guardian-in-fact or a person in loco parentis of a minor with regard to an application of the minor for benefits and certifying that the benefits received would be used solely for necessities of the minor.

(79) *Form G–661, Appeal From Decision Concerning Creditability of Service.* This form is prescribed for filing an appeal from an initial decision of the Bureau of Retirement Claims with respect to a determination by that bureau that service claimed in connection with an application for annuity is not creditable because the employer is not covered by the Railroad Retirement Act.

(80) *Form OE–1, Payroll Report (Quarterly) for System Subordinate Units.* The form is for quarter-annual reports by system subordinate units of national-labor-organization "employers" of earnings by employees and of employer "contributions" remitted pursuant to the Railroad Unemployment Insurance Act; it shows also amounts of taxes paid pursuant to the Railroad Retirement Tax Act.

(81) *Form OE–2, Payroll Report (Monthly) for System Subordinate Units.* This form is similar to Form OE–1 except that it is for monthly reports.

(82) *Form OE–2a, Payroll Report (Monthly) for Local Subordinate Units.* This form is for monthly reports by local subordinate units of national-labor-organization "employers" and of earnings by employees and show amounts of taxes paid under the Railroad Retirement Tax Act.

(83) *Form OE–5, Service and Compensation Report by Labor Organization.* This requires a report from covered labor organizations of the service and compensation of its covered employees.

(84) *Form RL–13e, Notice to and Certification by a Disability Annuitant Upon Attainment of Age 65 of Relinquishment of Rights.* This form is used to certify that a person receiving an annuity on the basis of physical disability and who has reached the age of 65, is not in the service of any employer under the Railroad Retirement Act or of the person by whom he was employed last before his annuity began to accrue and that he has relinquished all rights to return to the service of such an employer or person.

(85) *Form RL–50, Letter and Questionnaire re Continuance of Disability Annuity Awarded after July 30, 1946.* This form is to be used by annuitants receiving disability annuities to provide proof of continuance of the disability.

(86) *Form RL–51, Report of Pay For Time Lost.* This form is to be used by an employer to report payments to an employee for time lost.

(87) *Form RL–52, Report Concerning Employment Relation.* This form is used by an applicant for an annuity who was not in compensated service on August 29, 1935, to supply information concerning his employment status on that date.

(88) *Form RL–66, Report of Use of Payments Made to Persons on Behalf of Annuitants and Pensioners.* This form is for use in reporting how payments received in a representative capacity for incompetent beneficiaries are used.

(89) *Form ES–1, Application for Employment Service.* This form is to be used by unemployed persons in applying for placement by the employment service.

(90) *Form ES–19b, Referral Card.* This referral card is given to an applicant for employment service who is not a claimant for unemployment insurance benefits. It tells the applicant to report to a designated hiring official for work. The notice is to be left with the hiring office which is requested to complete the card to show whether or not the applicant was hired and to return it to a designated Board office.

(91) *Form ES–20a, Applicant's Referral Report.* This form is to be used by a claimant for unemployment insurance to inform the Board field office of the results of his referral to a designated hiring official.

(92) *Form ES–20b, Referral Card.* This is a referral card given to a claimant for unemployment insurance benefits. It tells him to report to a designated hiring official for work. The notice is to be left with the hiring office which is requested to complete the card to show whether or not the applicant was hired and to return it to a designated Board office.

(93) *Form ES–21, Referral Card–RRB to SES.* This is a referral card given to an applicant for unemployment insurance benefits instructing him to report to the State Employment Service office for employment instructions. After entries have been made by the State Employment Service, or if he has not reported to the State Employment Service, he explains his reasons, and signs and dates the card and mails it to the Railroad Retirement Board.

(94) *Form ES–21c, Report on Placement or Refusal of Referral or Job Offer.* This is a form used by a State Employment Service representative to report the results of a referral of an applicant for unemployment insurance benefits to the Employment Service for placement.

(95) *Form ES–107, Call-in-Card.* This is a notice to an applicant for unemployment insurance benefits who has applied for employment service to appear in person at a designated place to discuss the possibility of employment. If the applicant does not report as directed, he is instructed to return the form furnishing information that he has good cause for not reporting. The form specifically states penalties for failure to comply with the instructions thereon.

(96) *Form ES–110, Referral List.* This is to list the individuals instructed to report to employer for an interview on job opening. The reverse side is to be completed by the employer to indicate whether the individuals were hired and date they are to begin work or reason they were not hired and is to be returned to a designated Board office.

(97) *Form ID–5i, Report of Unemployment Insurance Claimant's Employment.* Form to be used by non-railroad employers to report employment and earnings of a claimant who may have worked on days claimed as days of unemployment.

(98) *Form ID–9a, Employer's Special Report of Compensation.* This form is to be used by an employer to report compensation not previously reported to the Bureau of Wage and Service Records. This information is required in determining the benefit rights of an applicant for unemployment insurance benefits whose base year wages were earned in the employment of the employer.

(99) *Form ID–9b, Special Report of Compensation for Service Under Contract.* This form is to be used by a contractor who had contracts with an employer to report an employee's service and compensation.

(100) *Form SI–1a, Application for Sickness Benefits.* This form is to be used by an employee in applying for the form on which to claim sickness benefits. The completed form supplies information necessary to determine if the applicant is eligible to claim benefits and waives any existing "doctor-patient privileges" for the purpose of supplying medical information in support of his claim.

(101) *Form SI–1b, Statement of Sickness.* This form is a detachable part of Form SI–1a and is to be executed by an authorized person supplying medical information in connection with an employee's application for sickness benefits.

(102) *Form SI–1c, Supplemental Information on Accident and Insurance.* This form is to be used by a claimant of sickness benefits to supply information not shown on the sickness benefit application about the person or persons who may have been responsible for payment of damages to him.

(103) *Form SI–1d, Pay Rate Report and Employer's Corrected Report of Pay Rate.* This form is to be used by a claimant for sickness benefits to report the pay rates required to determine his daily benefit rates under the Railroad Unemployment Insurance Act. The pay rate report is then verified and, if necessary, corrected by the employer.

(104) *Form SI–3, Claim for Sickness Benefits.* This form is sent by the Board to claimants for sickness benefits to inform the claimant of the registration period covered by the claim and to request information as to days of sickness claimed, days worked, and earnings. The form is to be returned to the office of the Board to which it is pre-addressed.

(105) *Form SI–3a, Claim for Sickness Benefits.* This form is the same as Form SI–3 but is sent to those claimants for sickness benefits whose statements of sickness indicate the need for additional medical information.

(106) *Form SI–3b, Supplemental Doctor's Statement.* This form is a detachable part of Form SI–3a and is to be executed by an authorized person to supplement information contained in Form SI–1b, Statement of Sickness, when additional information is desired.

(107) *Form SI–5, Report of Payments to Employee Claiming Sickness Benefits under the Railroad Unemployment Insurance Act.* This form is to be used by an employer or other person to report damages, pay for time lost, workmen's compensation or other payments made or payable to an employee claiming sickness benefits.

(108) *Form SI–7, Supplemental Doctor's Statement.* This form is to be filled out by a claimant's doctor to supply medical information needed to supplement a statement of sickness submitted under the Railroad Unemployment Insurance Act.

(109) *Form SI–10, Statement of Authority to Act for Employer.* This is a form to be used by a person in furnishing information concerning his authority when applying for sickness benefits under the Railroad Unemployment Insurance Act on behalf of an employee who is unable to sign documents and transact business in connection with obtaining such benefits.

(110) *Form SI–34, Report of Physical Condition of Claimant Under Railroad Unemployment Insurance Act.* This form is to be used by a medical examiner to report the physical condition of an applicant when it appears that he has been released from or rejected for work

because of sickness and should therefore apply for sickness benefits.

(111) *Form SI–62, Claim for Sickness Benefits to Employee But not Paid at Death.* This is the form to be used in making claim for sickness benefits due an employee but unpaid at his death.

(112) *Form SI–101, Application for Maternity Benefits.* This is the form to be used by a female employee in applying for a claim form on which to claim maternity benefits. The form provides for a statement by the employee of prior employment and of the birth or expected birth of a child; and also for a waiver of any existing "doctor-patient privilege" with respect to the maternity sickness for which the claim is made. This form is to be mailed, together with completed Form SI–104, to the Board.

(113) *Form SI–103, Claim for Maternity Benefits.* This is the form to be used in making claim for maternity benefits under the Railroad Unemployment Insurance Act.

(114) *Form SI–104, Statement of Maternity Sickness.* This form is to be executed by a doctor of medicine in connection with an application for maternity benefits, and is to be furnished by the applicant to the Board, upon execution, together with completed Form SI–101, Application for Maternity Benefits.

(115) *Form UI–1, Application for Unemployment Benefits.* This form is to be used by an employee in applying for unemployment benefits and provides for information in connection with employment service.

(116) *Form UI–1a, Pay Rate Report and Employer's Corrected Report of Pay Rate.* This form is given to a claimant for unemployment benefits to provide information of his employment and pay to be used in the determination of the claimant's daily benefit rate. The employer verifies and, if necessary, corrects the pay rate reported by the claimant.

(117) *Form UI–1d, Pay Rate Report and Employer's Corrected Report of Pay Rate.* This form is to be used by a claimant for unemployment benefits to provide information, supplemental or similar to that provided by Form UI–1a, concerning the claimant's employment and rate of pay. The claimant's statements are to be verified by the employer.

(118) *Form UI–3, Registration and Claim for Unemployment Benefits.* This is a form for registering for days of unemployment and claiming unemployment insurance benefits, for providing notice to the claimant of requirements upon him, and for statement to be certified to by the claimant.

(119) *Form UI–3a, Explanation of Exceptions to Certification for Day of Unemployment.* This form provides an opportunity for a full explanation of the reasons any statement to which a claimant has certified on Form UI–3 is not or may not be true for any particular day or days for which registration has been made.

(120) *Form UI–9, Applicant's Statement of Employment and Wages.* This is a form to be used in reporting service and compensation in connection with a claim for benefits under the Railroad Unemployment Insurance Act.

(121) *Form UI–10, Request for Determination of Veteran Status under Title IV, Veteran's Readjustment Assistance Act of 1952.* This form is to be used by applicants for railroad unemployment benefits in applying also for benefits under Title IV of the Veteran's Readjustment Assistance Act.

(122) *Form UI–84, Delayed Registration.* This is a form upon which to make a delayed registration for a day or days of unemployment.

(123) *Form UI–85, Appeal to the Board From Referee's Decision under Railroad Unemployment Insurance Act.* This form is used to appeal to the Board from a decision of a referee on a claim for benefits under the Railroad Unemployment Insurance Act.

(124) *Form UI–86, Appeal from Initial Determination under The Railroad Unemployment Insurance Act.* This form is used to appeal from an initial decision denying benefits under the Railroad Unemployment Insurance Act.

(Sec. 10, 49 Stat. 973, as amended, sec. 12, 52 Stat. 1107, as amended; 45 U. S. C. 228j, 362)

Dated: June 8, 1956.

By authority of the Board.

[SEAL] MARY B. LINKINS, *Secretary of the Board.*

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter I—Federal Home Loan Bank Board

#### Subchapter A—General Regulations of the Federal Home Loan Bank Board

[No. 9715]

PART 109—RULES OF PRACTICE AND PROCEDURE; ADJUDICATIONS UNDER ADMINISTRATIVE PROCEDURE ACT

*Correction*

In Federal Register Document 56–5032, appearing at page 4546 of the issue for Tuesday, June 26, 1956, the following changes should be made:

1. In the authority citation the reference to "sec. 17, 47 Stat. 1736" should read "sec. 17, 47 Stat. 736".

2. In the tenth line of § 109.8 (b) the word "hearings" should read "hearing".

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

[5th Rev. S. O. 95, Amdt. 5]

PART 95—CAR SERVICE

APPOINTMENT OF REFRIGERATOR CAR AGENT

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 22d day of June A. D. 1956.

Upon further consideration of the provisions of Fifth Revised Service Order No. 95 (18 F. R. 473, 3732, 7642; 19 F. R. 4003; 20 F. R. 4688), and good cause appearing therefor: *It is ordered,* That:

Section 95.95 *Appointment of Refrigerator car agent,* of Fifth Revised Service Order No. 95, be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

(d) This section, as amended, shall expire at 11:59 p. m., June 30, 1957, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

It is further ordered, that this amendment shall become effective at 11:59 p. m., June 30, 1956; that a copy of this order and direction be served upon the Association of American Railroads, Car Service Division, as Agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] HAROLD D. McCOY, *Secretary.*

# PROPOSED RULE MAKING

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

[ 26 CFR (1954) Part 1 ]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

SOIL AND WATER CONSERVATION EXPENDITURES

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U. S. C. 7805).

[SEAL] O. GORDON DELK, *Acting Commissioner of Internal Revenue.*

The following regulations relating to soil and water conservation expenditures are hereby promulgated under section 175 of the Internal Revenue Code of 1954, and are effective for taxable years beginning after December 31, 1953, and ending after August 16, 1954:

Sec.
1.175 Statutory provisions; soil and water conservation expenditures.
1.175–1 Soil and water conservation expenditures; in general.
1.175–2 Definition of soil and water conservation expenditures.
1.175–3 Definition of "the business of farming".
1.175–4 Definition of "land used in farming".
1.175–5 Percentage limitation and carryover.
1.175–6 Adoption or change of method.

§ 1.175 *Statutory provisions; soil and water conservation expenditures.*

SEC. 175. *Soil and water conservation expenditures*—(a) *In general.* A taxpayer engaged in the business of farming may treat expenditures which are paid or incurred by him during the taxable year for the purpose of soil or water conservation in respect of land used in farming, or for the prevention of erosion of land used in farming, as expenses which are not chargeable to capital account. The expenditures so treated shall be allowed as a deduction.

(b) *Limitation.* The amount deductible under subsection (a) for any taxable year shall not exceed 25 percent of the gross income derived from farming during the taxable year. If for any taxable year the total of the expenditures treated as expenses which are not chargeable to capital account exceeds 25 percent of the gross income derived from farming during the taxable year, such excess shall be deductible for succeeding taxable years in order of time; but the amount deductible under this section for any one such succeeding taxable year (including the expenditures actually paid or incurred during the taxable year) shall not exceed 25 percent of the gross income derived from farming during the taxable year.

(c) *Definitions.* For purposes of subsection (a)—

(1) The term "expenditures which are paid or incurred by him during the taxable year for the purpose of soil or water conservation in respect of land used in farming, or for the prevention of erosion of land used in farming" means expenditures paid or incurred for the treatment or moving of earth, including (but not limited to) leveling, grading and terracing, contour furrowing, the construction, control, and protection of diversion channels, drainage ditches, earthen dams, watercourses, outlets, and ponds, the eradication of brush, and the planting of windbreaks. Such term does not include—

(A) The purchase, construction, installation, or improvement of structures, appliances, or facilities which are of a character which is subject to the allowance for depreciation provided in section 167, or

(B) Any amount paid or incurred which is allowable as a deduction without regard to this section.

Notwithstanding the preceding sentences, such term also includes any amount, not otherwise allowable as a deduction, paid or incurred to satisfy any part of an assessment levied by a soil or water conservation or drainage district to defray expenditures made by such district which, if paid or incurred by the taxpayer, would without regard to this sentence constitute expenditures deductible under this section.

(2) The term "land used in farming" means land used (before or simultaneously with the expenditures described in paragraph (1)) by the taxpayer or his tenant for the production of crops, fruits, or other agricultural products or for the sustenance of livestock.

(d) *When method may be adopted*—(1) *Without consent.* A taxpayer may, without the consent of the Secretary or his delegate, adopt the method provided in this section for his first taxable year—

(A) Which begins after December 31, 1953, and ends after the date on which this title is enacted, and

(B) For which expenditures described in subsection (a) are paid or incurred.

(2) *With consent.* A taxpayer may, with the consent of the Secretary or his delegate, adopt at any time the method provided in this section.

(e) *Scope.* The method adopted under this section shall apply to all expenditures described in subsection (a). The method adopted shall be adhered to in computing taxable income for the taxable year and for all subsequent taxable years unless, with the approval of the Secretary or his delegate, a change to a different method is authorized with respect to part or all of such expenditures.

§ 1.175–1 *Soil and water conservation expenditures; in general.* Under section 175, a farmer may deduct his soil or water conservation expenditures which do not give rise to a deduction for depreciation and which are not otherwise deductible. The amount of the deduction is limited annually to 25 percent of the taxpayer's gross income from farming. Any excess may be carried over and deducted in succeeding taxable years. As a general rule, once a farmer has adopted this method of treating soil and water conservation expenditures, he must deduct all such expenditures (subject to the 25-percent limitation) for the current and subsequent taxable years. If a farmer does not adopt this method, such expenditures increase the basis of the property to which they relate.

§ 1.175–2 *Definition of soil and water conservation expenditures*—(a) *Expenditures treated as a deduction.* (1) The method described in section 175 applies to expenditures paid or incurred for the purpose of soil or water conservation in respect of land used in farming, or for the prevention of erosion of land used in farming. More specifically, a farmer may deduct expenditures made for these purposes which are for (i) the treatment or moving of earth, (ii) the construction, control, and protection of diversion channels, drainage ditches, irrigation ditches, earthen dams, watercourses, outlets, and ponds, (iii) the eradication of brush, and (iv) the planting of windbreaks. Expenditures for the treatment or moving of earth include but are not limited to expenditures for leveling, conditioning, grading, terracing, contour furrowing, and restoration of soil fertility.

(2) The following are examples of soil and water conservation: (i) Constructing terraces, or the like, to detain or control the flow of water, to check soil erosion on sloping land, to intercept run-off, and to divert excess water to protected outlets; (ii) constructing water detention or sediment retention dams to prevent or fill gullies, to retard or reduce run-off of water, or to collect stock water; and (iii) constructing earthen floodways, levies, or dikes, to prevent flood damage to farmland.

(b) *Expenditures not subject to section 175 treatment.* (1) The method described in section 175 applies only to expenditures for nondepreciable items. Accordingly, a taxpayer may not deduct expenditures for the purchase, construction, installation, or improvement of structures, appliances, or facilities subject to the allowance for depreciation. Thus, the method does not apply to depreciable nonearthen items such as those made of masonry or concrete (see section 167). For example, expenditures in respect of depreciable property include those for materials, supplies, wages, fuel, hauling, and dirt moving for making structures such as tanks, reservoirs, pipes, conduits, canals, dams, wells, or pumps composed of masonry, concrete, tile, metal, or wood. Similarly, the method is not applicable to expenditures for fertilizer effective substantially longer than one year, since such expenditures are also depreciable. However, the method applies to expenditures for earthen items which are not subject to a depreciation allowance. For example, expenditures for earthen terraces and dams which are nondepreciable are deductible under section 175.

(2) The method does not apply to expenses deductible apart from section 175. Adoption of the method is not necessary in order to deduct such expenses in full without limitation. Thus, the method does not apply to interest (deductible under section 163), nor to taxes (deductible under section 164). It does not apply to expenses for the repair of completed soil or water conservation structures, such as costs of annual removal of sediment from a drainage ditch. It does not apply to costs of items having a useful life of less than one year. It does not apply to expenditures paid or incurred primarily to produce an agricultural crop even though they incidentally conserve soil. Thus, the cost of fertilizer (the effectiveness of which does not last beyond one year) used to produce hay is deductible without adoption of the method described in section 175. However, the method would apply to expenses incurred to produce vegetation primarily to conserve soil or water or to prevent erosion. Thus, for example, the method would apply to such expenditures as the cost of dirt moving, lime, fertilizer, seed and planting stock used in gully stabilization, or in stabilizing severely eroded areas, in order to obtain a soil binding stand of vegetation on raw or infertile land.

(c) *Assessments.* The method applies also to that part of assessments levied by a soil or water conservation or drainage district to reimburse it for its expenditures which, if actually paid or incurred during the taxable year by the taxpayer directly, would be deductible under section 175. Depending upon the farmer's method of accounting, the time when

the farmer pays or incurs the assessment, and not the time when the expenditures are paid or incurred by the district, controls the time the deduction must be taken. The provisions of this paragraph may be illustrated by the following example:

*Example.* In 1955 a soil and water conservation district levies an assessment of $700 upon a farmer on the cash method of accounting. The assessment is to reimburse the district for its expenditures in 1954. The farmer's share of such expenditures is as follows: $400 for digging drainage ditches for soil conservation; and $300 for assets subject to the allowance for depreciation. If the farmer pays the assessment in 1955 and has adopted the method of treating expenditures for soil or water conservation as current expenses under section 175, he may deduct in 1955 the $400 attributable to the digging of drainage ditches as a soil conservation expenditure subject to the 25-percent limitation.

§ 1.175–3 *Definition of "the business of farming".* The method described in section 175 is available only to a taxpayer engaged in "the business of farming." A taxpayer is engaged in the business of farming if he cultivates, operates, or manages a farm for gain or profit, either as owner or tenant. Similarly, a taxpayer is engaged in the business of farming if he receives a rental based upon a share of the crops. However, a taxpayer who receives a fixed rental for the use of farmland is not thereby engaged in the business of farming. A taxpayer engaged in forestry or the growing of timber is not thereby engaged in the business of farming. A person cultivating or operating a farm for recreation or pleasure which shows a continual loss from year to year is not engaged in the business of farming. For purposes of this section, the term "farm" is used in the ordinary, accepted sense, and includes stock, dairy, poultry, fruit, and truck farms, and also plantations, ranches, and all land used for farming operations.

§ 1.175–4 *Definition of "land used in farming."* For the purpose of section 175, to qualify as "land used in farming" the land must meet both of the following requirements:

(a) The land must be used for the production of crops, fruits, or other agricultural products or for the sustenance of livestock. The term livestock is used in the ordinary, accepted sense, and includes cattle, hogs, horses, mules, donkeys, sheep, goats, fur-bearing animals, and other domesticated mammals. It does not include chickens, turkeys, pigeons, geese, other birds, fish, frogs, reptiles, and the like. Land used for the sustenance of livestock includes land used as pasture for grazing such livestock.

(b) In addition, the land must be or have been so used either by the taxpayer or his tenant at some time before, or at the same time as, the taxpayer makes the expenditures for soil or water conservation or for the prevention of erosion of land. The requirement that the taxpayer or his tenant must have used the land in farming before making such expenditures does not mean that the land must have been so used immediately before making the expenditures. It is enough if the taxpayer or his tenant has used the land in farming at any time in the past. If the land has not been used in farming by the taxpayer or his tenant at any time in the past, it must be used in farming at the same time as the expenditures are undertaken. Land will be considered "used in farming" if it is part of the taxpayer's farm even though as a conservation practice it is temporarily idle.

§ 1.175–5 *Percentage limitation and carryover*—(a) *The limitation*—(1) *General rule.* The amount of soil and water conservation expenditures which the taxpayer may deduct under section 175 in any one taxable year is limited to 25 percent of his "gross income from farming."

(2) *Definition of "gross income from farming".* The term "gross income from farming" means the gross income of the taxpayer derived in the normal course of the business of farming as defined in § 1.175–3. Thus, it means gross income from the sale of crops, fruits, or other products of his farm such as cattle. It does not include gains from sales of assets such as farm machinery, or gains from the disposition of land or "property used in the trade or business" as defined in section 1231 (b). If the taxpayer has more than one farm, it includes such gross income from all of them. It is not restricted to the gross income derived from the land in connection with which the expenditures are made. It also includes a share of the produced crops paid by a tenant for the use of a farm. The provisions of this subparagraph may be illustrated by the following example:

*Example.* A's gross income from farming during the calendar year 1956 consists of the following items of gross income:

| | |
|---|---|
| Proceeds from sale of his 1955 yield of corn | $10,000 |
| In determining his gross income from farming for purposes of applying the limitation, A excludes the following items found in his gross income: | |
| Gain from disposition of old breeding cows replaced by younger cows raised on his farm | 500 |
| Gain from disposition of a worn-out tractor | 100 |
| Cash rent from tenant using a second farm | 5,000 |
| Gain from sale of 40 acres of farmland | 8,000 |
| Interest on loan to neighboring farmer | 100 |
| Total | 13,700 |

(3) *Deduction qualifies for net operating loss deduction.* Any amount allowed as a deduction under section 175, either for the year in which the expenditure is paid or incurred or for the year to which it is carried, is taken into account in computing a net operating loss for such taxable year. If a deduction for soil or water conservation expenditures has been taken into account in computing a net operating loss carryback or carryover, it shall not be considered a soil or water conservation expenditure for the year to which the loss is carried, and therefore, is not subject to the 25–percent limitation for that year. The provisions of this subparagraph may be illustrated by the following example:

*Example.* Assume that in 1956 A has gross income from farming of $4,000, soil and water conservation expenditures of $1,600, and deductible farm expenses of $3,500. Of the soil and water conservation expenditures, $1,000 is deductible in 1956. The $600 in excess of 25 percent of A's gross income from farming is carried over into 1957. Assuming that A has no other income, his deductions of $4,500 ($1,000 plus $3,500) exceed his gross income of $4,000 by $500. This $500 will constitute a net operating loss which he must carry back two years and carry forward five years, until it has offset $500 of taxable income. No part of this $500 net operating loss carryback or carryover will be taken into account in determining the amount of soil and water conservation expenditures in the years to which it is carried.

(b) *Carryover of expenditures in excess of deduction.* The deduction for soil and water conservation expenditures in any one taxable year is limited to 25 percent of the taxpayer's gross income from farming. The taxpayer may carry over the excess of such expenditures over 25 percent of his gross income from farming into his next taxable year, and, if not deductible in that year, into the next year, and so on without limit as to time. In determining the deductible amount of such expenditures for any taxable year, the actual expenditures of that year shall be added to any such expenditures carried over from prior years, before applying the 25-percent limitation. Any such expenditures in excess of the deductible amount may be carried over during the taxpayer's entire existence. For this purpose in a farm partnership, since the 25-percent limitation is applied to each partner, not the partnership, the carryover may be carried forward during the life of the partner. The provisions of this paragraph may be illustrated by the following example:

*Example.* Assume the expenditures and income shown in the following table:

| Year | Deductible soil and water conservation expenditures | | Total | 25 percent of gross income from farming | Excess to be carried forward |
|---|---|---|---|---|---|
| | Paid or incurred during taxable year | Carried forward from prior year | | | |
| 1954 | $900 | None | $900 | $800 | $100 |
| 1955 | 1,000 | $100 | 1,100 | 900 | 200 |
| 1956 | None | 200 | 200 | 1,000 | None |

The deduction for 1954 is limited to $800. The remainder, $100 ($900 minus $800), not being deductible for 1954, is a carryover to 1955. For 1955, accordingly, the total of the expenditures to be taken into account is $1,100 (the $100 carryover and the $1,000 actually paid in that year). The deduction for 1955 is limited to $900, and the remainder of the $1,100 total, or $200, is a carryover to 1956. The deduction for 1956 consists solely of this carryover of $200. Since the total expenditures, actual and carried-over, for 1956 are less than 25 percent of gross income from farming, there is no carryover into 1957.

§ 1.175–6 *Adoption or change of method*—(a) *Adoption without consent.* A taxpayer may, without consent, adopt the method of treating expenditures for soil or water conservation as expenses for the first taxable year:

(1) Which begins after December 31, 1953, and ends after August 16, 1954, and

(2) For which soil or water conservation expenditures described in section 175 (a) are paid or incurred.

Such adoption shall be made by claiming the deduction on his income tax return. For a taxable year ending prior to the adoption of regulations under this section, the adoption of the method described in section 175 shall be made by claiming the deduction on such return for that year, or by claiming the deduction on an amended return filed for that year within 90 days after the date of publication (following adoption) of such regulations in the FEDERAL REGISTER.

(b) *Adoption with consent.* A taxpayer may adopt the method of treating soil and water conservation expenditures as provided by section 175 for any taxable year to which the section is applicable if consent is obtained from the district director for the district in which the taxpayer's return is required to be filed.

(c) *Change of method.* A taxpayer who has adopted the method of treating expenditures for soil or water conservation, as provided by section 175, may change from this method and capitalize such expenditures made after the effective date of the change, if he obtains the consent of the district director for the district in which his return is required to be filed.

(d) *Request for consent to adopt or change method.* Where the consent of the district director is required under paragraph (b) or (c) of this section, the request for his consent shall be in writing, signed by the taxpayer or his authorized representative, and shall be filed not later than the date prescribed by law for filing the income tax return for the first taxable year to which the adoption of, or change of, method is to apply, or not later than 90 days after the date of publication in the FEDERAL REGISTER of the regulations under section 175 following their adoption, whichever is later. The request shall:

(1) Set forth the name and address of the taxpayer;

(2) Designate the first taxable year to which the method or change of method is to apply;

(3) State whether the method or change of method is intended to apply to all expenditures within the permissible scope of section 175, or only to a particular project or farm and, if the latter, include such information as will identify the project or farm as to which the method or change of method is to apply;

(4) Set forth the amount of all soil and water conservation expenditures paid or incurred during the first taxable year for which the method or change of method is to apply; and

(5) State that the taxpayer will make an accounting segregation in his books and records of the expenditures to which the election relates.

(e) *Scope of method.* Except with the consent of the district director as provided in paragraph (b) or (c) of this section, the taxpayer's method of treating soil and water conservation expenditures described in section 175 shall apply to all such expenditures for the taxable year of adoption and all subsequent taxable years. Although a taxpayer may have elected to deduct soil and water conservation expenditures, he may request an authorization to capitalize his soil and water conservation expenditures attributable to a special project or single farm. Similarly, a taxpayer who has not elected to deduct such expenditures may request an authorization to deduct his soil and water conservation expenditures attributable to a special project or single farm. The authorization with respect to the special project or single farm will not affect the method adopted with respect to the taxpayer's regularly incurred soil and water conservation expenditures. No adoption of or change of the method under section 175 will be permitted as to expenditures actually paid or incurred before the taxable year to which the method or change of method is to apply. Thus, if a taxpayer adopts such method for 1956, he cannot deduct any part of such expenditures which he capitalized, or should have capitalized, in 1955. Likewise, if a taxpayer who has adopted such method has an unused carryover of such expenditures in excess of the 25-percent limitation, and is granted consent to capitalize soil and water conservation expenditures beginning in 1956, he cannot capitalize any part of the unused carryover. The excess expenditures carried over continue to be deductible to the extent of 25 percent of the taxpayer's gross income from farming. No adjustment to the basis of land shall be made under section 1016 for expenditures to which the method under section 175 applies.

### INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

### REAL PROPERTY SUBDIVIDED FOR SALE

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention, T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U. S. C. 7805).

[SEAL] O. GORDON DELK,
*Acting Commissioner of Internal Revenue.*

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

The following regulations are hereby prescribed under section 1237, relating to real property subdivided for sale, of the Internal Revenue Code of 1954 and, except as otherwise provided, are effective for taxable years beginning after December 31, 1953, and ending after August 16, 1954, with respect to sales of real property made after December 31, 1953:

§ 1.1237 *Statutory provisions; real property subdivided for sale.*

SEC. 1237. *Real property subdivided for sale*—(a) *General.* Any lot or parcel which is part of a tract of real property in the hands of a taxpayer (including corporations only if no shareholder directly or indirectly holds real property for sale to customers in the ordinary course of trade or business and only in the case of property described in the last sentence of subsection (b) (3)) shall not be deemed to be held primarily for sale to customers in the ordinary course of trade or business at the time of sale solely because of the taxpayer having subdivided such tract for purposes of sale or because of any activity incident to such subdivision or sale, if:

(1) Such tract, or any lot or parcel thereof, had not previously been held by such taxpayer primarily for sale to customers in the ordinary course of trade or business (unless such tract at such previous time would have been covered by this section), or, in the same taxable year in which the sale occurs, such taxpayer does not so hold any other real property; and

(2) No substantial improvement that substantially enhances the value of the lot or parcel sold is made by the taxpayer on such tract while held by the taxpayer or is made pursuant to a contract of sale entered into between the taxpayer and the buyer. For purposes of this paragraph, an improvement shall be deemed to be made by the taxpayer if such improvement was made by:

(A) The taxpayer or members of his family (as defined in section 267 (c) (4)), by a corporation controlled by the taxpayer, or by a partnership which included the taxpayer as a partner; or

(B) A lessee, but only if the improvement constitutes income to the taxpayer; or

(C) Federal, State, or local government, or political subdivision thereof, but only if the improvement constitutes an addition to basis for the taxpayer; and

(3) Such lot or parcel, except in the case of real property acquired by inheritance or devise, is held by the taxpayer for a period of 5 years.

(b) *Special rules for application of section*—(1) *Gains.* If more than 5 lots or parcels contained in the same tract of real property are sold or exchanged, gain from any sale or exchange (which occurs in or after the taxable year in which the sixth lot or parcel is sold or exchanged) of any lot or parcel which comes within the provisions of paragraphs (1), (2) and (3) of subsection (a) of this section shall be deemed to be gain from the sale of property held primarily for sale to customers in the ordinary course of the trade or business to the extent of 5 percent of the selling price.

(2) *Expenditures of sale.* For the purpose of computing gain under paragraph (1) of this subsection, expenditures incurred in connection with the sale or exchange of any lot or parcel shall neither be allowed as a deduction in computing taxable income, nor treated as reducing the amount realized on such sale or exchange; but so much of such expenditures as does not exceed the portion of gain deemed under paragraph (1) of this subsection to be gain from the sale of property held primarily for sale to customers in the ordinary course of trade or business shall be so allowed as a deduction, and the

remainder, if any, shall be treated as reducing the amount realized on such sale or exchange.

(3) *Necessary improvements.* No improvement shall be deemed a substantial improvement for purposes of subsection (a) if the lot or parcel is held by the taxpayer for a period of 10 years and if:

(A) Such improvement is the building or installation of water, sewer, or drainage facilities or roads (if such improvement would except for this paragraph constitute a substantial improvement);

(B) It is shown to the satisfaction of the Secretary or his delegate that the lot or parcel, the value of which was substantially enhanced by such improvement, would not have been marketable at the prevailing local price for similar building sites without such improvement; and

(C) The taxpayer elects, in accordance with regulations prescribed by the Secretary or his delegate, to make no adjustment to basis of the lot or parcel, or of any other property owned by the taxpayer, on account of the expenditures for such improvements. Such election shall not make any item deductible which would not otherwise be deductible.

The requirement of subparagraphs (B) and (C) shall not apply in the case of property acquired through the foreclosure of a lien thereon which secured the payment of an indebtedness to the taxpayer or (in the case of a corporation) to a creditor who has transferred the foreclosure bid to the taxpayer in exchange for all of its stock and other consideration and in the case of property adjacent to such property if 80 percent of the real property owned by the taxpayer is property described in the first part of this sentence.

(c) *Tract defined.* For purposes of this section, the term "tract of real property" means a single piece of real property, except that 2 or more pieces of real property shall be considered a tract if at any time they were contiguous in the hands of the taxpayer or if they would be contiguous except for the interposition of a road, street, railroad, stream, or similar property. If, following the sale or exchange of any lot or parcel from a tract of real property, no further sales or exchanges of any other lots or parcels from the remainder of such tract are made for a period of 5 years, such remainder shall be deemed a tract.

(d) *Effective date.* This section shall apply only with respect to sales of property occurring after December 31, 1953, except that, for purposes of subsection (c) (defining tract of real property) and for determining the number of sales under paragraph (1) of subsection (b), all sales of lots and parcels from any tract of real property during the period of 5 years before December 31, 1953, shall be taken into account, except as provided in subsection (c).

(Sec. 1237 as amended by Pub. Law 495 (84th Cong.) for taxable years beginning after December 31, 1954)

§ 1.1237–1 *Real property subdivided for sale*—(a) *General.* (1) This section provides a special rule for determining whether the taxpayer holds real property primarily for sale in the ordinary course of business under section 1221 (1). This rule is to permit an individual investor to sell real estate from a single tract held for investment without the income being treated as ordinary income merely because of subdividing the tract or of active efforts to sell it. The rule is not applicable to dealers in real estate or to corporations, except a corporation making such sales in a taxable year beginning after December 31, 1954, if such corporation qualifies under the provisions of paragraph (c) (5) (iv) of this section.

(2) When its conditions are met, section 1237 provides that if there is no other substantial evidence that a taxpayer holds real estate primarily for sale in his business, he shall not be considered a real estate dealer holding it primarily for sale merely because he has (i) subdivided the tract into lots and (ii) engaged in advertising, promotion, selling activities or the use of sales agents in connection with the sale of lots in such subdivision. Such subdividing and selling activities shall be disregarded in determining the purpose for which the taxpayer held real property sold from a subdivision whenever it is the only substantial evidence indicating that the taxpayer has ever held the real property sold primarily for sale to customers in the ordinary course of business.

(3) However, where other substantial evidence tends to show that the taxpayer held real property for sale in his business, his activities in connection with the subdivision and sale of the property sold shall be taken into account in determining the purpose for which the taxpayer held both the subdivided property and any other real property. For example, such other evidence may consist of the taxpayer's selling activities in connection with other property in prior years during which he was engaged in subdividing or selling activities with respect to the subdivided tract, his intention in prior years (or at the time of acquiring the property subdivided) to hold the tract primarily for sale in his business, his subdivision of other tracts in the same year, his holding other real property for sale to customers in the same year, or his construction of a permanent real estate office which he could use in selling other real property. On the other hand, if the only evidence of the taxpayer's purpose in holding real property consisted of not more than one of the following, in the year in question, such fact would not be considered substantial other evidence:

(i) Holding a real estate dealer's license;

(ii) Selling other real property which was clearly investment property;

(iii) Acting as a salesman for a real estate dealer, but without any financial interest in the business; or

(iv) Mere ownership of other vacant real property without engaging in any selling activity whatsoever with respect to it.

(4) (i) The rule in section 1237 is not exclusive in its application. Failure to meet all of the requirements of section 1237 does not necessarily indicate that the taxpayer held the real property primarily for sale in his business. Also, even though the conditions of section 1237 are met, the rules of section 1237 are not applicable if without regard to section 1237 the real property sold would not have been considered real property held primarily for sale in the ordinary course of business. Thus, the district director may at all times conclude from convincing evidence that the taxpayer held the real property solely as an investment. Furthermore, whether or not the conditions of section 1237 are met, the section has no application to losses realized upon the sale of realty from subdivided property.

(ii) If, owing solely to the application of section 1237, the real property sold is deemed not to have been held primarily for sale in the ordinary course of business, any gain realized upon such sale shall be treated as ordinary income to the extent provided in section 1237 (b) (1) and (2) and paragraph (e) of this section. Any additional gain realized upon the sale shall be treated as gain arising from the sale of a capital asset or, if the circumstances so indicate, as gain arising from the sale of real property used in the trade or business as defined in section 1231 (b) (1). For the relationship between sections 1237 and 1231, see paragraph (f) of this section.

(5) Before this section applies, the taxpayer must meet three basic conditions, more fully explained later: He cannot have held any part of the tract at any time previously for sale in the ordinary course of business, nor in the year of sale held any other real estate for sale to customers; he cannot make substantial improvements which increase the value of the lot sold substantially; and he must have owned the property five years, unless he inherited it. However, the taxpayer may make certain improvements if they are necessary to make the property marketable if he elects neither to add their cost to the basis of the property nor to deduct the cost as an expense, and he has held the property at least ten years. If the requirements of the section are met, gain (but not more than five percent of the selling price of each lot) shall be treated as ordinary income in and after the year in which the sixth lot or parcel is sold.

(b) *Holding real property primarily for sale.* (1) Section 1237 does not apply to any transaction if the taxpayer either:

(i) Held the lot sold (or the tract of which it was a part) primarily for sale in the ordinary course of business in a prior year, or

(ii) Holds other real property primarily for sale in the ordinary course of business in the same year in which such lot is sold.

Where either of these elements are present, section 1237 shall be disregarded in determining the proper treatment of any gain arising from such sale.

(2) For purposes of this paragraph, in determining whether the lot sold was held primarily for sale in the ordinary course of business in a prior year, the principles of section 1237 shall be applied, whether or not section 1237 was effective for such prior year, if the sale of the lot occurs after December 31, 1953, or, in the case of a corporation meeting the requirements of paragraph (c) (5) (iv) of this section, if the sale of the lot occurs in a taxable year beginning after December 31, 1954. Whether, on the other hand, the taxpayer holds other real property primarily for sale in the ordinary course of business shall at all times be determined without regard to the application of section 1237 to such other real property.

(3) The taxpayer is considered as holding property which he owns individually, jointly, or as a member of a partnership. He is not considered as holding property owned by members of his family, an estate or trust, or a corporation. The purpose for which a prior owner held the lot or tract or his activities are immaterial except to the extent, if any, they indicate the purpose for which the taxpayer has held the property.

(c) *Substantial improvements.* (1) Section 1237 will not apply if the taxpayer, or certain others, makes improvements on the tract which are both substantial and substantially increase the value of the lot sold. Certain improvements are not substantial within the meaning of section 1237 (a) (2) if they are necessary to make the lot marketable at the prevailing local price and meet the other conditions of section 1237 (b) (3). See subparagraph (5) of this paragraph.

(2) Certain improvements made by the taxpayer or made under a contract of sale between the taxpayer and the buyer make section 1237 inapplicable.

(i) For the purposes of section 1237 (a) (2) the taxpayer is deemed to have made any improvements on the tract while he held it which are made by:

(*a*) The taxpayer's whole or half brothers and sisters, spouse, ancestors, and lineal descendants.

(*b*) A corporation controlled by the taxpayer. A corporation is controlled by the taxpayer if he owns more than 50 percent of its voting stock directly or indirectly.

(*c*) A partnership of which the taxpayer was a member either when the improvements were made or when the lot was sold.

(*d*) A lessee if the improvement takes the place of a payment of rental income. See section 109 and the regulations thereunder.

(*e*) A Federal, State, or local government, or political subdivision thereof, if the improvement results in an increase of the taxpayer's basis for the property, as it would, for example, from a special tax assessment for paving streets.

(ii) The taxpayer is also charged with making any improvements made pursuant to a contract of sale entered into between the taxpayer and the buyer. Therefore, the buyer, as well as the taxpayer, may make improvements which prevent the application of section 1237.

(*a*) If a contract of sale obligates either the taxpayer or the buyer to make a substantial improvement which would substantially increase the value of the lot, the taxpayer may not claim the application of section 1237 unless before the period of limitations has run on the year of sale, the obligation to improve the lot ceases for any reason. The following example illustrates this rule:

*Example.* In 1956, A sells several lots from a tract he has subdivided for sale. Section 1237 would apply to the sales of these lots except that in the contract of sale A agreed to install sewers, hard surface roads and other utilities which would increase the value of the lots substantially. If in 1957, instead of requiring the improvements, the buyer releases A from this obligation, A may then claim the application of section 1237 to the sale of lots in 1956 in computing his income tax for 1956, since the period of limitations in which A may file a claim for 1956 income tax has not expired.

(*b*) An improvement is made pursuant to a contract if the contract imposes an obligation on either party to make the improvement, but not if the contract merely places restrictions on the improvements, if any, either party may make. The following example illustrates this rule:

*Example.* B sells several lots from a tract which he has subdivided. Each contract of sale prohibits the purchaser from building any structure on his lot except a personal residence, costing $15,000 or more. Even if the purchasers build such residences, that does not preclude B from applying section 1237 to the sales of such lots, since the contracts did not obligate the purchasers to make any improvements.

(iii) Improvements made by a bona fide lessee (other than as rent) or by others not described in section 1237 (a) (2) do not preclude the use of section 1237.

(3) Before a substantial improvement will preclude the use of section 1237, it must substantially enhance the value of the lot sold.

(i) The increase in value to be considered is only the increase attributable to the improvement or improvements when completed. Other changes in the market price of the lot, not arising from improvements made by the taxpayer, should be disregarded. The difference between the value of the lot, including improvements, when the improvement has been completed and an appraisal of its value if unimproved at that time, will disclose the value added by the improvements.

(ii) Whether improvements have substantially increased the value of a lot depends upon the circumstances in each case. Whenever the improvements increase the value of the lot by 20 percent or more over its value immediately before improvement, all relevant factors must be considered to determine whether under such circumstances the increase is substantial.

(iii) Improvements may increase the value of some lots in a tract without equally affecting other lots in the same tract. Only the lots whose value was substantially increased are ineligible for application of the rule established by this section.

(4) To prevent the application of section 1237, the improvement itself must be substantial in character. Among the improvements considered substantial are shopping centers, other commercial or residential buildings, and the installation of hard surface roads or utilities such as sewers, water, gas, or electric lines. On the other hand a temporary structure used as a field office, surveying, filling, draining, levelling and clearing operations, and the construction of minimum all-weather access roads, including gravel roads where required by the climate, are not substantial improvements.

(5) Under certain conditions a taxpayer, including a corporation to which subdivision (iv) of this subparagraph applies, may obtain the benefits of section 1237 whether or not substantial improvements have been made. In addition, the individual taxpayer may, under certain circumstances, elect to have substantial improvements treated as necessary and not substantial.

(i) An improvement will not be considered substantial if all of the following conditions are met:

(*a*) The taxpayer has held the property for 10 years. This 10–year period includes any time that the property has been held by another if the taxpayer has the same basis, in whole or in part, as the other person. The full 10–year period must elapse, whether or not the taxpayer inherited the property. Although the taxpayer must hold the property 10 years, he need not hold it for 10 years after subdividing it.

(*b*) The improvement consists of the building or installing of water, sewer, or drainage facilities or roads, including hard surface roads.

(*c*) The district director with whom the taxpayer must file his return is satisfied that, without such improvement, the lot sold would not have brought the prevailing local price for similar building sites.

(*d*) The taxpayer elects, as provided in subdivision (iv) of this subparagraph, not to adjust the basis of the lot sold or any other property held by him for the cost of such improvement attributable to such lot and not to deduct such cost as an expense.

(ii) A "similar building site" is any real property in the immediate vicinity whose size, terrain, and other characteristics are comparable to the taxpayer's property. In determining whether a tract is marketable at the prevailing local price for similar building sites, the district director shall compare (*a*) the value of the taxpayer's property in an unimproved state with (*b*) the amount for which similar building sites, improved by the installation of water or sewer facilities or roads, have recently been sold, reduced by the present cost of such improvements. Such comparison may be made and expressed in terms of dollars per square foot, dollars per acre, or dollars per front foot, or in any other suitable terms depending upon the practice generally followed by real estate dealers in the taxpayer's locality. Whenever possible, the district director shall determine the value of the taxpayer's property in an unimproved state by ascertaining the best current bona fide offer which the taxpayer has received for the property. The operation of this subdivision and subdivision (i) of this subparagraph may be illustrated by the following examples:

*Example (1).* A has been offered $500 per acre for a tract without roads, water, or sewer facilities which he has owned for 15 years. The adjacent tract has been subdivided and improved with water facilities and hard surface roads, and has sold for $4,000 per acre. The estimated cost of roads and water facilities on the adjacent tract is $2,500 per acre. The prevailing local price for similar building sites in the vicinity would be $1,500 per acre (i. e., $4,000 less $2,500). If A installs roads and water facilities at a cost of $2,500, his tract will sell for approximately $4,000 per acre. Under section 1237 (b) (3)

(B) the installation of water facilities and roads shall not constitute a substantial improvement, if A elects to disregard the $2,500 cost of such improvements in computing his cost or other basis for the lots sold from the tract, and in computing his basis for any other property owned by him.

*Example (2).* Assume the same facts as in example (1) of this subdivision except that A can obtain $1,600 per acre for his property without improvements. The installation of any substantial improvements would not constitute a necessary improvement under section 1237 (b) (3), since the prevailing local price could have been obtained without any improvement.

*Example (3).* Assume the same facts as in example (1) of this subdivision except that the adjacent tract has also been improved with sewer facilities, the present cost of which is $1,200 per acre. The installation of the substantial improvements would not constitute a necessary improvement under section 1237 (b) (3) on A's part, since the prevailing local price ($4,000, less the sum of $1,200 plus $2,500, or $300) could have been obtained by A without any improvement.

(iii) The election required by section 1237 (b) (3) (C) shall be made as follows:

(*a*) The taxpayer shall submit:

(*1*) A plat showing the subdivision and all improvements attributable to him.

(2) A list of all improvements to the tract, showing:

(*i*) Costs.

(*ii*) Which of the costs, apart from the election, he considers "substantial" and which he considers not "substantial".

(*iii*) Those improvements which are substantial to which the election is to apply, with a fair allocation of their cost to each lot they affect, and the amount by which they have increased the values of such lots.

(*iv*) The date on which each lot was acquired and its basis for determining gain or loss, exclusive of the cost of any improvements listed in subdivision (*iii*) of this subdivision.

(3) A statement that he will not deduct as an expense nor add to the basis of the lots sold, or of any other property, the cost to which this section applies, and allocated to any lot sold, of any improvement which substantially increased the value of such lot and which either he listed in subdivision (2) (*iii*) of this subdivision or which the district director deems substantial.

(*b*) The election and the information required under subdivision (*a*) of this subdivision shall be submitted to the district director:

(*1*) With the taxpayer's income tax return for the taxable year in which the lots subject to the election were sold, or

(2) In the case of a return filed prior to the publication in the FEDERAL REGISTER of the regulations under section 1237 following their adoption, either with a timely formal claim for refund, or independently within 90 days of such publication, to be attached to such return if it is otherwise in accordance with section 1237 and the regulations thereunder, or

(3) If there is an obligation to make disqualifying improvements outstanding when the taxpayer files his return, with a formal claim for refund at the time of the release of the obligation, if it is then still possible to file a timely claim.

(c) Once made, the election as to the necessary improvement costs attributable to any lot sold shall be irrevocable and binding on the taxpayer unless the district director assesses an income tax as to such lot as if it were held for sale in the ordinary course of taxpayer's business. Under such circumstances, in computing gain, the cost or other basis shall be computed without regard to section 1237.

(iv) For taxable years beginning after December 31, 1954, individual taxpayers and certain corporations may obtain the benefits of section 1237 without complying with the provisions of subdivisions (i) (c) and (*d*), (ii), and (iii) of this subparagraph if the requirements of section 1237 are otherwise met and if—

(*a*) The property in question was acquired by the taxpayer through the foreclosure of a lien thereon,

(*b*) The lien foreclosed secured the payment of an indebtedness to the taxpayer or (in the case of a corporation) secured the payment of an indebtedness to a creditor who has transferred the foreclosure bid to the taxpayer in exchange for all of the stock of the corporation and other consideration, and

(*c*) In the case of a corporate taxpayer, no shareholder of the corporation holds real property for sale to customers in the ordinary course of trade or business, directly or indirectly.

Thus, in the case of such property, it is not necessary for the taxpayer to satisfy the district director that the property would not have brought the prevailing local price without improvements or to elect not to add the cost of the improvements to his basis. In addition, if 80 percent or more of the real property owned by a taxpayer is property to which this subdivision applies, the requirements of subdivisions (*a*) and (*b*) of this subdivision need not be met with respect to property adjacent to such property which is also owned by the taxpayer.

(d) *Holding period required.* (1) To apply section 1237, the taxpayer must either have inherited the lot sold or have held it for 5 years. In computing the 5-year holding period, if the taxpayer has the same basis, in whole or in part, for the property as another person, the period that such other person held the property shall be added to the period that the taxpayer held it. See section 1223 (2).

(2) If the taxpayer inherited the property there is no 5-year holding period required under section 1237. However, any holding period required under sections 1222, 1223 or other provisions of the Code are still applicable. Neither the survivor's one-half of community property, nor property acquired by survivorship in a joint tenancy is property acquired by devise or inheritance. The holding period for the surviving joint tenant begins on the date the property was originally acquired.

(e) *Tax consequences if section 1237 applies.* (1) Where there is no substantial evidence other than subdivision and related selling activities that real property is held for sale in the ordinary course of taxpayer's business and section 1237 applies, section 1237 (b) (1) provides a special rule for computing taxable gain. For the relationship between sections 1237 and 1231, see paragraph (f) of this section.

(2) (i) When the taxpayer has sold less than six lots or parcels from the same tract up to the end of his taxable year, the entire gain will be capital gain. (Where the land is used in a trade or business, see paragraph (f) of this section.) In computing the number of lots or parcels sold, two or more contiguous lots sold to a single buyer in a single sale will be counted as only one parcel. The following example illustrates this rule.

*Example.* A meets all the conditions of section 1237, in subdividing and selling a single tract. There is no other evidence he holds any real property for sale. In 1956 he sells four lots to B, C, D, and E. In the same year F buys three adjacent lots. Since A has sold only 5 lots or parcels from the tract, any gain A realizes on the sales will be capital gain.

(ii) If the taxpayer has sold the sixth lot or parcel from the same tract within the taxable year, then the amount, if any, by which 5 percent of the selling price of each lot exceeds the expenses incurred in connection with its sale or exchange, shall be ordinary income. Any part of the gain not treated as ordinary income will be treated as capital gain. (Where the land is used in a trade or business, see paragraph (f) of this section.) Five percent of the selling price of each lot sold from the tract is considered ordinary income in the taxable year the sixth lot is sold and thereafter. However, all expenses must be considered expenses of sale of the lot and are deducted first from the 5 percent of the gain considered ordinary income and thereafter from any further gain. Such expenses cannot be deducted as ordinary business expenses from other income. The 5 percent rule applies to all lots sold from the tract in the year the sixth lot or parcel is sold. Thus, if the taxpayer sells the first six lots of a single tract in one year, 5 percent of the selling price of each lot sold shall be treated as ordinary income and reduced by the selling expenses. On the other hand, if the taxpayer sells the first three lots of a single tract in 1955, and the next three lots in 1956, only the gain realized from the sales made in 1956 shall be so treated. For the effect of a 5-year interval between sales, see paragraph (g) (2) of this section. The operation of this subdivision may be illustrated by the following examples:

*Example (1).* Assume the selling price of the sixth lot of a tract is $10,000, the basis of the lot in the hands of the taxpayer is $5,000, and the expenses of sale are $750. The amount of gain realized by the taxpayer is $4,250, of which the amount of ordinary income attributable to the sale is zero, computed as follows:

| | | |
|---|---|---|
| Selling price | | $10,000 |
| Basis | | 5,000 |
| Excess over basis | | 5,000 |
| 5 percent of selling price | $500 | |
| Expenses of sale | 750 | |
| Amount of gain realized treated as ordinary income | | 0 |
| Excess over basis | | $5,000 |
| 5 percent of selling price | $500 | |
| Excess of expenses over 5 percent of selling price | 250 | |
| | | 750 |
| Amount of gain realized from sale of property not held for sale in ordinary course of business | | 4,250 |

*Example (2).* Assume the same facts as in Example (1), except that the expenses of sale of such sixth lot are $300. The amount of gain realized by the taxpayer is $4,700, of which the amount of ordinary income attributable to the sale is $200, computed as follows:

| | | |
|---|---|---|
| Selling price | | $10,000 |
| Basis | | 5,000 |
| Excess over basis | | 5,000 |
| 5 percent of selling price | $500 | |
| Expenses of sale | 300 | |
| Amount of gain realized treated as ordinary income | | 200 |
| Excess over basis | | 5,000 |
| 5 percent of selling price | $500 | |
| Excess of expenses over 5 percent of selling price | 0 | |
| | | 500 |
| Amount of gain realized from sale of property not held for sale in ordinary course of business | | 4,500 |

(iii) In the case of an exchange, the term "selling price" shall mean the fair market value of property received in exchange for the lot. See section 1031 for those exchanges in which no gain is recognized.

(f) *Relationship of section 1237 and section 1231.* Application of section 1237 to a sale of real property may, in some cases, result in the property being treated as real property used in the trade or business, as described in section 1231 (b) (1). Thus, assuming section 1237 is otherwise applicable, if the lot sold would be considered property described in section 1231 (b) (1) except for the fact that the taxpayer subdivided the tract of which it was a part, then evidence of such subdivision and connected sales activities shall be disregarded and the lot sold shall be considered real property used in the trade or business. Under such circumstances, any gain (to the extent not treated as ordinary income under section 1237 (b) (1) and (2)), or any loss, realized from the sale shall be treated as gain or loss arising from the sale of real property used in the trade or business.

(g) *Definition of "tract".* (1) For the purposes of section 1237, the term "tract" means either (i) a single piece of real property or (ii) two or more pieces of real property if they were contiguous at any time while held by the taxpayer, or would have been contiguous but for the interposition of a road, street, railroad, stream or similar property. Such properties are contiguous if they would meet at more than one point if their boundaries were continued. The single piece or contiguous properties need not have been conveyed by a single deed. The taxpayer may have assembled them over a period of time and may hold them separately, jointly, or as a partner, or in any combination of such forms of ownership.

(2) If the taxpayer sells or exchanges no lots from the tract for a period of 5 years after the sale or exchange of at least one lot in the tract, then the remainder of the tract shall be deemed a new tract for the purpose of counting the number of lots sold from the same tract under section 1237 (b) (1). The pieces in the new tract need not be contiguous. The 5-year period is measured between the dates of the sales or exchanges.

(h) *Effective date.* This section shall apply only to gain realized on sales made after December 31, 1953, or, in the case of a person meeting the requirements of paragraph (c) (5) (iv) of this section, if the sale of the lot occurs in a taxable year beginning after December 31, 1954. Sales or exchanges made before January 1, 1954, shall be taken into account, however, to determine whether: (1) no sales or exchanges have been made for 5 years, under section 1237 (c), and (2) more than 5 lots or parcels have been sold or exchanged from the same tract, under section 1237 (b) (1). Thus, if the taxpayer sold 5 lots from a single tract in 1950, and another lot is sold in 1954, the lot sold in 1954 constitutes the "sixth lot" sold from the original tract. On the other hand, if the first 5 lots were sold in 1948, the sale made in 1954 shall be deemed to have been made from a new tract.

[F. R. Doc. 56-5179; Filed, June 28, 1956; 8:54 a. m.]

## DEPARTMENT OF THE INTERIOR

### Bureau of Mines

### [ 30 CFR Part 11 ]

[Schedule 13D]

### SELF-CONTAINED BREATHING APPARATUS

### NOTICE OF PROPOSED RULE MAKING

There was published in the FEDERAL REGISTER of December 1, 1955 (20 F. R. 8831), a notice and text of proposed amendment of the regulations governing tests and investigations leading to approval of self-contained breathing apparatus. Interested persons were invited to submit written data, views, or arguments concerning the proposed amendment.

After consideration of the views and data received, it is proposed to amend Part 11 in its entirety, to read as indicated below. Interested persons may submit, in triplicate, written data, views or arguments concerning this proposed amendment to the Director, Bureau of Mines, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER.

*Preliminary statement.* The Bureau of mines is prepared, at its Central Experiment Station, Pittsburgh, Pa., to conduct tests to determine the permissibility of self-contained breathing apparatus for use in irrespirable and poisonous gases.

The authority for conducting such tests and investigations is contained in the act of May 16, 1910, as amended (36 Stat. 370, 30 U. S. C. 3, 5, 7), and in Executive Order No. 6611, February 22, 1934. The act, as so amended, contains the following provision:

For tests or investigations authorized by the Secretary of the Interior under the provisions of this Act, as amended and supplemented, except those performed for the Government of the United States or State governments within the United States, a fee sufficient in each case to compensate the Bureau of Mines for the entire cost of the services rendered shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

(These regulations constitute Schedule 13D and supersede all schedules heretofore issued by the Bureau of Mines relating to the testing and approval of self-contained breathing apparatus.)

Sec.

11.1 Definition of "permissible."
11.2 Conditions under which apparatus will be tested.
11.3 Fees for testing.
11.4 General requirements.
11.5 Construction.
11.6 Character and general description of tests.
11.7 Detailed procedure of tests.
11.8 Approval of regenerators.
11.9 Notification of approval or disapproval.
11.10 Approval plates and markings for permissible apparatus and for approved supplemental parts.
11.11 Changes subsequent to approval.
11.12 Withdrawal of approval.

AUTHORITY: §§ 11.1 to 11.12 issued under 37 Stat. 681, as amended by 47 Stat. 410; E. O. 6611, Feb. 22, 1934, 30 U. S. C. secs. 3, 5, 7.

§ 11.1 *Definition of "permissible."* The Bureau of Mines considers a self-contained breathing apparatus to be permissible for use in irrespirable and poisonous gases if all the details of construction and materials are the same in all respects as those of a self-contained breathing apparatus that has passed the tests for safety, practicability, and efficiency in accordance with standards established by the Bureau and hereinafter described.

§ 11.2 *Conditions under which apparatus will be tested.* The conditions under which the Bureau of Mines will examine and test a self-contained breathing apparatus to establish its permissibility follow:

(a) (1) Application for inspection, examination, and testing shall be made in duplicate to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., and shall be accompanied by (i) a check, bank draft, or money order (see § 11.3) payable to the order of the United States Bureau of Mines; (ii) a complete written description of the apparatus in duplicate; and (iii) a set of drawings in duplicate showing full details of construction of the apparatus. If an apparatus operates with a regenerator, the application shall be accompanied by a complete written description of the regenerator and a set of drawings showing full details of its construction, all in duplicate. The ap-

making such sales in a taxable year beginning after December 31, 1954, if such

convincing evidence that the taxpayer held the real property solely as an in-

without regard to the application of section 1237 to such other real property.

instead of requiring the improvements, the buyer releases A from this obligation. A may then claim the application of section 1237

subdivision (iv) of this subparagraph applies, may obtain the benefits of section

$2,500, his tract will sell for approximately $4,000 per acre. Under section 1237 (b) (3)

(B) the installation of water facilities and roads shall not constitute a substantial improvement, if A elects to disregard the $2,500 cost of such improvements in computing his cost or other basis for the lots sold from the tract, and in computing his basis for any other property owned by him.

*Example* (2). Assume the same facts as in example (1) of this subdivision except that A can obtain $1,600 per acre for his property without improvements. The installation of any substantial improvements would not constitute a necessary improvement under section 1237 (b) (3), since the prevailing local price could have been obtained without any improvement.

*Example* (3). Assume the same facts as in example (1) of this subdivision except that the adjacent tract has also been improved with sewer facilities, the present cost of which is $1,200 per acre. The installation of the substantial improvements would not constitute a necessary improvement under section 1237 (b) (3) on A's part, since the prevailing local price ($4,000, less the sum of $1,200 plus $2,500, or $300) could have been obtained by A without any improvement.

(iii) The election required by section 1237 (b) (3) (C) shall be made as follows:

(*a*) The taxpayer shall submit:

(*1*) A plat showing the subdivision and all improvements attributable to him.

(*2*) A list of all improvements to the tract, showing:

(*i*) Costs.

(*ii*) Which of the costs, apart from the election, he considers "substantial" and which he considers not "substantial".

(*iii*) Those improvements which are substantial to which the election is to apply, with a fair allocation of their cost to each lot they affect, and the amount by which they have increased the values of such lots.

(*iv*) The date on which each lot was acquired and its basis for determining gain or loss, exclusive of the cost of any improvements listed in subdivision (*iii*) of this subdivision.

(*3*) A statement that he will not deduct as an expense nor add to the basis of the lots sold, or of any other property, the cost to which this section applies, and allocated to any lot sold, of any improvement which substantially increased the value of such lot and which either he listed in subdivision (*2*) (*iii*) of this subdivision or which the district director deems substantial.

(*b*) The election and the information required under subdivision (*a*) of this subdivision shall be submitted to the district director:

(*1*) With the taxpayer's income tax return for the taxable year in which the lots subject to the election were sold, or

(*2*) In the case of a return filed prior to the publication in the FEDERAL REGISTER of the regulations under section 1237 following their adoption, either with a timely formal claim for refund, or independently within 90 days of such publication, to be attached to such return if it is otherwise in accordance with section 1237 and the regulations thereunder, or

(*3*) If there is an obligation to make disqualifying improvements outstanding when the taxpayer files his return, with a formal claim for refund at the time of the release of the obligation, if it is then still possible to file a timely claim.

(c) Once made, the election as to the necessary improvement costs attributable to any lot sold shall be irrevocable and binding on the taxpayer unless the district director assesses an income tax as to such lot as if it were held for sale in the ordinary course of taxpayer's business. Under such circumstances, in computing gain, the cost or other basis shall be computed without regard to section 1237.

(iv) For taxable years beginning after December 31, 1954, individual taxpayers and certain corporations may obtain the benefits of section 1237 without complying with the provisions of subdivisions (i) (c) and (*d*), (ii), and (iii) of this subparagraph if the requirements of section 1237 are otherwise met and if—

(*a*) The property in question was acquired by the taxpayer through the foreclosure of a lien thereon,

(*b*) The lien foreclosed secured the payment of an indebtedness to the taxpayer or (in the case of a corporation) secured the payment of an indebtedness to a creditor who has transferred the foreclosure bid to the taxpayer in exchange for all of the stock of the corporation and other consideration, and

(c) In the case of a corporate taxpayer, no shareholder of the corporation holds real property for sale to customers in the ordinary course of trade or business, directly or indirectly.

Thus, in the case of such property, it is not necessary for the taxpayer to satisfy the district director that the property would not have brought the prevailing local price without improvements or to elect not to add the cost of the improvements to his basis. In addition, if 80 percent or more of the real property owned by a taxpayer is property to which this subdivision applies, the requirements of subdivisions (*a*) and (*b*) of this subdivision need not be met with respect to property adjacent to such property which is also owned by the taxpayer.

(d) *Holding period required.* (1) To apply section 1237, the taxpayer must either have inherited the lot sold or have held it for 5 years. In computing the 5-year holding period, if the taxpayer has the same basis, in whole or in part, for the property as another person, the period that such other person held the property shall be added to the period that the taxpayer held it. See section 1223 (2).

(2) If the taxpayer inherited the property there is no 5-year holding period required under section 1237. However, any holding period required under sections 1222, 1223 or other provisions of the Code are still applicable. Neither the survivor's one-half of community property, nor property acquired by survivorship in a joint tenancy is property acquired by devise or inheritance. The holding period for the surviving joint tenant begins on the date the property was originally acquired.

(e) *Tax consequences if section 1237 applies.* (1) Where there is no substantial evidence other than subdivision and related selling activities that real property is held for sale in the ordinary course of taxpayer's business and section 1237 applies, section 1237 (b) (1) provides a special rule for computing taxable gain. For the relationship between sections 1237 and 1231, see paragraph (f) of this section.

(2) (i) When the taxpayer has sold less than six lots or parcels from the same tract up to the end of his taxable year, the entire gain will be capital gain. (Where the land is used in a trade or business, see paragraph (f) of this section.) In computing the number of lots or parcels sold, two or more contiguous lots sold to a single buyer in a single sale will be counted as only one parcel. The following example illustrates this rule.

*Example.* A meets all the conditions of section 1237, in subdividing and selling a single tract. There is no other evidence he holds any real property for sale. In 1956 he sells four lots to B, C, D, and E. In the same year F buys three adjacent lots. Since A has sold only 5 lots or parcels from the tract, any gain A realizes on the sales will be capital gain.

(ii) If the taxpayer has sold the sixth lot or parcel from the same tract within the taxable year, then the amount, if any, by which 5 percent of the selling price of each lot exceeds the expenses incurred in connection with its sale or exchange, shall be ordinary income. Any part of the gain not treated as ordinary income will be treated as capital gain. (Where the land is used in a trade or business, see paragraph (f) of this section.) Five percent of the selling price of each lot sold from the tract is considered ordinary income in the taxable year the sixth lot is sold and thereafter. However, all expenses must be considered expenses of sale of the lot and are deducted first from the 5 percent of the gain considered ordinary income and thereafter from any further gain. Such expenses cannot be deducted as ordinary business expenses from other income. The 5 percent rule applies to all lots sold from the tract in the year the sixth lot or parcel is sold. Thus, if the taxpayer sells the first six lots of a single tract in one year, 5 percent of the selling price of each lot sold shall be treated as ordinary income and reduced by the selling expenses. On the other hand, if the taxpayer sells the first three lots of a single tract in 1955, and the next three lots in 1956, only the gain realized from the sales made in 1956 shall be so treated. For the effect of a 5-year interval between sales, see paragraph (g) (2) of this section. The operation of this subdivision may be illustrated by the following examples:

*Example (1).* Assume the selling price of the sixth lot of a tract is $10,000, the basis of the lot in the hands of the taxpayer is $5,000, and the expenses of sale are $750. The amount of gain realized by the taxpayer is $4,250, of which the amount of ordinary income attributable to the sale is zero, computed as follows:

| | | |
|---|---|---|
| Selling price | | $10,000 |
| Basis | | 5,000 |
| Excess over basis | | 5,000 |
| 5 percent of selling price | $500 | |
| Expenses of sale | 750 | |
| Amount of gain realized treated as ordinary income | | 0 |
| Excess over basis | | 5,000 |
| 5 percent of selling price | $500 | |
| Excess of expenses over 5 percent of selling price | 250 | |
| | | 750 |
| Amount of gain realized from sale of property not held for sale in ordinary course of business | | 4,250 |

*Example (2).* Assume the same facts as in Example (1), except that the expenses of sale of such sixth lot are $300. The amount of gain realized by the taxpayer is $4,700, of which the amount of ordinary income attributable to the sale is $200, computed as follows:

| | | |
|---|---|---|
| Selling price | | $10,000 |
| Basis | | 5,000 |
| Excess over basis | | 5,000 |
| 5 percent of selling price | $500 | |
| Expenses of sale | 300 | |
| Amount of gain realized treated as ordinary income | | 200 |
| Excess over basis | | 5,000 |
| 5 percent of selling price | $500 | |
| Excess of expenses over 5 percent of selling price | 0 | |
| | | 500 |
| Amount of gain realized from sale of property not held for sale in ordinary course of business | | 4,500 |

(iii) In the case of an exchange, the term "selling price" shall mean the fair market value of property received in exchange for the lot. See section 1031 for those exchanges in which no gain is recognized.

(f) *Relationship of section 1237 and section 1231.* Application of section 1237 to a sale of real property may, in some cases, result in the property being treated as real property used in the trade or business, as described in section 1231 (b) (1). Thus, assuming section 1237 is otherwise applicable, if the lot sold would be considered property described in section 1231 (b) (1) except for the fact that the taxpayer subdivided the tract of which it was a part, then evidence of such subdivision and connected sales activities shall be disregarded and the lot sold shall be considered real property used in the trade or business. Under such circumstances, any gain (to the extent not treated as ordinary income under section 1237 (b) (1) and (2)), or any loss, realized from the sale shall be treated as gain or loss arising from the sale of real property used in the trade or business.

(g) *Definition of "tract".* (1) For the purposes of section 1237, the term "tract" means either (i) a single piece of real property or (ii) two or more pieces of real property if they were contiguous at any time while held by the taxpayer, or would have been contiguous but for the interposition of a road, street, railroad, stream or similar property. Such properties are contiguous if they would meet at more than one point if their boundaries were continued. The single piece or contiguous properties need not have been conveyed by a single deed. The taxpayer may have assembled them over a period of time and may hold them separately, jointly, or as a partner, or in any combination of such forms of ownership.

(2) If the taxpayer sells or exchanges no lots from the tract for a period of 5 years after the sale or exchange of at least one lot in the tract, then the remainder of the tract shall be deemed a new tract for the purpose of counting the number of lots sold from the same tract under section 1237 (b) (1). The pieces in the new tract need not be contiguous. The 5-year period is measured between the dates of the sales or exchanges.

(h) *Effective date.* This section shall apply only to gain realized on sales made after December 31, 1953, or, in the case of a person meeting the requirements of paragraph (c) (5) (iv) of this section, if the sale of the lot occurs in a taxable year beginning after December 31, 1954. Sales or exchanges made before January 1, 1954, shall be taken into account, however, to determine whether: (1) no sales or exchanges have been made for 5 years, under section 1237 (c), and (2) more than 5 lots or parcels have been sold or exchanged from the same tract, under section 1237 (b) (1). Thus, if the taxpayer sold 5 lots from a single tract in 1950, and another lot is sold in 1954, the lot sold in 1954 constitutes the "sixth lot" sold from the original tract. On the other hand, if the first 5 lots were sold in 1948, the sale made in 1954 shall be deemed to have been made from a new tract.

[F. R. Doc. 56-5179; Filed, June 28, 1956; 8:54 a. m.]

## DEPARTMENT OF THE INTERIOR

### Bureau of Mines

### [ 30 CFR Part 11 ]

[Schedule 13D]

### SELF-CONTAINED BREATHING APPARATUS

### NOTICE OF PROPOSED RULE MAKING

There was published in the FEDERAL REGISTER of December 1, 1955 (20 F. R. 8831), a notice and text of proposed amendment of the regulations governing tests and investigations leading to approval of self-contained breathing apparatus. Interested persons were invited to submit written data, views, or arguments concerning the proposed amendment.

After consideration of the views and data received, it is proposed to amend Part 11 in its entirety, to read as indicated below. Interested persons may submit, in triplicate, written data, views or arguments concerning this proposed amendment to the Director, Bureau of Mines, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER.

*Preliminary statement.* The Bureau of mines is prepared, at its Central Experiment Station, Pittsburgh, Pa., to conduct tests to determine the permissibility of self-contained breathing apparatus for use in irrespirable and poisonous gases.

The authority for conducting such tests and investigations is contained in the act of May 16, 1910, as amended (36 Stat. 370, 30 U. S. C. 3, 5, 7), and in Executive Order No. 6611, February 22, 1934. The act, as so amended, contains the following provision:

For tests or investigations authorized by the Secretary of the Interior under the provisions of this Act, as amended and supplemented, except those performed for the Government of the United States or State governments within the United States, a fee sufficient in each case to compensate the Bureau of Mines for the entire cost of the services rendered shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

(These regulations constitute Schedule 13D and supersede all schedules heretofore issued by the Bureau of Mines relating to the testing and approval of self-contained breathing apparatus.)

Sec.
11.1 Definition of "permissible."
11.2 Conditions under which apparatus will be tested.
11.3 Fees for testing.
11.4 General requirements.
11.5 Construction.
11.6 Character and general description of tests.
11.7 Detailed procedure of tests.
11.8 Approval of regenerators.
11.9 Notification of approval or disapproval.
11.10 Approval plates and markings for permissible apparatus and for approved supplemental parts.
11.11 Changes subsequent to approval.
11.12 Withdrawal of approval.

AUTHORITY: §§ 11.1 to 11.12 issued under 37 Stat. 681, as amended by 47 Stat. 410; E. O. 6611, Feb. 22, 1934, 30 U. S. C. secs. 3, 5, 7.

§ 11.1 *Definition of "permissible."* The Bureau of Mines considers a self-contained breathing apparatus to be permissible for use in irrespirable and poisonous gases if all the details of construction and materials are the same in all respects as those of a self-contained breathing apparatus that has passed the tests for safety, practicability, and efficiency in accordance with standards established by the Bureau and hereinafter described.

§ 11.2 *Conditions under which apparatus will be tested.* The conditions under which the Bureau of Mines will examine and test a self-contained breathing apparatus to establish its permissibility follow:

(a) (1) Application for inspection, examination, and testing shall be made in duplicate to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., and shall be accompanied by (i) a check, bank draft, or money order (see § 11.3) payable to the order of the United States Bureau of Mines; (ii) a complete written description of the apparatus in duplicate; and (iii) a set of drawings in duplicate showing full details of construction of the apparatus. If an apparatus operates with a regenerator, the application shall be accompanied by a complete written description of the regenerator and a set of drawings showing full details of its construction, all in duplicate. The ap-

plication shall state, among other things, whether the apparatus is ready to be marketed.

(2) Applicants, manufacturers, or their representatives may visit or communicate with the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., to obtain criticism of proposed designs or to discuss the requirements covering the approval of self-contained breathing apparatus. No charge is made for such consultation.

(b) The examination, inspection, and test shall be made at the Central Experiment Station, Bureau of Mines, Pittsburgh, Pa.

(c) The applicant, submitting the self-contained breathing apparatus for inspection, examination, and test, will be required to provide two sets of apparatus, prepaid to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa. If the apparatus successfully passes all the tests and requirements hereinafter specified, one set of the apparatus will be retained by the Bureau of Mines as a laboratory exhibit and the other set will be returned to the applicant. If the apparatus does not pass all of the Bureau's tests or requirements, both sets of apparatus will be returned to the applicant at his expense.

(d) Each self-contained breathing apparatus submitted for test shall have marked on it in a distinct manner the name and address of the manufacturer and the name, letter, or number by which the apparatus is designated for trade purposes.

(e) (1) For tests of self-contained oxygen breathing apparatus utilizing a supply of compressed gaseous oxygen, the oxygen will be supplied by the Bureau of Mines and will be of the purity specified in contracts by the Bureau for use in its own self-contained breathing apparatus, namely, at least 98 percent oxygen and the remainder nitrogen. The applicant shall supply such regenerators or regenerating materials as are necessary to operate the apparatus during the tests as hereinafter described.

(2) For tests of self-contained breathing apparatus utilizing a supply of compressed air, the applicant shall supply the compressed air (in suitable containers) necessary in making the hereafter desired tests. The compressed air shall not contain any amount of gaseous, liquid, or solid substance that is harmful to a wearer of the apparatus under any condition of use. The applicant shall furnish a written statement setting forth the method used to compress the air and the controls used to prevent contamination of the compressed air by any gaseous, liquid, or solid substance that is harmful to a human being.

(3) For tests of self-contained breathing apparatus utilizing a supply of oxygen that is generated by a chemical reaction when using the apparatus, the applicant shall supply the oxygen-generating chemicals (in suitable containers) in amounts necessary to conduct the hereafter described tests. The oxygen shall not contain any amount of gaseous, liquid, or solid substance that is harmful to a wearer of the apparatus under any condition of use. The applicant shall furnish a written statement setting forth the method by which the oxygen is generated and the chemical reaction involved for this purpose during the use of the apparatus. Furthermore, this statement shall set forth how the chemicals in the oxygen generator have been manufactured so as to prevent contamination of the oxygen by any gaseous, liquid, or solid substance in amounts or proportions harmful to a human being.

(f) On receipt of the self-contained breathing apparatus for which application has been made for examination, inspection, or test, the applicant will be notified whether the apparatus meets the requirements of these regulations and whether additional spare parts are necessary to facilitate making a proper test of the apparatus. The applicant will be required to provide additional parts, if needed, and also to alter the apparatus, if necessary.

(g) No self-contained breathing apparatus will be tested unless it is in the complete form in which it is to be marketed.

(h) As soon as possible after the formal application for the test and the apparatus to be tested have been received, the applicant will be notified of the date on which the test will begin and if any additional material is required.

(i) Tests will be made in the order of receipt of application, provided that the applicant has furnished the necessary apparatus and material.

(j) Self-contained breathing apparatus in course of development may be submitted by manufacturers and inventors for preliminary tests or inspection to ascertain defective construction or misapplication of safety principles. The Bureau will determine the nature of such test or inspection and the fee, if any. If a fee is to be charged, it shall be paid before the test or inspection is undertaken.

(k) No one shall be present during any part of the formal investigation, conducted by the Bureau, that leads to approval except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. When a self-contained breathing apparatus is approved as permissible, the Bureau will announce that such approval has been granted and may thereafter conduct from time to time, in its discretion, public demonstrations of the tests of approved self-contained breathing apparatus. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. The results of chemical analyses and all information contained in the drawings, specifications, and instructions shall be deemed confidential, and the Bureau will appropriately safeguard them against disclosure.

(l) Breathing apparatus will be tested for manufacturers or accredited agents of manufacturers and for inventors.

(m) The Bureau of Mines will make public from time to time a list of permissible self-contained breathing apparatus and data on tests of such equipment.

§ 11.3 *Fees for testing.*

| | Apparatus with separate regenerator | Oxygen generating apparatus | Demand-type apparatus |
|---|---|---|---|
| Complete 2-hour self-contained breathing apparatus inspection and tests | $1,500 | $1,500 | $1,500 |
| Complete 1-hour self-contained breathing apparatus inspection and tests | 1,390 | 1,390 | 1,390 |
| Complete ¾-hour self-contained breathing apparatus inspection and tests | 1,390 | 1,390 | 1,390 |
| Complete ½-hour self-contained breathing apparatus inspection and tests | 1,390 | 1,390 | 1,390 |
| Separate preliminary 2-hour apparatus inspection and tests | 230 | 230 | 230 |
| Separate preliminary 1-hour apparatus inspection and tests | 230 | 230 | 230 |
| Separate preliminary ¾-hour apparatus inspection and tests | 230 | 230 | 230 |
| Separate preliminary ½-hour apparatus inspection and tests | 230 | 230 | 230 |
| Separate supplementary facepiece assembly | 230 | 230 | ---------- |
| Separate regenerator 2-hour apparatus inspection and tests | 165 | ---------- | ---------- |
| Separate regenerator 1-hour apparatus inspection and tests | 165 | ---------- | ---------- |
| Separate regenerator ¾-hour apparatus inspection and tests | 165 | ---------- | ---------- |
| Separate regenerator ½-hour apparatus inspection and tests | 165 | ---------- | ---------- |
| Special reducing valve inspection and tests, all models | 165 | 165 | 165 |
| Separate auxiliary parts inspection and tests, each part | 110 | 110 | 110 |

Fees for testing unusually complicated types of self-contained breathing apparatus and for extensions of approval will be based on the actual cost of testing, as determined by the Bureau of Mines in advance; the applicant will be notified and the fees paid before the tests are begun.

§ 11.4 *General requirements.* To receive approval of the Bureau of Mines for any type of self-contained breathing apparatus described under types A, B, C, or D in the following, the apparatus must comply with the requirements specified. Four general types of self-contained breathing apparatus will be tested—type A, ½-hour; type B, ¾-hour; type C, 1-hour; and type D, 2-hour. To be approved each type of breathing apparatus must pass satisfactorily all of the tests specified for the respective type in § 11.7. The Bureau considers that the A, ½-hour, and B, ¾-hour, types are suitable for mine rescue and recovery work as auxiliary equipment only.

(a) The amount of oxygen or air supplied by the apparatus must meet the needs of the wearer at all times.

(b) The apparatus shall be free from mechanical obstructions so that the wearer can breathe freely at all times.

(c) The temperature of the inspired atmosphere shall not exceed 110° F. when the temperature of the atmosphere external to the apparatus does not exceed 85° F. The Bureau will not test self-contained breathing apparatus when the temperature external to the apparatus exceeds 85° F. or is less than 60° F.

(d) The apparatus shall be durable in construction, and all vital parts shall be so protected as to prevent damage or excessive wear during the tests to which it will be subjected.

(e) (1) For an apparatus, equipped with a mouth-breathing device in which the expired atmosphere is recirculated and which utilizes a supply of compressed oxygen and a regenerator, the regenerating material (absorbent) shall absorb carbon dioxide from the expired atmosphere. Samples of the atmosphere within the apparatus shall be taken for analytical determination of carbon dioxide content. The atmosphere within the apparatus shall be sampled as near to the point of inspiration as practicable, only while the wearer is inhaling, over a period covering several inhalations, and at uniform intervals of time. None of the samples so taken shall contain more than 2½ percent of carbon dioxide. The average carbon dioxide content of all atmospheric samples taken from within the apparatus during the test shall not exceed 1 percent.

(2) For an apparatus, equipped with a facepiece, in which the expired atmosphere is recirculated and which utilizes a supply of compressed oxygen and a regenerator, the regenerating material (absorbent) shall absorb carbon dioxide from the expired atmosphere. Samples of the atmosphere within the apparatus shall be taken for analytical determination of carbon dioxide content. The atmosphere within the apparatus shall be sampled only when the wearer is inhaling, over a period covering several inhalations, and at uniform intervals of time. None of the samples so taken shall contain more than 2½ percent of carbon dioxide. Samples of the atmosphere within the apparatus shall be taken from the inhalation side of the apparatus as near as possible to the facepiece; the average carbon dioxide content of such samples shall not exceed 1 percent during the test. Samples of the atmosphere within the apparatus also shall be taken from within the facepiece as near as practicable to the nose and mouth of the wearer; the average carbon dioxide content of such samples shall not exceed 2 percent during the test.

(3) From an oxygen-generating apparatus, equipped with a mouth-breathing device, in which the expired atmosphere is recirculated and in which a chemical change is effected so that carbon dioxide is absorbed concurrently with the generation of oxygen, samples of the atmosphere within the apparatus shall be taken for analytical determination of carbon dioxide content. The atmosphere within the apparatus shall be sampled as near to the point of inspiration as practicable, only while the wearer is inhaling, over a period covering several inhalations, and at uniform intervals of time. None of the samples so taken shall contain more than 2½ percent of carbon dioxide. The average carbon dioxide content of all atmospheric samples taken from within the apparatus during the test shall not exceed 1 percent.

(4) For an oxygen-generating apparatus, equipped with a facepiece, in which the expired atmosphere is recirculated and in which a chemical change is effected so that carbon dioxide is absorbed concurrently with the generation of oxygen, samples of the atmosphere within the apparatus shall be taken for analytical determination of carbon dioxide content. The atmosphere within the apparatus shall be sampled only when the wearer is inhaling, over a period covering several inhalations, and at uniform intervals of time. None of the samples so taken shall contain more than 2½ percent of carbon dioxide. Samples of the atmosphere within the apparatus shall be taken from the inhalation side of the apparatus as near as possible to the facepiece; the average carbon dioxide content of such samples shall not exceed 1 percent during the test. Samples of the atmosphere within the apparatus also shall be taken from within the facepiece as near as practicable to the nose and mouth of the wearer; the average carbon dioxide content of such samples shall not exceed 2 percent during the test.

(5) For an apparatus, equipped with a mouth-breathing device, in which the expired atmosphere is not recirculated, as in open-circuit (demand) apparatus, and which utilizes a supply of compressed oxygen or compressed air, samples of the atmosphere within the apparatus shall be taken for analytical determination of carbon dioxide content. The atmosphere within the apparatus shall be sampled as near to the point of inspiration as practicable, only while the wearer is inhaling, over a period covering several inhalations, and at uniform intervals of time. None of the samples so taken shall contain more than 2½ percent of carbon dioxide. The average carbon dioxide content of all atmospheric samples taken from within the apparatus during the test shall not exceed 1 percent.

(6) For an apparatus, equipped with facepiece, in which the expired atmosphere is not recirculated, as in open-circuit (demand) apparatus, and which utilizes a supply of compressed oxygen or compressed air, samples of the atmosphere within the apparatus shall be taken for analytical determination of carbon dioxide content. The atmosphere within the apparatus shall be sampled only when the wearer is inhaling, over a period covering several inhalations, and at uniform intervals of time. None of the samples so taken shall contain more than 2½ percent of carbon dioxide. Samples of the atmosphere within the apparatus shall be taken from the inhalation side of the apparatus as near as practicable to the nose and mouth of the wearer; the average carbon dioxide content of such samples shall not exceed 2 percent during the test.

(f) All parts of a self-contained breathing apparatus, including the source of the breathed atmosphere, shall be carried on the body of the wearer.

§ 11.5 *Construction.* (a) When worn in irrespirable air, the apparatus shall, without recharging, meet the needs of the wearer for not less than the number of minutes for which it was designed.

(b) The mechanical construction of the apparatus shall be such that every part can be tested, inspected, and repaired by persons that are skilled in such work, and all parts that require sterilizing shall be readily accessible for this purpose.

(c) All parts of the apparatus subject to or liable to be subjected to pressures in excess of 5 pounds per square inch shall be so constructed and equipped with safety devices that the safety of the wearer shall be assured, as determined by the 15 tests described in § 11.7.

(d) In apparatus equipped with a breathing bag or bags, or their equivalent, the inhalation and exhalation compartments shall have a combined capacity of at least 8 liters. If a single breathing bag is used, it shall have a capacity of at least 5 liters.

(e) In apparatus equipped with a breathing bag that is used in conjunction with operation of an oxygen- or air-admission valve, the bag shall have a capacity of at least 3 liters after the admission valve is closed. After 3 liters of oxygen or air is introduced into the breathing bag, the water-gage pressure shall not exceed 3 inches.

(f) All parts enclosing the breathed atmosphere of a self-contained breathing apparatus shall consist of material that will exclude gases external to the apparatus and be impervious to gasoline vapor for at least a 2½-hour period. The material shall be of good strength and be flexible, and the joints or seams shall be either cemented and sewed or vulcanized or bound in such manner that the part or parts will not become separated at the joints or seams when the apparatus is in use. Such part or parts may be made in one piece without joints or seams.

(g) The apparatus shall not have in its circulatory system any zone of constant negative pressure, or a positive pressure at the mouthpiece or facepiece of more than 3 inches water gage after a 2½-liter exhalation.

(h) A self-contained breathing apparatus in which the expired atmosphere is recirculated shall be provided with a release valve that is operated manually or automatically and is placed at some point in the circulatory system of the apparatus. The function of this valve shall be to permit the escape to the outside atmosphere of a part of the atmosphere in the circulatory system of the apparatus. The valve shall be so designed that the outside atmosphere cannot be drawn into the apparatus.

(i) When apparatus is equipped with high-pressure gas container(s) the applicant shall furnish therewith a certificate of test required by the Interstate Commerce Commission under Specifica-

tions No. 3–A or equivalent specifications or shall give evidence satisfactory to the Bureau that such high-pressure gas container(s) were tested in accordance with Interstate Commerce Commission Specifications No. 3–A or equivalent specifications.

(j) (1) When an apparatus is equipped with a high-pressure gas container charged with compressed oxygen or compressed air to a pressure 10 percent in excess of its marked service pressure, the container shall be equipped with a perforated safety cap attached to the main closing valve. The perforated safety cap shall contain a frangible disk, without fusible metal backing, and the disk shall have a bursting pressure of 2,650 to 3,000 pounds per square inch.

(2) When an apparatus is equipped with a high-pressure gas container charged with compressed oxygen or compressed air at a pressure not in excess of its marked service pressure, the container shall be equipped with a perforated safety cap attached to the main closing valve. The perforated safety cap shall contain a frangible disk, without fusible metal backing, having a bursting pressure of 2,650 to 3,000 pounds per square inch. As an alternate, when the high-pressure gas container is charged at a pressure not in excess of its marked service pressure, the container may be equipped with a perforated safety cap attached to the main closing valve and the safety cap provided with a plain copper disk and fiber gasket and filled with a metal (such as Rose's metal) having a fusing temperature of approximately 94° C. Such fusible metal shall not be forced from the perforated safety cap by a pressure less than 2,250 pounds per square inch.

(k) (1) The closing valve of the high-pressure gas container shall be provided with a device to prevent the wearer of the apparatus from screwing the stem entirely out of the valve. The closing valve shall also be provided with a device to enable the wearer to lock the valve stem open when the valve has been opened to the desired point. The valve-closing device shall be operable by hand without use of wrenches or external levers.

(2) Main and bypass valves that control the flow of compressed oxygen or compressed air from the source of supply shall be so located that they can be manipulated readily by the wearer when the apparatus is being worn.

(l) When an apparatus is equipped with a gage for recording time or pressure of compressed-oxygen or compressed-air supply, the Bureau of Mines will test such a gage for accuracy of calibration. A variation of 3 atmospheres (approximately 45 pounds per square inch) will be allowed in comparison with the pressure shown by the Bureau of Mines standard pressure gage.

(m) (1) Apparatus having a separate pressure-gage connection shall be equipped with a valve to shut off the compressed-oxygen or compressed-air supply from the gage. The gage-connection valve shall be so placed that it can be manipulated readily by the wearer without interfering with the flow of compressed oxygen or compressed air from the high-pressure gas container to the circulatory system of the apparatus.

(2) An oxygen-generating, self-contained breathing apparatus shall be equipped with a timing device that will indicate accurately the number of minutes a person may continue to wear the apparatus with safety.

(n) Any pressure gage or timing device shall be so located that it can be read easily by the wearer.

(o) Apparatus equipped with a reducing valve giving a constant or automatic flow of oxygen or air shall be provided with a bypass valve that will permit compressed oxygen or compressed air to flow freely from the high-pressure gas container to the circulatory system of the apparatus, independent of the reducing valve.

(p) When the compressed-oxygen or compressed-air supply of the apparatus is controlled by automatic devices, such devices shall adjust themselves readily to the needs of the wearer.

(q) Apparatus in which the expired atmosphere is recirculated and which is equipped with either a mouth-breathing device or a facepiece shall be provided with an adequate saliva or moisture trap and release valve at the exhalation side of the inhalation and exhalation valve assembly and shall be so designed that, while the saliva or moisture trap and release valve are functioning, any atmosphere that may be external thereto cannot be drawn into the apparatus.

(r) Apparatus equipped with a mouth-breathing device shall be provided with a suitable nose clip properly attached to the apparatus. The suitability of the nose clip will be determined by the tests to which the apparatus will be subjected.

(s) Self-contained breathing apparatus submitted for testing and approval shall not weigh more than 40 pounds when completely assembled and fully charged.

(t) Apparatus equipped with a facepiece shall meet the following requirements:

(1) The facepiece shall be so constructed as to assure quick, gastight fit on persons of widely varying facial dimensions and contours.

(2) The eyepiece(s) of the facepiece shall be of the nonshatter type and be so designed as to provide a satisfactory field of vision for persons of widely varying facial dimensions and contours. Air or oxygen shall enter the facepiece in such manner as will prevent excessive accumulation of moisture on the eyepiece(s). If fog-preventing solutions or other substances are applied to or furnished for application to the lenses of the eyepiece(s), such solutions or substances shall be nonirritating, odorless, and nonflammable.

(3) A facepiece shall be provided with elastic headbands that are adjustable and replaceable.

(4) If a facepiece is equipped with an exhalation valve, the valve shall be guarded to prevent distortion and injury.

(5) For self-contained breathing apparatus, approved before the effective date of this part and for which a facepiece is approved as supplemental equipment, the facepiece shall weigh not more than 3 pounds complete with inhalation and exhalation valve assembly, breathing tubes, and fittings.

(6) A facepiece approved as supplemental equipment shall be distinctively and permanently marked to identify it as a supplemental part of a specific type of self-contained breathing apparatus.

§ 11.6 *Character and general description of tests.* (a) After the self-contained breathing apparatus to be tested for permissibility has been thoroughly inspected for adequacy of its mechanical principles, a series of 15 tests will be made, as described in § 11.7. At the beginning of the series of tests, if a high-pressure gas container is used on the apparatus, it shall first be charged with oxygen or air to a pressure of 10 atmospheres (approximately 150 pounds per square inch) and the oxygen or air permitted to escape into the atmosphere. Any high-pressure gas container used in the tests shall be fully charged at the beginning of each test at a pressure prescribed by the applicant or manufacturer of the apparatus.

(b) If an apparatus using compressed oxygen or compressed air is equipped with one or more breathing bags, the breathing bag or bags shall be deflated at the beginning of each test to expel any contained nitrogen.

(c) A single test must be continuous, without removal of the apparatus from the wearer during the test.

(d) Samples of the atmosphere from an apparatus in which the atmosphere is recirculated and which is equipped with a mouth-breathing device or a facepiece shall be taken from the inhalation side of the circulatory system as near as possible to the mouthpiece or facepiece, as the case may be. Samples of the atmosphere from a regenerating- or recirculating-type apparatus equipped with a facepiece also shall be taken from the interior of the facepiece as near as practicable to the nose and mouth of the wearer of the apparatus and shall be taken only when the wearer is inhaling. Samples of the atmosphere from an apparatus in which the atmosphere is not recirculated, such as in open-circuit (demand) equipment, and which is equipped with a mouth-breathing device shall be taken from the inhalation side of the apparatus as near as possible to the mouthpiece. Samples of the atmosphere from an apparatus in which the atmosphere is not recirculated, such as in open-circuit (demand) equipment, and which is equipped with a facepiece shall be taken from the interior of the facepiece as near as practicable to the nose and mouth of the wearer and shall be taken only when the wearer is inhaling. The first sample shall be taken from the source of supply of compressed oxygen or compressed air immediately before the beginning of the test. The second sample shall be taken after the apparatus has been adjusted to the wearer and compressed oxygen or compressed air has been turned on and after the wearer has inhaled at least three times and has exhaled to the atmosphere outside of the apparatus. Samples shall be taken as indicated in Tables 1–5, inclusive, of § 11.7 for ½-hour, A types; 2-hour, B types; 1-hour, C types; and ¾-hour, D types; respectively. The physiological effects of the apparatus on the wearer will be noted during each test; they include the comfort of the wearer, ease of breathing, and lack of interference with normal body functioning, as determined by questioning the wearer of the apparatus during and after testing.

(e) Not more than 1 test of 2 hours' duration will be made on any day. The tests will be completed within 60 days from date of beginning, unless prevented by conditions that are beyond the control of the Bureau.

All tests of apparatus will be conducted in a specially equipped gallery filled with an irrespirable atmosphere, at the Central Experiment Station, Bureau of Mines, Pittsburgh, Pa.

(f) Before each test is begun, the apparatus shall be examined and tested to make certain that no leakage is present under working conditions.

(g) The apparatus under test will be worn during each and all of the periods of the 15 tests by qualified Bureau of Mines personnel assigned to such test work. Immediately before participation in any of these tests the prospective wearer of the apparatus being tested shall pass, satisfactorily, a physical examination by a qualified physician. If it is impossible to complete any one of these tests solely because of the poor physical condition of the wearer, when such condition has been brought about through no fault of the apparatus being tested, such test shall be disregarded, and the apparatus shall not be penalized or disqualified thereby.

(h) At the conclusion of each test a record shall be made of the general physical condition of the wearer and of the apparatus and of the amount of compressed oxygen or compressed air, if any, remaining in the container. The schedule of work to be performed by the wearer of the apparatus in each of the 15 tests is described in § 11.7.

(f) *Test 5.*

TABLE 2—DURATION OF SPECIFIC ACTIVITIES FOR TEST 5

| Activity | Self-contained breathing apparatus | | | | |
|---|---|---|---|---|---|
| | ½-hour A type | ¾-hour B type | 1-hour C type | 2-hour D type |
| Sampling and readings | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Wearer walks at 3 miles per hour | 2 minutes | 3 minutes | 4 minutes | 5 minutes. |
| Crawls as indicated | 2 times in 4 minutes. | 3 times in 6 minutes. | 4 times in 8 minutes. | 5 times in 10 minutes. |
| Carries 50-pound weight over overcast | 2 minutes | 4 minutes | 4 minutes | 10 minutes. |
| Walks at 2 miles per hour | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Sampling and readings | 2 minutes | 6 minutes | 4 minutes | 8 minutes. |
| Carries 4-pound weight and walks at 3 miles per hour | 30 times in 2 minutes. | 45 times in 3 minutes. | 60 times in 4 minutes. | 75 times in 5 minutes. |
| Raises 45-pound weight 5 feet vertically | 2 minutes | 6 minutes | 10 minutes | 15 minutes. |
| Saws wood as indicated | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Carries 50-pound weight over overcast | 3 times in 6 minutes. | 4 times in 8 minutes. | 5 times in 10 minutes. | 10 times in 20 minutes. |
| Walks at 3 miles per hour | 2 minutes | 4 minutes | 6 minutes | 8 minutes. |
| Sampling and readings | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Walks at 3 miles per hour | | | | 24 minutes. |
| Sampling and readings | | | | 2 minutes. |
| Total | 30 minutes | 45 minutes | 60 minutes | 120 minutes. |

(g) *Tests 6, 7, and 8.* The work schedule for Test 5, give in Table 2, is repeated for each of these tests.

(h) *Test 9.*

TABLE 3—DURATION OF SPECIFIC ACTIVITIES FOR TEST 9

| Activity | Self-contained breathing apparatus | | | |
|---|---|---|---|---|
| | ½-hour A type | ¾-hour B type | 1-hour C type | 2-hour D type |
| Sampling and readings | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Wearer walks at 3 miles per hour | 2 minutes | 3 minutes | 4 minutes | 5 minutes. |
| Crawls as indicated | 25 feet in 3 minutes. | 40 feet in 4 minutes. | 60 feet in 6 minutes. | 100 feet in 10 minutes. |
| Lies on his side | 2 minutes | 4 minutes | 5 minutes | 10 minutes. |
| Lies on his back | 1 minute | 2 minutes | 3 minutes | 5 minutes. |
| Sampling and readings | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Walks at 3 miles per hour | 2 minutes | 6 minutes | 6 minutes | 10 minutes. |
| Runs at 6–8 miles per hour | 300 feet in 1 minute. | 400 feet in 2 minutes. | 600 feet in 3 minutes. | 600 feet in 3 minutes. |
| Walks at 3 miles per hour | 3 minutes | 4 minutes | 7 minutes | 15 minutes. |
| Sampling and readings | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Walks at 3 miles per hour | 2 times in 4 minutes. | 3 times in 6 minutes. | 4 times in 8 minutes. | 5 times in 10 minutes. |
| Carries 50-pound weight over overcast | 2 minutes | 3 minutes | 4 minutes | 10 minutes. |
| Walks at 3 miles per hour | 2 minutes | 3 minutes | 4 minutes | 8 minutes. |
| Sampling and readings | 2 minutes | 2 minutes | 2 minutes | 2 minutes. |
| Walks at 3 miles per hour | | | | 24 minutes. |
| Sampling and readings | | | | 2 minutes. |
| Total | 30 minutes | 45 minutes | 60 minutes | 120 minutes. |

(i) *Tests 10 and 11.* The work schedule for Test 9, given in Table 3, is repeated for each of these tests.

TABLE 1—DURATION OF SPECIFIC ACTIVITIES FOR TEST 1

| Activity | Self-contained breathing apparatus | | | |
|---|---|---|---|---|
| | ½-hour A type | ¾-hour B type | 1-hour C type | 2-hour D type |
| | *Minutes* | *Minutes* | *Minutes* | *Minutes* |
| Sampling and readings | 2 | 2 | 2 | 2 |
| Wearer walks at 3 miles per hour | 8 | 13 | 18 | 28 |
| Sampling and readings | 2 | 2 | 2 | 2 |
| Wearer walks at 3 miles per hour | 8 | 12 | 17 | 28 |
| Sampling and readings | 2 | 2 | 2 | 2 |
| Wearer walks at 3 miles per hour | 6 | 12 | 17 | 28 |
| Sampling and readings | 2 | 2 | 2 | 2 |
| Wearer walks at 3 miles per hour | | | | 26 |
| Sampling and readings | | | | 2 |
| Total | 30 | 45 | 60 | 120 |

(e) *Tests 2, 3, and 4.* The work schedule for Test 1, given in Table 1, is repeated for each of these tests.

(j) *Test 12.*

TABLE 4—DURATION OF SPECIFIC ACTIVITIES FOR TEST 12

| Activity | Self-contained breathing apparatus | | | |

| Walks at 3 miles per hour | | | | 24 minutes. |
| Sampling and readings | | | | 2 minutes. |
| Total | 30 minutes. | 45 minutes. | 60 minutes. | 120 minutes. |

(k) *Tests 13 and 14.* The work schedule for Test 12, given in Table 4, is repeated for each of these tests.

(l) *Test 15.*

TABLE 5—DURATION OF SPECIFIC ACTIVITIES FOR TEST 15

| Activity | Self-contained breathing apparatus | | | |
|---|---|---|---|---|
| | ½-hour A type | ¾-hour B type | 1-hour C type | 2-hour D type |
| Samplings and readings | *Minutes* 2 | *Minutes* 2 | *Minutes* 2 | *Minutes* 2 |
| Wearer sits quietly | 8 | 13 | 18 | 28 |
| Sampling and readings | 2 | 2 | 2 | 2 |
| Wearer sits quietly | 8 | 13 | 18 | 28 |
| Sampling and readings | 2 | 2 | 2 | 2 |
| | (1) | (1) | (1) | (1) |

[1] Continue sitting quietly and take samples and readings at the same listed intervals until the supply of compressed oxygen or compressed air is exhausted; record the time when the supply is exhausted.

(m) Test 15 is made to determine the maximum length of time that the apparatus will supply the needs of the wearer when in a quiescent state. The wearer will remain as far as possible in a sitting posture throughout the test and perform no work. He will be allowed to manipulate the devices controlling the compressed-oxygen or compressed-air supply to conserve such compressed-oxygen or compressed-air supply to the greatest advantage.

§ 11.8 *Approval of regenerators.* (a) The Bureau will, on application, make separate tests, identical with the foregoing tests, of regenerators manufactured for use with any breathing apparatus that it has approved under the regulations of this part.

(b) Regenerators that fulfill the requirements of the foregoing tests will be approved for use only with that particular type of apparatus for which they are designed and that has previously been approved by the Bureau.

§ 11.9 *Notification of approval or disapproval.* (a) After the Bureau has considered the results of the investigation and suitable drawings and specifications have been placed on file, it will supply the applicant with a formal written notification of approval or disapproval of the self-contained breathing apparatus. If the breathing apparatus meets all requirements of this part, the notification will not be accompanied by test data or detailed results of tests. If the apparatus fails to meet any requirements of this part, the notification will be accompanied by details of the failure, with a view to possible remedying of the defect or defects in self-contained breathing apparatus submitted for testing and approval in the future. Results of tests of self-contained breathing apparatus that fail to meet the requirements will not be made public by the Bureau.

(b) When an application for testing an apparatus is received and within a period not exceeding 10 days one or more additional applications for testing apparatus are received from sources different from the first application, the Bureau will not announce approval of the first apparatus unless approval can be announced for the other apparatus within a period not exceeding the interval of time between receipt of the first and subsequent applications. This exception is contingent upon the apparatus submitted with each application successfully meeting all of the requirements prescribed in this part. If an apparatus does not meet all of the requirements prescribed in this part it will not delay announcement of approval of such apparatus as have met the requirements.

(c) When an applicant or manufacturer receives formal notification of approval, he shall be free to advertise the type of successfully tested self-contained breathing apparatus as "permissible" and to use the approval inscription described in § 11.10.

§ 11.10 *Approval plates and markings for permissible apparatus and for approved supplemental parts.* (a) Manufacturers of self-contained breathing apparatus that has been approved by the Bureau as permissible and is to be offered for sale as such are required to attach to each apparatus a plate or marking bearing the following inscription:

Permissible Breathing Apparatus, United State Bureau of Mines Approval No. ---------.

(b) When a supplemental part, such as a facepiece, is approved for use with an approved self-contained breathing apparatus, it shall be plainly and permanently marked to identify the apparatus for which it is a supplemental part, substantially as follows:

U. S. B. M. Approval No. --------- for use with ---------- Breathing Apparatus
(Trade name)
U. S. B. M. Approval No. ---------.

The inscription shall be stamped, cast, or molded into the supplemental part of the breathing apparatus or shall be on a plate attached to the supplemental part.

§ 11.11 *Changes subsequent to approval.* All approvals are granted with the understanding that the manufacturer will make the approved self-contained breathing apparatus according to final drawings and specifications submitted to the Bureau. Therefore, before making any change in an approved apparatus, the manufacturer shall first obtain the Bureau's approval of the change. This procedure is as follows:

(a) The manufacturer shall write to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., requesting an extension of the original approval and stating the change or changes desired. He shall send 2 sets of revised drawings and specifications showing the changes in detail, and 1 each of the apparatus parts affected to the Central Experiment Station.

(b) The Bureau will consider the application and inspect the drawings and parts to determine whether it will be necessary to make tests.

(c) If tests are unnecessary, the applicant will be notified formally by the Bureau of the approval or disapproval of the change.

(d) If tests are necessary, the applicant will be notified of the fee and material required.

§ 11.12 *Withdrawal of approval.* The Bureau reserves the right to rescind for cause any approval granted under the regulations of this part.

FRED A. SEATON,
*Secretary of the Interior.*

JUNE 20, 1956.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 918 ]

[Docket No. AO-219-A5]

MILK IN MEMPHIS, TENN., MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS THERETO WITH RESPECT TO A PROPOSED MARKETING AGREEMENT AND PROPOSED AMENDMENTS TO THE ORDER, AS AMENDED, REGULATING THE HANDLING OF MILK IN THE MEMPHIS, TENNESSEE, MARKETING AREA

Pursuant to the provisions of the Agricultural Marketing Agreement Act of

1937, as amended (7 U. S. C. 601 et seq.), hereinafter referred to as the act, and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and proposed amendments to the order, as amended, regulating the handling of milk in the Memphis, Tennessee, marketing area.

Interested parties may file written exceptions to the decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 10th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

*Preliminary statement.* The hearing on the record of which the proposed marketing agreement and order were formulated was held at Memphis, Tennessee, on February 29 and March 1, 1956, pursuant to notice thereof issued on February 20, 1956 (21 F. R. 1236).

The material issues of the hearing related to:

1. The determination and level of the price for Class I milk;
2. The price for Class II milk in the months of September, October, and November;
3. The classification of shrinkage;
4. The area within which location differentials to handlers and producers should apply;
5. Accounting for milk in inventory;
6. Charges for additional solids required to conform with state standards;
7. Determination of the status of plants and producers when other orders are involved; and
8. Reclassification charges.

*Findings and conclusions.* The following findings and conclusions are based on the evidence received at the hearing and the record thereof:

1. Class I pricing provisions of the order should be revised to (a) increase the differential applicable for the month of August from $1.28 to $1.68; (b) provide for use of a somewhat higher level of normal supply in determining the need for price increases on the basis of supply and sales conditions without changing the annual level of supply that determines need for price decreases; (c) adjust the seasonal relationship of the supply-demand norms to reflect current conditions; and (d) eliminate from the list of mid-west condenseries named in the order two plants no longer in operation or reporting prices.

The Class I milk price of the Memphis order is determined by adding to a basic formula price (the highest of the average paying price of certain mid-west condenseries, a butter-powder formula price or a butter-cheese formula price) $1.28 for the months of March through August and $1.68 for the months of September through February. This result is adjusted on the basis of the relationship of producer receipts to Class I sales in the second and third preceding months as compared to base utilization percentages for such period set forth in the order.

Producer representatives proposed that for the Class I differentials of $1.28 and $1.68 there be substituted a table which would bracket the resulting prices in multiples of 20 cents at a level representing an average increase of 22 cents. It was also proposed that August be included with the months to which the seasonally higher differentials apply.

Certain modifications of the provisions for adjusting prices on the basis of supply-demand were suggested by these producer representatives, including (1) inclusion of producer receipts and sales of handlers subject to the order for the Central Arkansas marketing area (2) in the alternative, exclusion of receipts and sales of a Memphis handler doing business in another marketing area unless 70 percent or more of such handler's Class I sales were in the Memphis marketing area, and (3) a change in the level of the base utilization percentages.

While the Memphis market is now more adequately supplied than when the order first became effective producer milk supplies have not been fully adequate to provide sufficient reserves of milk for the Class I needs of the market in the late fall months. For the calendar year 1951 producer receipts were 107 percent of Class I sales. In succeeding years the percentages were as follows: 1952, 108 percent; 1953, 112 percent; 1954, 111 percent; 1955, 113 percent.

For the normally low production months of October and November the ratio of producers' supplies to fluid milk sales were 91 percent in 1951, 98 percent in 1952 and 1953, 97 percent in 1954, 105 percent in 1955.

From the record it does not appear that the comparison between 1954 and 1955 shown by the above percentages is truly representative of conditions in the Memphis market. Handlers with plants located in Memphis, Jackson, and nearby cities of Tennessee, are principally supplied by two cooperative associations representing approximately 60 percent of the producer receipts of the market. A third association supplies milk to a plant of a handler located in the Central Arkansas marketing area for which an order became effective December 1, 1955. This handler has substantial Class I sales in each of the Memphis and the Central Arkansas marketing areas and has been regulated under the Memphis order since June 1954. The cooperative association which supplies the major portion of this handler's supplies also supplies a number of the major handlers in the Central Arkansas marketing area.

The record indicates that the changes from 1954 to 1955 in Memphis utilization percentages are largely due to a change in the supply situation of this handler. Data submitted by the cooperative associations supplying other handlers indicate that for the months of October and November 1955 producer receipts of handlers fully supplied by them were only 99.6 percent of such handlers' Class I sales as compared with 101.9 percent in October and November 1954. For the entire year 1955 producer receipts of these associations declined about one percent where as the Class I sales of the handlers' they supply increased about one percent. Imports of milk required to supply the needs of these handlers increased substantially in the fall of 1955 over those for 1954. In contrast, this handler, who was far short of needs for Class I sales in 1954, was somewhat more adequately supplied than the remainder of the Memphis market in 1955. He was also much better supplied in the fall of 1955 than were the Central Arkansas handlers likewise supplied by the same cooperative association. Testimony of a representative of this association establishes the fact that a disproportionate part of the milk supplies of members of such association were allocated to this handler. This association maintains a full supply arrangement with a number of handlers and apparently found it convenient to concentrate the local producer supplies with the Memphis handler and import supplies to meet the deficits of the Central Arkansas handlers whom it supplies. The record also indicates that this association blends returns of its sales of member milk in both the Memphis and Central Arkansas markets so that returns the producers supplying the Memphis handler receive do not reflect the Memphis price at this location.

For the period through March 1957 the Class I price of the Central Arkansas order has been established as the same as that of the Memphis order, thus any supply-demand adjustments of the Memphis price will also affect the Central Arkansas price. Producers for the Central Arkansas market supported proposals to increase the Memphis price on the basis of need for increased returns to more adequately supply the Central Arkansas market and relieve current deficits.

Despite the fact that Memphis prices in the later part of 1954 and early 1955 were increased through the supply-demand adjustment of the order by the abnormally short supplies of the handler mentioned above, milk supplies available to the other handlers have not increased as much as Class I sales; and the change since then in this handler's supply situation has now resulted in lower Class I prices. It does not appear that market supplies can be maintained without some price adjustment.

The proposal to include August among the months for which the seasonally higher Class I differential applies should be adopted. Daily average deliveries per producers in August have been declining in recent years in relation to the yearly average. It does not appear that August can now be considered a flush production month for which seasonally lower prices should apply.

Other adjustments in the level of prices should be brought about through adjustment in the level of the minimum base utilization percentages of the supply-demand adjustor rather than by changes in the fixed differentials of the order. The present base utilization percentages provide for no upward revision of the January price whenever the October-November supply of producer milk equals 100 percent of Class I sales for these months, with the minimum percentages for other two-month periods

seasonally adjusted to this level. Raising the average minimum percentages in the table of monthly base utilization percentages five points would raise the average or mid-point of the monthly minimum and maximum base utilization percentages two and one-half points, and thus raise the level of Class I prices at the specified rates per point. It would also reduce the interval between the minimum and maximum monthly percentages, and thus make the provision more sensitive to changes in supply conditions. The present ten point interval allows an unduly wide variation in the supply to sales relation without any price adjustment.

In addition, the base utilization percentages should be revised to reflect certain changes in seasonality of supplies and sales. The record indicates less seasonal variation in utilization than that previously prevailing in the market. The base utilization percentages provided herein reflect this changed seasonality, as well as, a two and one-half point increase in the annual average level of the percentages.

The proposal to use 20-cent bracket ranges in determining the Class I price should not be adopted. The 40-cent steps previously contained in the order were eliminated in order to avoid abrupt changes in the Class I price on the basis of small changes in basic formula prices. Operation of the supply-demand adjustment will continue to produce price changes in smaller amounts so that the proposal, if adopted, would not result in Class I prices in 20-cent multiples. It is concluded that the increase in the level of the Class I price at this time should be effected by the change described elsewhere in the base utilization range of the supply-demand adjuster rather than by change in the fixed differential of the order.

This record does not provide the information necessary to determine base utilization ranges suitable for use with the combined receipts and sales of the Memphis and Central Arkansas markets in computation of the supply-demand adjustment of the Class I price. If the current price alignment between the two markets is to be maintained supply-sales conditions in the Central Arkansas market should be recognized in the adjustment of the Class I price as soon as such information is developed through operation of the order for that market.

Exclusion of the receipts and sales of a Memphis handler doing business in another marketing area from computation of supply-demand adjustments unless such handler has 70 percent or more of his Class I sales in the Memphis marketing area does not appear to provide an appropriate basis for adjustment. Supply situations rather than sales volumes characterize the situation whereby receipts and sales of the handler mentioned above have failed in the past to represent the direction of change in utilization in the total volume of milk priced under the Memphis and Central Arkansas orders. The record fails to show any reason other than the peculiar circumstance affecting this individual by sales in another marketing area and lack of 70 percent of Class I sales in the Memphis marketing area would affect the supply-sales relationships for any other handler. With respect to this particular handler Class I utilization in his plant currently varies less from the average of the market than heretofore, and changing sales trends may result in this plant becoming regulated under the Central Arkansas order.

The 40-cent change in the Class I differential for August represents an annual average increase of 3.3 cents in the Class I price. The average increase that would have resulted from the change in base utilization herein provided would have been about 11 cents for the years 1954 and 1955.

The list of mid-west condenseries used in determining basic formula prices should be revised by deleting therefrom two plants which have ceased operations and for which no paying prices are now available.

It is concluded that these changes will result in prices at which market supplies will be in better balance than in recent months without providing inducement for any supplies in excess of market needs.

2. The price for Class II milk should be increased 15 cents per hundredweight for each of the months of September, October, and November.

The Class II milk price of the Memphis order is presently determined by the paying price of five Mississippi milk manufacturing plants and one Kentucky plant. A seventh plant named in the order has discontinued operation and should be deleted from the list of plants named. Handlers offered no testimony in opposition to a producer proposal that the Class II price be increased 15 cents per hundredweight during the fall months of September, October, and November. Cooperative associations dispose of practically all the Class II milk of the Memphis market which handlers do not process in their own plants. In fall months when there is little Class II milk in the Memphis market it should not be priced below its very highest value product utilization, with minimum margin allowance. Lower prices might tend to reduce available supplies for Class I usage.

3. Shrinkage not in excess of two percent of receipts of producer milk and other source milk should continue to be classified as Class II milk. The base used in determining the two percent limitation and in dividing allowable shrinkage between producer milk and other source milk should, however, exclude producer milk diverted to nonpool plants.

The Memphis order presently permits unaccounted for milk not in excess of two percent of receipts in producer milk and other source milk to be classified as Class II milk. Producers proposed that such unaccounted for milk be classified pro rata to the uses for which a handler had accounted for the remainder of his receipts. Since something more than 80 percent of annual receipts are classified as Class I milk, approximately that percentage of the allowable shrinkage presently classified as Class II milk would under the proposal be classified as Class I milk. Limited shrinkage under the order is permitted in order to require that handlers account for all uses of milk beyond those which might reasonably be attributed to plant loss. While it is true that in a fluid milk operation plant losses are incurred in the receipt and processing of Class I milk it does not necessarily follow that such necessary loss has a higher unit value than that lost in the processing of manufacturing or Class II milk. In addition to the milk involved in plant losses, fluid milk handlers must have additional supplies to provide reserves to compensate for day-to-day variations in supplies and sales beyond those quantities sold for fluid use. The present practice of the Memphis order and of most other orders establishes a price for the quantity of Class I milk actually disposed of (or unaccounted for in excess of a normal loss allowance) that is designed to result in a supply adequate to provide such reserves and the inevitable plant loss to be expected. A change in the classification of shrinkage requires consideration of this change in arriving at the Class I price.

It is concluded that there should be no change in the classification of allowable shrinkage. There should, however, be a minor change in the manner in which the volume of allowable shrinkage is determined and is divided between producer milk and other source milk. The base to which the two percent limit is appropriate should not include milk diverted from farms to nonpool plants since no loss is incurred in such disposition. Likewise, such milk should be excluded from the base used in prorating allowable shrinkage between producer milk and other source milk.

4. The minimum distance from the city hall in Memphis at which location differentials to handlers and producers is applicable should be increased from forty miles to fifty miles. The Memphis order presently provides a 17 cents per hundredweight location differential to handlers for Class I milk received at fluid milk plants between forty and fifty mile distant from the Memphis City Hall. This rate increases 1 cent for each ten miles or major fraction thereof in excess of fifty miles.

When the order was amended, effective June 1, 1954, to increase the marketing area so as to include all territory within Shelby County, Tennessee, a handler located within the 40- to 50-mile zone first became subject to the order. This handler is the only one with a plant located within this mileage zone and his plant is beyond the 40-mile limit by only one or two miles.

For some years prior to regulation of his buying prices, this handler purchased his milk supplies at the full Memphis price from the principal cooperative association representing Memphis producers. Under regulation, he has continued to pay f. o. b. Memphis prices for all milk, and producers supplying the plant have been paid without regard to the differential provided in the order.

The fact that this plant is only one or two miles outside the zone of no location adjustment operates to give this plant a substantial difference in price for a very small difference in distance from the zone of no location differentials. It does not appear that this difference in price

contributes to the orderly marketing of milk within the Memphis marketing area, and it should, therefore, be eliminated. This would be accomplished by removing the location differential applicable in the 40- to 50-mile zone from Memphis, and this change should be made in the order.

5. Fluid milk products in inventory should be classified as Class II milk, with provision for an additonal charge when allocated to Class I use in the succeeding month; cream frozen and stored should not be included in such inventories.

The Memphis order presently classifies bulk milk, cream and other Class I products on hand at the end of the month as Class I milk. In the succeeding month such inventory (now the beginning inventory) is substracted from Class I milk. In view of the 40-cent seasonal increase in Class I prices September 1 of each year and the decrease of like amount March 1, a 40-cent charge is made for any amount by which the September 1 inventory exceeds that of the preceding March 1.

A handler proposed that provision be made for a 40-cent per hundredweight credit when the September 1 inventory is less than that for the preceding March 1. Producers testified in favor of carrying inventories in Class II with provision for an additional charge when producer milk in inventory is allocated to Class I use in the following month.

Substantial changes in Class I prices occur under the order due to factors other than changes in the Class I differential. Changes in basic formula prices and supply-demand adjustments result in Class I price changes. Seven such changes in the 28 months ending with February 1956 have ranged from 12 to 40 cents. Under the present system each handler pays for some portion of each month's Class I sales at the Class I price of the preceding month. This proportion is not uniform among handlers. Greater equity among handlers will be achieved by reserving current Class I sales so far as possible for assignment to current receipts of producer milk. This can be accomplished by classification of closing inventory as Class II milk, and allocation of opening inventory to Class I milk only when current receipts of producer milk (except for shrinkage) are less than Class I sales. In such case the handler should pay the difference between the Class II price paid for such milk in the preceding month and the current Class I price. The volume on which this charge is made should not exceed the volume (in excess of allowable shrinkage) for which producers were paid at the Class II price in the preceding month.

The record indicates that cream stored as frozen cream should not be included in the inventories which are to be allocated in the succeeding month. Frozen cream is stored principally for manufacturing use. Due to the high butterfat test of producer milk, the Memphis market is more adequately supplied with butterfat than milk solids and does not need to store cream for Class I use in the short season. It appears appropriate to establish Class II classification for frozen cream when stored, subject to the provisions applicable to other Class II products, that if it is re-used in another product it be reported as a receipt of other source milk.

6. The provision that all water originally associated with nonfat milk solids used in the production of a product be included in the volume of skim milk considered to be disposed of in such products should not apply with respect to nonfat milk solids used to bring the nonfat solids content of producer milk to a minimum standard of 8.5 percent, as substantiated by individual batch solids tests.

Under the order any condensed or dry nonfat milk solids added to producer milk are considered to have increased the volume of the resulting product by the volume of skim milk from which such milk solids was derived. Thus, Class I products disposed of with a solids content increased above normal require payment for a proportionately greater volume of Class I milk than for products not so fortified. The provisions assume that the solids content of the producer milk are at least those required for minimum legal standards. Lack of a practical platform inspection testing technique for milk solids results, however, in handlers not being at all times in position to reject producer milk with low solids content before receipt. Tennessee law requires a minimum nonfat total solids of 8.5 percent. When a handler can demonstrate by solids tests of individual batches that concentrated solids were required to bring the solids content of producer milk to this legal minimum the volume of the resulting product should not be expanded by inclusion of the water originally associated with such solids. Producers should not receive an increased return for milk with abnormally low solids content.

7. The order should not permit producers to retain their status with respect to milk diverted to a plant regulated under another order; the determination of the order under which a plant disposing of Class I milk in both Memphis and another marketing area should be fully regulated should be based on disposition during the six months immediately preceding rather than the current month, as presently provided.

The order provides that a producer whose milk is diverted to a nonfluid milk plant for the account of a handler or cooperative association shall retain his status as a producer. Plants fully subject to other orders are nonfluid milk plants as defined in the Memphis order. Under the order recently issued for the Central Arkansas marketing area, a Memphis producer whose milk was received at a plant regulated under that order would qualify as a Central Arkansas producer. Most of the producers supplying one Memphis plant located in the Central Arkansas marketing area are members of the same cooperative association that supplies a number of Central Arkansas handlers. It appears appropriate that milk first received from the farm at a regulated plant should be priced under the order regulating that plant, rather than under another order as diverted milk. The Central Arkansas order presently does not recognize diversion to plants regulated under other orders. Adoption of a similar provision in the Memphis order will eliminate conflicting regulation and need for interpretation.

The plant mentioned above distributes milk in both the Memphis and Central Arkansas marketing areas, and is currently regulated under the Memphis order on the basis of slightly greater distribution in the Memphis area. The Central Arkansas order provides that the volume of distribution to be compared in the determination of the order under which such a plant shall be fully regulated be that for the six-month period immediately preceding. The Memphis order currently bases the determination or distribution in the current month. Adoption of the six-month period provision in the Memphis order will prevent conflict in regulation between the two orders and will provide less opportunity for a change in regulation on the basis of small changes in volume of distribution.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Rulings on proposed findings and conclusions.* Briefs were filed on behalf of producer organizations and handlers subject to the proposed marketing agreement and order, as hereby proposed to be further amended. The briefs contained proposed findings, conclusions, and arguments with respect to the provisions of the proposed amendments. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

*Recommended marketing agreement and amendment to the order.* The fol-

lowing order, amending the order, as amended, is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The proposed marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as hereby proposed to be further amended.

1. Amend § 918.11 (b) to read as follows:

(b) Diverted from a fluid milk plant to a non-fluid milk plant, except a milk plant fully subject to the provisions of another order issued pursuant to the act, for the account of the handler: *Provided*, That milk so diverted shall be deemed to have been received by the diverting handler at the location of the plant from which it was diverted.

2. Amend § 918.13 (b) to read as follows:

(b) Products from any source (including those produced by the handler) designated as Class II milk pursuant to § 918.41 (b) (1) or (3) which are reprocessed or converted to another product during the month.

3. Amend § 918.41 to read as follows:

§ 918.41 *Classes of utilization.* Subject to the conditions set forth in §§ 918.43 and 918.44, the class of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including concentrated and reconstituted skim milk) and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, milk drinks (plain or flavored), cream (including sour cream) and any mixture in fluid form of skim milk and cream (except eggnog, ice cream mix, and milk or skim milk disposed of and used for livestock feed); and (2) not accounted for as Class II milk.

(b) Class II milk shall be all skim milk and butterfat (1) used to produce any product other than those designated as Class I milk pursuant to paragraph (a) of this section;

(2) Disposed of and used for livestock feed;

(3) In cream frozen and stored;

(4) Contained in inventory of milk and milk products (other than frozen cream) designated as Class I milk pursuant to paragraph (a) of this section; and

(5) In shrinkage assigned to Class II milk pursuant to § 918.42 in (i) producer milk and (ii) other source milk.

4. Amend § 918.42 to read as follows:

§ 918.42 *Shrinkage.* The market administrator shall determine the assignment of shrinkage to Class II milk as follows:

(a) Determine the total shrinkage of skim milk and butterfat, respectively, in the fluid milk plant(s) of each handler;

(b) Multiply the pounds of skim milk and butterfat, respectively, in producer milk (except milk diverted pursuant to § 918.11) and in other source milk by 0.02; and

(c) The lesser of the pounds of skim milk and butterfat, respectively, determined pursuant to paragraphs (a) or (b) of this section shall be classified as Class II milk and assigned pro rata to producer milk (except milk diverted pursuant to § 918.11) and other source milk.

5. Delete § 918.43 (b).

6. Amend § 918.45 to read as follows:

§ 918.45 *Computation of the skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and for other obvious errors the reports of receipts and utilization for the fluid milk plants of each handler and shall compute the pounds of butterfat and skim milk in Class I milk and Class II milk for such handlers: *Provided*, That if any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water originally associated with such solids, except that when nonfat milk solids are added to producer milk in an amount, as shown by solids tests of individual batches, which does not increase the total solids-nonfat content of such milk beyond 8.5 percent by weight, the volume of water originally associated with such nonfat milk solids shall not be considered in determining the pounds of skim milk disposed of in such product.

7. In § 918.46 (a) (1) change "§ 918.42 (b)" to read "§ 918.42 (c)".

8. Amend § 918.46 (a) (3) to read as follows (such amendment to be effective one month following the effective date of the amendment provided herein with respect to § 918.41):

(3) Subtract from the remaining pounds of skim milk in Class II milk the pounds of skim milk contained in inventory (as specified in § 918.41 (b) (4)) on hand at the beginning of the month: *Provided*, That if the pounds of such skim milk in inventory are greater than the remaining pounds of skim milk in Class II milk, an amount equal to the difference shall be subtracted from the pounds of skim milk in Class I milk;

9. Delete the following from the list of plants or places appearing in § 918.50 (a): "Carnation Co., Chilton, Wisconsin, Carnation Co., Berlin, Wisconsin".

10. Amend § 918.51 to read as follows:

§ 918.51 *Class prices.* Subject to the provisions of §§ 918.52 and 918.53, the minimum prices per hundredweight to be paid by each handler for milk received at this fluid milk plant from producers during the month shall be as follows:

(a) *Class I milk.* The price per hundredweight for Class I milk for the month shall be the basic formula price for the preceding month, subject to the adjustments provided in subparagraphs (1) and (2) of this paragraph:

(1) Add $1.28 for the months of March through July, and $1.68 for all other months:

(2) Add if the net utilization percentage calculated pursuant to subparagraph (3) of this paragraph is less than, or subtract if it is more than the base utilization range, an amount determined by multiplying such net utilization percentage by the appropriate rate as follows:

| Pricing months: | Rate (cents) |
|---|---|
| January-March | 3 |
| April-June | 1 |
| July-August | 3 |
| September-December | 4 |

(3) The figure calculated for each month as follows shall be known as the net utilization percentage: Divide the net pounds of Class I milk disposed of from fluid milk plants for the second and third preceding months into the volume of producer milk for the same months, multiply by 100, round to the nearest whole percentage number and determine the amount by which such number exceeds the higher figure or is less than the lower figure of the appropriate base utilization range in the following table:

| Pricing month | Second and third preceding month | Base utilization range |
|---|---|---|
| January | October-November | 108-113 |
| February | November-December | 109-114 |
| March | December-January | 113-118 |
| April | January-February | 117-122 |
| May | February-March | 119-124 |
| June | March-April | 124-129 |
| July | April-May | 130-134 |
| August | May-June | 130-134 |
| September | June-July | 127-132 |
| October | July-August | 125-130 |
| November | August-September | 118-122 |
| December | September-October | 111-116 |

(b) *Class II milk.* The average of the basic or field prices reported to have been paid or to be paid for ungraded milk of 4.0 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture:

*Present Operator and Location*

Borden Co., Starkville, Miss.
Carnation Co., Tupelo, Miss.
Pet Milk Co., Mayfield, Ky.
Pet Milk Co., Kosciusko, Miss.
Kraft Foods Co., Corinth, Miss.
Armour Creameries, New Albany, Miss.

to which 15 cents shall be added for each of the months of September, October, and November.

11. Delete from the table of distances and rates appearing in § 918.53 the following:

| *From miles column* | *From cents column* |
|---|---|
| 40 but less than 50 | 17 |

12. Delete § 918.70 (e) and (f) and substitute therefor the following: (such amendment to be effective one month after the effective date of the amendment provided herein with respect to § 918.41):

(e) Add an amount computed by multiplying by the difference between the appropriate Class II milk price for the preceding month and the appropriate Class I price for the current month the lesser of:

(i) The hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 918.46 (a) (3) and the corresponding step of (b); or

(ii) The hundredweight of skim milk and butterfat remaining in Class II milk for the preceding month after the calculation pursuant to § 918.46 (a) (4) and the corresponding step of (b).

13. Amend § 918.61 (a) to read as follows:

(a) Any plant qualified pursuant to § 918.7 (a) which would be subject to the classification and pricing provisions of another order unless a greater volume of Class I milk was disposed of from such plant during the six-month period immediately preceding to retail or wholesale outlets (except fluid milk plants) in the Memphis, Tennessee, marketing area than in the marketing area regulated pursuant to such other order.

14. Delete from the table of distances and rates appearing in § 918.93 the following:

| *From miles column:* | *From cents column:* |
|---|---|
| 40 but less than 50 | 17 |

### IRISH POTATOES GROWN IN COLORADO

### PROPOSED EXPENSES AND RATE OF ASSESSMENT

Notice is hereby given that the Secretary of Agriculture is considering the approval of the expenses and rate of assessment hereinafter set forth, which were recommended by the area committee for Area No. 3, established pursuant to Marketing Agreement No. 97 and Order No. 58 (7 CFR Part 958; 19 F. R. 9368), regulating the handling of Irish potatoes grown in the State of Colorado, issued under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto, which are filed with the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., not later than 15 days following publication of this notice in the FEDERAL REGISTER. The proposals are as follows:

§ 958.221 *Expenses and rate of assessment.* (a) The reasonable expenses that are likely to be incurred by the area committee for Area No. 3, established pursuant to Marketing Agreement No. 97 and Order No. 58, to enable such committee to perform its functions pursuant to the provisions of aforesaid marketing agreement and order, during the fiscal period ending May 31, 1957, will amount to $2,660.

(b) The rate of assessment to be paid by each handler, pursuant to Marketing Agreement No. 97 and Order No. 58, shall be $0.00095 per hundredweight of potatoes handled by him as the first handler thereof during said fiscal period.

(c) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 97 and Order No. 58.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 25, 1956.

## [ 7 CFR Part 989 ]

### HANDLING OF RAISINS PRODUCED FROM RAISIN VARIETY GRAPES GROWN IN CALIFORNIA

### NOTICE OF CANCELLATION OF PROPOSED FURTHER MODIFICATION OF MINIMUM GRADE AND CONDITION STANDARDS FOR NATURAL CONDITION RAISINS

In the FEDERAL REGISTER issue of May 29, 1956 (21 F.R. 3653, F.R. Doc. 56-4212) there was published a notice of proposed rule making with respect to the further modification of the minimum grade and condition standards for natural condition raisins, such proposed further modification being to change the permitted maximum moisture content for natural condition Golden Seedless, Sulfur Bleached, and Soda Dipped raisins from 14 percent to 15 percent. This regulation is effective pursuant to Marketing Agreement No. 109, as amended, and Marketing Order No. 89, as amended (20 F. R. 6435), regulating the handling of raisins produced from raisin variety grapes grown in California, which agreement and order are, in turn, effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

In said notice of proposed rule making a period of 15 days after publication thereof in the FEDERAL REGISTER was allowed for the submission by any interested person to the Director, Fruit and Vegetable Division, Agriculture Marketing Service, United States Department of Agriculture, Washington 25, D. C., of data, views, and arguments with respect to whether or not such proposed further modification should be made effective. Since the issuance and publication of said notice, written data, views, and arguments have been received.

The aforesaid data, views, and arguments raise a serious question as to whether the proposed rule should be made effective at this time. In the production of Golden Seedless raisins, the fresh grapes are lye-dipped, thus checking the skins for better absorption of sulfur and faster dehydration. This slight cracking of the skin on the berries tends to make them hygroscopic. A higher initial moisture content of the raisins plus absorption during humid weather can cause excessive moisture developing during storage. It may cause the raisins to deteriorate in grade (both as to quality and color) and interfere with processing for shipment. In addition to dehydration, these raisins are sulfured to aid in their preservation. A high moisture content causes loss of sulfur and shortens storage life. Furthermore, there is a segment of the market for Golden Seedless raisins which requires a sulfur content considerably below normal and which presumably requires a low moisture raisin. Hence, low moisture content appears to be important both to the storage life of the raisins and to the shipment of high quality raisins to the markets demanding a low sulfur content. In view of these conditions, the presently available information is deemed insufficient for a determination to be made that a permitted maximum moisture content of 15 percent is consistent with the storage and market requirements for Golden Seedless raisins. It is concluded that any change in the permitted maximum moisture content should await the development of experimental data from physical change studies during the storage of these raisins. Such a study should establish the specific effect moisture content has on the maintenance of quality, color, and sulfur content, for various periods of storage.

Therefore, the proposed further modification of the minimum grade and condition standards for natural condition raisins should not be put into effect at this time. Accordingly, said notice of proposed rule making (21 F. R. 3653; F. R. Doc. 56-4212) is hereby canceled.

Dated: June 26, 1956.

[SEAL] S. R. SMITH,
*Director,*
*Fruit and Vegetable Division.*

## [ 7 CFR Part 1014 ]

[Docket No. AO-280]

### POTATOES GROWN IN NASSAU AND SUFFOLK COUNTIES, LONG ISLAND, NEW YORK

### NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed marketing order regulating the handling of Irish potatoes grown in Nassau and Suffolk Counties, New York, to be effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.) (hereinafter called the "act"). Interested parties may file exceptions to this recommended decision with the Hearing Clerk, Room 112, Administration Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the fifteenth day after publication of this recommended decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

*Preliminary statement.* A hearing on the aforementioned proposed marketing agreement and proposed order was held at Riverhead, Long Island, New York, April 30 through May 5, 1956, pursuant to notice thereof which was published April 11, 1956, in the FEDERAL REGISTER (21 F. R. 2339).

*Material issues.* The most material issues presented on the record of the hearing were as follows:

(1) The desirability of and economic justification for entering into an agreement and the issuing of an order for regulating the handling of Irish potatoes grown in Nassau and Suffolk Counties, Long Island, New York; (2) The right to exercise Federal jurisdiction; (3) The necessity for and the equitable nature and scope of the provisions of the proposed marketing agreement and order as set forth in the notice of hearing; and (4) The determination of the production area to be covered by the proposed marketing agreement and order.

*Findings and conclusions.* Upon the basis of the evidence adduced at such hearing, it is hereby found and concluded that the entering into a marketing agreement and the issuance of an order at this time to regulate the handling of Irish potatoes grown in Nassau and Suffolk Counties, Long Island, New York, on the basis of the proposed regulation of such commodity considered at the aforementioned hearing would not tend to effectuate the declared policy of the act. This finding and conclusion is reached primarily on the basis that a program of this type requires a high degree of voluntary cooperation and support by members of the particular industry to assure its successful operation. The record of that hearing indicates that a substantial number of the growers and grower-shippers of Irish potatoes in Nassau and Suffolk Counties, New York, would not give such cooperation and support.

In view of the conclusion that the record fails to justify entering into a marketing agreement and order at this time, there appears to be no need for a discussion of the issues relating to the individual provisions of the proposed regulatory program.

*Rulings on briefs of interested parties.* At the conclusion of the hearing, the Presiding Officer fixed June 1, 1956, later extended to June 11, 1956, as the latest day on which briefs from interested parties with respect to the testimony presented in evidence at the hearing and the findings and conclusions to be drawn therefrom must be filed wth the Hearing Clerk of the Department.

Briefs were filed within the allotted time by William Wickham, Mattituck, New York, Attorney for a group of Eastern Long Island potato growers and by Harold R. Hudson, Farmingdale, New York, Attorney for opponents.

Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions herein set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

Dated: June 26, 1956.

[SEAL] ROY W. LENNARTSON,
*Deputy Administrator.*

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

### [ 21 CFR Part 120 ]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITIONS FOR EXEMPTION FROM NECESSITY OF TOLERANCES FOR RESIDUES OF PIPERONYL BUTOXIDE AND RESIDUES OF PYRETHRINS

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

Petitions have been filed by the Food Machinery and Chemical Corporation, Middleport, New York, proposing that the pesticide chemicals piperonyl butoxide ((butyl carbityl) (6-propyl piperonyl) ether) and pyrethrins (insecticidally active principles of Chrysanthemum cinerariaefolium) be exempted from the requirement of tolerances for residues from use after harvest on the following raw agricultural commodities: Apples, blackberries, blueberries, boysenberries, cherries, crabapples, currants, dewberries, figs, gooseberries, grapes, guavas, huckleberries, loganberries, mangoes, muskmelons, oranges, peaches, pears, pineapples, plums, prunes, tomatoes, peanuts, English walnuts, almonds, cottonseed, beans, peas, barley, oats, flaxseed, rye, grain sorghum, popcorn, corn, wheat, rice, copra, and cocoa beans.

The analytical method proposed in the petition for determining residues of piperonyl butoxide is the colorimetric method reported by Jones, Ackerman, and Webster in the Journal of the Association of Official Agricultural Chemists, Volume 35, pages 771–780, August 1952. Because pyrethrins decompose more rapidly than piperonyl butoxide, it is proposed that determination of piperonyl butoxide serves as an index to the presence of both materials. Multiplying the residue of piperonyl butoxide by the ratio of pyrethrins to piperonyl butoxide in the formulation used gives the maximum pyrethrin residue that can be present.

Dated: June 25, 1956.

## CIVIL AERONAUTICS BOARD

### [ 14 CFR Parts 40, 41, 42 ]

[Draft Release No. 56-18]

NACELLE FIRE PROTECTION FOR CURRENTLY OPERATED TRANSPORT CATEGORY AIRPLANES ENGAGED IN PASSENGER SERVICE

NOTICE OF PROPOSED RULE MAKING

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau has under consideration possible amendments to Parts 40, 41, and 42 of the Civil Air Regulations as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rules, communications must be received by August 31, 1956. Copies of such communications will be available after September 5, 1956, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

The Board has received from the Administrator of Civil Aeronautics a recommendation to amend the Civil Air Regulations to require retroactive application of the provisions of § 4b.487 (e) of Part 4b of the Civil Air Regulations to all transport category airplanes engaged in passenger operations under Parts 40, 41, and 42 of the Civil Air Regulations with the exception of the DC–3, L–18, and C–46.

The currently effective provisions of § 4b.487 (e) read as follows: "The airplane shall be so designed and constructed that, in the event of fire originating in the engine power or accessory sections, the probability is extremely remote for fire to enter either through openings or by burning through external skin into any other zone of the nacelle where such fire could create additional hazards. If the airplane is provided with a retractable landing gear, this provision shall apply with the landing gear retracted. Fireproof materials shall be used for all nacelle skin areas which might be subjected to flame in the event of a fire originating in the engine power or accessory sections."

The provisions of § 4b.487 (e) were made effective May 16, 1953, and are applicable to all Part 4b airplanes for which application for type certification was made on or after that date.

The Administrator has advised that transport category airplanes, currently operating, which are not required to meet the powerplant fire protection provisions of currently effective Part 4b of the Civil Air Regulations, do not incorporate satisfactory protection for nacelle areas aft of the fire wall, specifically against the entrance of flames issuing from the power and accessory sections of the engine. In support of this contention, the Administrator cited 24 known cases of inflight fires, which have occurred in the period from 1948 through 1955, wherein flames originating in the forward sections of the nacelle penetrated areas aft of the fire wall.

Section 1.24 of Part 1 of the Civil Air Regulations prescribes that, if the Administrator finds as a result of service experience that an unsafe condition exists with respect to a design feature, part, or characteristic of any product, and that such condition is likely to exist or develop in other products of the same type design, he shall provide notice (typically in the form of an Airworthiness Directive) thereof for all operators of products of that type and the product shall not thereafter be operated until the unsafe condition has been corrected, unless otherwise authorized by the Administrator under specified conditions and limitations, including inspections. The Administrator has advised the Board that it has considered using its authority to issue Airworthiness Directives, pursuant to § 1.24, to require that all affected airplanes comply with the provisions of § 4b.487 (e), but instead recommends that the Board consider the promulgation of a regulation to this effect. This raises the question as to whether the action recommended by the Administrator would penalize certain model airplanes for which the service record does not clearly indicate evidence of an unsafe condition with respect to nacelle fire protection.

In view of the Administrator's belief that Airworthiness Directives are not appropriate and because of the importance of this matter to safety, notice is hereby given of the Administrator's recommendation for the purpose of obtaining comments from interested parties as to whether all currently operated passenger-carrying airplanes, with the exception of the DC–3, L–18, and C–46, not complying with § 4b.487 (e) do in fact possess unsatisfactory protection for nacelle areas aft of the fire wall, or whether this situation applies only to certain specific airplane models. If the former situation exists, the Bureau of Safety Regulation will consider recommending to the Board the adoption of the proposed rule recommended by the Administrator.

In considering this matter, the Bureau believes it appropriate to explore generally the question whether, irrespective of the design of the airplane and the quality of maintenance practiced by the operators, all transport category airplanes, with the stated exceptions, engaged in passenger service under Parts 40, 41, and 42 of the Civil Air Regulations, not incorporating fireproof nacelle skin, should be subject, on a retroactive basis, to the provisions of § 4b.487 (e).

It should be pointed out that, effective May 16, 1953, § 4b.484 (a) (1) was amended, and among other things, certain provisions were applied retroactively. The retroactive aspects of this amendment require that on all airplanes manufactured after Jone 30, 1954, irrespective of the date on which application for type certificate was made, there be installed fire-extinguishing systems in all designated fire zones unless the engine power section is completely isolated from the engine accessory section by a fireproof diaphragm and unless the cowling and nacelle skin is such as to comply with the provisions of § 4b.487. In effect, the foregoing amendment requires either the installation of a fire-extinguishing system in the engine power section or the installation of fireproof cowling and nacelle skin in accordance with § 4b.487.

Since the provisions of § 4b.484 (a) (1) provide alternative means to meet the fire-extinguishing requirements on airplanes manufactured after June 30, 1954, it is not now known which of these airplanes have a fire-extinguishing system installed in the engine power section. If so equipped, this raises a question as to whether the installation of a fire-extinguishing system in the engine power section provides a degree of fire protection equivalent to that which would be provided by the installation of fireproof nacelle skin aft of the firewall as required by § 4b.487 (e). Comments from interested persons are particularly requested, therefore, as to which airplanes have fire-extinguishing systems installed in the engine power section in accordance with the provisions of §4b.484 (a) (1), and whether such installations are as safe as those complying with the alternative provision of § 4b.484 (a) (1). This information will assist in determining whether aircraft with such fire-extinguishing systems installed should be excluded from compliance with the proposed rule, if adopted.

The Administrator's recommendation does not include a specific date as to when the proposed rule should become effective. Therefore, persons who might be directly affected are requested to submit comments which can be considered in establishing a realistic compliance date for the proposed rule.

These amendments are proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended, and may be changed in the light of comment received in response to this notice of proposed rule making.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601–610, 52 Stat. 1007–1012, as amended, 49 U. S. C. 551–560)

Dated at Washington, D. C., June 19, 1956.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN,
*Director.*

[F. R. Doc. 56-5168; Filed, June 28, 1956; 8:52 a. m.]

## FEDERAL POWER COMMISSION

### [ 18 CFR Part 157 ]

[Docket No. R-155]

APPLICATIONS FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY UNDER SECTION 7 OF NATURAL GAS ACT AS AMENDED

IMMEDIATE INSTITUTION OF TEMPORARY SERVICE BY INDEPENDENT PRODUCERS

JUNE 27, 1956.

1. Notice is hereby given that the Commission has under consideration the amendment of its rules in the above-entitled matter.

2. Pursuant to the authority vested in it by the Natural Gas Act (52 Stat. 821) and particularly sections 7 and 16 thereof (15 U. S. C. 717f, 717o) the Commission proposes to (a) promulgate a new § 157.28 to provide under certain circumstances for the immediate institution of temporary service by independent producers of natural gas pending the determination of an application for a certificate of public convenience and necessity authorizing the proposed service, (b) redesignate the existing § 157.28 as § 157.29 and, (c) amend the existing § 157.29 in a minor technical respect and redesignate it as § 157.30.

3. The Commission's experience has indicated the advisability of making possible the earlier initiation of sales or transportation of natural gas in cases where even the normal regulatory lag in the processing of applications for temporary authorization may result in losses to the applicant arising, among other things, from drainage of property by adjoining wells, possible loss of lease from non-production, economic hardship resulting from payment of shut-in royalties or lack of income or the excessive flaring of gas. The Commission is of the opinion that the public interest in sound regulatory processes neither requires nor justifies that these economic burdens be borne by the producing segment of the natural-gas industry.

4. It is therefore proposed to amend Part 157 (as amended particularly by Order No. 174–B, 19 F. R. 8807, 8809–11), entitled "Applications for Certificates of Public Convenience and Necessity Under Section 7 of the Natural Gas Act of Subchapter E, Regulations Under the Natural Gas Act," Chapter I of Title 18 Code of Federal Regulations, in the following respects:

a. Redesignate the present § 157.28 as § 157.29 and add a new § 157.28 to read:

§ 157.28 *Temporary authorizations.*

(a) An independent producer, in the event of an emergency, may initiate the sale or transportation of natural gas in interstate commerce and continue such sale or transportation pending final action under sections 4 and 7 of the Natural Gas Act and without prejudice to such final action thereon, provided there shall be on file with the Commission an application for a certificate of public convenience and necessity filed pursuant to §§157.23 to 157.27, prior to commencement of such act pursuant to this section: *Provided, however,* That the provisions of this section shall not be available in lieu of the requirements of this part with respect to the termination of any sale or transportation nor with respect to service proposed to commence more than 30 days from the date of the filing of the application.

(b) The provisions of this section may not be invoked unless the purchaser of the gas or the person for whom the transportation is to be performed has been authorized to construct and operate such facilities as may be necessary to enable him to accept delivery of such gas from the independent producer.

(c) Before service may commence under this section, there shall be on file an effective rate schedule covering the proposed service and filed in accordance with §§ 154.91 through 154.102 of this subchapter.

(d) Any certificate application filed pursuant to paragraph (a) of this section shall contain statements that the provisions of this section are intended to be invoked and setting forth the facts constituting the emergency requiring such action.

b. Redesignate the present § 157.29 as 157.30 and amend it to read:

§ 157.30 *Applicability of sections 157.23 to 157.29.* Sections 157.23 through 157.29 shall be applicable only to an independent producer as defined in § 154.91 of this subchapter.

5. Any interested person may submit to the Federal Power Commission, Washington 25, D. C., on or before July 20, 1956, data, views, and comments in writing concerning the amendments proposed herein. The Commission will consider these written submittals before acting upon the proposed amendments. An original and 9 copies should be filed of any such submittals.

[SEAL] LEON M. FUQUAY,
*Secretary.*

## DEPARTMENT OF THE TREASURY

### Foreign Assets Control

CAMEL HAIR; IMPORTATION FROM COUNTRIES NOT IN AUTHORIZED TRADE TERRITORY

APPLICATIONS FOR LICENSES

Notice is hereby given that the Treasury Department is now prepared to consider applications for licenses under the Foreign Assets Control Regulations (31 CFR 500.101 to 500.808) for the importation during 1956 of 26,000 pounds of camel hair from the U. S. S. R. This amount of camel hair is in addition to amounts previously licensed for importation during 1956. To receive consideration, applications, on Form TFAC-1, must be filed prior to August 1, 1956, by, or on behalf of, persons who on the date of this Notice are engaged in the business of dealing in, including processing, animal hair and who do not already hold licenses to import camel hair. Applications from persons already holding such licenses will not be considered.

Additional information and license application forms may be obtained from the Foreign Assets Control, Treasury Department, Washington 25, D. C., or the Federal Reserve Bank of New York, 33 Liberty Street, New York 45, New York.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

NEW MEXICO GRAZING DISTRICTS NO. 1 (SAN ISIDRO) AND NO. 7 (CHACO)

SPECIAL RULE FOR TRANSFER OF GRAZING PRIVILEGES

JUNE 25, 1956.

Pursuant to the authority vested in the Secretary of the Interior by the Taylor Grazing Act of June 28, 1934 (48 Stat. 1270; 43 U. S. C. 315a), delegated to me by Departmental Order No. 2583 of August 16, 1950 (15 F. R. 5643) as amended, and to the provisions of § 161.16 of the Federal Range Code for Grazing Districts, 1956 Rev. (43 CFR 161.16), upon consideration of the recommendation of the respective district advisory boards and of the showing of necessity made by the State Supervisor and the Area Administrator, the following special rule is hereby approved, to apply to the administration of New Mexico Grazing Districts Nos. 1 and 7, and shall govern the transfers of base property qualifications in these districts:

Transfers of base property qualifications from a land base to a land base, or from a water base to a water base, shall be made in accordance with the provisions of § 161.7 (b) of the Federal Range Code for Grazing Districts, 1956 Rev., (43 CFR 161.7 (b)), subject to the additional provision that upon application of a licensee or permittee and after reference to the district advisory board, the district range manager may approve a transfer of base property qualifications from a land base to a water base, provided such new water base shall have an adequate water source or sources and shall service the same Federal range area previously used in connection with the grazing license or permit issued from the former land base.

EDWARD WOOZLEY,
*Director.*

Sec. 5, S½SE¼SW¼;
Sec. 11, NW¼NW¼, SW¼SW¼.

The above areas aggregate 713.95 acres.

E. G. NIELSEN,
*Assistant Commissioner.*

[70173]

JUNE 22, 1956.

I concur.

1. The land is located on both sides of the San Joaquin River, just above the head of Millerton Lake. The topography is rolling to steep, and the soil is sandy loam. Vegetation consists of scrub oak, chemise, occasional jumper, and digger pine. The land is too rough and mountainous for cultivation.

2. The following-described lands, which are included within Power Site Reserve No. 383 of July 1, 1913 and No. 474 of January 14, 1915, shall be opened to mining location pursuant to the act of August 11, 1955, 1955 (69 Stat. 683; 30 U. S. C. 621) at 10:00 a. m. on July 28, 1956.

T. 10 S., R. 22 E.,
Sec. 2, lots 14 and 16 to 21 inclusive, SW¼NW¼ and NW¼SW¼;
Sec. 3, lots 5, 7, 10, and SE¼NW¼;
Sec. 4, lots 11 and 12;
Sec. 11, NW¼NW¼ and SW¼SW¼.

The areas described aggregate approximately 659 acres.

3. Subject to any valid existing rights and the requirements of applicable law, lot 9, sec. 3; S½SE¼SW¼, sec. 5, is hereby opened to filing of applications, selections, and locations, in accordance with the procedure described below. No application for these lands may be allowed under the homestead, desert-land, small tract, or any other non-mineral public-land law unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon the consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

a. Applications and selections under the non-mineral public-land laws may be presented to the Manager mentioned below, beginning on the date of this order. Such applications and selections will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

(1) Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications under the Homestead, Desert Land, and Small Tract Laws by qualified veterans of World War II or of the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284 as amended), presented prior to 10:00 a. m. on July 28, 1956, will be considered as simultaneously filed at that hour. Rights under such preference right applications filed after that hour and before 10:00 a. m. on October 27, 1956, will be governed by the time of filing.

(3) All valid applications and selections under the non-mineral public-land laws, other than those coming under paragraphs (1) and (2) above, presented prior to 10:00 a. m. on October 27, 1956, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

b. The lands have been open to applications and offers under the mineral-leasing laws. They will be open to location under the United States mining laws beginning at 10:00 a. m. on October 27, 1956.

4. Persons claiming veterans preference rights must enclose with their applications proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge. Persons claiming preference rights based upon valid settlement, statutory preference, or equitable claims must enclose properly corroborated statements in support of their claims. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations.

5. Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Los Angeles, California.

DEPUE FALCK,
*Acting Director,*
*Bureau of Land Management.*

## DEPARTMENT OF COMMERCE

### Federal Maritime Board

GRACE LINES INC. ET AL.

NOTICE OF AGREEMENT FILED FOR APPROVAL

Notice is hereby given that the following described agreement has been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, 39 Stat. 733, 46 U. S. C. 814.

Agreement No. 8300, between Grace Line Inc., Lykes Bros. Steamship Co., Inc., Marina Mercante Nicaraguense, S. A., Panama Canal Company and United Fruit Company, is a new agreement of the Atlantic and Gulf/West Coast of Central America and Mexico Conference providing for the establishment and maintenance of agreed rates and charges of every lawful type and rules, regulations and practices for or in connection with the receiving, handling transportation and discharge of cargo carried by the parties to this agreement in the trade, either for direct movement or for transhipment via Cristobal and or Balboa, Canal Zone, between Atlantic and/or Gulf ports of the United States and West Coast ports of Panama (except Panama R. P.), Costa Rica, Nicaragua, Honduras, Salvador, Guatemala and Mexico. Upon approval, this agreement will supersede and cancel the present agreement of the conference (No. 2743), except that portion thereof designated as No. 2743–C.

Interested parties may inspect this agreement and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to the agreement and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: June 26, 1956.

By order of the Federal Maritime Board.

[SEAL] A. J. WILLIAMS,
*Secretary.*

[F. R. Doc. 56-5163; Filed, June 20, 1956; 8:51 a. m.]

## FEDERAL POWER COMMISSION

[Docket Nos. G-2451, G-5475]

UNITED FUEL GAS CO.

ORDER FIXING DATE OF FURTHER HEARING

The Commission by order issued June 4, 1954 in Docket No. G-2451, suspended United Fuel Gas Company's proposed increased rates and charges contained in its FPC Gas Tariff, Fourth Revised Volume No. 1, and provided for hearing concerning the lawfulness of the rates and charges proposed. By order issued October 29, 1954, the Commission, among other things, permitted certain changes in the suspended tariff, consolidated Docket No. G-2451 for purposes of hearing on the issue of form of rate with the proceedings relating to Docket No. G-2450, In the Matter of Central Kentucky Natural Gas Company, and fixed date for such consolidated hearing.

By further orders issued December 3, 1954, in Docket Nos. G-5475 and G-5476, the Commission suspended the additional increases in rate filed by United Fuel and Central Kentucky, respectively, and consolidated those dockets with Docket Nos. G-2451 and G-2450 for purposes of hearing on the issue of form of rate. The consolidated hearings on the single issue of form of rate were concluded April 7, 1955, and following the filing of briefs, the Presiding Examiner issued his decision which was sustained by Commission order issued May 11, 1956. That issue is presently pending before the Commission on petitions for rehearing filed by certain of the parties.

At the conclusion of the hearings on the issue of form of rate on April 7, 1955, the Presiding Examiner stated on the record that further hearing with respect to the level of the rates would be convened by further order of the Commission.

The Commission finds:

(1) It is appropriate and in the public interest in carrying out the provisions of the Natural Gas Act that the proceedings in the above-designated dockets relating to all matters involved and issues presented by the above-entitled proceedings, except the issue of form of rate, be set for hearing as hereinafter provided.

(2) Good cause exists for fixing the date of hearing in this proceeding less than 15 days after publication of this order in the FEDERAL REGISTER.

The Commission orders: Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 4, 5, 15 and 16 of the Natural Gas Act and the Commission's general rules and regulations, including rules of practice and procedure (18 CFR, Chapter I) public hearing hereby is reconvened in the above-designated dockets concerning the matters involved and the issues presented therein, other than the issue of form of rate, commencing July 5, 1956, at 10:00 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C.

Issued: June 25, 1956.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 56-5156; Filed, June 28, 1956; 8:49 a. m.]

[Docket No. G-6366, etc.]

KERR-MCGEE OIL INDUSTRIES, INC., ET AL.

FINDINGS AND ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY, ORDER SEVERING DOCKET NO. G-7448 FROM CONSOLIDATED PROCEEDINGS, AND ORDER GRANTING PARTIAL DISMISSAL OF APPLICATIONS IN DOCKET NOS. G-6613 AND G-9464

Kim Carter, Docket No. G-6860; J. C. Trahan (J. C. Trahan, Drilling Corporation, Inc.), et al.; Docket No. G-6278; G. Scott Hammonds et al., Docket No. G-6298; G. Scott Hammonds et al., Docket No. G-6299; Tekoil Corporation (G. S. Hammonds, Predecessor), Docket No. G-6300; Champlin Refining Company,[1] Docket No. G-6613; Amerada Petroleum Corporation, Docket Nos. G-6311–6318, incl., G-6320, G-6325 and G-6326; Waterford Oil Company (Christie, Mitchell and Mitchell, Agent), Docket No. G-6812; The Carter Oil Company, Docket No. G-6827; Burge and Beren Oil and Gas Company, Docket No. G-7100; Jesse M. Brooks and M. James Brooks, Jr., Docket

[1] Application requesting partial dismissal filed on May 11, 1956, as to sales to Kansas-Nebraska Natural Gas Company, Inc., from production in the Ryan Field of Rush County, Kansas, under contract dated August 26, 1946.

No. G–7116; St. Paul Church Lease, Docket No. G–7117; Wirt County Oil & Gas Company, Docket No. G–7118; Hunter M. Bennett Lease (K. M. Hunt), Docket No. G–7120; Carroll Gas Company, Docket No. G–7121; Collins Gas Company, Docket No. G–7122; Bryan E. Miller et al., Docket No. G–7123; Kuntz Farm Gas Company, Docket No. G–7124; Parsonage Lot Lease, Docket No. G–7127; Park Norman Lease, Docket No. G–7128; Glen Wilson Lease, Docket No. G–7129; Simmons Gas Company, Docket No. G–7130; Stump Gas Company, Docket No. G–7131; Mill Lot Gas Company, Docket No. G–7132; Gay Wilson Lease, Docket No. G–7133; Bonnie Weaver Lease, Docket No. G–7134; Mary L. Taylor Gas Company, Docket No. G–7135; Kirby Oil & Gas Company, Docket No. G–7182; Gus Siers Oil and Gas Company, Docket No. G–7357; H. C. Arnold, Docket No. G–7390; Calvert Drilling, Inc., Docket No. G–7391; McRae Oil and Gas Corporation (J. A. McRae, Ltd), J. F. Balderson, James C. Brady, Malcom G. Chace, Jr., Docket No. G–7447; Crow Drilling Company, Inc.,[2] Docket No. G–7448; Sinclair Oil & Gas Company, Docket No. G–7674; Graham-Messman-Rinehart Oil Company, Docket No. G–8122; Anderson-Prichard Oil Corporation, Docket No. G–8327; Ralph Tudesco, Docket No. G–8312; Big Injun Development Company, Docket No. G–8881; Citizens Bank of Hattiesburg, Mississippi, Docket No. G–8912; Miami Operating Company, Inc., Docket No. G–9464; Neumont Oil Company, Docket No. G–8293.

Each Applicant listed hereinabove has filed an appli cation at each of the designated dockets for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing such Applicant to sell natural gas in interstate commerce for resale, subject to the jurisdiction of the Commission, as more fully described in the respective applications from the sources of production to the purchasers referred to in the tabulation hereinafter set forth. The designated Applicants are referred to singly and collectively as Applicant.

Pursuant to due notice, a public hearing was held in Washington, D. C., respecting the matters involved in and the issues presented by the applications listed in each docket except Docket Nos. G–6613 and G–9464 in which partial dismissals are being ordered, and Docket No. G–7448 which is severed herefrom, all as more fully ordered herein. No notice of intervention, petition to intervene or protest to the granting of the application has been received. Staff counsel moved orally at the hearing that the intermediate decision procedure be omitted and the Commission render a decision herein pursuant to §1.30 (c) (1) of the Commission's rules of practice and procedure.

The record reflects (a) that in Docket No. G–6613 Champlin Refining Company filed on May 11, 1956, an application requesting partial dismissal of the matters made the subject of its original filing for a certificate of public convenience and necessity, and insofar as its request relates to the sale of natural gas produced in the Ryan Field of Rush County, Kansas, under contract dated August 26, 1946, and sold to Kansas-Nebraska Natural Gas Company, Inc., (b) that gas produced by Miami Operating Company, Inc., Docket No. G–9464 in the Bowie Southwest 2nd Conglomerate Field, Montague County, Texas, is consumed entirely within the State of Texas, and (c) that on May 28, 1956, Crow Drilling Company, Docket No. G–7448, filed an application at Docket No. G–7448 to abandon service to Arkansas-Louisiana Gas Company pursuant to Section 7 (b) of the Natural Gas Act. It appears to be appropriate therefore to partially dismiss the applications in Docket Nos. G–6613, and G–9464, and to sever Docket No. G–7448 from the consolidated proceedings.

The record further reflects that (1) the Applicants in Docket Nos. G–6860, G–6812, G–6827, G–7100, G–7116, G–7182, G–7357, G–7390, G–7391, G7447, G–8122, G–8327, G–8312, G–8881, and G–8912 propose to sell natural gas in interstate commerce for resale from sources of production to purchasers identified and set forth in the tabulation herein; and (2) that the Applicants in Docket Nos. G–6366, G–6367, G–6368, G–6877, G–6409, G–6278, G–6298, G–6299, G–6300, G–6613, G–6311 thru G–6318, G–6320, G–6325, G–6326, G–7117, G–7118, G–7120 thru G–7124, G–7127 thru G–7135, G–7674, G–9464 and G–8293 sell natural gas in interstate commerce for resale from sources of production to purchasers identified and set forth in the tabulation herein. The tabulation is set forth as follows:

*Docket No. G–; Location of Field or Source of Production; and Purchaser*

6366; Texas-Hugoton Field, Sherman County, Tex.; Phillips Petroleum Co.

6367; Guymon-Hugoton Field, Texas County, Tex.; Phillips Petroleum Co.

8912; Maxie and Pistol Ridge Gas Fields, Forrest County, Miss.; United Gas Pipe Line Co.

9464; Producing horizons down to and including Pennsylvania Formation in Garvin County, Okla.; Lone Star Gas Company.

The Commission finds:

(1) Each Applicant listed herein is or will be an independent producer of natural gas engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption and, by reason thereof, is or will be a "natural-gas company" within the meaning of the Natural Gas Act and subject to the jurisdiction of the Commission under the act.

(2) Each sale of natural gas listed herein, as more fully described in the application, is or will be made in interstate commerce, and together with the operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is subject to the requirements of subsections (c) and (e) of section 7 of the Natural Gas Act.

(3) Each Applicant listed herein is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(4) The sale of natural gas hereinbefore described, as more fully described in the application, is or will be made in interstate commerce, subject to the jurisdiction of the Commission, and such sale by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is subject to the requirements of subsections (c) and (e) of section 7 of the Natural Gas Act.

(5) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(6) The sale of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(7) A request during the public hearing by Staff Counsel for omission of the intermediate decision procedure under § 1.30 (c) of the Commission's rules of practice and procedure, was unopposed by any party of record and, not having been denied by the Commission, is granted pursuant to § 1.30 (c) (1) of said rules.

The Commission orders:

(A) A certificate of public convenience and necessity be and is hereby issued, upon the terms and conditions of this order, authorizing the sale by each Applicant of natural gas in interstate commerce for resale, together with the construction and operation of any facilities, subject to the jurisdiction of the Commission, used or proposed to be used for the sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and exhibits in this proceeding.

(B) The certificate issued herein shall be deemed accepted and of full force and effect, unless refused in writing and under oath by Applicant within 30 days from issuance of this order.

(C) The application (i) of Champlin Refining Company, in Docket No. G–6613 insofar as it relates to natural gas produced in the Ryan Field of Rush County, Kansas, and sold to Kansas-Nebraska Natural Gas Company, Inc., and not presently sold in interstate commerce for resale subject to the jurisdiction of the Commission, and (ii) of Miami Operating Company, in Docket No. G–9464 relating to natural gas produced in the Bowie Southwest 2nd Conglomerate Field, Montaque, Texas and consumed in the State of Texas, be and the same are hereby dismissed.

(D) The application of Crow Drilling Company, in Docket No. G–7448, and the proceeding relating thereto consolidated herewith for the purposes of hearing be and the same is hereby severed from this proceeding, and the hearing thereof postponed subject to further order of the Commission or setting by the Secretary of the Commission.

(E) The certificate is not transferable and shall be effective only so long as Applicant continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act, and the applicable rules, regulations and orders of the Commission.

(F) The grant of the certificate herein shall not be construed as waiver of the requirements of section 4 of the Natural Gas Act, or of section 154 of the Commission's rules and regulations thereunder requiring the filing of rate schedules for service herein authorized; and is without prejudice to any findings or orders which have been or may hereafter instituted by or against the Applicant. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objection relating to the operation of any price or related provision in the gas purchase contracts herein involved.

Issued: June 25, 1956.

By the Commission.

Commissioner Digby concurring, subject to statement filed as part of original document.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 56–5157; Filed, June 28, 1956; 8:50 a. m.]

---

[Docket No. G–10098]

PENNSYLVANIA GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

JUNE 25, 1956.

Take notice that Pennsylvania Gas Company (Applicant), a Pennsylvania corporation with a principal office in Warren, Pennsylvania, filed an application on March 13, 1956, and supplements thereto on April 16 and May 28, 1956, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the Applicant to construct and operate facilities subject to the jurisdiction of the Commission, more fully described in the application filed herein, and open for public inspection. The natural gas facilities subject to Commission jurisdiction are described as follows:

*Erie Transmission Line.* Approximately 23 miles of 10¾-inch of gas transmission line and appurtenant facilities originating at Applicant's existing interconnection with Tennessee Gas Transmission Company near Union City, Pennsylvania, extending northwesterly

[2] Application filed on May 28, 1956, for authority to abandon service for which certificate authorization is sought herein.

and terminating in the western suburban area of the City of Erie at the Borough of Fairview, all within Erie County, Pennsylvania.

*Jamestown Transmission Line.* Approximately 15 miles of 8⅝-inch gas transmisison line and appurtenant facilities originating at an interconnection with Applicant's existing control station in Pittsfield Township, Warren County, Pennsylvania, extending northeasterly into New York State, and terminating approximately one mile west of the City of Jamestown, Chautauqua County, New York.

*Erie Lateral Transmission Lines.* Approximately 121,900 feet of 6-inch, 32,300 feet of 10-inch and 6,300 feet of 8-inch pipeline extending from the Erie transmission line to Fairview, Middleboro, Lake City and Waterford; communities in the Townships of LeBoeuf, Waterford, Fairview, McKean and Girard; and from a point in Fairview Township near the terminus of the Erie Line eastwardly into Millcreek Township.

The application recites that (1) the Erie line will bring natural gas to communities not now being served, and will enable Applicant during periods of peak demand and in emergencies to feed natural gas thru Applicant's distribution lines from the west into the City of Erie, Pennsylvania, and (2) the Jamestown line will enable Applicant to augment the supply of gas now being furnished the City of Jamestown.

The application further recites the estimated aggregate requirements of communities to be served from the proposed Erie line to be:

| | 1957 | 1958 | 1959 |
|---|---|---|---|
| Peak day (Mcf) | 2,412 | 5,352 | 7,043 |
| Annual (Mcf) | 274,975 | 624,020 | 814,265 |

and the incidental requirements along the route of the Jamestown line to be:

| | 1957 | 1958 | 1959 |
|---|---|---|---|
| Peak day (Mcf) | 24 | 27 | 27 |
| Annual (Mcf) | 3,120 | 3,640 | 3,640 |

The proposed Erie line is designed to provide approximately 11,300 Mcf on a design day of which about 5000 Mcf will be delivered to the City of Erie via the proposed lines. The proposed Jamestown line will be used to furnish about 11,000 Mcf per day to Jamestown this coming winter to assist Applicant in meeting a total peak day demand of 38,000 Mcf in the area.

The estimated cost of all facilities is $2,628,000, which will be borrowed from its corporate parent, National Fuel Gas Company.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on August 1, 1956, at 9:30 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before July 20, 1956. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 56-5158; Filed, June 28, 1956; 8:50 a. m.]

## GENERAL SERVICES ADMINISTRATION

[Project 3-DC-01]

FEDERAL OFFICE BUILDINGS

PROSPECTUS FOR PROPOSED BUILDINGS IN SOUTHWEST REDEVELOPMENT AREA OF DISTRICT OF COLUMBIA

EDITORIAL NOTE: This prospectus of proposed Project Number 3-DC-01 is published pursuant to section 412 (f) of the Public Buildings Purchase Contract Act of 1954 as amended by Public Law 150, 84th Congress, which requires publication in the FEDERAL REGISTER, for a period of ten consecutive days from date of submission to the Committees on Public Works of the Senate and House of Representatives.

Project Number 3-DC-01 (Revised)

MARCH 14, 1956.

FORMAL PROSPECTUS FOR PROPOSED BUILDING UNDER TITLE I PUBLIC LAW 519, 83D CONGRESS, 2D SESSION

FEDERAL OFFICE BUILDING, WASHINGTON, D. C.

1. *Brief description of proposed building.* The project contemplates the erection of a group of three Federal Office Buildings on a site to be acquired by the Government facing on the proposed Tenth Street Mall in the southwest redevelopment area of Washington, D. C. Each building will be multi-storied. An aggregate of approximately 643,000 square feet of net assignable space will be provided.

2. *Estimated maximum cost and financing.*
a. Maximum cost of site and buildings, $25,250,000.
b. Proposed contract term, 30 years.
c. Maximum rate of interest on purchase contract, 4 percent.

3. *Certificates of need.* As the project is intended to provide relocation of numerous Federal agencies now in temporary buildings, no specific allocation of space can be made at this time. Upon completion of the facility, assignment and reassignment will be made in accordance with existing law. Therefore, requirement for Certificate of Need otherwise required by section 411 (e) of the Public Buildings Purchase Contract Act of 1954 was waived in Public Law 150, 84th Congress. Certification is hereby made as to the need for service and garage space.

4. *Non-availability of existing space.* Suitable space owned by the Government is not available; and suitable rental space is not available at a price commensurate with that to be afforded through the contract proposed.

5. *Estimated annual managerial, custodial, heat, and utility costs.* (Services to be supplied by Government), $675,000.

6. *Estimated annual tax liability, upkeep and maintenance.* a. Taxes, post construction (contract period), $321,625.
b. Upkeep and maintenance (to be provided by Government), $96,000.

7. *Current annual housing costs.* Rents and other housing costs currently paid by the Government for agencies to be housed in the building to be erected, $509,000 p. a.

*Determination of need.* It has been determined that (1) the needs for space for the permanent activities of the Federal Government in this particular area cannot be satisfied by utilization of any existing suitable property now owned by the Government, and (2) the best interests of the United States will be served by taking action hereunder.

Submitted at Washington, D. C., on June 1, 1956.

Approved:

FRANKLIN G. FLOETE,
*Administrator of General Services.*

8. *Statement of Director, Bureau of the Budget.* Reflected in letter (copy attached).

EXECUTIVE OFFICE OF THE PRESIDENT
BUREAU OF THE BUDGET
WASHINGTON 25, D. C.

JUNE 13, 1956.

Project 3-DC-01 (Revised 3-14-56).
3 Multi-storied Federal Office Buildings.
Southwest Redevelopment Area, Washington, D. C.

MY DEAR MR. FLOETE: Pursuant to section 411 (e) (8) of the Public Buildings Purchase Contract Act of 1954 (Public Law 519), the (Revised March 14, 1956) proposal for a group of three Federal Office Buildings, transmitted with your letter of June 1, 1956, has been examined and in my opinion "is necessary and in conformity with the policy of the President." This approval is given with the following understanding:

1. Revision reflects the application of more definite plans for integration of the facility with the proposed Tenth Street Mall developed subsequent to approval of the project last July. Effective integration requires construction of three building units in lieu of one, as originally proposed. Garage space of 134,250 square feet not contemplated in original project is provided. Number of employees, utilization of space and cost factors are relatively the same.

2. That the stated project cost of $25,250,000 (including $2,500,000 for a site to be acquired) is a maximum figure.

3. That the reported annual operating cost of existing Tempos 4, 5, and T; i. e., $1.00 per square foot, represents minimum maintenance in anticipation of demolition, and that temporary Government buildings actually cost more to maintain than the proposed new buildings.

4. That the proposed buildings will house approximately 10% of Federal employees presently housed in temporary buildings, and that the specific allocation of agencies in the proposed buildings is to be determined later by General Services Administration.

5. That every effort will be made to design and construct space conducive to maximum efficient utilization of both site and buildings and to take advantage of any revision of cost downward which may be found possible as the plans develop and negotiations are advanced.

6. That this approval supersedes Mr. Hughes' letter of July 22, 1955.

You appreciate, of course, that this project will receive a more detailed review as to cost and space utilization prior to the approval of the lease-purchase agreement.

Sincerely yours,

(Signed) PERCIVAL BRUNDAGE,
*Director.*

Hon. FRANKLIN G. FLOETE,
*Administrator,*
*General Services Administration,*
*Washington 25, D. C.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3484]

CENTRAL PUBLIC UTILITY CORP.

ORDER AUTHORIZING RENEWAL OF GUARANTY BY PARENT OF SHORT-TERM NOTE OF SUBSIDIARY

JUNE 25, 1956.

Central Public Utility Corporation ("Central"), a registered holding company under the Public Utility Holding Company Act of 1935 ("act"), as to which an application for exemption is pending pursuant to section 3 (a) (5) of the act (File No. 31-626), has filed a declaration pursuant to sections 7 and 12 (b) of the act and Rule U-45 thereunder with respect to the following proposed transactions:

By order issued on December 16, 1955 (Holding Company Act Release No. 13066), the Commission authorized Central to lend its credit as guarantor of a short-term promissory note to be issued by its wholly-owned subsidiary The Islands Gas and Electric Company ("Islands"), an exempt intermediate holding company; pursuant to which authorization, Islands on December 28, 1955 issued its 90-day promissory note to The Hanover Bank in the principal amount of $2,000,000, bearing interest at the rate of 3½ percent per annum and secured by Central's pledge to said bank of a 90-day Time Deposit Open Account in the amount of $2,000,000 bearing interest at the rate of 2 percent per annum; and by order issued on March 26, 1956, the Commission authorized Central to continue this arrangement for a further ninety day period until June 25, 1956 (Holding Company Act Release No. 13136).

Central states that Islands has not yet received the funds with which it had expected to pay the note and that Islands intends to renew such note for an additional period of ninety days from June 25, 1956, in identical amount and on identical terms, the renewal note to be payable by Islands at its election at any time after sixty days without penalty or prepayment charge. Central proposes to guaranty the renewal note and pledge as security the aforesaid Open Account. Central further states Islands expects to pay the renewed note prior to its maturity date.

Due notice having been given of the filing of said declaration, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable standards of the act are satisfied.

*It is ordered,* Pursuant to Rule U-23 and applicable provisions of the act, that said declaration be, and it hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[File No. 812-1009]

NORTH RIVER SECURITIES CO. INC., ET AL.

NOTICE OF AND ORDER FOR HEARING ON APPLICATION FOR AN ORDER EXEMPTING CERTAIN TRANSACTIONS

JUNE 25, 1956.

In the matter of North River Securities Co., Inc., Dale Properties, Inc., Lauderdale Properties, Ft. Lauderdale Properties, Inc., Broward Properties, Inc., Broward Boulevard Properties, Inc., Ira Guilden, and Metals Corporation of America.

Notice is hereby given that North River Securities Co., Inc. ("North River"), registered under the Investment Company Act of 1940 ("act") as a closed-end, non-diversified management investment company, and certain affiliated persons of North River and affiliated persons of such persons, have filed a joint application pursuant to sections 6 (c) and 17 (b) of the Act for an order exempting from the provisions of sections 17 (a) and 23 (a) certain transactions whereby North River proposes to acquire certain properties and securities.

North River proposes to acquire certain real estate located in Florida from Dale Properties, Inc., Lauderdale Properties, Inc., Ft. Lauderdale Properties, Inc., Broward Properties, Inc. and Broward Boulevard Properties, Inc., all Florida corporations (herein collectively called the "Five Realty Corporations"). North River also proposes to acquire from Mrs. Ira Guilden ("Guilden") and from Metals Corporation of America, a Delaware corporation ("Metals"), and from other persons, all the issued and outstanding capital stock of Frank T. Budge Company ("Budge"), a Florida corporation engaged in the wholesale hardware business in Florida.

North River and the Five Realty Corporations have entered into an Agreement and Plan of Reorganization, dated April 25, 1956 ("Agreement and Plan"), providing, among other things, for (a) the transfer by the Five Realty Corporations to North River of all of the property and assets of the Five Realty Corporations in exchange for the issuance to the Five Realty Corporations by North River of 150,000 shares of common stock, par value $1 per share, of North River and the assumption by North River of all of the liabilities and obligations of the Five Realty Corporations, and (b) the dissolution of each of the Five Realty Corporations and the distribution of the shares of stock received by each of them pro rata among the respective stockholders of the Five Realty Corporations.

In addition, North River has entered into a Purchase Agreement, dated April 25, 1956 ("Purchase Agreement"), providing, among other things, for the transfer to it by the holders thereof of all the issued and outstanding capital stock of Budge in exchange for an aggregate of 107,000 shares of common stock, par value $1 per share, of North River.

Guilden is a director of North River and as of March 31, 1956 owned 191,876 shares of its common stock. In addition, Guilden owned 50 percent of the outstanding stock of American Perfit Crystal Corp., which owned, of record and beneficially, 39,377 shares of common stock of North River on such date. An additional 11,000 shares of North River are owned by Guilden, as trustee of two trusts, in which Guilden has no direct or indirect beneficial interest. The aggregate of 242,253 shares owned or controlled by Guilden represents 31.18 percent of the 776,825 shares of outstanding common stock of North River. Guilden also is the beneficial owner of 10⅛ shares of capital stock of each of the Five Realty Corporations, constituting approximately 10.17 percent of the 100 shares of issued and outstanding capital stock of each of the Five Realty Corporations. In addition, American Perfit Crystal Corp., owns 10 shares of capital stock of each of the Five Realty Corporations constituting 10 percent of the issued and outstanding shares of the Five Realty Corporations. An additional 20 shares of each of the Five Realty Corporations are held by Stuart W. Patton, as nominee for two trusts, for both of which Guilden is co-trustee, and in one of which Guilden has a one-half beneficial interest, which such 20 shares constitute 20 percent of the outstanding capital stock of each of the Five Realty Corporations. Accordingly, North River and each of the Five Realty Corporations are each affiliated persons of Guilden and Guilden as an affiliated person of each of the said companies by virtue of the provisions of section 2 (a) (3) of the act.

With respect to the transactions contemplated by the Purchase Agreement, Guilden is the beneficial owner of 1,666⅔ shares of the Second Preferred Stock of Budge. In addition, Metals, of which Guilden owns all of the issued and outstanding capital stock, owns 3,333⅓ shares of the Second Preferred Stock of Budge. The Second Preferred Stock is one of the classes of stock of Budge which will be transferred to North River in exchange for its common stock. Accordingly, North River will be acquiring securities directly from (a) an affiliated person in the case of Guilden and (b) an affiliate of an affiliated person in the case of Metals.

Each of the Five Realty Corporations was incorporated under the laws of the State of Florida on June 4, 1955. The Five Realty Corporations own certain mortgages and contiguous portions of a tract of land in Broward County, Florida. The land is undeveloped and is subdivided into smaller plots.

The consolidated recorded gross cost of such real estate to the Five Realty Corporations per books as of March 1, 1956, was $624,779. The recorded consolidated net asset value of the Five Realty Corporations as of the same date amounted to $130,645. As consideration therefor North River proposes to issue to the sellers 150,000 shares of its stock having a net asset value as of the same date aggregating approximately $600,000. On the basis of an appraisal of said real estate dated March 30, 1956, North River has submitted a pro-forma statement of assets and liabilities reflecting said real estate at a gross value of $1,312,000. Such statement also reflects net assets of the Five Real Estate companies in the amount of $817,366.

Budge was incorporated on July 1, 1912, under the laws of the State of Florida and is presently engaged in the wholesale hardware business in Miami, Florida. Budge leases a building containing approximately 40,000 square feet of warehouse space on one level, under a lease dated May 9, 1947, for a period of five years, with a right of renewal by Budge for four five-year periods ending in 1972 at an annual rental of $15,600. The territory served by Budge includes the entire East Coast of Florida from Vero Beach south to Key West, the Okeechobee Lake region and through Fort Myers on the West Coast. Delivery service is provided for its customers and is accomplished by four trucks which are leased by Budge on an annual basis.

As of February 29, 1956, Budge had total assets of $922,130 represented primarily by inventory and trade accounts and notes receivable aggregating approximately $868,000. There was outstanding an aggregate of 12,000 shares of first, second and fourth preferred stock with a par value of $10 per share, and 100,500 shares of $1 par value common stock. The net assets applicable to the total preferred and common stocks at February 29, 1956, aggregated approximately $533,900. Prior to the consummation of the proposed transaction, the total outstanding 2,000 shares of first preferred stock will be redeemed at $10 per share or an aggregate of $20,000. North River proposes to issue 107,000 shares of its common stock with a total net asset value at the same date of approximately $428,000 for the second and fourth preferred stocks and the common stock. North River has submitted a proforma statement of assets and liabilities reflecting its investment in the stock of Budge at $553,900. For each of the fiscal years ended April 30, 1953, 1954 and 1955, the net income applicable to the stock of Budge proposed to be acquired by North River and the first preferred stock that will be retired amounted to $37,599, $12,998, and $7,567 respectively. Net income for the 10 months ended February 29, 1956, amounted to $11,975.

The application recites that the obligations under the Agreement and Plan and the obligations under the purchase agreement are each conditioned upon the simultaneous consummation of the other.

The Statement of Policy filed by North River pursuant to section 8 (b) of the act reserves freedom to issue senior securities, to borrow money to finance additional investments and to purchase real estate at a cost not exceeding 40 percent of the value of its assets. Its policy is to operate as a special situation company and to invest primarily in common stocks.

Generally speaking, section 17 (a) of the act prohibits an affiliated person of a registered investment company or any affiliated person of such a person, from selling to, or purchasing from such registered investment company or any company controlled by such registered investment company, any securities or property, subject to certain exceptions not here pertinent. The Commission upon application pursuant to section 17 (b) may grant an exemption from the provisions of section 17 (a) if it finds that the terms of the proposed transactions, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, and the proposed transactions are consistent with the policy of each registered investment company concerned, as recited in its registration statement and reports filed under the act and is consistent with the general purposes of the act.

Section 23 (a) of the act provides in pertinent part that no registered closed-end investment company shall issue any of its securities (1) for services; or (2) for property other than cash or securities, except in connection with a reorganization. Section 6 (c) permits the Commission to exempt any transaction from any provision of the act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes and policies fairly intended by the policy and provisions of the act.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors that a hearing be held with respect to the application;

*It is ordered,* Pursuant to section 40 (a) of said act, that a hearing on the aforesaid application under the applicable provisions of the act and of the Rules of the Commission thereunder be held on the 16th day of July 1956 at 10:00 a. m., in the offices of the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At such time the Hearing Room Clerk will advise as to the room in which such hearing will be held. Any person desiring to be heard or otherwise wishing to participate in this proceeding is directed to file with the Secretary of the Commission his application as provided in Rule XVII of the Commission's rules of practice, on or before the date provided in the Rule, setting forth any issues or law or facts which he desires to controvert or any additional issues which he deems raised by this Notice and Order or by such application.

*It is further ordered,* That James G. Ewell, or any officer or officers of the Commission, designated by it for that purpose, shall preside at said hearing. The officer so designated is hereby authorized to exercise all the powers granted to the Commission under sections 41 and 42 (b) of the Investment Company Act of 1940 and to a hearing officer under the Commission's rules of practice.

The Division of Corporate Regulation having advised the Commission that it has made a preliminary examination of the application, and that upon the basis thereof the following matters and questions are presented for consideration, without prejudice to its specifying additional matters and questions upon further examination:

(1) Whether the terms of the proposed transactions, including the considerations to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned;

(2) Whether the proposed transactions are consistent with the policies of North River, as recited in its registration statement and reports filed pursuant to the act;

(3) Whether the proposed transactions are consistent with the general purposes of the act; and

(4) Whether the proposed securities issuances by North River are in connection with a reorganization within the meaning of section 23 (a) of the act and, if not, whether an exemption from the provisions of such section of the act is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the act.

*It is further ordered,* That at the aforesaid hearing attention be given to the foregoing matters and questions.

*It is further ordered,* That the Secretary of the Commission shall give notice of the aforesaid hearing by mailing a copy of this notice and order by registered mail to North River Securities Co., Inc., Dale Properties, Inc., Lauderdale Properties, Inc., Ft. Lauderdale Properties, Inc., Broward Properties, Inc., Broward Boulevard Properties, Inc., Ira Guilden and Metals Corporation of America, and that notice to all persons shall be given by publication of this notice and order in the FEDERAL REGISTER; and that a general release of this Commission in respect of this notice and order be distributed to the press and mailed to the mailing list for releases.

*It is further ordered,* That North River Securities Co., Inc., give notice of this hearing to all of its stockholders (insofar as the identity of such security holders is known or available) by mailing to each of said persons a copy of this notice and order to his last known address at least 13 days prior to the date set for said hearing.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

BADGER URANIUM CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 25, 1956.

I. Badger Uranium Corporation, a Nevada corporation, 401 Fremont Street, Las Vegas, Nevada, filed with the Commission on July 1, 1955, a notification on Form 1-A and an offering circular, and subsequently filed amendments thereto, relating to an offering of 6,500,000 shares of 1 cent par value common stock at 1 cent per share for an aggregate of $65,000 for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

1. The notification and offering circular are false and misleading in naming Weber Investment Company as the principal underwriter; in omitting to state that Ruth J. Rains was intended to act as the principal underwriter; and in omitting to state that Ruth J. Rains was not registered with the Commission as a broker-dealer.

2. The offering circular is false and misleading in omitting to state that Weber Investment Company, named as underwriter therein, ceased its underwriting business in July, 1955 and withdrew its registration with the Commission as a broker-dealer, effective November 23, 1955.

3. It is falsely represented in the notification, underwriter's agreement and underwriter's consent to be named in the offering circular that Ruth J. Rains, who signed said documents on behalf of Weber Investment Company, was a registered member of the National Association of Securities Dealers, Inc.

4. Issuer has failed to file a report on Form 2-A of sales of securities being offered, as required by Rule 224.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any persons having any interest in the matter may file with the Secretary of the Commission a written request for hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place of said hearing will be promptly given by the Commission.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 24D-1543]

LISTA, INC.

ORDER TEMPORARILY DENYING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 25, 1956.

I. Lista, Inc., a Nevada corporation, 139 North Virginia Street, Reno, Nevada, filed with the Commission on December 28, 1954, a notification on Form 1-A and an offering circular, and subsequently filed amendments thereto, relating to an offering of 2,500,000 shares of 1 cent par value common stock at 10 cents per share for an aggregate of $250,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

1. The offering circular is false and misleading in omitting to state that Ruth J. Rains, named as underwriter in the offering circular and who signed an underwriting agreement with the issuer, is not registered with the Commission as a broker-dealer.

2. The aggregate offering price of all securities of the issuer presently being offered and all those sold in violation of section 5 (a) of the Securities Act of 1933, within one year prior to the commencement of the proposed offering exceeds $300,000.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily denied.

Notice is hereby given that any persons having any interest in the matter may file with the Secretary of the Commission a written request for hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

By the Commission.

GRAND CANYON URANIUM CO.

ORDER TEMPORARILY DENYING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 25, 1956.

I. Grand Canyon Uranium Company, a Utah corporation, 156 East Third South Street, Salt Lake City 11, Utah, filed with the Commission on February 29, 1956, a notification on Form 1-A and an offering circular relating to an offering of 9,000,000 shares of 2 cents par common stock at 2 cents per share for an aggregate of $180,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

1. The offering circular is false and misleading in omitting to state that Ruth J. Rains, named as underwriter in the offering circular, and who signed an underwriting agreement with the issuer, is not registered with the Commission as a broker-dealer.

2. No consent on the part of Ruth J. Rains to be named as principal underwriter of the securities proposed to be offered has been filed, as required by Item 7 of Form 1-A.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily denied.

Notice is hereby given that any persons having any interest in the matter may file with the Secretary of the Commission a written request for hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of denial should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

By the Commission.

[File No. 24 SF-2114]

MOAPA URANIUM CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 25, 1956.

I. Moapa Uranium Corporation, a Nevada corporation, 1112 Fremont Street, Las Vegas, Nevada, filed with the Commission on July 14, 1955, a notification on Form 1-A and an offering circular, and subsequently filed amendments thereto, relating to an offering of 3,000,000 shares of 10 cents par value common stock at 10 cents per share for an aggregate of $300,000 for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

1. The offering circular is false and misleading in stating that Ruth J. Rains, one of the principal underwriters, is a licensed securities broker under the laws of the State of Nevada; and in omitting to state that Ruth J. Rains was not registered with the Commission as a broker-dealer.

2. Issuer has failed to file a report on Form 2–A of sales of securities being offered, as required by Rule 224.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place of said hearing will be promptly given by the Commission.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[File No. 24D–1874]

DIX URANIUM CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 25, 1956.

I. Dix Uranium Corporation, a Nevada corporation, 290 North University Avenue, Provo, Utah, filed with the Commission on August 10, 1955, a notification on Form 1–A and an offering circular, and subsequently filed amendments thereto, relating to an offering of 6,000,000 shares of 5 cents par value common stock at 5 cents per share for an aggregate of $300,000 for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

1. The notification and offering circular are false and misleading in naming Weber Investment Company as the principal underwriter; in omitting to state that Ruth J. Rains was intended to act as the principal underwriter; and in omitting to state that Ruth J. Rains was not registered with the Commission as a broker-dealer.

2. The offering circular is false and misleading in stating, "The Underwriter agrees to use its best efforts to sell such stock directly and through securities dealers registered in Nevada and such other States wherein this offering has been registered and cleared for sale," and in omitting to state that the State of Nevada does not register securities dealers or securities being offered for sale in such State.

3. The offering circular is false and misleading in omitting to state that Weber Investment Company, named as underwriter therein, ceased its underwriting business in July 1955 and withdrew its registration with the Commission as a broker-dealer, effective November 23, 1955.

4. Issuer has failed to file a report on Form 2–A of sales of securities being offered, as required by Rule 224.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place of said hearing will be promptly given by the Commission.

By the Commission.

[File No. 24D–1781]

AMARILLA URANIUM, INC.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 25, 1956.

I. Amarilla Uranium, Inc., a Nevada corporation, 139 North Virginia Street, Reno, Nevada, filed with the Commission on June 13, 1955, a notification on Form 1–A and an offering circular, and subsequently filed an amendment thereto on August 18, 1955, relating to an offering of 3,000,000 shares of 1 cent par value common stock at 10 cents per share for an aggregate of $300,000, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

1. The notification and offering circular are false and misleading in naming Weber Investment Company as the principal underwriter; in omitting to state that Ruth J. Rains was intended to act as the principal underwriter; and in omitting to state that Ruth J. Rains was not registered with the Commission as a broker-dealer.

2. The offering circular is false and misleading in stating, "The Underwriter agrees to use its best efforts to sell such stock directly and through securities dealers registered in Nevada and such other States wherein this offering has been registered and cleared for sale," and in omitting to state that the State of Nevada does not register securities dealers or securities being offered for sale in such State.

3. The offering circular is false and misleading in omitting to state that Weber Investment Company, named as underwriter therein, ceased its underwriting business in July 1955, and withdrew its registration with the Commission as a broker-dealer, effective November 23, 1955.

4. Issuer has failed to file a report on Form 2–A of sales of securities being offered, as required by Rule 224.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any persons having any interest in the matter may file with the Secretary of the Commission a written request for hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

By the Commission.

## DEPARTMENT OF JUSTICE

### Office of Alien Property

[Vesting Order SA–68]

"COSMOS", S. I. N. C., EMIL HERKLE & CO.

In re: Debt owing to "Cosmos", S. I. N. C., Emil Herkle & Company, F–57–1265.

Under the authority of Title II of the International Claims Settlement Act of 1949, as amended (69 Stat. 562), Executive Order 10644, November 7, 1955 (20 F. R. 8363), Department of Justice Order No. 106–55, November 23, 1955 (20 F. R. 8993), and pursuant to law, after investigation, it is hereby found and determined:

1. That the property described as follows: That certain debt or other obligation of Axelson Manufacturing Company, P. O. Box 58335, Vernon Station, Los Angeles 58, California arising out of an account payable entitled, "Cosmos, S. I. N. C., Emil Herkle & Company, Bucharest, Rumania," maintained by the aforesaid company, together with any and all rights to demand, enforce and collect the same,

is property within the United States which was blocked in accordance with Executive Order 8389, as amended, and remained blocked on August 9, 1955, and which is, and as of September 15, 1947, was, owned directly or indirectly by "Cosmos", S. I. N. C., Emil Herkle & Company, Bucharest, Rumania, a national of Rumania as defined in said Executive Order 8389, as amended.

2. That the property described herein is not owned directly by a natural person.

There is hereby vested in the Attorney General of the United States the property described above, to be administered, sold, or otherwise liquidated, in accordance with the provisions of Title II of the International Claims Settlement Act of 1949, as amended.

It is hereby required that the property described above be paid, conveyed, transferred, assigned and delivered to or for the account of the Attorney General of the United States in accordance with directions and instructions issued by or for the Assistant Attorney General, Director, Office of Alien Property, Department of Justice.

The foregoing requirement and any supplement thereto shall be deemed instructions or directions issued under Title II of the International Claims Settlement Act of 1949, as amended. Attention is directed to section 205 of said Title II (69 Stat. 562) which provides that:

> Any payment, conveyance, transfer, assignment, or delivery of property made to the President or his designee pursuant to this title, or any rule, regulation, instruction, or direction issued under this title, shall to the extent thereof be a full acquittance and discharge for all purposes of the obligation of the person making the same; and no person shall be held liable in any court for or in respect of any such payment, conveyance, transfer, assignment, or delivery made in good faith in pursuance of and in reliance on the provisions of this title, or of any rule, regulation, instruction, or direction issued thereunder.

Executed at Washington, D. C., on June 25, 1956.

For the Attorney General.

[SEAL] DALLAS S. TOWNSEND,
*Assistant Attorney General,*
*Director, Office of Alien Property.*

## TITLE 5—ADMINISTRATIVE PERSONNEL

### Chapter I—Civil Service Commission

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

GENERAL SERVICES ADMINISTRATION

Effective upon publication in the FEDERAL REGISTER, paragraph (a) (9) is added to § 6.333 as set out below.

§ 6.333 *General Services Administration*—(a) *Office of the Administrator.*

* * *

(9) The Assistant Administrator for Program Planning and Coordination.

(R. S. 1753, sec. 2, 22 Stat. 403; 5 U. S. C. 631, 633)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
*Executive Assistant.*

[F. R. Doc. 56-5298; Filed, June 29, 1956; 11:39 a. m.]

PART 32—INCENTIVE AWARDS

INTERDEPARTMENTAL AWARDS

Sections 32.402 and 32.403 of Subpart D are amended as set out below.

§ 32.402 *Referrals to other departments.* (a) The head of each department shall establish procedures to insure that an employee contribution originating within his department which may have application in other departments will be made available to those other departments. However, the case will first be given consideration for application throughout the originatfng department.

(b) If the responsibility for decision on an employee contribution clearly rests with only one department, it should be referred by the headquarters of the originating department directly to the other department. A copy of the reply to the originating department that a contribution has been adopted or rejected will be forwarded to the Commission.

(c) If the responsibility for decision on a contribution does not clearly rest with only one department, it should be forwarded to the Commission for appropriate referral. Specific information as to the activities in other departments where it is believed the employee contribution can be used shall accompany the incentive awards file.

§ 32.403 *Awards by benefiting departments other than the employing department.* (a) When the head of a department approves an employee contribution which originated in another department he shall report the fact to the office which referred the contribution (the Commission or the originating department) at the earliest practicable date, and in no event later than six months after it has been referred, except upon prior approval of the Commission. The report of the head of the adopting department shall state the estimated first year net savings, if any, and the intangible benefits, if any, and the award that will be granted under applicable Commission and department regulations. However, when one or more other departments will benefit significantly from the employee contribution so that they should provide a portion of the award, the case will be referred to the Civil Service Commission after adoption with recommendations for additional award consideration.

(b) In cases referred direct from one department to another, the adopting department will make arrangements with the originating department for transfer of funds necessary for any cash award.

(c) In other cases the Commission, on the basis of departmental reports, will determine the total interdepartmental first year net monetary savings and total awards for intangible benefits resulting from the employee contribution, and recommend to each benefiting department (other than the employing department) its proportionate share of the award.

(d) Within 30 days after date of receipt of the Commission's recommendation, the head of each benefiting department shall notify the Commission, in writing, as to the action the department will take on the Commission's recommendation.

(Sec. 302, 68 Stat. 1112; 5 U. S. C. 2121)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
*Executive Assistant.*

## Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

### PART 28—COTTON STANDARDS

### SUBPART A—REGULATIONS

#### REVISED REGULATIONS FOR COTTON LINTERS

On May 24, 1956, a notice of proposed rule making was published in the FEDERAL REGISTER (21 F. R. 3458) regarding proposed revised regulations for licensed classifiers and for the classification of United States Cotton Linters (7 CFR Part 28) pursuant to authority contained in section 6 of the United States Cotton Standards Act, as amended (42 Stat. 1517; 7 U. S. C. 54).

After consideration of all relevant matters presented pursuant to the notice, said regulations are hereby amended as follows, effective July 1, 1957:

1. Section 28.83 is amended to read:

§ 28.83 *Copies of class certificates; retention period; other requirements.* Each licensed classifier shall keep for a period of 1 year in a place accessible to interested persons a copy of each certificate issued by him as a licensed classifier under this subpart. The Administrator may require that a copy of each such certificate be forwarded to a supervising office of the Agricultural Marketing Service immediately after issuance of the certificate.

2. Section 28.85 is amended to read:

§ 28.85 *Supervisory samples and reports.* The Administrator may require each licensed classifier to submit supervisory samples to a supervising office of the Agricultural Marketing Service in accordance with instructions furnished to licensed classifiers from time to time. The Administrator may also require each licensed classifier to make reports on forms furnished by the Agricultural Marketing Service, or otherwise, bearing upon his activities as such licensed classifier.

3. Section 28.92 (h) is amended to read:

(h) A statement in accordance with the facts in each case, either (1) that the classifier has drawn the samples upon which his classification is based, or (2) that the samples were submitted to the classifier by another person, in which case the name and address of such person shall be stated.

4. Section 28.96 is amended to read:

§ 28.96 *Inconsistent classifications.* In the event any licensed classifier or any employee of the Department of Agriculture shall find that any cotton has been inconsistently classified by two or more licensed classifiers, he shall thereupon bring the matter to the attention of the supervising office of the Agricultural Marketing Service, which shall review all the facts obtainable and, if possible, determine the classification of the cotton. The supervising office may examine or requisition such samples of the cotton in question as may be in the hands of such licensed classifiers, or, in the discretion of the supervising officer may request that new samples be drawn, if obtainable. In the event samples are not obtainable, the supervising officer may, if in his judgment sufficient facts are available, decide which of the inconsistent classifications shall be sustained. The records of the licensed cotton classifiers concerned shall be corrected to show the findings of the supervising office.

5. Sections 28.147, 28.148, and 28.149 are re-numbered §§ 28.160, 28.161, and 28.162 respectively.

6. The center heading immediately preceding § 28.136 and §§ 28.136 through 28.146 are deleted and the following substituted therefor:

#### UNITED STATES COTTON LINTERS

§ 28.136 *Applicability of other sections of regulations.* Insofar as applicable, and not inconsistent with §§ 28.136 to 28.152, the provisions of the foregoing subpart relating to cotton shall likewise apply to cotton linters.

§ 28.137 *Boards of cotton linters examiners.* There shall be located at Washington, D. C., and, when necessary in the opinion of the Administrator, at any other point that he shall designate for the purpose, a board of cotton linters examiners. The members of all such boards and the chairman of each shall be designated by the Administrator.

§ 28.138 *Classification and comparison; requests; memorandums and certificates.* For each lot or mark of linters which the applicant desires classified or compared separately he shall make a separate written request specifying which of the following forms of service is desired. Only one request within a 30-day period shall be made by the same owner for the classification or comparison of the same linters, except a request for a review determination. If the applicant desires that the samples be returned to him, at his expense, he must indicate this in the request for classification or comparison. If the return of samples is not requested they shall become the property of the Government and shall be disposed of in accordance with law and applicable regulations.

(a) *Form A determination.* The classification or comparison of samples of linters that have been freshly drawn by a licensed classifier and submitted direct to a Board of Cotton Linters Examiners without classification or further handling by such classifier. Such classification shall be evidenced by a Form A memorandum which shall be subject to review as provided in § 28.146. Composite samples composed of portions of linters drawn from more than one bale are not eligible for Form A determinations.

(b) *Form C determination.* The classification of bales of linters sampled under the supervision of an employee of the Department of Agriculture. The classification in such cases shall be evidenced by a Form C certificate which shall be subject to review as provided in § 28.146. Such certificate when it has been reviewed in accordance with § 28.146 shall be deemed to be a final certificate as to the classification shown, within the meaning of section 4 of the act (42 Stat. 1517; 7 U. S. C. 54).

(c) *Form D determination.* The classification or comparison of samples submitted for other than Form A or Form C determinations. Such classification or comparison shall be evidenced by a Form D memorandum which shall not be subject to review.

§ 28.139 *Filing of requests.* All requests for classification or comparison leading to Form A memoranda, Form D memoranda, or Form C certificates shall

be filed with the secretary of the Board of Cotton Linters Examiners at Washington, D. C., unless otherwise directed by the Administrator.

§ 28.140 *Samples; weight; drawing.* Each sample submitted to a Board of Cotton Linters Examiners shall weigh not less than 8 ounces; shall be wrapped separately; shall contain a coupon or tag showing the bale number or identity of bale from which drawn; and shall be drawn in the following manner:

(a) *Condenser system linters.* Separate portions shall be drawn from three different places in either head of the bale so as to provide as representative sample as possible, each portion to be approximately 6 by 8 inches in size. All portions of the bale sample shall be placed in a single paper sack or wrapper together with an identifying tag stub or other identification. The portions together shall constitute the sample representing one bale.

(b) *Flue and beater system linters.* A sample of not less than 8 ounces, consisting of equal portions drawn from two sides of a bale, or from two shoulders of a bale, shall be drawn.

§ 28.141 *Inspection of bales for special conditions.* A licensed classifier drawing samples for submission to a Board of Cotton Linters Examiners for Form A classification or comparison shall inspect each bale and shall specify on his sampler's certificate accompanying the samples any conditions not fully indicated by the samples.

§ 28.142 *Submission of samples.* All samples submitted to a Board of Cotton Linters Examiners for classification or comparison under this subpart shall be delivered or sent to the secretary of the board with all transportation charges incident thereto prepaid. All samples submitted by a licensed linters classifier for Form A classification must have been freshly drawn by such classifier, must be submitted direct to the board without classification or further handling, and must be accompanied by a sampler's certificate. Such certificate shall be on a form furnished by the Agricultural Marketing Service for this purpose.

§ 28.143 *Method of classification.* The classification of all cotton linters samples shall be in accordance with the official cotton linters standards of the United States and §§ 28.143 to 28.145. The grade, staple, and character of each sample shall be determined and designated separately, together with any special conditions of the sample or bale. The official staple guides (§ 28.152) shall be used in the practical determination of the staple classification of cotton linters.

§ 28.144 *Samples falling between grades or staples.* In classification, a sample which is determined to be between two adjacent grades or between two adjacent staples shall be assigned the lower of the two grades or two staples.

§ 28.145 *Terms defined; linters classification.* For the purposes of classification of any cotton linters or comparison with a type or other samples, the following terms shall be construed, respectively, to mean:

(a) *Grade.* The term grade means the color and trash in cotton linters.

(b) *Staple.* The staple normal for each grade as illustrated in grades 1 through 7 (§§ 28.201 to 28.207) and represented in official staple guides numbered 1 through 7 respectively shall be designated as staples 1, 2, 3, 4, 5, 6, and 7, respectively.

(c) *Character.* The term character means the relative harshness of linters. In linters classification, character shall be described as follows: Soft (symbol S); Average (symbol A); Harsh (symbol H); or Extra Harsh (symbol EH).

(d) *Prime linters.* Prime linters are cotton linters which are equivalent in grade to the official grade standards and do not show evidence of excess trash, physical deterioration, the presence of objectionable odors, or other characteristics which prohibit its description in terms of the official grade standards.

(e) *Off grade linters.* Cotton linters which show evidence of physical deterioration, the presence of objectionable odors, or other characteristics which prohibit its description in terms of the official grade standards shall be designated as "Off Grade," and no specific grade assigned.

(f) *Excess trash.* Cotton linters that contain more trash than is represented in the grades described in §§ 28.201 to 28.208 shall be assigned that grade to which it is equal in color and further described by the term "Excess Trash." Such linters shall not be considered as prime linters.

(g) *Compound grades.* Cotton linters which in grade show a variation equal to that shown in any 2 or 3 adjacent grades of those described in §§ 28.201 to 28.208 shall be designated by the compound name of such grades.

(h) *Compound staples.* Cotton linters which in staple show a variation equal to that shown in any 2 or 3 adjacent staples of those listed in § 28.209 shall be designated by the compound name of such staples.

(i) *Mixed packed grades.* Cotton linters which in grade show a variation greater than that shown in any 3 adjacent grades of those described in §§ 28.201 to 28.208 shall be designated as "Mixed Packed" for grade on classification certificates and memoranda and the grades constituting the mixture shown.

(j) *Mixed-packed staples.* Cotton linters which in staple show a variation greater than that shown in any 3 adjacent staples of those listed in § 28.209 shall be designated as "Mixed Packed" for staple on classification certificates and memoranda and the staples constituting the mixture shown.

(k) *Weak staple.* Cotton linters in which the strength of staple is below that normally found in linters of otherwise comparable staple shall be designated by the term "Weak" and no specific staple assigned.

(l) *Below 7 staple.* Cotton linters which in staple is below that illustrated in Grade 7 (§ 28.207) shall be designated as "Below 7" staple.

(m) *False packed linters.* Linters in a bale (1) containing substances entirely foreign to linters; (2) containing damaged linters in the interior with or without any indication of such damage upon the exterior; (3) composed of good linters upon the exterior and decidedly inferior linters in the interior, in such manner as not to be detected by customary examination; or (4) containing motes, sweepings, or hull fiber worked into the bale.

(n) *Repacked linters.* Linters that are composed of factors', brokers', or other samples, or of loose or miscellaneous lots collected and rebaled, or linters in a bale which is composed of linters from two or more smaller bales or parts of bales.

(o) *Water-packed linters.* Linters in a bale that has been penetrated by water during the baling process, causing damage to the fiber, or a bale that through exposure to the weather or by other means, while apparently dry on the exterior, has been damaged by water in the interior.

§ 28.146 *Reviews.* A review of any Form A or Form C determination may be requested by the owner of the linters from which the sample was drawn, or his agent, within 30 days after the issuance of the original memorandum or certificate. Such request shall be filed with the secretary of the Board of Cotton Linters Examiners at Washington, D. C., and shall be accompanied by the original classification memorandum or certificate if it is in the possession of the applicant. The application shall state the reason for failure to submit such document. Form D determinations are not subject to review.

(a) *Form A and Form C Reviews.* Redrawn samples will be required except in cases where the original samples have remained in the custody of the Board of Cotton Linters Examiners. When redrawn samples are necessary, they shall be drawn and submitted in accordance with the applicable provisions of §§ 28.138, 28.140, 28.141, and 28.142. A Form A memorandum or Form C certificate, as applicable, appropriately marked to indicate that it represents a review determination shall be issued to the applicant requesting the review. The review classification memorandum shall supersede the original classification memorandum.

(b) *Review of licensed classifier's certificate.* In case a review is desired of the classification of any linters represented in a valid certificate issued by a licensed linters classifier, the holder of such certificate shall surrender the same, together with samples of the linters involved, to the Board of Cotton Linters Examiners and receive in its stead a Form D memorandum signed by the chairman of such board. Such Form D memorandum shall be appropriately marked to show it represents a review of a licensed classifier's certificate. The Form D memorandum issued in lieu of the licensed classifier's certificate shall not be subject to further review. The provisions of this paragraph do not prohibit the drawing of new samples and filing of a request with the Board of Cotton Linters Examiners leading to a Form A or Form D memorandum or a Form C certificate.

§ 28.147 *Licensed classifiers.* Subject to the applicable terms and conditions of §§ 28.76 to 28.96, any person may, upon presentation of evidence of competency, be licensed to grade or classify linters, and to certificate the grade or class thereof in accordance with the official cotton linters standards of the United States.

(a) *Class certificates; form; mailing to board.* Each class certificate issued by a licensed linters classifier under this subpart shall be on a form furnished by the Department of Agriculture. A copy of each certificate shall be mailed to the Board of Cotton Linters Examiners at Washington, D. C., within 3 days after issuance.

(b) *Supervisory samples.* Some samples from each lot or mark of samples on which a licensed linters classifier issues a certificate under this subpart shall be sent to the Board of Cotton Linters Examiners for supervisory purposes. Such supervisory samples shall be submitted to the board in accordance with instructions furnished licensees by the Department of Agriculture from time to time.

§ 28.148 *Fees and costs; classification; reviews; other.* The fee for the classification, comparison, or review of linters with respect to grade, staple, and character, or any of these qualities, shall be at the rate of 20 cents for each bale or sample involved. The provisions of §§ 28.118 to 28.135 relating to other fees and costs shall, so far as applicable, apply to services performed with respect to linters.

§ 28.149 *Fees and costs; supervision of sampling.* For the supervision of sampling of bales of linters leading to a Form C certificate pursuant to § 28.138 (b), the person making the request for classification shall pay, in addition to the classification fee prescribed in § 28.148, the necessary traveling expenses and subsistence, or per diem in lieu of subsistence, incurred on account of such request, in accordance with the fiscal regulations of the Department of Agriculture, by the Department employee supervising the sampling.

§ 28.150 *Fee; licenses; renewals.* The fee for the examination of an applicant for a license to classify linters shall be $10. No additional charge shall be made for the issuance of a license to an applicant found to be properly qualified. The fee for each renewal of such license shall be $5.

§ 28.151 *Cost of practical forms; period effective.* Practical forms of the official cotton linters standards of the United States will be furnished to any person subject to the applicable terms and conditions specified in § 28.115, and upon prepayment of the costs thereof: *Provided,* That no practical form of any of the official cotton linters standards of the United States shall be considered as representing any of said standards after the date of its cancellation in accordance with this subpart, or, in any event, after the expiration of 12 months following the date of its certification. The costs of the official standards shall be at the rate of $5 each, f. o. b., Washington, D. C., for shipments within the continental United States, and $6.50 each, delivered to destination, for shipments outside the continental United States.

§ 28.152 *Official staple guides.* An actual sample of linters illustrating the staples as embraced in each of the grades 1 through 7 (§§ 28.201 to 28.207) shall be made available, to the extent that facilities permit, to purchasers of practical forms of the official standards, at the rate of $1 each, f. o. b., Washington, D. C., for shipments within the continental United States, and $1.50 each, delivered to destination, for shipments outside the continental United States.

The revised regulations will implement the revised official linters standards which become effective July 1, 1956. The Department announced in the notice of proposed rule making (21 F. R. 3458) the intention of making the revised regulations effective July 1, 1956. The provisions of the revised regulations were discussed at a meeting with the linters industry in Washington on June 4 and 5 and later at public meetings held at central points throughout the United States. The regulations will impose no hardship on affected persons and in order to be of maximum benefit should be made effective on July 1, 1956. For these reasons good cause exists for making the revised regulations effective on July 1, 1956.

(Sec. 10, 42 Stat. 1519; 7 U. S. C. 61. Interpret or apply sec. 4, 42 Stat. 1517; 7 U. S. C. 54)

Done at Washington, D. C., this 27th day of June 1956.

[SEAL] ROY W. LENNARTSON,
*Deputy Administrator,*
*Agricultural Marketing Service.*

## PART 28—COTTON STANDARDS

### SUBPART B—STANDARDS

### REVISION OF OFFICIAL STAPLE STANDARDS FOR UNITED STATES COTTON LINTERS

On June 19, 1956, a notice of proposed rule making was published in the FEDERAL REGISTER (21 F. R. 4293) concerning a proposed revision of the official staple standards for United States cotton linters (7 CFR 28.209, as amended), pursuant to authority contained in the United States Cotton Standards Act, as amended (42 Stat. 1517; 7 U. S. C. 51 et seq.)

After consideration of all relevant matters presented pursuant to said notice, the regulations governing cotton linters standards (7 CFR Part 28) are hereby amended, effective July 1, 1957, as follows:

1. Change the undesignated center head immediately preceding § 28.201 (as amended 20 F. R. 4615) to read "Official Cotton Linters Standards Of The United States For Grade."

2. Delete § 28.209 (as amended 20 F. R. 4617) and substitute the following:

#### OFFICIAL COTTON LINTERS STANDARDS OF UNITED STATES FOR STAPLE

§ 28.215 *Staple 1.* Staple 1 shall be United States cotton linters which in staple is within the range represented by a quantity of cotton linters in the custody of the United States Department of Agriculture marked "Original Official Cotton Linters Standard of the United States, Staple 1, effective July 1, 1957."

§ 28.216 *Staple 2.* Staple 2 shall be United States cotton linters which in staple is within the range represented by a quantity of cotton linters in the custody of the United States Department of Agriculture marked "Original Official Cotton Linters Standard of the United States, Staple 2, effective July 1, 1957."

§ 28.217 *Staple 3.* Staple 3 shall be United States cotton linters which in staple is within the range represented by a quantity of cotton linters in the custody of the United States Department of Agriculture marked "Original Official Cotton Linters Standard of the United States, Staple 3, effective July 1, 1957."

§ 28.218 *Staple 4.* Staple 4 shall be United States cotton linters which in staple is within the range represented by a quantity of cotton linters in the custody of the United States Department of Agriculture marked "Original Official Cotton Linters Standard of the United States, Staple 4, effective July 1, 1957."

§ 28.219 *Staple 5.* Staple 5 shall be United States cotton linters which in staple is within the range represented by a quantity of cotton linters in the custody of the United States Department of Agriculture marked "Original Official Cotton Linters Standard of the United States, Staple 5, effective July 1, 1957."

§ 28.220 *Staple 6.* Staple 6 shall be United States cotton linters which in staple is within the range represented by a quantity of cotton linters in the custody of the United States Department of Agriculture marked "Original Official Cotton Linters Standard of the United States, Staple 6, effective July 1, 1957."

§ 28.221 *Staple 7.* Staple 7 shall be United States cotton linters which in staple is within the range represented by a quantity of cotton linters in the custody of the United States Department of Agriculture marked "Original Official Cotton Linters Standard of the United States, Staple 7, effective July 1, 1957."

4. Add new § 28.222 to read as follows:

§ 28.222 *Below 7 Staple.* Cotton linters which in staple is below staple 7 will be designated as "Below 7" staple.

(Sec. 10, 42 Stat. 1519; 7 U. S. C. 61. Interpret or apply sec. 6, 42 Stat. 1518; 7 U. S. C. 56)

Done at Washington, D. C. this 27th day of June 1956.

[SEAL] ROY W. LENNARTSON,
*Deputy Administrator,*
*Agricultural Marketing Service.*

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION AND STANDARDS)

SUBPART—UNITED STATES STANDARDS FOR SHELLED RUNNER TYPE PEANUTS [1]

On April 18, 1956, a notice of proposed rule making was published in the FEDERAL REGISTER (21 F. R. 2529) regarding a proposed revision of United States Standards for Shelled Runner Type Peanuts.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the following United States Standards for Shelled Runner Type Peanuts are hereby promulgated pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., as amended; 7 U. S. C. 1621 et seq.).

DEFINITIONS

51.2714 Similar varietal characteristics.
51.2715 Whole.
51.2716 Split.
51.2717 Broken.
51.2718 Foreign material.
51.2719 Unshelled.
51.2720 Minor defects.
51.2721 Damage.

AUTHORITY: §§ 51.2710 to 51.2721 issued under sec. 205, 60 Stat. 1090, as amended; 7 U. S. C. 1624.

GRADES

§ 51.2710 *U. S. No. 1 Runner.* "U. S. No. 1 Runner" consists of shelled Runner type peanut kernels of similar varietal characteristics which are whole and free from foreign material, damage and minor defects, and which will not pass through a screen having 15/64 x 3/4 inch openings.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 1 percent for other varieties of peanuts;

(2) 2 percent for sound peanuts which are split or broken;

(3) 1.5 percent for damaged or unshelled peanuts;

(4) 0.5 percent for minor defects: *Provided,* That in addition, any unused part of the tolerance for damaged or unshelled peanuts shall be allowed for minor defects;

(5) 0.1 percent for foreign material; and,

(6) 2 percent for sound whole peanuts which will pass through the prescribed screen.

§ 51.2711 *U. S. Runner Splits.* "U. S. Runner Splits" consists of shelled Runner type peanut kernels of similar varietal characteristics which are split or broken, but which are free from foreign material, damage and minor defects, and which will not pass through a screen having 17/64 inch round openings.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 2 percent for other varieties of peanuts;

(2) 2 percent for damaged or unshelled peanuts and minor defects;

(3) 0.2 percent for foreign material;

(4) 2 percent for sound portions of peanuts which will pass through the prescribed screen; and,

(5) 4 percent for sound whole peanuts.

§ 51.2712 *U. S. No. 2 Runner.* "U. S. No. 2 Runner" consists of shelled Runner type peanut kernels of similar varietal characteristics which may be split or broken, but which are free from foreign material, damage and minor defects, and which will not pass through a screen having 17/64 inch round openings.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 2 percent for other varieties of peanuts;

(2) 2.5 percent for damaged or unshelled peanuts and minor defects;

(3) 0.2 percent for foreign material; and,

(4) 6 percent for sound peanuts and portions of peanuts which will pass through the prescribed screen.

APPLICATION OF TOLERANCES

§ 51.2713 *Application of tolerances.* The tolerances provided in these standards are on a lot basis and shall be applied to a composite sample representative of the lot. However, any container or group of containers in which the peanuts are obviously of a quality materially different from that in the majority of containers shall be considered a separate lot, and shall be sampled separately.

DEFINITIONS

§ 51.2714 *Similar varietal characteristics.* "Similar varietal characteristics" means that the peanut kernels in the lot are not of distinctly different varieties. For example, Spanish type shall not be mixed with Runners.

§ 51.2715 *Whole.* "Whole" means that the peanut kernel is not split or broken.

§ 51.2716 *Split.* "Split" means the separated half of a peanut kernel.

§ 51.2717 *Broken.* "Broken" means that more than one-fourth of the peanut kernel is broken off.

§ 51.2718 *Foreign material.* "Foreign material" means pieces or loose particles of any substance other than peanut kernels or skins.

§ 51.2719 *Unshelled.* "Unshelled" means a peanut kernel with part or all of the hull (shell) attached.

§ 51.2720 *Minor defects.* "Minor defects" means that the peanut kernel is not damaged but is affected by one or more of the following:

(a) Skin discoloration which is dark brown, dark gray, dark blue or black and covers more than one-fourth of the surface;

(b) Flesh discoloration which is darker than a light yellow color or consists of more than as light yellow pitting of the flesh;

(c) Sprout extending more than one-eighth of an inch from the tip of the kernel; and,

(d) Dirt when the surface of the kernel is distinctly dirty, and its appearance is materially affected.

§ 51.2721 *Damage.* "Damage" means that the peanut kernel is affected by one or more of the following:

(a) Rancidity or decay;

(b) Mold;

(c) Insects, worm cuts, web or frass;

(d) Freezing injury causing hard, translucent or discolored flesh; and

(e) Dirt when the surface of the kernel is heavily smeared, thickly flecked or coated with dirt, seriously affecting its appearance.

The United States Standards for Shelled Runner Type Peanuts contained in this subpart shall become effective 30 days after publication hereof in the FEDERAL REGISTER, and will thereupon supersede the United States Standards for Shelled Runner Peanuts which have been in effect since September 3, 1946.

Dated: June 27, 1956.

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION AND STANDARDS)

SUBPART—UNITED STATES STANDARDS FOR SHELLED SPANISH TYPE PEANUTS [1]

On April 18, 1956, a notice of proposed rule making was published in the FEDERAL REGISTER (21 F. R. 2530) regarding a proposed revision of United States Standards for Shelled Spanish Type Peanuts.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the following United States Standards for Shelled Spanish Type Peanuts are hereby promulgated pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., as amended; 7 U. S. C. 1621 et seq.).

GRADES

Sec.
51.2730 U. S. No. 1 Spanish.
51.2731 U. S. Spanish Splits.
51.2732 U. S. No. 2 Spanish.

APPLICATION OF TOLERANCES

51.2733 Application of tolerances.

DEFINITIONS

51.2734 Similar varietal characteristics.
51.2735 Whole.
51.2736 Split.
51.2737 Broken.
51.2738 Foreign material.
51.2739 Unshelled.
51.2740 Minor defects.
51.2741 Damage.

AUTHORITY: §§ 51.2730 to 51.2741 issued under sec. 205, 60 Stat. 1090, as amended; 7 U. S. C. 1624.

GRADES

§ 51.2730 *U. S. No. 1 Spanish.* "U. S. No. 1 Spanish" consists of shelled Spanish type peanut kernels of similar varietal characteristics which are whole and free from foreign material, damage and minor defects, and which will not pass through a screen having 15/64 x 3/4 inch openings.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 1 percent for other varieties of peanuts;

(2) 2 percent for sound peanuts which are split or broken;

(3) 0.75 percent for damaged or unshelled peanuts;

(4) 0.5 percent for minor defects: *Provided,* That in addition, any unused part of the tolerance for damaged or unshelled peanuts shall be allowed for minor defects;

(5) 0.1 percent for foreign material; and,

(6) 2 percent for sound whole peanuts which will pass through the prescribed screen.

§ 51.2731 *U. S. Spanish Splits.* "U. S. Spanish Splits" consists of shelled Spanish type peanut kernels of similar varietal characteristics which are split or broken, but which are free from foreign material, damage and minor defects, and which will not pass through a screen having 17/64 inch round openings.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 2 percent for other varieties of peanuts;

(2) 2 percent for damaged or unshelled peanuts and minor defects;

(3) 0.2 percent for foreign material;

(4) 2 percent for sound portions of peanuts which will pass through the prescribed screen; and,

(5) 4 percent for sound whole kernels.

§ 51.2732 *U. S. No. 2 Spanish.* "U. S. No. 2 Spanish" consists of shelled Spanish type peanut kernels of similar varietal characteristics which may be split or broken, but which are free from foreign material, damage and minor defects, and which will not pass through a screen having 17/64 inch round openings.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 2 percent for other varieties of peanuts;

(2) 2.5 percent for damaged or unshelled peanuts and minor defects;

(3) 0.2 percent for foreign material; and,

(4) 6 percent for sound peanuts and portions of peanuts which will pass through the prescribed screen.

APPLICATION OF TOLERANCES

§ 51.2733 *Application of tolerances.* The tolerances provided in these standards are on a lot basis and shall be applied to a composite sample representative of the lot. However, any container or group of containers in which the peanuts are obviously of a quality materially different from that in the majority of containers shall be considered a separate lot, and shall be sampled separately.

DEFINITIONS

§ 51.2734 *Similar varietal characteristics.* "Similar varietal characteristics" means that the peanut kernels in the lot are not of distinctly different varieties. For example, Runner type shall not be mixed with Spanish, and White Spanish shall not be mixed with Red Spanish.

§ 51.2735 *Whole.* "Whole" means that the peanut kernel is not split or broken.

§ 51.2736 *Split.* "Split" means the separated half of a peanut kernel.

§ 51.2737 *Broken.* "Broken" means that more than one-fourth of the peanut kernel is broken off.

§ 51.2738 *Foreign material.* "Foreign material" means pieces or loose particles of any substance other than peanut kernels or skins.

§ 51.2739 *Unshelled.* "Unshelled" means a peanut kernel with part or all of the hull (shell) attached.

§ 51.2740 *Minor defects.* "Minor defects" means that the peanut kernel is not damaged but is affected by one or more of the following:

(a) Skin discoloration which is dark brown, dark gray, dark blue or black and covers more than one-fourth of the surface;

(b) Flesh discoloration which is darker than a light yellow color or consists of more than a slight yellow pitting of the flesh;

(c) Sprout extending more than one-eighth of an inch from the tip of the kernel; and,

(d) Dirt when the surface of the kernel is distinctly dirty, and its appearance is materially affected.

§ 51.2741 *Damage.* "Damage" means that the peanut kernel is affected by one or more of the following:

(a) Rancidity or decay;

(b) Mold;

(c) Insects, worm cuts, web or frass;

(d) Freezing injury causing hard, translucent or discolored flesh; and,

(e) Dirt when the surface of the kernel is heavily smeared, thickly flecked or coated with dirt, seriously affecting its appearance.

The United States Standards for Shelled Spanish Type Peanuts contained in this subpart shall become effective 30 days after publication hereof in the FEDERAL REGISTER, and will thereupon supersede the United States Standards for Shelled White Spanish Peanuts which have been in effect since September 1, 1939.

Dated: June 27, 1956.

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION AND STANDARDS)

SUBPART—UNITED STATES STANDARDS FOR SHELLED VIRGINIA TYPE PEANUTS [1]

On April 18, 1956, a notice of proposed rule making was published in the FEDERAL REGISTER (21 F. R. 2531) regarding a proposed revision of United States Standards for Shelled Virginia Type Peanuts.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the following United States Standards for Shelled Virginia Type Peanuts are hereby promulgated pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., as amended; 7 U. S. C. 1621 et seq.).

GRADES

Sec.
51.2750 U. S. Extra Large Virginia.
51.2751 U. S. Medium Virginia.
51.2752 U. S. No. 1 Virginia.
51.2753 U. S. Virginia Splits.
51.2754 U. S. No. 2 Virginia.

APPLICATION OF TOLERANCES

51.2755 Application of tolerances.

DEFINITIONS

51.2756 Similar varietal characteristics.
51.2757 Whole.
51.2758 Split.
51.2759 Broken.
51.2760 Foreign material.
51.2761 Unshelled.
51.2762 Minor defects.
51.2763 Damage.

AUTHORITY: §§ 51.2750 to 51.2763 issued under sec. 205, 60 Stat. 1090, as amended; 7 U. S. C. 1624.

GRADES

§ 51.2750 *U. S. Extra Large Virginia.* "U. S. Extra Large Virginia" consists of shelled Virginia type peanut kernels of similar varietal characteristics which are whole and free from foreign material, damage and minor defects, and which will not pass through a screen having 20/64 x 1 inch openings. Unless otherwise specified, the peanuts in any lot shall average not more than 512 per pound.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 0.75 percent for other varieties of peanuts;

(2) 2 percent for sound peanuts which are split or broken;

(3) 1 percent for damaged or unshelled peanuts;

(4) 0.75 percent for minor defects: *Provided,* That in addition, any unused part of the tolerance for damaged or unshelled peanuts shall be allowed for minor defects;

(5) 0.1 percent for foreign material; and,

(6) 2 percent for sound whole peanuts which will pass through the prescribed screen.

[1] Packing of the product in conformity with the requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 51.2751 *U. S. Medium Virginia.* "U. S. Medium Virginia" consists of shelled Virginia type peanut kernels of similar varietal characteristics which are whole and free from foreign material, damage and minor defects, and which will not pass through a screen having $^{18}/_{64}$ x 1 inch openings. Unless otherwise specified, the peanuts in any lot shall average not more than 640 per pound.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 1 percent for other varieties of peanuts;

(2) 2 percent for sound peanuts which are split or broken;

(3) 1.25 percent for damaged or unshelled peanuts;

(4) 0.75 percent for minor defects: *Provided*, That in addition, any unused part of the tolerance for damaged or unshelled peanuts shall be allowed for minor defects;

(5) 0.1 percent for foreign material; and,

(6) 2 percent for sound whole peanuts which will pass through the prescribed screen.

§ 51.2752 *U. S. No. 1 Virginia.* "U. S. No. 1 Virginia" consists of shelled Virginia type peanut kernels of similar varietal characteristics which are whole and free from foreign material, damage and minor defects, and which will not pass through a screen having $^{15}/_{64}$ x 1 inch openings. Unless otherwise specified, the peanuts in any lot shall average not more than 800 per pound.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 1 percent for other varieties of peanuts;

(2) 2 percent for sound peanuts which are split or broken;

(3) 1.25 percent for damaged or unshelled peanuts;

(4) 0.75 percent for minor defects: *Provided*, That in addition, any unused part of the tolerance for damaged or unshelled peanuts shall be allowed for minor defects;

(5) 0.1 percent for foreign material; and,

(6) 2 percent for sound whole peanuts which will pass through the prescribed screen.

§ 51.2753 *U. S. Virginia Splits.* "U. S. Virginia Splits" consists of shelled Virginia type peanut kernels of similar varietal characteristics which are free from foreign material, damage and minor defects, and which will not pass through a screen having $^{20}/_{64}$ inch round openings. Not less than 90 percent, by weight, shall be splits.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 2 percent for other varieties of peanuts;

(2) 2 percent for damaged or unshelled peanuts and minor defects;

(3) 0.2 percent for foreign material; and,

(4) 3 percent for sound peanuts and portions of peanuts which will pass through the prescribed screen.

§ 51.2754 *U. S. No. 2 Virginia.* "U. S. No. 2 Virginia" consists of shelled Virginia type peanut kernels of similar varietal characteristics which are free from foreign material, damage and minor defects, and which will not pass through a screen having $^{18}/_{64}$ inch round openings. Not less than 25 percent, by weight, shall be splits.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 2 percent for other varieties of peanuts;

(2) 2.5 percent for damaged or unshelled peanuts and minor defects;

(3) 0.2 percent for foreign material; and,

(4) 6 percent for sound peanuts and portions of peanuts which will pass through the prescribed screen.

APPLICATION OF TOLERANCES

§ 51.2755 *Application of tolerances.* The tolerances provided in these standards are on a lot basis and shall be applied to a composite sample representative of the lot. However, any container or group of containers in which the peanuts are obviously of a quality materially different from that in the majority of containers shall be considered a separate lot, and shall be sampled separately.

DEFINITIONS

§ 51.2756 *Similar varietal characteristics.* "Similar varietal characteristics" means that the peanut kernels in the lot are not of distinctly different varieties. For example, Spanish type shall not be mixed with Virginia.

§ 51.2757 *Whole.* "Whole" means that the peanut kernel is not split or broken.

§ 51.2758 *Split.* "Split" means the separated half of a peanut kernel.

§ 51.2759 *Broken.* "Broken" means that more than one-fourth of the peanut kernel is broken off.

§ 51.2760 *Foreign material.* "Foreign material" means pieces or loose particles of any substance other than peanut kernels or skins.

§ 51.2761 *Unshelled.* "Unshelled" means a peanut kernel with part or all of the hull (shell) attached.

§ 51.2762 *Minor defect.* "Minor defects" means that the peanut kernel is not damaged but is affected by one or more of the following:

(a) Skin discoloration which is dark brown, dark gray, dark blue or black and covers more than one-fourth of the surface;

(b) Flesh discoloration which is darker then a light yellow color or consists of more than a slight yellow pitting of the flesh;

(c) Sprout extending more than one-eighth of an inch from the tip of the kernel; and,

(d) Dirt when the surface of the kernel is distinctly dirty, and its appearance is materially affected.

§ 51.2763 *Damage.* "Damage" means that the peanut kernel is affected by one or more of the following:

(a) Rancidity or decay;

(b) Mold;

(c) Insects, worm cuts, web or frass;

(d) Freezing injury causing hard, translucent or discolored flesh; and,

(e) Dirt when the surface of the kernel is heavily smeared, thickly flecked or coated with dirt, seriously affecting its appearance.

The United States Standards for Shelled Virginia Type Peanuts contained in this subpart shall become effective 30 days after publication hereof in the FEDERAL REGISTER, and will thereupon supersede the United States Standards for Shelled Virginia Type Peanuts which have been in effect since November 1, 1939.

Dated: June 27, 1956.

## Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Valencia Orange Reg. 75]

### PART 922—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 922.375 *Valencia Orange Regulation 75*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 22, as amended (7 CFR Part 922; 21 F. R. 4392), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Valencia Orange Administrative Committee held an open meeting on June 28, 1956, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of Valencia oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. S. t., July 1, 1956, and ending at 12:01 a. m., P. S. t., July 8, 1956, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 646,800 cartons;

(iii) District 3: Unlimited movement.

(2) All Valencia oranges handled during the period specified in this section are subject also to all applicable size restrictions which are in effect pursuant to this part during such period.

(3) As used in this section, "handled," "handler," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said marketing agreement and order, as amended.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 29, 1956.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[F. R. Doc. 56-5293; Filed, June 29, 1956; 11:50 a. m.]

### PART 927—MILK IN NEW YORK METROPOLITAN MARKETING AREA

ORDER AMENDING ORDER, AS AMENDED

§ 927.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing, was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area, as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary, in the public interest, to make this order amending the order, as amended, effective on July 1, 1956. An effective date other than as of the first day of a month is administratively impracticable. The provisions of the said order are well known to handlers, having been included in the decision published in the FEDERAL REGISTER on June 20, 1956 (21 F. R. 4317). The changes effected by this order amending the order, as amended, do not require substantial or extensive preparation by persons affected prior to its effective date. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order, as amended, effective July 1, 1956.

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended, which is marketed within the New York metropolitan milk marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who, during the determined representative period (April 1956), were engaged in the production of milk for sale in the said marketing area.

*It is therefore ordered,* That for the month of July 1956, the handling of milk in the New York metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as heretofore amended and as hereby further amended as follows:

1. Amend paragraph (a) of § 927.40 by adding a proviso as follows: "*Provided further,* That the Class I–A price for July 1956 shall be $5.22."

2. Amend paragraph (f) of § 927.40 as follows:

a. Amend the opening sentence to read as follows: "For Class III milk, the price shall be the sum of the amounts computed or determined pursuant to subparagraphs (1), (2), and (3) of this paragraph, minus 80 cents."

b. Add a new subparagraph (3) as follows:

(3) Determine the appropriate seasonal adjustment in accordance with the following table:

| Month to which the price is applicable: | Amount |
|---|---|
| July through November | $0.13 |
| December through February | .10 |
| March and April | .08 |
| May and June | .05 |

3. Amend § 927.43 as follows:

a. Change the words just prior to the first proviso from "four cents per pound of butterfat in such milk" to "four cents per pound of butterfat in such milk in the months of March through June and three cents per pound of butterfat in such milk in the months of July through February:".

b. Delete the first proviso.

c. Amend the second proviso to read: "*Provided,* That for milk received from producers during any of the months of March through July which is classified on the basis of one of the types of cheese named in this section, the amount so credited shall be increased one-cent per pound of butterfat for each full five-hundredths by which the ratio of 2.5 is lower than a ratio computed as follows: Add to the New York 92-score butter price for the month announced pursuant to § 927.46 (b) (5) the amount obtained by multiplying by 1.83 the weighted nonfat dry milk solids price for the period ending with the 25th day of the month as announced pursuant to § 927.46 (b) (7); divide this sum by the price of Cheddar cheese for the month as announced pursuant to § 927.46 (b) (8) and round the result to the nearest hundredth."

4. Amend § 927.44 prior to the first colon to read as follows:

§ 927.44 *Fluid skim differential.* For skim milk derived from Class II or Class III milk which skim milk enters the

marketing area in the form of milk, fluid skim milk, condensed skim milk, half and half, cream, or cultured milk drinks and there utilized or disposed of in the form of milk, fluid skim milk, half and half, or cultured milk drinks containing 3.0 percent or more but not more than 5.0 percent of butterfat, and for all other skim milk derived from Class II or Class III milk which is not established to have been otherwise utilized or disposed of, the handler shall pay a fluid skim differential per hundredweight computed as follows: • • •

(Sec. 5, 49 Stat. 753, as amended, 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 27th day of June 1956 to be effective July 1, 1956.

[SEAL] TRUE D. MORSE, *Acting Secretary.*

[F. R. Doc. 56-5234; Filed, June 29, 1956; 8:55 a. m.]

[Lemon Reg. 648]

## PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### LIMITATION OF SHIPMENTS

§ 953.755 *Lemon regulation 648*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 20 F. R. 8451; 21 F. R. 4393), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on June 27, 1956, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., July 1, 1956, and ending at 12:01 a. m., P. s. t., July 8, 1956, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 372,000 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 28, 1956.

[SEAL] S. R. SMITH, *Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

## PART 978—MILK IN NASHVILLE, TENN., MARKETING AREA

### ORDER AMENDING ORDER, AS AMENDED, REGULATING HANDLING OF MILK

Sec.
978.0 Findings and determinations.

DEFINITIONS

978.1 Act.
978.2 Secretary.
978.3 Department of Agriculture.
978.4 Person.
978.5 Nashville, Tennessee, marketing area.
978.6 Cooperative association.
978.7 Producer-handler.
978.8 Fluid milk plant.
978.9 Nonfluid milk plant.
978.10 Handler.
978.11 Producer.
978.12 Producer milk.
978.13 Fluid milk product.
978.14 Other source milk.
978.15 Base milk.
978.16 Excess milk.

MARKET ADMINISTRATOR

978.20 Designation.
978.21 Powers.
978.22 Duties.

REPORTS, RECORDS AND FACILITIES

978.30 Reports of receipts and utilization.
978.31 Other reports.
978.32 Records and facilities.
978.33 Retention of records.

CLASSIFICATION OF MILK

978.40 Skim milk and butterfat to be classified.
978.41 Classes of utilization.
978.42 Responsibility of handlers.
978.43 Transfers.
978.44 Computation of skim milk and butterfat in each class.
978.45 Allocation of skim milk and butterfat classified.

MINIMUM PRICES

978.50 Basic formula price.
978.51 Class prices.
978.52 Butterfat differentials to handlers.
978.53 Location differentials to handlers.

DETERMINATION OF BASE

978.60 Computation of daily average base for each producer.
978.61 Base rules.
978.62 Announcement of established bases.

DETERMINATION OF UNIFORM PRICES

978.70 Net obligation of handlers.
978.71 Computation of uniform prices for handlers.
978.72 Computation of the uniform price for base milk and for excess milk for handlers.
978.73 Notification of handlers.

PAYMENTS

978.80 Payments to market administrator.
978.81 Payments to producers.
978.82 Butterfat and location differentials to producers.
978.83 Statement to producers.
978.84 Reserve funds.
978.85 Expense of administration.
978.86 Marketing services.
978.87 Adjustment of accounts.
978.88 Termination of obligations.

APPLICATION OF PROVISIONS

978.90 Producer-handlers.
978.91 Plants subject to other Federal orders.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

978.100 Effective time.
978.101 Suspension or termination.
978.102 Continuing power and duty of the market administrator.
978.103 Liquidation after suspension or termination.

MISCELLANEOUS PROVISIONS

978.110 Separability of provisions.
978.111 Agents.

AUTHORITY: §§ 978.0 to 978.111 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and sup. 608c.

§ 978.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of

marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and certain proposed amendments to the order, as amended, regulating the handling of milk in the Nashville, Tennessee, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions of said order, as amended, and as hereby further amended, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which hearings have been held;

(b) *Additional findings.* It is hereby found and determined that good cause exists for making this order amending the order, as amended, effective July 1, 1956. Such action is necessary in the public interest in order to reflect current marketing conditions and to insure the production of an adequate supply of milk for the Nashville marketing area.

(1) The changes effected by this order amending the order, as amended, do not require of persons affected substantial or extensive changes prior to the effective date. The provisions of the said order are well known to handlers, the public hearing having been held on September 22–23, 1955, the recommended decision having been published in the FEDERAL REGISTER (21 F. R. 2188) on April 5, 1956 and the final decision having been issued by the Acting Secretary on June 22, 1956. Therefore, reasonable time, under the circumstances, has been afforded persons affected to prepare for its effective date and it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER.

(2) In view of the foregoing, it is hereby found that good cause exists for making this order amending the order, as amended, effective July 1, 1956 (section 4 (c), Administrative Procedure Act, 5 U. S. C. 1003 (c)).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order, amending the order, as amended) of more than 50 percent of the volume of milk covered by this order, amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

1. The refusal of failure of such handlers to sign said marketing agreement tend to prevent the effectuation of the declared policy of the act;

2. This issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

3. The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who, during the determined representative period (September 1955), were engaged in the production of milk for sale in the said marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof the handling of milk in the Nashville, Tennessee, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

### DEFINITIONS

§ 978.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 978.2 *Secretary.* "Secretary" means the Secretary of Agriculture or any officer or employee of the United States authorized to exercise the powers and to perform the duties of the Secretary of Agriculture.

§ 978.3 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture or any other Federal agency as may be authorized by act of Congress, or by Executive order, to perform the price reporting functions of the United States Department of Agriculture.

§ 978.4 *Person.* "Person" means any individual, partnership, corporation, association, or other business unit.

§ 978.5 *Nashville, Tennessee, marketing area.* "Nashville, Tennessee, marketing area", hereinafter called the "marketing area", means all the territory within the boundaries of Davidson County, Tennessee, including, but not limited to, the cities of Nashville and Belle Meade.

§ 978.6 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines to be qualified pursuant to the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act", and is authorized by its members to make collective sales or to market milk or its products for the producers thereof.

§ 978.7 *Producer-handler.* "Producer-handler" means any person who produces Grade A milk under a dairy farm inspection permit issued by any duly constituted health authority, and who processes milk from his own production, all or a portion of which is distributed within the marketing area as Class I milk, but who receives no milk from producers.

§ 978.8 *Fluid milk plant.* "Fluid milk plant" means all the premises, buildings and facilities of any milk receiving, processing or packaging plant from which plant:

(a) Any fluid milk product is disposed of during the month on routes (including routes operated by vendors, and sales through plant stores) to retail or wholesale outlets (except fluid milk plants) in the marketing area;

(b) Grade A milk or skim milk is shipped during the month for any of the months of January through August to a plant (except any portion thereof from which no fluid milk product may be disposed of under a Grade A label) specified under paragraph (a) of this section; or

(c) Grade A milk or skim milk equal to more than 70,000 pounds is shipped during the month for any of the months of September through December to plants (except any portions of such plants from which no fluid milk product may be disposed of under a Grade A label) specified under paragraph (a) of this section.

§ 978.9 *Nonfluid milk plant.* "Nonfluid milk plant" means any milk manufacturing, processing, or packaging plant other than a fluid milk plant described in § 978.8.

§ 978.10 *Handler.* "Handler" means (a) any person in his capacity as the operator of one or more fluid milk plants, or (b) any cooperative association of producers with respect to producer milk diverted by it from a fluid milk plant to a nonfluid milk plant for the account of such association.

§ 978.11 *Producer.* "Producer" means any person, except a producer-handler, who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority which milk is received at a fluid milk plant: *Provided,* That if such milk is diverted for his account, by a handler from a fluid milk plant to any other milk plant any day during the months of March through August, or on not more than 10 days during any other month, the milk so diverted shall be deemed to have been received by the diverting handler at a fluid milk plant at the location of the plant from which it was diverted.

§ 978.12 *Producer milk.* "Producer milk" means only that skim milk or butterfat contained in milk (a) received at a fluid milk plant directly from producers, or (b) diverted from a fluid milk plant to a nonfluid milk plant (except a nonfluid milk plant which is fully subject to the pricing provisions of another order issued pursuant to the act) in accordance with the provisions of § 978.11.

§ 978.13 *Fluid milk product.* "Fluid milk product" means milk, skim milk, buttermilk, flavored milk, flavored milk

drinks, yogurt, cream or any mixture in fluid form of milk, skim milk and cream (except sterilized products packaged in hermetically sealed containers, eggnog, ice cream mix and aerated cream).

§ 978.14 *Other source milk.* "Other source milk" means all skim milk and butterfat contained in: (a) Receipts during the month of fluid milk products except (1) fluid milk products received from other fluid milk plants, or (2) producer milk; and (b) products, other than fluid milk products, from any source (including those from a plant's own production), which are reprocessed or converted to another product in the fluid milk plant during the month.

§ 978.15 *Base milk.* "Base milk" means milk received at fluid milk plants from a producer during any of the months specified in § 978.72 for the computation of base and excess prices, which is not in excess of such producer's daily average base computed pursuant to § 978.60, multiplied by the number of days in such month.

§ 978.16 *Excess milk.* "Excess milk" means milk received at fluid milk plants from a producer during any of the months specified in § 978.72 for computation of base and excess prices, which is in excess of the base milk of such producer for such month, and shall include all milk received during such months from a producer for whom no daily average base can be computed pursuant to § 978.60.

MARKET ADMINISTRATOR

§ 978.20 *Designation.* The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by and shall be subject to removal at the discretion of, the Secretary.

§ 978.21 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary, complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 978.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including, but not limited to, the following:

(a) Within 45 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary, a bond, effective as of the date on which he enters upon his duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds provided by § 978.85, (1) the cost of his bond and of the bonds of his employees, (2) his own compensation, and (3) all other expenses (except those incurred under § 978.86) necessarily incurred by him in the maintenance and functioning of his office, and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly disclose to handlers and producers, at his discretion, the name of any person who, within 5 days after the day upon which he is required to perform such acts, has not made (1) reports pursuant to §§ 978.30 and 978.31, or (2) payments pursuant to §§ 978.80, 978.85 and 978.87;

(g) Submit his books and records to examination by the Secretary, and furnish such information and reports as may be required by the Secretary;

(h) Prepare and make available for the benefit of producers, consumers, and handlers, general statistics and information concerning the operation of this part;

(i) Verify all reports and payments by each handler by audit, if necessary, of such handler's records and the records of any other handler or person upon whose utilization the classification of skim milk and butterfat for such handler depends; and

(j) On or before the date specified, publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate the following: (1) The 6th day of each month, the Class II price and the Class II butterfat differential, both for the preceding month; and (2) the 5th day of each month, the Class I price, and the Class I butterfat differential, both for the current month; and (3) the 10th day after the end of each month, the uniform price(s) for each handler, computed pursuant to § 978.71 or § 978.72, and the producer butterfat differential for the preceding month.

REPORTS, RECORDS AND FACILITIES

§ 978.30 *Reports of receipts and utilization.* On or before the 6th day after the end of each month each handler, except a producer-handler, shall report for each of his fluid milk plants for such month, to the market administrator in the detail and on forms prescribed by the market administrator:

(a) The quantities of skim milk and butterfat contained in receipts of producer milk;

(b) The quantities of skim milk and butterfat contained in fluid milk products received from other fluid milk plants;

(c) The quantities of skim milk and butterfat contained in other source milk;

(d) Inventories of fluid milk products on hand at the beginning and end of the month; and

(e) The utilization of all skim milk and butterfat required to be reported pursuant to this section.

§ 978.31 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may request.

(b) Each handler, except a producer-handler, shall report to the market administrator, in the detail and on forms prescribed by the market administrator, as follows:

(1) On or before the 6th day after the end of each month for each producer from whom milk was received (i) his name and address, (ii) the total pounds and butterfat content of milk received from such producer during the month, (iii) his total pounds of base milk and his total pounds of excess milk for the month, and (iv) the amount of any deductions authorized in writing by such producer to be made from payments due for milk delivered;

(2) On or before the 21st day of each month, the name and address of each producer from whom milk was received during the first 15 days of such month, and the pounds of milk so received during said period from such producer; and

(3) On or before the first day in any month during which other source milk is received in the form of fluid milk products, his intention to receive such milk, and on or before the last day such milk is received, his intention to discontinue such receipts.

§ 978.32 *Records and facilities.* Each handler shall keep adequate records of receipts and utilization of skim milk and butterfat and shall, during the usual hours of business, make available to the market administrator, or his representative, such records and facilities as will enable the market administrator to (a) verify the receipts and utilization of all skim milk and butterfat and, in case of errors or omissions, ascertain the correct figures; (b) weigh, sample and test for butterfat content all milk and milk products handled; (c) verify deductions authorized by producers and the disbursement of moneys so deducted; and (d) make such examinations of operations, equipment, and facilities as the market administrator deems necessary.

§ 978.33 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation, or when the records are no longer necessary in connection therewith.

CLASSIFICATION OF MILK

§ 978.40 *Skim milk and butterfat to be classified.* The skim milk and butterfat to be reported for fluid milk plants pursuant to § 978.30 shall be classified each month by the market administrator, pursuant to the provisions of §§ 978.41 through 978.45.

§ 978.41 *Classes of utilization.* Subject to the conditions set forth in §§ 978.42 through 978.45, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat (1) disposed of in the form of fluid milk products, except those classified pursuant to paragraph (b) (3) of this section, and (2) not specifically accounted for as Class II milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat (1) used to produce any products other than fluid milk products; (2) contained in inventories of fluid milk products on hand at the end of the month; (3) disposed of and used for livestock feed; and (4) in shrinkage not to exceed 3 percent respectively of the skim milk and butterfat contained in producer milk (except that diverted pursuant to § 978.11) and other source milk: *Provided*, That if shrinkage of skim milk or butterfat is less than 3 percent of such amounts, it shall be assigned pro rata, respectively, to the skim milk and butterfat contained in such producer milk and other source milk.

§ 978.42 *Responsibility of handlers.* All skim milk and butterfat to be classified pursuant to this part shall be classified as Class I milk unless the handler who first receives such skim milk and butterfat establishes to the satisfaction of the market administrator that it should be classified as Class II milk.

§ 978.43 *Transfers.* (a) Skim milk and butterfat transferred to the fluid milk plant of another handler (except a producer-handler) in the form of fluid milk products shall be classified as Class I milk unless the operators of both plants claim utilization thereof in Class II milk in their reports submitted pursuant to § 978.30: *Provided*, That the skim milk or butterfat so assigned to Class II milk for any month shall be limited to the amount thereof remaining in Class II milk in the fluid milk plant(s) of the transferee for such month after the subtraction of other source milk pursuant to § 978.45, and any additional amounts of such skim milk or butterfat shall be assigned to Class I milk.

(b) Skim milk and butterfat transferred to the plant of a producer-handler in the form of fluid milk products, shall be classified as Class I milk.

(c) Skim milk and butterfat transferred or diverted in bulk form as milk, skim milk or cream to a nonfluid milk plant located less than 100 miles from the State Capitol at Nashville, Tennessee, by the shortest hard-surfaced highway distance, as determined by the market administrator, shall be classified as Class I milk unless (1) the transferring or diverting handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 978.30, for the month within which such transaction occurred, (2) the operator of the nonfluid milk plant maintains books and records showing the utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and (3) not less than an equivalent amount of skim milk and butterfat was actually utilized in the nonfluid milk plant in the use indicated in such report: *Provided*, That if it is found that an equivalent amount of skim milk and butterfat was not actually used in such plant during the month in such indicated use the pounds transferred in excess of such actual use shall be classified as Class I milk.

(d) Skim milk and butterfat transferred in bulk form as cream to a nonfluid milk plant located 100 miles or more from the State Capitol in Nashville, Tennessee, by the shortest hard-surfaced highway distance, as determined by the market administrator, shall be classified as Class I milk unless (1) the transferring handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 978.30, (2) such cream is disposed of and used as other than Grade A under a Grade A certification or label, (3) the handler attaches tags or labels to each container of such cream bearing the words "for manufacturing uses only", (4) the handler gives the market administrator sufficient notice to allow him to verify or inspect such shipment, and (5) the operator of the nonfluid milk plant maintains books and records showing the utilization of all skim milk and butterfat at such plant, which are made available if requested by the market administrator for the purpose of verification.

§ 978.44 *Computation of skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and other obvious errors the reports of each handler submitted pursuant to § 978.30 and compute the total pounds of skim milk and butterfat, respectively, in Class I milk and Class II milk in the fluid milk plant(s) of such handler.

§ 978.45 *Allocation of skim milk and butterfat classified.* After making the computations pursuant to § 978.44, the market administrator shall determine the classification of producer milk for each handler as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II milk the pounds of skim milk in producer milk classified pursuant to § 978.41 (b) (4);

(2) Subtract from the remaining pounds of skim milk in Class II milk the pounds of skim milk in other source milk: *Provided*, That if the pounds of skim milk in other source milk are greater than the remaining pounds of skim milk in Class II milk, an amount equal to the excess shall be subtracted from the pounds of skim milk in Class I milk;

(3) Subtract from the remaining pounds of skim milk in Class II milk the pounds of skim milk contained in inventory of fluid milk products on hand at the beginning of the month: *Provided*, That if the pounds of skim milk in such inventory are greater than the remaining pounds of skim milk in Class II milk, an amount equal to the excess shall be subtracted from the pounds of skim milk in Class I milk;

(4) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk transferred from the fluid milk plants of other handlers in the form of fluid milk products according to the classification thereof as determined pursuant to § 978.43 (a);

(5) Add to the remaining pounds of skim milk in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(6) If the remaining pounds of skim milk in both classes exceed the pounds of skim milk contained in producer milk, subtract such excess from the remaining pounds of skim milk in series beginning with Class II milk. Any amount so subtracted shall be known as "overage".

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section; and

(c) Add the pounds of skim milk and the pounds of butterfat allocated to producer milk in each class, pursuant to paragraphs (a) and (b) of this section, and determine the percentage of butterfat in each class.

MINIMUM PRICES

§ 978.50 *Basic formula price.* The basic formula price shall be the highest of the prices per hundredweight for milk of 4.0 percent butterfat content computed pursuant to paragraphs (a), (b), (c), or (d) of this section, rounded to the nearest whole cent.

(a) To the average of the basic (or field) prices reported to have been paid or to be paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following milk plants for which prices have been reported to the market administrator or to the Department of Agriculture on or before the 5th day after the end of the month:

White House Milk Company, Manitowoc, Wis.
White House Milk Company, West Bend, Wis.

add an amount computed by multiplying the butterfat differential computed pursuant to § 978.82, by 5.

(b) The price per hundredweight obtained by adding any plus amounts obtained pursuant to subparagraphs (1) and (2) of this paragraph:

(1) Multiplying by 4.0 the average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as

one price) of 92-score bulk creamery butter per pound at Chicago, as reported by the Department of Agriculture during the month, and add 20 percent thereof;

(2) From the weighted average of the carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department of Agriculture, subtract 5 cents and multiply by 7.5.

(c) The average of the basic (or field) prices reported to have been paid or to be paid per hundredweight for milk of 4.0 percent butterfat content received from farmers during the month at the following milk plants for which prices have been reported to the market administrator or to the Department of Agriculture on or before the 6th day after the end of the month:

*Location and present operator*

Cudahy Packing Company, Lafayette, Tenn.
Carnation Company, Murfreesboro, Tenn.
Kraft Foods Company, Gallatin, Tenn.
Kraft Foods Company, Pulaski, Tenn.
Borden Company, Fayetteville, Tenn.
Borden Company, Lewisburg, Tenn.
Lakeshire-Marty Cheese Company, Carthage, Tenn.
Sumner County Cooperative Creamery, Gallatin, Tenn.
Swift & Company, Lawrenceburg, Tenn.
Wilson & Company, Murfreesboro, Tenn.

(d) The price per hundredweight computed as follows:

(1) Multiply by 6 the average daily wholesale price per pound of 92-score butter in the Chicago market, as reported by the Department of Agriculture during the month;

(2) Add 2.4 times the average of the weekly prevailing price per pound of "Twins" during the month on the Wisconsin Cheese Exchange at Plymouth, Wisconsin: *Provided*, That if the price of "Twins" is not quoted on such Exchange, the weekly prevailing price per pound of "Cheddars" shall be used; and

(3) Divide by 7, add 30 percent thereof, and then multiply by 4.

§ 978.51 *Class prices.* Subject to the provisions of §§ 978.52 and 978.53, the class prices per hundredweight for the month shall be as follows:

(a) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month, plus $1.40 during the months of September through February, and plus $1.10 during all other months, plus or minus a supply-demand adjustment calculated for each month as follows: *Provided*, That any fluid milk plant which, during the second preceding month, did not dispose of at least an average of 1,000 pounds of fluid milk products per day on routes (including routes operated by vendors and sales through plant stores) to retail or wholesale outlets in the marketing area shall not be included in the supply-demand computation:

(1) For each month calculate a utilization ratio as follows:

(i) Calculate a utilization percentage by dividing the total hundredweight of producer milk of all fluid milk plants during the twelve-month period ending with the beginning of the preceding month by the net hundredweight of Class I milk disposed of from all fluid milk plants during the same period, and multiply the result by 100,

(ii) Add or subtract, respectively, any amount by which the percentage computed pursuant to subdivision (i) of this subparagraph is greater or less than a comparable utilization percentage calculated using the twelve-month period ending with the beginning of the fourth preceding month, and

(iii) The resultant figure rounded to the nearest whole percentage shall be known as the utilization ratio.

(2) For each percentage by which the utilization ratio calculated for the month pursuant to subparagraph (1) of this paragraph exceeds 130, subtract from, or for each percentage by which it is less than 125, add to, the Class I price, 1 cent.

(3) The price for Class I milk otherwise computed pursuant to this section shall be increased 46 cents from May 1956 through June 1956 and 26 cents for the month of July 1956.

(b) *Class II milk price.* The Class II milk price shall be the price determined pursuant to § 978.50 (c) plus 15 cents during the months of February through August, and plus 25 cents during all other months: *Provided*, That in no case shall such price exceed the basic formula price.

§ 978.52 *Butterfat differentials to handlers.* For milk containing more or less than 4.0 percent butterfat, the class prices for the month calculated pursuant to § 978.51 shall be increased or decreased, respectively, for each one-tenth percent variation in butterfat content at the appropriate rate determined as follows:

(a) *Class I price.* Multiply by 0.12 the average of the daily wholesale prices (using the midpoint of any price range as one price) of 92-score bulk creamery butter per pound at Chicago, as reported by the Department of Agriculture during the previous month, and round to the nearest one-tenth cent.

(b) *Class II price.* Multiply by 0.115 the average of the daily wholesale prices (using the midpoint of any price range as one price) of 92-score bulk creamery butter per pound at Chicago, as reported by the Department of Agriculture during the month, and round to the nearest one-tenth cent.

§ 978.53 *Location differentials to handlers.* For that milk which is received from producers at a fluid milk plant located outside the marketing area and 50 miles or more from the State Capitol, Nashville, Tennessee, by shortest hard-surfaced highway distance, as determined by the market administrator, and which is transferred to another fluid milk plant in the form of fluid milk products and assigned to Class I milk pursuant to the proviso of this section, or otherwise classified as Class I milk, the price specified in § 978.51 (a) shall be reduced at the rate set forth in the following schedule according to the location of the fluid milk plant where such milk is received from producers:

| Distance from the State Capitol, Nashville, Tenn., (miles): | *Rate per hundredweight (cents)* |
|---|---|
| 50 but not more than 60 | 10.0 |
| For each additional 10 miles or fraction thereof an additional | 1.5 |

*Provided*, That for purpose of calculating such location differential, fluid milk products which are transferred between fluid milk plants shall be assigned to any remainder of Class II milk in the plant to which transferred after making the calculations prescribed in § 978.45 (a) (1), (2) and (3), and the comparable steps in § 978.45 (b) for such plant, such assignment to the plant from which transferred to be made in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential.

DETERMINATION OF BASE

§ 978.60 *Computation of daily average base for each producer.* Subject to the rules set forth in § 978.61, the daily average base for each producer shall be an amount calculated by dividing the total pounds of producer milk received from such producer at all fluid milk plants during the months of August through January immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of January, inclusive, or by 120, whichever is more, except that bases computed for payments to producers in base-operating months of 1956 and 1957 shall be computed by dividing the pounds of producer milk received from the producer in the months of September through February immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of February, inclusive, or by 120, whichever is more.

§ 978.61 *Base rules.* The following rules shall apply in connection with the establishment and assignment of bases:

(a) Subject to the provisions of paragraph (b) of this section, the market administrator shall assign a base as calculated pursuant to § 978.60 to each person for whose account producer milk was delivered to fluid milk plants during the months specified in § 978.60 for computation of base.

(b) An entire base or any portion thereof shall be transferred from a person holding such base to any other person, effective as of the end of any month during which an application for such transfer is received by the market administrator, such application to be on forms approved by the market administrator, and signed by the baseholder, or his heirs, and by the person to whom such base is to be transferred: *Provided*, That if a base is held jointly, the entire base or any portion thereof shall be transferrable only upon the receipt of such application signed by all joint holders or their heirs.

§ 978.62 *Announcement of established bases.* On or before February 25 of each year, the market administrator shall notify each producer and the handler receiving milk from such producer of the daily average base established by such producer, except that such announcement in 1957 shall be on or before March 25.

DETERMINATION OF UNIFORM PRICES

§ 978.70 *Net obligation of handlers.* The net obligation of each handler for producer milk received at his fluid milk plant(s) each month shall be a sum of money computed by the market administrator as follows: (a) Multiply the total pounds of such milk in each class by the applicable class price; (b) add together the resulting amounts; (c) add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 978.45 (a) (6) and (b) by the applicable class price; and (d) add the amount computed by multiplying the difference between the appropriate Class II price for the preceding month and the appropriate Class I price for the current month by the hundredweight of skim milk and butterfat in Class II milk after making the calculations for such handler pursuant to § 978.45 (a) (4) and (b) for the preceding month, or by the hundredweight of milk subtracted from Class I milk pursuant to § 978.45 (a) (3) and (b) for the current month, whichever is less.

§ 978.71 *Computation of uniform prices for handlers.* For each month, except those months specified in § 978.72 for the computation of base and excess prices, the market administrator shall compute a uniform price for the producer milk received by each handler as follows:

(a) Add to the amount computed for such handler pursuant to § 978.70, the sum of the location differential deductions to be made pursuant to § 978.82 (b);

(b) Add or subtract for each one-tenth percent that the average butterfat content of producer milk received by such handler is less or more, respectively, than 4.0 percent, an amount computed by multiplying such difference by the butterfat differential to producers, and multiplying the result by the total hundredweight of his producer milk;

(c) Add the amount remaining in the reserve fund for such handler;

(d) Divide the resulting amount by the total hundredweight of producer milk received by such handler; and

(e) Subtract not less than 4 cents nor more than 5 cents. The resulting figure shall be known as the uniform price for such handler for milk of 4.0 percent butterfat content, f. o. b. marketing area.

§ 978.72 *Computation of the uniform price for base milk and for excess milk for handlers.* For each of the months of March 1956 through August 1956, and March 1957 through July 1957, and for each of the months of February through July in subsequent years, the market administrator shall compute for each handler, with respect to his producer milk, a uniform price for base milk and for excess milk as follows:

(a) Add to the amount computed for such handler pursuant to § 978.70, the sum of the location differential deductions to be made pursuant to § 978.82 (b);

(b) Add or subtract for each one-tenth percent that the average butterfat content of producer milk received by such handler is less or more, respectively, than 4.0 percent, an amount computed by multiplying such difference by the butterfat differential to producers, and multiplying the result by the total hundredweight of his producer milk;

(c) Add the amount remaining in the reserve fund for such handler;

(d) Compute the value of excess milk on a 4.0 percent basis in the producer milk of such handler by multiplying the hundredweight of such milk not in excess of the total quantity of the Class II milk of such handler by the price for Class II milk of 4.0 percent butterfat content, multiplying the hundredweight of such milk in excess of the total quantity of such Class II milk of such handler by the price for Class I milk of 4.0 percent butterfat content and adding together resulting amounts;

(e) Divide the total value of excess milk obtained in paragraph (d) of this section by the total hundredweight of such milk and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk of 4.0 percent butterfat content f. o. b. marketing area;

*Provided*, That such excess price shall not exceed the uniform price for base milk computed pursuant to paragraph (g) of this section. Any additional value remaining shall be prorated on a volume basis between excess and base milk.

(f) Subtract the value of excess milk determined by multiplying the uniform price obtained in paragraph (e) of this section, times the hundredweight of such excess milk from the total value of producer milk determined according to the calculations in paragraph (a) through (c) of this section; and

(g) Divide the amount obtained in paragraph (f) of this section by the total hundredweight of base milk in the producer milk of such handler and subtract not less than 4 cents nor more than 5 cents. The resulting figure shall be the uniform price for base milk of 4.0 percent butterfat content f. o. b. marketing area.

§ 978.73 *Notification of handlers.* On or before the 10th day after the end of each month, the market administrator shall mail to each handler, at his last known address, a statement showing:

(a) The amount of his producer milk allocated to each class;

(b) The calculation of such handler's net obligation pursuant to § 978.70;

(c) The uniform price(s) computed for such handler pursuant to §§ 978.71 and 978.72 and the producer butterfat differential computed pursuant to § 978.82 (a); and

(d) The amounts to be paid by such handler pursuant to §§ 978.80, 978.85 and 978.87.

PAYMENTS

§ 978.80 *Payments to market administrator.* (a) On or before the 25th day of each month each handler shall pay to the market administrator for deposit into the reserve fund for such handler a sum of money calculated by multiplying the hundredweight of producer milk received by him during the first 15 days of such month by the Class II price for the preceding month.

(b) On or before the 12th day after the end of each month, each handler shall pay to the market administrator for deposit into the handler's reserve fund an amount of money equal to such handler's net obligation for such month as determined pursuant to § 978.70 less payments made pursuant to paragraph (a) of this section for such month and less proper deductions authorized in writing by producers from whom such handler received milk.

§ 978.81 *Payments to producers.* (a) On or before the last day of each month, the market administrator shall make payment to each producer for milk received from such producer during the first 15 days of such month by handlers from whom the appropriate payments have been received pursuant to § 978.80 (a) at not less than the Class II price per hundredweight for the preceding month.

(b) On or before the 15th day after the end of each month, the market administrator shall make payment to each producer for milk received from such producer during the month by each handler from whom the appropriate payments have been received pursuant to § 978.80 (b), such payments by the market administrator to be at not less than the uniform price computed pursuant to § 978.71 for such handler for the months for which such uniform prices are computed, and such payments to be for base and excess milk at not less than the uniform base and excess prices, respectively, computed pursuant to § 978.72 for such handler for the months for which such base and excess prices are computed, subject to the following adjustments: (1) Butterfat and location differentials pursuant to § 978.82, (2) less payments made pursuant to paragraph (a) of this section, (3) less marketing service deductions pursuant to § 978.86, (4) less proper deductions authorized in writing by the producer, and (5) adjusted for any error in calculating payment to such individual producer for past months: *Provided*, That if the market administrator has not received full payment from any handler for such month, pursuant to § 978.80, he shall reduce uniformly per hundredweight his payments due such handler's producers for milk received by such handler by a total amount not in excess of the amount due from such handler: *Provided further*, That the market administrator shall make such balance of payment to such producers on or before the next date for making payments pursuant to this paragraph following that on which such balance of payment is received from such handler.

(c) In making payments to producers pursuant to paragraphs (a) and (b) of this section the market administrator shall pay, on or before the second day prior to the date payments are due to individual producers, to a cooperative association which is authorized to collect payment for milk of its members and from which a written request for such payment has been received, a total

amount equal to, but not less than, the sum of the individual payments otherwise payable to such producers pursuant to this section.

§ 978.82 *Butterfat and location differentials to producers.* (a) The applicable uniform prices to be paid each producer pursuant to § 978.81 (b) shall be increased or decreased for each one-tenth of one percent which the average butterfat content of his milk is above or below 4.0 percent, respectively, at the rate determined by multiplying the average of the daily wholesale prices per pound of 92-score butter in the Chicago market as reported by the Department of Agriculture during the month in which the milk was received by 0.12 and adjusting to the nearest even one-tenth of a cent.

(b) In making payment to producers pursuant to § 978.81 (b), the applicable uniform prices to be paid for producer milk received at a fluid milk plant located 50 miles or more from the State Capitol, Nashville, Tennessee, by the shortest hard-surfaced highway distance as determined by the market administrator, shall be reduced according to the location of the fluid milk plant where such milk was received at the following rate:

| Distance from the State Capitol, Nashville, Tenn., (miles): | *Rate per hundredweight (cents)* |
|---|---|
| 50 but not more than 60 | 10.0 |
| For each additional 10 miles or fraction thereof an additional | 1.5 |

§ 978.83 *Statement to producers.* In making payments required by § 978.81 (b), the market administrator shall furnish each producer or cooperative association with a supporting statement in such form that it may be retained by the producer or cooperative association which shall show:

(a) The month and the identity of the handler and of the producer;

(b) The total pounds and the average butterfat content of milk delivered by the producer, including, for the months in which base and excess prices apply, the pounds of base and excess milk;

(c) The minimum rate or rates at which payment to the producer or cooperative association is required under the provisions of §§ 978.81 and 978.82;

(d) The amount or the rate per hundredweight of each deduction claimed by the handler including any deduction made pursuant to § 978.86, together with a description of the respective deductions; and

(e) The net amount of payment to the producer or cooperative association.

§ 978.84 *Reserve funds.* The market administrator shall maintain for each handler a reserve fund into which he shall deposit the appropriate payments made by such handler pursuant to §§ 978.80 and 978.87, and out of which he shall make the appropriate payments required for such handler pursuant to §§ 978.81 and 978.87.

§ 978.85 *Expense of administration.* As his pro rata share of this part, each handler shall pay to the market administrator, on or before the 15th day after the end of each month, 4 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to receipts, during the month, of (a) producer milk (including such handler's own production), and (b) other source milk allocated to Class I milk pursuant to § 978.45.

§ 978.86 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, the market administrator, in making payments to producers pursuant to § 978.81, shall deduct an amount not exceeding 6 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to milk received by a handler(s) from producers during the month. Such moneys shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such service from a cooperative association. Such services shall be performed in whole or in part by the market administrator or an agent engaged by and responsible to him.

(b) In the case of producers who are members of a cooperative association which the Secretary determines is performing the services specified in paragraph (a) of this section for its members, the market administrator shall, in lieu of the deductions provided in paragraph (a) of this section, make such deductions as are authorized by such producers, and on or before the 15th day after the end of each month, pay the money so deducted to such cooperative association.

§ 978.87 *Adjustment of accounts.* Whenever audit by the market administrator of any handler's reports, books, records or accounts or other verification discloses errors, resulting in money due the market administrator from such handler, or due such handler from the market administrator, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred.

§ 978.88 *Termination of obligations.* The provisions of this section shall apply to any obligation under this part for the payment of money irrespective of when such obligation arose, except an obligation involved in an action instituted before March 1, 1950, under section 8c (15) (A) of the Act or before a court.

(a) The obligation of any handler to pay money required to be paid under the terms of this part, shall except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligations, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representative.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an an underpayment is claimed or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

APPLICATION OF PROVISIONS

§ 978.90 *Producer-handlers.* Sections 978.40 through 978.45, 978.50 through 978.53, 978.60 through 978.62, 978.70 through 978.73, and 978.80 through 978.87 shall not apply to a producer-handler.

§ 978.91 *Plants subject to other Federal orders.* A plant specified in paragraph (a) or (b) of this section shall be treated as a nonfluid milk plant except that the operator of such plant shall, with respect to the total receipts and utilization or disposition of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require (in lieu of the reports required pursuant to § 978.30), and allow verification of such reports by the market administrator.

(a) Any plant qualified pursuant to § 978.8 (a) which would otherwise be subject to the classification and pricing provisions of another order issued pursuant to the act, unless a greater volume of Class I milk is disposed of from such plant to retail or wholesale outlets (except fluid milk plants) in the Nashville marketing area than in the marketing area regulated pursuant to such other order.

(b) Any plant qualified pursuant to § 978.8 (b) or (c) which would be subject to the classification and pricing provisions of another order issued pursuant to the act, unless such plant qualified as a fluid milk plant pursuant to § 978.8 (c) for each of the preceding months of September through December.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 978.100 *Effective time.* The provisions of this part or any amendments to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 978.101 *Suspension or termination.* The Secretary shall suspend or terminate any or all of the provisions of this part, whenever he finds that it obstructs or does not tend to effectuate the declared policy of the Act. This part shall, in any event, terminate whenever the provisions of the Act authorizing it cease to be in effect.

§ 978.102 *Continuing power and duty of the market administrator.* (a) If, upon the suspension or termination of any or all of the provisions of this part, there are any obligations arising under this part, the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided,* That any such acts required to be performed by the market administrator, shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(b) The market administrator, or such other person as the Secretary may designate, shall (1) continue in such capacity until discharged by the Secretary; (2) from time to time account for all receipts and disbursements and deliver all funds or property on hand, together with the books and records of the market administrator, or such person, to such person as the Secretary shall direct; and (3) if so directed by the Secretary execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant thereto.

§ 978.103 *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions of this part, the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this part, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator, or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 978.110 *Separability of provisions.* If any provision of this part, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

§ 978.111 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

Issued at Washington, D. C., this 26th day of June 1956, to be effective on and after July 1, 1956.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

[F. R. Doc. 56-5194; Filed, June 29, 1956; 8:47 a. m.]

## PART 992—IRISH POTATOES GROWN IN WASHINGTON

LIMITATION OF SHIPMENTS

§ 992.311 *Limitation of shipments—*(a) *Findings.* (1) Pursuant to Marketing Agreement No. 113 and Order No. 92 (7 CFR Part 992), regulating the handling of Irish potatoes grown in the State of Washington, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the State of Washington Potato Committee, established pursuant to said marketing agreement and order, and upon other available information, it is hereby found that the limitations of shipments, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (i) the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, (ii) more orderly marketing in the public interest, than would otherwise prevail, will be promoted by regulating the shipment of potatoes, in the manner set forth below, on and after the effective date of this section, (iii) compliance with this section will not require any preparation on the part of handlers which cannot be completed by the effective date, (iv) a reasonable time is permitted under the circumstances, for such preparation, and (v) information regarding the committee's recommendations has been made available to producers and handlers in the production area.

(b) *Order.* (1) During the period from July 2, 1956, through May 31, 1957, no handler shall ship potatoes of any variety unless such potatoes are "fairly clean" and (i) if they are of the round varieties (including, but not limited to, Kennebec, Irish Cobbler, Bliss Triumph, and Pontiac varieties), such potatoes meet the requirements of the U. S. No. 2 or better grade, 1⅞ inches minimum diameter, and (ii) if they are of the long varieties, (including, but not limited to, White Rose, Russet Burbank, and Early Gem varieties), such potatoes meet the requirements of the U. S. No. 2 or better grade, 2 inches minimum diameter or 4 ounces minimum weight, as such terms are defined in the United State Standards for Potatoes (§§ 51.1540 to 51.1559 of this title), including the tolerances set forth therein.

(2) During the period from July 2, 1956, through May 31, 1957, and subject to the requirements set forth in subparagraph (1) of this paragraph no handler shall ship (i) any lot of potatoes of the round varieties (including, but not limited to, Kennebec, Irish Cobbler, Bliss Triumph, and Pontiac varieties) if more than 20 percent of the potatoes in such lot have more than one-half of the skin missing or "feathered," as such terms are used in the said United States Standards, (ii) any lot of potatoes of the White Rose variety if more than 35 percent of the potatoes in such lot have more than one-half of the skin missing or "feathered," as such terms are used in the said United States Standards, or (iii) any lot of potatoes of the Netted Gem varieties (including, but not limited to Russet Burbank and Early Gem varieties) if such potatoes are more than "moderately skinned" as such term is defined in the said United States Standards which means that not more than 10 percent of such potatoes have more than one-half of the skin missing or "feathered."

(3) Pursuant to § 992.49, each handler may make one shipment of not in excess of five hundredweight per week without regard to the limitations set forth in subparagraphs (1) and (2) of this paragraph and §§ 992.41 and 992.53.

(4) The limitations set forth in subparagraphs (1) and (2) of this paragraph shall not be applicable to shipments of potatoes for any of the following purposes: (i) Export; (ii) distribution by the Federal Government, distribution by relief agencies, or consumption by charitable institutions; (iii) manufacture or conversion into starch, flour, alcohol, dehydrated products, canned products, frozen products, or potato chips; (iv) livestock feed; or (v) certified seed potatoes.

(5) Each handler making shipments of potatoes (except shipments of certified seed potatoes) pursuant to subparagraph (4) of this paragraph shall (i) pursuant to § 992.120 first apply to the committee for and obtain a Certificate

of Privilege permitting the proposed shipments (except shipments for distribution by the Federal Government); (ii) pay assessments on such shipments pursuant to § 992.41 (except shipments for livestock feed and starch); (iii) have such shipments (except shipments for livestock feed and starch) inspected pursuant to § 992.53; and (iv) for each shipment (except shipments for livestock feed and starch) furnish the committee with the applicant handler's certification and the buyer's certification that the potatoes to be handled under the Cerificate of Privilege are to be used for the purpose stated: *Provided*, That the buyer agrees in his certification to make periodic reports to the committee showing the date of each shipment received under a Certificate of Privilege, the quantity (in hundredweight) of potatoes received, and the inspection certificate number when applicable and the rail car or truck license number.

(6) Terms used in Marketing Agreement No. 113 and Order No. 92 shall, when used in this section, have the same meaning as when used in said agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup 608c)

Done at Washington, D. C. this 26th day of June 1956, to become effective July 2, 1956.

[SEAL] S. R. SMITH,
*Director,*
*Fruit and Vegetable Division.*

# TITLE 14—CIVIL AVIATION

## Chapter I—Civil Aeronautics Board

### Subchapter A—Civil Air Regulations

### PART 18—MAINTENANCE, REPAIR, AND ALTERATION OF AIRFRAMES, POWERPLANTS, PROPELLERS, AND APPLIANCES

Because of the number of outstanding amendments to Part 18, it has been decided to issue a revision of this part incorporating all amendments thereto in effect on July 17, 1956. Attention is called also to the following minor changes which have been made:

(1) All definitions in § 18.1 have been arranged alphabetically, without subsection numbers. Also, minor editorial changes have been made in some of the definitions for the purpose of obtaining uniformity in language or clarification of intent.

(2) All footnotes have been changed to notes and follow the sections to which they apply.

Since the changes effected by this revision are minor in nature and impose no additional burden on any person, notice and public procedure hereon are unnecessary and the revised part may be made effective on less than 30 days' notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby revises Part 18 of the Civil Air Regulations (14 CFR Part 18, as amended) as attached hereto, effective on July 17, 1956.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
*Secretary.*

APPLICABILITY AND DEFINITIONS

Sec.
18.0 Applicability of this part.
18.1 Definitions.

GENERAL

18.10 Persons authorized to perform maintenance, preventive maintenance, repairs, and alterations.
18.11 Persons authorized to approve maintenance, repairs, and alterations.
18.12 Persons authorized to perform and approve one-hundred-hour, periodic, and progressive inspections.
18.13 Aircraft operating limitations.

MAINTENANCE, REPAIR, AND ALTERATION RECORDS

18.20 Required records and entries.
18.21 Content of repair and alteration records.
18.22 Form and disposition of major repair or major alteration records.
18.23 Form and disposition of periodic and progressive inspection records.
18.24 Provisions for air carrier records.

PERFORMANCE RULES

18.30 Standard of performance; general.

AUTHORITY: §§ 18.0 to 18.30 issued under sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended, sec. 605, 52 Stat. 1010; 49 U. S. C. 551, 554.

APPLICABILITY AND DEFINITIONS

§ 18.0 *Applicability of this part.* This part establishes rules for the performance of maintenance, repair, and alteration of aircraft for which airworthiness certificates have been issued by the Administrator, or any component thereof.

NOTE: The Administrator publishes Civil Aeronautics Manual 18 which lists operations considered to be maintenance, preventive maintenance, minor and major repairs and alterations, and progressive and 100-hour inspections, and sets forth acceptable procedures, methods, and practices under the provisions of this part. This manual may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

§ 18.1 *Definitions.* As used in this part terms are defined as follows:

*Aircraft.* An aircraft is any contrivance now known or hereafter invented, used, or designed for navigation of or flight in the air, including airframe, powerplant, propeller, and appliances.

*Aircraft engine.* An aircraft engine is an engine used, or intended to be used, for propulsion of aircraft, and includes all parts, appurtenances, and accessories thereof other than propellers.

*Airframe.* Airframe means any and all kinds of fuselages, booms, nacelles, cowlings, fairings, empennages, airfoil surfaces, and landing gear, and all parts, accessories, or controls, of whatever description, appertaining thereto, but not including powerplants and propellers.

*Alteration.* An alteration means any appreciable change in the design of an airframe, powerplant, propeller, or appliance.

*Appliances.* Appliances are instruments, equipment, apparatus, parts, appurtenances, or accessories, of whatever description, which are used, or are capable of being or intended to be used, in the navigation, operation, or control of aircraft in flight (including communications equipment, electronic devices, and any other mechanism or mechanisms installed in or attached to aircraft during flight, but excluding parachutes), and which are not a part or parts of airframes, powerplants, or propellers.

*Appropriately certificated air carrier.* An appropriately certificated air carrier is an air carrier holding an air carrier operating certificate, and which is required, either by its operating certificate or by operations specifications approved by the Administrator, to provide for a continuous airworthiness maintenance and inspection program to be performed by the carrier in accordance with its maintenance manual.

*Approved.* Approved, when used either alone or as modifying such words as aircraft, airframe, powerplant, propeller, appliance, method, or technique, means approved by the Administrator of Civil Aeronautics in accordance with the applicable requirements of this subchapter.

*Authorized representative of the Administrator.* An authorized representative of the Administrator is any employee of the Civil Aeronautics Administrator or any private person, authorized by the Administrator to perform particular duties of the Administrator under the provisions of this part.

*Certificated commercial operator.* A certificated commercial operator is any person holding a commercial operator certificate as required by the provisions of Part 45 of this subchapter.

*Certificated mechanic.* A certificated mechanic is an individual holding a valid mechanic certificate with appropriate ratings issued by the Administrator.

*Certificated repair station.* A certificated repair station is a facility for the maintenance, repair, and alteration of airframes, powerplants, propellers, or appliances, holding a valid repair station certificate with appropriate ratings issued by the Administrator.

*Certificated repairman.* A certificated repairman is an individual holding a valid repairman certificate issued in accordance with Subpart B of Part 24 of this subchapter.

*Component.* A component is a constituent part of an aircraft.

*Instrument.* An instrument is a device utilizing internal mechanism to indicate visually or aurally the attitude, altitude, performance, or operation of an aircraft or any component thereof, and shall include electronic instrumentation and devices for the automatic control of navigation of the aircraft in flight.

*Maintenance.* Maintenance, which includes preventive maintenance, is the inspection, overhaul, repair, upkeep, and preservation of airframes, powerplants, propellers, and appliances, including the replacement of parts.

*Major alteration.* A major alteration of an aircraft or any component thereof is:

(a) An alteration which might cause an appreciable change in its weight, balance, structural strength, performance, powerplant operation, flight characteristics, or other qualities affecting airworthiness, or

(b) An alteration which is not accomplished in accordance with accepted practices or cannot be performed by means of elementary operations.

*Major repair.* A major repair to an aircraft or any component thereof is:

(a) A repair which, if improperly accomplished, would adversely affect the structural strength, performance, flight characteristics, powerplant operation, or other qualities affecting airworthiness, or

(b) A repair which is not accomplished in accordance with accepted practices or cannot be performed by means of elementary operations.

*Manufacturer.* A manufacturer is any person who:

(a) Holds a type or production certificate for and manufactures an aircraft, aircraft engine, propeller, or appliance, or

(b) Manufactures an approved appliance in accordance with a specification issued by the Administrator.

*Minor alteration.* A minor alteration of an aircraft or any component thereof is an alteration other than a major alteration.

*Minor repair.* A minor repair is any repair other than a major repair.

*One-hundred-hour inspection.* A 100-hour inspection is an inspection of an aircraft required within each 100 hours of time in service and is a complete airworthiness inspection of such aircraft and its various components and systems in accordance with procedures prescribed by the Administrator.

*Periodic inspection.* A periodic inspection is an inspection of an aircraft required once each 12 calendar months and is a complete airworthiness inspection of such aircraft and its various components and systems in accordance with procedures prescribed by the Administrator.

*Person.* Person means any individual, firm, copartnership, corporation, company, association, joint-stock association, or body politic; and includes any trustee, receiver, assignee, or other similar representative thereof.

*Powerplant.* A powerplant is an aircraft engine and its component parts, and other parts necessary to properly install such engine in an aircraft, but not the propeller (if used).

*Preventive maintenance.* Preventive maintenance means simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations.

NOTE: The Administrator publishes, as part of Civil Aeronautics Manual 18, the various operations constituting preventive maintenance of the several types of aircraft.

*Progressive inspection.* A progressive inspection is a continuing airworthiness inspection of an aircraft and its various components and systems at scheduled intervals in accordance with procedures prescribed by the Administrator.

*Propeller.* A propeller is a device for propelling an aircraft through the air, having blades mounted on a power-driven shaft, which when rotated produces by its action on the air a thrust approximately parallel to the longitudinal axis of the aircraft, and also includes control components normally supplied by the manufacturer of the propeller. It also includes a system of rotating airfoils which serve either to counteract the effect of the main rotor torque of a rotorcraft or to maneuver a rotorcraft about one or more of its three principal axes.

*Repair.* Repair means the restoration of an airframe, powerplant, propeller, or appliance to a condition for safe operation after damage or deterioration.

*Time in service.* Time in service, as used in computing maintenance and inspection time records, is the time from the moment an aircraft leaves the ground until it touches the ground at the end of a flight.

*Type.* Type is a specific classification of aircraft having the same basic design including all modifications thereto except those modifications which result in a change in handling or flight characteristics.

GENERAL

§ 18.10 *Persons authorized to perform maintenance, preventive maintenance, repairs, and alterations.* No person shall perform maintenance, preventive maintenance, repairs, or alterations on civil aircraft of United States registry except as provided as follows:

NOTE: The Communications Act of 1934, as amended, and the rules and regulations of the Federal Communications Commission require that all transmitter adjustments or tests during or coincident with the installation, servicing, or maintenance of a radio station licensed by the Federal Communications Commission which may affect the proper operation of such station shall be made by or under the immediate supervision and responsibility of a person holding a first- or second-class radio operator license issued by the Federal Communications Commission, either radiotelephone or radiotelegraph as may be appropriate for the class of station concerned, who shall be responsible for the proper functioning of the station equipment.

(a) A certificated mechanic or a person who works under the direct supervision of such mechanic may perform maintenance, repairs, and alterations on aircraft or aircraft components including related appliances, appropriate to his rating, but excluding major repairs and alterations to propellers and all repairs and alterations to instruments.

(b) An appropriately rated repair station may perform maintenance, repairs, and alterations on aircraft or aircraft components, including propellers and appliances, as provided in Part 52 of this subchapter.

(c) A certificated pilot may perform, on aircraft owned or operated by him, except aircraft used in air carrier service, such preventive maintenance as may be authorized by the Administrator.

(d) A manufacturer shall be subject to the requirements of paragraphs (a) and (b) of this section, except that he may rebuild or alter:

(1) Any product manufactured by him under a type or production certificate, or

(2) Any product manufactured by him and approved under the terms of a Technical Standard Order or Product and Process Specification issued by the Administrator.

(e) An appropriately certificated air carrier may perform maintenance, repairs, and alterations on aircraft or aircraft components, including propellers and appliances, as provided for in its continuous airworthiness maintenance and inspection program and its maintenance manual. It may also perform maintenance, repairs, and alterations on any aircraft or aircraft components, including propellers and appliances, owned or operated by another air carrier as provided for in the applicable continuous airworthiness maintenance and inspection program and maintenance manual of such other air carrier.

(f) A certificated commercial operator may perform maintenance, repairs, and alterations on its own aircraft or aircraft components, including propellers and appliances, as provided for in its continuous airworthiness maintenance and inspection program and its maintenance manual.

§ 18.11 *Persons authorized to approve maintenance, repairs, and alterations.*

NOTE: Section 43.21 of this subchapter requires that when an aircraft has undergone any repair or alteration which may have appreciably changed its flight characteristics or substantially affected its operation in flight, such aircraft, prior to carrying passengers, shall be test flown.

(a) *Maintenance, minor repairs, and minor alterations.* No airframe, powerplant, propeller, or appliance which has undergone maintenance, minor repair, or minor alteration may be approved and returned to service except by one of the following:

(1) An appropriately rated certificated mechanic; or

(2) An appropriately rated certificated repair station; or

(3) An appropriately certificated air carrier; or

(4) A manufacturer, if the product has been rebuilt or altered by the manufacturer under the provisions of § 18.10 (d); or

(5) A certificated commercial operator.

(b) *Major repairs and major alterations.* No airframe, powerplant, propeller, or appliance, which has undergone any major repair or major alteration shall be returned to service until such repair or alteration has been examined, inspected, and approved as airworthy by one of the following:

NOTE: A major repair or major alteration whose design has not previously been approved by the Administrator may require the submittal of technical data and/or flight tests in order to establish compliance with the applicable airworthiness provisions. Examples of such major alterations for which it would be desirable to contact a representative of the Administrator prior to accomplishment of the alteration are given in Civil Aeronautics Manual 18. See also § 1.25 of this subchapter.

(1) An authorized representative of the Administrator; or

(2) An appropriately rated certificated repair station, if the work has been per-

formed by such repair station in accordance with a manual, specification, or other technical data approved by the Administrator; or

(3) A manufacturer, if the product has been rebuilt or altered by the manufacturer under the provisions of § 18.10 (d) and in accordance with a manual, specification, or other technical data approved by the Administrator; or

(4) An appropriately certificated air carrier, if the work has been performed by such air carrier in accordance with a manual, specification, or other technical data approved by the Administrator; or

(5) An appropriately rated certificated repair station, a manufacturer, or an appropriately certificated air carrier, if the product has been approved under the terms of a Technical Standards Order and the work is performed in accordance with data furnished by the product manufacturer which he asserts meet the terms of the Technical Standard Order; or

(6) A certificated commercial operator, if the work has been performed on aircraft listed in the operating certificate of that operator and has been performed in accordance with a manual, specification, or other technical data approved by the Administrator; or

(7) A certificated mechanic holding both airframe and powerplant ratings when authorized by the Administrator in accordance with the provisions of Part 24 of this subchapter, if the work has been performed in accordance with a manual, specification, or other technical data approved by the Administrator.

§ 18.12 *Persons authorized to perform and approve one-hundred-hour, periodic, and progressive inspections*—(a) *One-hundred-hour inspection.* No person shall perform and approve 100-hour inspections except one of the following:

(1) Certificated mechanics who together hold airframe and powerplant ratings, or a certificated mechanic holding both such ratings; or

(2) An appropriately rated certificated repair station; or

(3) The manufacturer holding the type certificate for the aircraft and who is operating under an approved production inspection system or a production certificate.

(b) *Periodic inspection.* No person shall perform and approve periodic inspections except one of the following:

(1) A certificated mechanic holding both airframe and powerplant ratings when authorized by the Administrator in accordance with Part 24 of this subchapter; or

(2) An appropriately rated certificated repair station; or

(3) The manufacturer holding the type certificate for the aircraft and who is operating under an approved production inspection system or a production certificate.

(c) *Progressive inspection.* No person shall perform or supervise and approve progressive inspections except one of the following:

(1) A certificated mechanic holding both airframe and powerplant ratings when authorized by the Administrator in accordance with Part 24 of this subchapter; or

(2) An appropriately rated certificated repair station; or

(3) The manufacturer holding the type certificate for the aircraft and who is operating under an approved production inspection system or a production certificate.

NOTE: This section does not apply to persons engaged in the inspection and maintenance of aircraft operated in accordance with Part 40 or Part 41 of this subchapter or aircraft of more than 12,500 pounds maximum certificated take-off weight operated in accordance with the provisions of Part 42 of this subchapter.

§ 18.13 *Aircraft operating limitations.* When a major repair or major alteration results in any change in the aircraft operating limitations or data contained in the approved airplane flight manual, appropriate amendments to the aircraft operating limitations shall be made in the form and manner approved by the Administrator.

MAINTENANCE, REPAIR, AND ALTERATION RECORDS

§ 18.20 *Required records and entries.* A permanent record of every maintenance (excepting preventive maintenance), repair, rebuilding, or alteration of any airframe, powerplant, propeller, or appliance shall be maintained by the owner (or in the case of an aircraft by the registered owner) in a logbook or other permanent record satisfactory to the Administrator, which shall contain at least the information specified in § 18.21. Entries in such records shall be made or caused to be made by the individual, repair station, air carrier, or manufacturer performing the work.

§ 18.21 *Content of repair and alteration records.* The record of all maintenance, repair, rebuilding, and alteration of any airframe, powerplant, propeller, or appliance or the installation or removal of an appliance shall contain the information set forth in paragraphs (a) through (d) of this section:

(a) An adequate description of the work performed;

(b) The date of completion of the work performed;

(c) The name of the individual, repair station, manufacturer, or air carrier performing the work; and

(d) The signature, and if a certificated mechanic or certificated repairman the certificate number, of the person approving as airworthy the work performed and authorizing the return of the aircraft or component to service.

§ 18.22 *Form and disposition of major repair or major alteration records.* All major repairs and major alterations to an airframe, powerplant, propeller, or appliance shall be entered on a form acceptable to the Administrator. Such form shall be executed in duplicate and shall be disposed of in such manner as, from time to time, may be prescribed by the Administrator.

§ 18.23 *Form and disposition of periodic and progressive inspection records.* A record of periodic and progressive inspections shall be entered on a form prescribed by the Administrator. Such form shall be completed and disposed of in a manner prescribed by the Administrator.

§ 18.24 *Provisions for air carrier records.* Required records and entries may be replaced, in the case of maintenance, repairs, or alterations to appropriately certificated air carrier aircraft, by a suitable system of recording maintenance, repairs, alterations, and signatures of responsible personnel: *Provided*, That the information specified in § 18.21 is furnished.

PERFORMANCE RULES

§ 18.30 *Standard of performance; general.* All maintenance, repairs and alterations shall be accomplished in accordance with methods, techniques, and practices approved by or acceptable to the Administrator.

(a) *Maintenance and repair.* All maintenance and repair shall be accomplished in such a manner and the materials used shall be of such quality and strength that the condition of the part of the aircraft on which such work has been performed shall, with regard to aerodynamic and mechanical function, structural strength, resistance to vibration and deterioration, and other qualities affecting airworthiness, be at least equivalent to its original or properly altered condition.

(b) *Alterations.* All alterations shall be so designed and accomplished that the altered airframe, powerplant, propeller, or appliance will comply with the applicable airworthiness requirements for the airframe, powerplant, propeller, or appliance.

NOTE: The airworthiness requirements applicable to an alteration are normally those with which the manufacturer originally demonstrated compliance for the issuance of a type certificate. The Aircraft Specification includes a reference to that part of the Civil Air Regulations and to the category under which the original type certification was obtained. The individual parts of the airworthiness regulations specify that the provisions in effect on the date of application for approval of the alteration may be made applicable. (See §§ 3.11, 4b.11, 5.11, 6.11, 13.11, or 14.11 of this subchapter, whichever part is applicable.) More detailed information on the requirements applicable at the time of type certification can be obtained from the Civil Aeronautics Administration.

(c) *Inspections.* One-hundred-hour, periodic, and progressive inspections shall be accomplished in accordance with procedures prescribed by the Administrator.

NOTE: Specific record or reporting requirements subsequently prescribed will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

[F. R. Doc. 56-5230; Filed, June 29, 1956; 8:54 a. m.]

## PART 24—MECHANIC AND REPAIRMAN CERTIFICATES

Because of the number of outstanding amendments to Part 24, it has been decided to issue a revision of this part incorporating all amendments thereto in effect on July 17, 1956. Attention is called also to the following minor changes which have been made:

(1) All definitions in § 24.1 have been arranged alphabetically, without subsection numbers. Also, minor editorial changes have been made in some of the definitions for the purpose of obtaining uniformity in language or clarification of intent.

(2) All footnotes have been changed to notes and follow the sections to which they apply.

Since the changes effected by this revision are minor in nature and impose no additional burden on any person, notice and public procedure hereon are unnecessary and the revised part may be made effective on less than 30 days' notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby revises Part 24 of the Civil Air Regulations (14 CFR Part 24, as amended) as attached hereto, effective on July 17, 1956.

By the Civil Aeronautics Board.

APPLICABILITY AND DEFINITIONS

§ 24.0 *Applicability of this part.* This part establishes requirements for the issuance of mechanic and repairman certificates and ratings, delineates the privileges of such certificates, and establishes basic operating rules for the holders thereof.

§ 24.1 *Definitions.* As used in this part terms are defined as follows:

*Aircraft.* An aircraft is any contrivance now known or hereafter invented, used, or designed for navigation of or flight in the air, including airframe, powerplant, propeller, and appliances.

*Aircraft engine.* An aircraft engine is an engine used, or intended to be used, for propulsion of aircraft, and includes all parts, appurtenances, and accessories thereof other than propellers.

*Airframe.* Airframe means any and all kinds of fuselages, booms, nacelles, cowlings, fairings, empennages, airfoil surfaces, and landing gear, and all parts, accessories, or controls, of whatever description, appertaining thereto, but not including powerplants and propellers.

*Alteration.* An alteration means any appreciable change in the design of an airframe, powerplant, propeller, or appliance.

*Appliances.* Appliances are instruments, equipment, apparatus, parts, appurtenances, or accessories, of whatever description, which are used, or are capable of being or intended to be used, in the navigation, operation, or control of aircraft in flight (including communication equipment, electronic devices, and any other mechanism or mechanisms installed in or attached to aircraft during flight, but excluding parachutes) and which are not a part or parts of airframes, powerplants, or propellers.

*Appropriately certificated air carrier.* An appropriately certificated air carrier is an air carrier holding an air carrier operating certificate, and which is required, either by its operating certificate or by operations specifications approved by the Administrator, to provide for a continuous airworthiness maintenance and inspection program to be performed by the carrier in accordance with its maintenance manual.

*Approved.* Approved, when used either alone or as modifying such words as aircraft, airframe, powerplant, propeller, appliance, method, or technique, means approved by the Administrator of Civil Aeronautics in accordance with the applicable requirements of this subchapter.

*Authorized representative of the Administrator.* An authorized representative of the Administrator is any employee of the Civil Aeronautics Administrator or any private person, authorized by the Administrator to perform particular duties of the Administrator under the provisions of this part.

*Certificated mechanic.* A certificated mechanic is an individual holding a valid mechanic certificate with appropriate ratings issued by the Administrator.

*Certificated repair station.* A certificated repair station is a facility for the maintenance, repair, and alteration of airframes, powerplants, propellers, or appliances, holding a valid repair station certificate with appropriate ratings issued by the Administrator.

*Certificated repairman.* A certificated repairman is an individual holding a valid repairman certificate issued in accordance with Subpart B of this part.

*Component.* A component is a constituent part of an aircraft.

*Maintenance.* Maintenance which includes preventive maintenance, is the inspection, overhaul, repair, upkeep, and preservation of airframes, powerplants, propellers, and appliances, including the replacement of parts.

*Major alteration.* A major alteration of an aircraft or any component thereof is:

(a) An alteration which might cause an appreciable change in its weight, balance, structural strength, performance, powerplant operation, flight characteristics, or other qualities affecting airworthiness, or

(b) An alteration which is not accomplished in accordance with accepted practices or cannot be performed by means of elementary operations.

*Major repair.* A major repair to an aircraft or any component thereof is:

(a) A repair which, if improperly accomplished, would adversely affect the structural strength, performance, flight characteristics, powerplant operation, or other qualities affecting airworthiness, or

(b) A repair which is not accomplished in accordance with accepted practices or cannot be performed by means of elementary operations.

*Minor alteration.* A minor alteration of an aircraft or any component thereof is an alteration other than a major alteration.

*Minor repair.* A minor repair is any repair other than a major repair.

*Powerplant.* A powerplant is an aircraft engine and its component parts, and other parts necessary to properly install such engine in an aircraft, but not the propeller (if used).

*Preventive maintenance.* Preventive maintenance means simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations.

NOTE: The Administrator publishes, as part of Civil Aeronautics Manual 18, the various operations constituting preventive maintenance of the several types of aircraft.

*Propeller.* A propeller is a device for propelling an aircraft through the air, having blades mounted on a power-driven shaft, which when rotated produces by its action on the air a thrust approxi-

mately parallel to the longitudinal axis of the aircraft, and also includes control components normally supplied by the manufacturer of the propeller. It also includes a system of rotating airfoils which serve either to counteract the effect of the main rotor torque of a rotorcraft or to maneuver a rotorcraft about one or more of its three principal axes.

*Repair.* Repair means the restoration of an airframe, powerplant, propeller, or appliance to a condition for safe operation after damage or deterioration.

### SUBPART A—MECHANIC CERTIFICATES

#### CERTIFICATION RULES

§ 24.5 *Application for certificate.* Application for certificates and ratings shall be made on a form and in a manner prescribed by the Administrator.

§ 24.6 *Issuance.* (a) Mechanic certificates and ratings shall be issued by the Administrator to applicants who meet the requirements of this part.

(b) Pending a review of an application and supporting documents by the Administrator and the issuance of a mechanic certificate and ratings, an authorized representative of the Administrator may, subject to such terms and conditions as the Administrator may specify, issue a temporary mechanic certificate with appropriate ratings to an applicant, if the representative determines that the applicant has met the requirements of this part.

§ 24.7 *Duration.* (a) A mechanic certificate and ratings shall remain in effect until surrendered, suspended, revoked, or otherwise terminated by order of the Board, except that a certificate issued to an individual other than a United States citizen shall remain in effect for only one year: *Provided,* That upon application to the Administrator and upon showing continued compliance with the other requirements of this part, a mechanic certificate may be reissued to an individual other than a United States citizen for additional periods of one year without further demonstration of technical competence. After revocation, and upon request of the Administrator after suspension or termination, the certificate shall be returned to the Administrator.

(b) A temporary mechanic certificate shall remain in effect for 90 days.

§ 24.8 *Outstanding mechanic certificates and ratings.* After the effective date of this part (June 15, 1952) a person holding a valid mechanic certificate with an aircraft mechanic rating shall be deemed to hold a valid mechanic certificate with an airframe rating, a person holding a valid mechanic certificate with an aircraft engine mechanic rating shall be deemed to hold a valid mechanic certificate with a powerplant rating, and a person holding a valid mechanic certificate with aircraft mechanic and aircraft engine mechanic ratings shall be deemed to hold a valid mechanic certificate with both airframe and powerplant ratings. The Administrator may, in such form and manner as he may establish, require the exchange of outstanding certificates for certificates issued in accordance with the provisions of this part.

§ 24.9 *Display.* When issued to the individual, the mechanic certificate with appropriate ratings shall be kept readily available by the mechanic at all times while exercising the privileges of such certificate, and shall be available for inspection by any authorized representative of the Administrator or the Board, or by any authorized State or local law enforcement officer.

§ 24.10 *Identification.* The holder of a certificate issued under the provisions of this subpart shall not, except while engaged in operations conducted by a scheduled air carrier, exercise the privileges conferred by the certificate unless he has readily available a current airman identification card or other identification card acceptable to the Administrator which duly describes him. The airman identification card may be obtained from the Administrator who shall prescribe its form and the manner of applying for it.

§ 24.11 *Change of address.* Within 30 days after any change in the permanent mailing address of a holder of a mechanic certificate, the holder shall notify the Administrator in writing of such change. Such notice shall be mailed to the Administrator of Civil Aeronautics, Attention Airman Records Branch, Washington 25, D. C.

#### GENERAL CERTIFICATE REQUIREMENTS

§ 24.15 *Citizenship.* An applicant for a mechanic certificate may be a citizen of any country or a person without nationality.

§ 24.16 *Age.* An applicant shall be at least 18 years of age.

§ 24.17 *Education.* An applicant shall be able to read, write, speak, and understand the English language: *Provided,* That if an applicant is employed by a United States air carrier outside of the United States, such applicant shall not be required to meet this requirement, and in that event his certificate shall be appropriately endorsed by the Administrator.

§ 24.18 *Examinations and tests.* Examinations and tests shall be conducted by an authorized representative of the Administrator at such times and places as the Administrator may designate.

§ 24.19 *Re-examination after failure.* An applicant for a mechanic certificate who has failed any prescribed written or practical examination or test may not apply for re-examination within 30 days after the date of such examination or test unless he presents a statement signed by a certificated mechanic holding an appropriate rating, a certificated ground instructor holding an appropriate rating, or an equally qualified individual acceptable to the Administrator, which attests that the applicant has received an additional 5 hours of instruction in each of the subjects failed and that the applicant is considered competent for re-examination.

§ 24.20 *Application for additional rating.* An applicant for a rating subsequent to the original issuance of a mechanic certificate with appropriate rating shall meet the knowledge, experience, and skill requirements for the rating sought.

§ 24.21 *Substantiation of experience.* An applicant shall submit evidence satisfactory to the Administrator to substantiate the experience qualifications for the mechanic certificate and rating sought.

§ 24.22 *Ratings.* The following mechanic ratings shall be issued:

(a) Airframe;

(b) Powerplant; and

(c) Airframe and powerplant.

#### MECHANICAL KNOWLEDGE, EXPERIENCE, AND SKILL REQUIREMENTS

§ 24.30 *Mechanical knowledge.* An applicant for a mechanic certificate with airframe or powerplant rating shall successfully accomplish a written and oral examination prescribed by the Administrator covering the construction, maintenance, repair, and inspection of aircraft appropriate to the rating sought, the provisions of this part, the applicable provisions of Parts 18 and 43 of this subchapter, and the provisions of Civil Aeronautics Manual 18. The basic principles covering the maintenance, installation, and inspection of propellers shall be included in the powerplant examination.

§ 24.31 *Mechanical experience.* An applicant for a mechanic certificate with either an airframe or powerplant rating shall have had at least 18 months of practical experience with the applicable procedures, practices, material, tools, machine tools, and equipment generally used in the construction, inspection, maintenance, repair, and alteration of airframes or of powerplants including propellers: *Provided,* That an applicant for an airframe and powerplant rating may be issued such rating, if he has performed concurrently the duties appropriate to both airframe and powerplant ratings for at least 30 months.

§ 24.32 *Graduates of certificated mechanic schools.* A graduate of a certificated mechanic school shall be deemed to have met the experience requirements of this part for a rating if, within 60 days after graduation, he presents an appropriate certificate of graduation: *Provided,* That when a graduate because of unanticipated circumstances is unable to present his certificate within such period, the Administrator, upon receipt of proof to that effect, may extend the 60-day period.

§ 24.33 *Mechanical skill.* An applicant for a mechanic certificate with a particular rating shall, in a manner prescribed by the Administrator, demonstrate his competency to maintain, repair, inspect, and alter any part of an aircraft for which a rating is sought. An applicant's ability to satisfactorily accomplish minor repairs and minor alterations to propellers shall be a part of such demonstration of competency for the powerplant rating.

#### PRIVILEGES AND LIMITATIONS OF A MECHANIC CERTIFICATE

§ 24.40 *Mechanic privileges; general.* A certificated mechanic may perform or supervise the maintenance, repair, inspection, and alteration of an aircraft, or component thereof, for which he is rated, and may perform additional work in accordance with the privileges and limitations stated in §§ 18.10, 18.11, 18.12, 24.41, 24.42, and 24.43 of this subchapter: *Provided,* That he shall not supervise the maintenance, repair, inspection, or alteration of or return to service any part of an aircraft for which he is rated unless he has previously performed the particular operation involved in a satisfactory manner or has otherwise established his competency to perform such operation.

§ 24.41 *Airframe rating.* A certificated mechanic with an airframe rating may release the airframe, or any component thereof, for service after he has performed, supervised, or inspected maintenance, minor repair, or minor alteration thereon. In addition, he may perform the 100-hour inspection required by Part 43 of this subchapter on an airframe, or any component thereof, and may return the same to service.

§ 24.42 *Powerplant rating.* A certificated mechanic with a powerplant rating may perform maintenance, minor repairs, or minor alterations to a propeller, and may release the powerplant or propeller, or any component thereof, for service after he has performed, supervised, or inspected maintenance, minor repair, or minor alteration thereon. In addition, he may peform the 100-hour inspection required by Part 43 of this subchapter on a powerplant or propeller, or any component thereof, and may release the same to service.

§ 24.43 *Airframe and powerplant ratings.* (a) A certificated mechanic holding both airframe and powerplant ratings and having such other qualifications as the Administrator may deem appropriate, when issued an inspection authorization by the Administrator under paragraph (b) of this section, may:

(1) Inspect and return to service aircraft or aircraft components thereof (excluding aircraft operated in accordance with the provisions of Part 40 or Part 41 of this subchapter, or aircraft of more than 12,500 pounds maximum certificated take-off weight when operated in accordance with the provisions of Part 42 of this subchapter) after major repairs and major alterations have been made in accordance with the provisions of Part 18 of this subchapter; and

(2) Perform the periodic, and perform or supervise the progressive inspections required by Part 43 of this subchapter. The activities conducted under authority of this subparagraph shall be in accordance with procedures and standards prescribed by the Administrator.

(b) The Administrator shall issue an appropriate, written inspection authorization to any person qualified under paragraph (a) of this section who shall apply therefor in a manner and form specified by the Administrator.

#### OPERATING RULES

§24.50 *General.* A certificated mechanic shall not exercise the privileges of his certificate and rating unless he is familiar with the current manufacturers' instructions and the maintenance manuals pertinent to the particular operation to be performed.

§ 24.51 *Recent experience requirements.* A certificated mechanic shall not exercise the privileges of his certificate and ratings unless, within the preceding 24 months he has either:

(a) Been found competent by an authorized representative of the Administrator, or

(b) For at least 6 months during the preceding 24-month period:

(1) Served as a mechanic under the terms of his certificate and ratings, or

(2) Been engaged in the technical supervision of mechanics, or

(3) Been engaged in the executive supervision of maintenance, repair, or alteration of aircraft, or

(4) Been engaged in any combination of subparagraphs (1), (2), and (3) of this paragraph.

### SUBPART B—REPAIRMAN CERTIFICATES

#### CERTIFICATION RULES

§ 24.100 *Classification.* There is hereby established a classification of airman, known as a "repairman," who:

(a) Possesses special qualifications to perform inspection, maintenance, overhaul, or repair of aircraft, aircraft engines, propellers, or appliances;

(b) Is employed by a certificated repair station or an appropriately certificated air carrier for a particular job requiring such special qualifications; and

(c) Is recommended for certification by such employer to the Administrator or his authorized representative.

§ 24.101 *Issuance.* A repairman certificate may be issued by the Administrator or his authorized representative to an individual who is found to meet the requirements of this subpart and who has been recommended for such certification by the certificated repair station or appropriately certificated air carrier by whom he is employed.

§ 24.102 *Duration.* A repairman certificate shall be valid until the termination of the holder's employment by the recommending repair station or air carrier, or relief of the repairman from the particular duties for which he was employed and certificated, whichever shall first occur, unless it is sooner suspended, revoked, or otherwise terminated by the Board, after which it shall be returned to the Administrator.

§ 24.103 *Display.* The repairman certificate shall be kept readily available by the repairman at all times while exercising the privileges of such certificate, and it shall be available for inspection by an authorized representative of the Administrator or the Board, or by any authorized State or local law enforcement officer.

§ 24.104 *Identification.* The holder of a certificate issued under the provisions of this subpart shall not, except while engaged in operations conducted by a scheduled air carrier, exercise the privileges conferred by the certificate unless he has readily available a current airman identification card or other identification card acceptable to the Administrator which duly describes him. The airman identification card may be obtained from the Administrator who shall prescribe its form and the manner of applying for it.

§ 24.105 *Change of address.* Within 30 days after any change in the permanent mailing address of a holder of a repairman certificate, the holder shall notify the Administrator in writing of such change. Such notice shall be mailed to the Administrator of Civil Aeronautics, Attention Airman Records Branch, Washington 25, D. C.

#### GENERAL CERTIFICATE REQUIREMENTS

§ 24.110 *Citizenship.* An applicant for a repairman certificate may be a citizen of any country or a person without nationality.

§ 24.111 *Age.* An applicant shall be at least 18 years of age.

§ 24.112 *Education.* An applicant shall be able to read, write, speak, and understand the English language: *Provided,* That if an applicant is employed outside of the United States by an appropriately certificated United States air carrier or a certificated repair station, such applicant shall not be required to meet this requirement, and in that event his certificate shall be appropriately endorsed by the Administrator, or the authorized representative of the Administrator who issued the certificate.

#### EXPERIENCE AND SKILL REQUIREMENTS

§ 24.120 *General.* The repair station or air carrier by whom the applicant is or will be employed shall certify to the satisfaction of the Administrator or his authorized representative that the applicant is competent to perform the duties of inspection, maintenance, overhaul, or repair of the particular aircraft, aircraft engines, propellers, or appliances with respect to which he is to be employed.

§ 24.121 *Minimum experience.* The applicant shall have had at least 18 months of practical experience with the procedures, practices, inspection methods, materials, tools, machine tools, and equipment generally used in the inspection, maintenance, overhaul, or repair functions of the particular job for which he is to be employed and certificated.

#### PRIVILEGES AND LIMITATIONS OF A REPAIRMAN CERTIFICATE

§ 24.130 *General.* A certificated repairman may supervise or perform the inspection, maintenance, overhauling, or repair of aircraft, aircraft engines, propellers, or appliances in connection with the particular job for which he was employed and certificated. Such privileges may be exercised only in connection with such duties with the certificated repair station or appropriately certificated air carrier by whom he was recommended and employed.

#### OPERATING RULES

§ 24.140 *General.* A certificated repairman shall not exercise the privileges of his certificate unless he is familiar

both with current manufacturers' or appropriate air carriers' instructions and the maintenance manuals pertinent to the particular operation to be performed.

NOTE: Specific record or reporting requirements subsequently prescribed will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

# TITLE 16—COMMERCIAL PRACTICES

## Chapter I—Federal Trade Commission

[Docket 6512]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

CENU FIBRES, LTD., ET AL.

Subpart—*Misbranding or mislabeling:* § 13.1190 *Composition:* Wool Products Labeling Act; § 13.1212 *Formal regulatory and statutory requirements:* Wool Products Labeling Act; § 13.1325 *Source or origin:* Maker or seller, etc.: *Wool Products Labeling Act.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 13.1845 *Composition:* Wool Products Labeling Act; § 13.1852 *Formal regulatory and statutory requirements:* Wool Products Labeling Act; § 13.1900 *Source or origin:* Wool Products Labeling Act: *Maker or seller, etc.*[1]

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, secs. 2–5, 54 Stat. 1128–1130; 15 U. S. C. 45, 68–68c) [Cease and desist order, Cenu Fibres, Ltd., et al., New York, N. Y., Docket 6512, June 16, 1956]

*In the Matter of Cenu Fibres, Ltd., a Corporation, and Philip Hausfeld, Individually and as an Officer of Said Corporation*

This proceeding was heard by a hearing examiner on the complaint of the Commission—charging a corporate manufacturer and its responsible officer, with principal place of business in New York City, with misbranding wool fabrics in violation of the Wool Products Labeling Act, through failing to attach tags, labels, etc., bearing information as required by the act—and an agreement containing consent order to cease and desist.

On this basis, the hearing examiner made his initial decision and order to cease and desist which, by order of June 15, 1956, became, on June 16, the decision of the Commission.

The order to cease and desist is as follows:

*It is ordered,* That Respondents Cenu Fibres, Ltd., a corporation, and Philip Hausfeld, individually and as an officer of said corporation, and Respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction or manufacture for introduction into commerce, or offering for sale, sale, transportation or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act and the Wool Products Labeling Act of 1939, of any "wool products" as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain, or in any way are represented as containing "wool", "reprocessed wool" or "reused wool" as those terms are defined in said Act, do forthwith cease and desist from misbranding such products by:

Failing to securely affix to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner:

(a) The percentage of the total fiber weight of such wool products, exclusive of ornamentation not exceeding five percentum of said total fiber weight, of (1) wool, (2) reprocesed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more, and (5) the aggregate of all other fibers;

(b) The maximum percentage of the total weight of such wool products of any non-fibrous loading, filling, or adulterating matter;

(c) The name or the registered identification number of the manufacturer of such wool products or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivery for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939;

*Provided,* That the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939, and

*Provided further,* That nothing contained in this order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

By "Decision of the Commission", etc., report of compliance was required as follows:

*It is ordered,* That respondents Cenu Fibres, Ltd., a corporation, and Philip Hausfeld, individually and as an officer of said corporation, shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: June 15, 1956.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

[F. R. Doc. 56-5195; Filed, June 29, 1956; 8:48 a. m.]

[Docket 6489]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

NATIONAL FIRE SAFETY COUNSELLORS ET AL.

Subpart—*Coercing and intimidating:* § 13.350 *Customers or prospective customers:* To purchase, make payment, or support product or service: *By utilizing scare tactics.*[1] Subpart—*Misrepresenting oneself and goods*—Business status, advantages or connections: § 13.1425 *Government connection;* § 13.1430 *Government indorsement, sanction or sponsorship;* § 13.1490 *Nature, in general;* [*Misrepresenting oneself and goods*]—Goods: § 13.1663 *Individual's special selection or situation;* § 13.1760 *Terms and conditions;* [*Misrepresenting oneself and goods*]—Prices: § 13.1778 *Additional costs unmentioned.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 13.1882 *Prices;*[1] § 13.1905 *Terms and conditions.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, National Fire Safety Counsellors et al., Irvington, N. J., Docket 6489, June 12, 1956]

*In the Matter of National Fire Safety Counsellors, a Corporation, and Robert L. Berko and Howard Berko, Individually and as Officers of Said Corporation*

This proceeding was heard by a hearing examiner on the complaint of the Commission—charging a corporation and its officers, with place of business in Irvington, N. J., engaged in the sale through house-to-house canvassers of a fire detection or fire alarm system for homes, with representing falsely that their salesmen were connected with the Federal Government or a civic organization, that they were only demonstrators, and desired to make fire prevention talks or demonstrations; that prospects and their homes were specially selected for demonstration purposes; that the total cost of the system would be little more than the credit allowed for supplying names of other prospects, and that demonstrations in the homes of referred prospects were not necessary before such credit was given; that the contract or promissory note for the purchase price would not be discounted and that carrying charges would not be added to the total cost; and that newspaper clippings or horror pictures of fire fatalities represented what the prospect could expect in his home if he did not purchase the system—and an agreement between the parties providing for entry of a consent order.

On this basis, the hearing examiner made his initial decision and order to cease and desist, which, on June 12, 1956, became the decision of the Commission.

The order to cease and desist is as follows:

*It is ordered,* That the respondents National Fire Safety Counsellors, a corporation, its officers, agents, representatives and employees, and Robert L. Berko and Howard Berko, individually and as officers of said corporation, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of fire detection or fire alarm systems, do forthwith cease and desist from representing, directly or by implication:

1. That respondents or any of their salesmen or employees are in any way connected with, or endorsed or approved by, the United States Government, any state Government, or any civic association;

2. That respondents' salesmen only desire to make fire prevention talks or demonstrations;

3. That respondents' representatives are not salesmen but are only demonstrators;

4. That prospective purchasers have been specially selected, or that their homes have been selected for demonstration purposes;

5. That the total cost or the cost per month of their fire detection device or fire alarm system is any less than the actual cost, without reference to credit for referrals;

6. That no demonstrations in the homes of referred prospective customers are necessary before credit is given to the supplier of said referrals;

7. That the identity of those supplying names of prospective purchasers will not be revealed to said prospective purchasers;

8. That the contract or promissory note for the purchase price of the system will not be discounted or failing to reveal that such will be discounted;

9. That carrying charges will not be added to the total cost of the system or failing to reveal that carrying charges will be added;

10. That newspaper clippings or horror pictures of fire fatalities represent what the prospective purchaser may expect in his home if he does not purchase respondents' products, or otherwise utilize such scare tactics to induce the purchase of respondents' products.

By "Decision of the Commission," etc., report of compliance was required as follows:

*It is ordered,* That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: June 12, 1956.

By the Commission.

# TITLE 19—CUSTOMS DUTIES

## Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 54120]

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

EXAMINATION OF PUREBRED DOGS AND CATS

The Department of Agriculture has requested that customs officers at all ports of first customs arrival in the United States be authorized to take the descriptions of purebred dogs and cats for which free entry is likely to be requested under paragraph 1606, Tariff Act of 1930, as amended, in cases where animals arrive by plane, whether or not the animals are accompanied by the owner.

Accordingly § 10.70 (c) of the Customs Regulations is hereby amended by deleting "coast or border" from the first sentence and by inserting a new sentence preceding the citation of authority as follows: "At all airports, customs officers shall make the examination of dogs and cats, whether or not accompanied by the owners, if there is no inspector of the Department of Agriculture stationed there or on duty at the time of arrival."

(R. S. 161, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 1624. Interprets or applies sec. 201 (par. 1606), 46 Stat. 672, as amended; 19 U. S. C. 1201 (par. 1606))

[SEAL] RALPH KELLY, *Commissioner of Customs.*

Approved: June 22, 1956.

DAVID W. KENDALL, *Acting Secretary of the Treasury.*

# TITLE 26—INTERNAL REVENUE, 1954

## Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter A—Income Tax

[T. D. 6186]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

SCHOLARSHIPS AND FELLOWSHIP GRANTS

On September 29, 1955, notice of proposed rule making regarding the regulations for taxable years beginning after December 31, 1953, and ending after August 16, 1954, under section 117 of the Internal Revenue Code of 1954, was published in the FEDERAL REGISTER (20 F. R. 7257). After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the following regulations are hereby adopted:

Sec.
1.117 Statutory provisions; scholarships and fellowship grants.
1.117–1 Exclusion of amounts received as a scholarship or fellowship grant.
1.117–2 Limitations.
1.117–3 Definitions.
1.117–4 Items not considered as scholarships or fellowship grants.

AUTHORITY: §§ 1.117 to 1.117–4, issued under sec. 7805, 68A Stat. 917; 26 U. S. C. 7805.

§ 1.117 *Statutory provisions; scholarships and fellowship grants.*

SEC. 117. *Scholarships and fellowship grants*—(a) *General rule.* In the case of an individual, gross income does not include—

(1) Any amount received—

(A) As a scholarship at an educational institution (as defined in section 151 (e) (4)), or

(B) As a fellowship grant,

including the value of contributed services and accommodations; and

(2) Any amount received to cover expenses for—

(A) Travel,
(B) Research,
(C) Clerical help, or
(D) Equipment,

which are incident to such a scholarship or to a fellowship grant, but only to the extent that the amount is so expended by the recipient.

(b) *Limitations*—(1) *Individuals who are candidates for degrees.* In the case of an individual who is a candidate for a degree at an educational institution (as defined in section 151 (e) (4)), subsection (a) shall not apply to that portion of any amount received which represents payment for teaching, research, or other services in the nature of part-time employment required as a condition to receiving the scholarship or the fellowship grant. If teaching, research, or other services are required of all candidates (whether or not recipients of scholarships or fellowship grants) for a particular degree as a condition to receiving such degree, such teaching, research, or other services shall not be regarded as part-time employment within the meaning of this paragraph.

(2) *Individuals who are not candidates for degrees.* In the case of an individual who is not a candidate for a degree at an educational institution (as defined in section 151 (e) (4)), subsection (a) shall apply only if the condition in subparagraph (A) is satisfied and then only within the limitations provided in subparagraph (B).

(A) *Conditions for exclusion.* The grantor of the scholarship or fellowship grant is an organization described in section 501 (c) (3) which is exempt from tax under section 501 (a), the United States, or an instrumentality or agency thereof, or a State, a Territory, or a possession of the United States, or any political subdivision thereof, or the District of Columbia.

(B) *Extent of exclusion.* The amount of the scholarship or fellowship grant excluded under subsection (a) (1) in any taxable year shall be limited to an amount equal to $300 times the number of months for which the recipient received amounts under the scholarship or fellowship grant during such taxable year, except that no exclusion shall be allowed under subsection (a) after the recipient has been entitled to exclude under this section for a period of 36 months (whether or not consecutive) amounts received as a scholarship or fellowship grant while not a candidate for a degree at an educational institution (as defined in section 151 (e) (4)).

§ 1.117–1 *Exclusion of amounts received as a scholarship or fellowship grant*—(a) *In general.* Any amount received by an individual as a scholarship at an educational institution or as a fellowship grant, including the value of contributed services and accommodations, shall be excluded from the gross income of the recipient, subject to the limitations set forth in section 117 (b) and § 1.117–2. The exclusion from gross income of an amount which is a scholarship or fellowship grant is controlled solely by section 117. Accordingly, to the extent that a scholarship or a fellowship grant exceeds the limitations of section 117 (b) and § 1.117–2, it is includible in the gross income of the recipient notwithstanding the provisions of section 102 relating to exclusion from gross income of gifts, or section 74 (b) relating to exclusion from gross income of certain prizes and awards. For definitions see § 1.117–3.

(b) *Exclusion of amounts received to cover expenses.* (1) Subject to the limitations provided in subparagraph (2) of this paragraph, any amount received by an individual which is specifically designated to cover expenses for travel (including meals and lodging while traveling and an allowance for travel of the

individual's family), research, clerical help, or equipment, is excludable from gross income provided that such expenses are incident to a scholarship or fellowship grant which is excludable from gross income under section 117 (a) (1). If, however, only a portion of a scholarship or fellowship grant is excludable from gross income under section 117 (a) (1) because of the part-time employment limitation contained in section 117 (b) (1) or because of the expiration of the 36 month period described in section 117 (b) (2) (B), only the amount received to cover expenses incident to such excludable portion is excludable from gross income. The requirement that these expenses be incident to the scholarship or the fellowship grant means that the expenses of travel, research, clerical help, or equipment, must be incurred by the individual in order to effectuate the purpose for which the scholarship or the fellowship grant was awarded.

(2) The exclusion provided under subparagraph (1) of this paragraph is applicable only to the extent that the amount received for travel, research, clerical help, or equipment, is actually expended for such expenses by the recipient during the term of the scholarship or fellowship grant and within a reasonable time before and after such term.

(3) The portion of any amount received to cover the expenses described in subparagraph (1) of this paragraph which is not actually expended for such expenses within the exclusion period described in subparagraph (2) of this paragraph shall, if not returned to the grantor within this period, be included in the gross income of the recipient for the taxable year in which such exclusion period expires.

§ 1.117–2 *Limitations*—(a) *Individuals who are candidates for degrees*—(1) *In general.* Under the limitations provided by section 117 (b) (1) in the case of an individual who is a candidate for a degree at an educational institution, the exclusion from gross income shall not apply (except as otherwise provided in subparagraph (2) of this paragraph) to that portion of any amount received as payment for teaching, research, or other services in the nature of part-time employment required as a condition to receiving the scholarship or fellowship grant. Payments for such part-time employment shall be included in the gross income of the recipient in an amount determined by reference to the rate of compensation ordinarily paid for similar services performed by an individual who is not the recipient of a scholarship or a fellowship grant. A typical example of employment under this subparagraph is the case of an individual who is required, as a condition to receiving the scholarship or the fellowship grant, to perform part-time teaching services. A requirement that the individual shall furnish periodic reports to the grantor of the scholarship or the fellowship grant for the purpose of keeping the grantor informed as to the general progress of the individual shall not be deemed to constitute the performance of services in the nature of part-time employment.

(2) *Exception.* If teaching, research, or other services are required of all candidates (whether or not recipients of scholarships or fellowship grants) for a particular degree as a condition to receiving the degree, such teaching, research, or other services on the part of the recipient of a scholarship or fellowship grant who is a candidate for such degree shall not be regarded as part-time employment within the meaning of this paragraph. Thus, if all candidates for a particular education degree are required, as part of their regular course of study or curriculum, to perform part-time practice teaching services, such services are not to be regarded as part-time employment within the meaning of this paragraph.

(b) *Individuals who are not candidates for degrees*—(1) *Conditions for exclusion.* In the case of an individual who is not a candidate for a degree at an educational institution, the exclusion from gross income of an amount received as a scholarship or a fellowship grant shall apply (to the extent provided in subparagraph (2) of this paragraph) only if the grantor of the scholarship or the fellowship grant is an organization described in section 501 (c) (3) which is exempt from tax under section 501 (a), the United States, or an instrumentality or agency thereof, or a State, a Territory, or a possession of the United States, or any political subdivision thereof, or the District of Columbia.

(2) *Extent of exclusion.* (i) In the case of an individual who is not a candidate for a degree, the amount received as a scholarship or a fellowship grant which is excludable from gross income under section 117 (a) (1) shall not exceed an amount equal to $300 times the number of months for which the recipient received amounts under the scholarship or fellowship grant during the taxable year. In determining the number of months during the period for which the recipient received amounts under a scholarship or fellowship grant, computation shall be made on the basis of whole calendar months. A whole calendar month means a period of time terminating with the day of the succeeding month numerically corresponding to the day of the month of its beginning, less one, except that if there be no corresponding day of the succeeding month the period terminates with the last day of the suceeding month. For purposes of this computation a fractional part of a calendar month consisting of a period of time including 15 days or more shall be considered to be a whole calendar month and a fractional part of a calendar month consisting of a period of time including 14 days or less shall be disregarded. For example, if an individual receives a fellowship grant on September 13 which is to expire on June 12 of the following year, the grant shall be considered to have extended for a period of 9 months. If in the preceding example the grant expired on June 27, instead of June 12, the grant shall be considered to have extended for a period of 10 months.

(ii) No exclusion shall be allowed under section 117 (a) (1) to an individual who is not a candidate for a degree after the recipient has, as an individual who is not a candidate for a degree, been entitled to an exclusion under that section for a period of 36 months. This limitation applies if the individual has received any amount which was either excluded or excludable from his gross income under section 117 (a) (1) for any prior 36 months, whether or not consecutive. For example, if the individual received a fellowship grant of $7,200 for 3 years (which he elected to receive in 36 monthly installments of $200), his exclusion period would be exhausted even though he did not in any of the 36 months make use of the maximum exclusion. Accordingly, such individual would be entitled to no further exclusion from gross income with respect to any additional grants which he may receive as an individual who is not a candidate for a degree.

(iii) If an individual who is not a candidate for a degree receives amounts from more than one scholarship or fellowship grant during the taxable year, the total amounts received in the taxable year shall be aggregated for the purpose of computing the amount which may be excludable from gross income for such taxable year. If amounts are received from more than one scholarship or fellowship grant during the same month or months within the taxable year, such month or months shall be counted only once for the purpose of determining the number of months for which the individual received such amounts under the scholarships or fellowship grants during the taxable year. For example, if an individual receives a fellowship grant from one source for the months of January to June of the taxable year and also receives a fellowship grant from another source for the months of March through December of the same taxable year, he shall be considered to have received amounts for 12 months of the taxable year. See example (4) in subparagraph (3) for further illustration.

(3) *Examples.* The application of this paragraph may be further illustrated by the following examples, it being assumed that in each example the grantor is a grantor who is described in section 117 (b) (2) (A) and subparagraph (1) of this paragraph:

*Example (1).* B, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant in March 1955. The grant is to commence on September 1, 1955, and is to end on May 31, 1956, so that it will extend over a period of 9 months. The amount of the fellowship grant is $4,500 and B receives this amount in monthly installments of $500 on the first day of each month commencing September 1, 1955. During the taxable year 1955, B receives a total of $2,000 with respect to the 4-month period September through December, inclusive. He may exclude $1,200 from gross income in the taxable year 1955 ($300 X 4) and must include the remaining $800 in gross income for that year. For the year 1956, he will exclude $1,500 ($300 X 5) from gross income with respect to the $2,500 which he receives in that year and must include in gross income $1,000.

*Example (2).* Assume the same taxpayer as in example (1) except that B receives the full amount of the grant ($4,500) on September 1, 1955. Since the amount received in the taxable year 1955 is for the full term of the fellowship grant (9 months), B may exclude $2,700 ($300 X 9) from gross income for the taxable year 1955. The remaining $1,800 must be included in gross income for that year.

*Example (3).* C, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant in March 1955. The amount of the grant is $4,500 for a period commencing on September 1, 1955, and ending 24 months thereafter. C receives the full amount of the grant on September 1, 1955. C may exclude from gross income for the taxable year 1955, the full amount of the grant ($4,500) since this amount does not exceed an amount equal to $300 times the number of months (24) for which he received the amount of the grant during that taxable year.

*Example (4).* (i) F, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant (Grant A) for two years commencing June 1, 1955, in the amount of $4,800. He elects to receive his grant in monthly installments of $200 commencing June 1, 1955. On March 1, 1956, F is awarded another post-doctorate fellowship grant (Grant B) for two years commencing September 1, 1956, in the amount of $7,200. He elects to receive this grant in monthly installments of $300 commencing September 1, 1956.

(ii) For the calendar year 1955, F receives $1,400 from Grant A which he is entitled to exclude from gross income since it does not exceed an amount equal to $300 times the number of months (7) for which he received amounts under the grant in the taxable year.

(iii) For the calendar year 1956, F receives $3,600 as the aggregate of amounts received under fellowship grants ($2,400 from Grant A and $1,200 from Grant B). F will be entitled to exclude the entire amount of $3,600 from gross income for the calendar year 1956 since such amount does not exceed an amount equal to $300 times the number of months (12) for which he received amounts under the grants in the taxable year.

(iv) For the calendar year 1957, F receives $4,600 as the aggregate of amounts received under fellowship grants ($1,000 from Grant A and $3,600 from Grant B). F will be entitled to exclude $3,600 ($300 × 12) from gross income for the calendar year 1957 and he will have to include $1,000 in gross income.

(v) For the calendar year 1958, F receives $2,400 from Grant B. F is entitled to exclude $1,500 ($300 × 5) from gross income for the calendar year 1958 and he will have to include $900 in gross income. While F receives amounts under fellowship Grant B for 8 months during the calendar year 1958, he is limited to an amount equal to $300 times 5 (months) because of the fact that he has already been entitled to exclude (and has in fact excluded) amounts received as a fellowship grant for a period of 31 months. Accordingly, he can only exclude amounts received under the fellowship grant for 5 months during the calendar year 1958, because of the 36-month limitation period. The fact that he was entitled to exclude only $1,400 ($200 a month for 7 months) instead of the maximum amount of $2,100 ($300 × 7) in 1955, is immaterial and the limitation period of 36 months is applicable.

(vi) The following chart illustrates the computation of the number of months for which F received amounts under the fellowship grants during the respective taxable years and the computation of the total amounts received under the fellowship grants during each taxable year:

| Period for which received and source | Number of months | Amounts received |
|---|---|---|
| 1955: | | |
| June 1 to December 31 | 7 | |
| Grant A | | $1,400 |
| Grant B | | None |
| Aggregate | 7 | 1,400 |
| 1956: | | |
| January 1 to August 31 | 8 | |
| Grant A | | 1,600 |
| Grant B | | None |
| September 1 to December 31 | 4 | |
| Grant A | | 800 |
| Grant B | | 1,200 |
| Aggregate | 12 | 3,600 |
| 1957: | | |
| January 1 to May 31 | 5 | |
| Grant A | | 1,000 |
| Grant B | | 1,500 |
| June 1 to December 31 | 7 | |
| Grant A | | None |
| Grant B | | 2,100 |
| Aggregate | 12 | 4,600 |
| 1958: | | |
| January 1 to August 31 | 8 | |
| Grant A | | None |
| Grant B | | 2,400 |
| Aggregate | 8 | 2,400 |

§ 1.117–3 *Definitions*—(a) *Scholarship.* A scholarship generally means an amount paid or allowed to, or for the benefit of, a student, whether an undergraduate or a graduate, to aid such individual in pursuing his studies. The term includes the value of contributed services and accommodations (see paragraph (d) of this section) and the amount of tuition, matriculation, and other fees which are furnished or remitted to a student to aid him in pursuing his studies. The term also includes any amount received in the nature of a family allowance as a part of a scholarship. However, the term does not include any amount provided by an individual to aid a relative, friend, or other individual in pursuing his studies where the grantor is motivated by family or philanthropic considerations. If an educational institution maintains or participates in a plan whereby the tuition of a child of a faculty member of such institution is remitted by any other participating educational institution attended by such child, the amount of the tuition so remitted shall be considered to be an amount received as a scholarship.

(b) *Educational institution.* For definition of "educational institution" section 117 adopts the definition of that term which is prescribed in section 151 (e) (4). Accordingly, for purposes of section 117 the term "educational institution" means only an educational institution which normally maintains a regular faculty and curriculum and normally has a regularly organized body of students in attendance at the place where its educational activities are carried on. See section 151 (e) (4) and regulations thereunder.

(c) *Fellowship grant.* A fellowship grant generally means an amount paid or allowed to, or for the benefit of, an individual to aid him in the pursuit of study or research. The term includes the value of contributed services and accommodations (see paragraph (d) of this section) and the amount of tuition, matriculation, and other fees which are furnished or remitted to an individual to aid him in the pursuit of study or research. The term also includes any amount received in the nature of a family allowance as a part of a fellowship grant. However, the term does not include any amount provided by an individual to aid a relative, friend, or other individual in the pursuit of study or research where the grantor is motivated by family or philanthropic considerations.

(d) *Contributed services and accommodations.* The term "contributed services and accommodations" means such services and accommodations as room, board, laundry service, and similar services or accommodations which are received by an individual as a part of a scholarship or fellowship grant.

(e) *Candidate for a degree.* The term "candidate for a degree" means an individual, whether an undergraduate or a graduate, who is pursuing studies or conducting research to meet the requirements for an academic or professional degree conferred by colleges or universities. It is not essential that such study or research be pursued or conducted at an educational institution which confers such degrees if the purpose thereof is to meet the requirements for a degree of a college or university which does confer such degrees. A student who receives a scholarship for study at a secondary school or other educational institution is considered to be a "candidate for a degree."

§ 1.117–4 *Items not considered as scholarships or fellowship grants.* The following payments or allowances shall not be considered to be amounts received as a scholarship or a fellowship grant for the purpose of section 117:

(a) *Educational and training allowances to veterans.* Educational and training allowances to a veteran pursuant to the Servicemen's Readjustment Act of 1944 or the Veterans' Readjustment Assistance Act of 1952.

(b) *Allowances to members of the Armed Forces of the United States.* Tuition and subsistence allowances to members of the Armed Forces of the United States who are students at an educational institution operated by the United States or approved by the United States for their education and training, such as the United States Naval Academy and the United States Military Academy.

(c) *Amounts paid as compensation for services or primarily for the benefit of the grantor.* (1) Except as provided in § 1.117–2 (a), any amount paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research, if such amount represents either compensation for past, present, or future employment services or represents payment for services which are subject to the direction or supervision of the grantor.

(2) Any amount paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research primarily for the benefit of the grantor.

However, amounts paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research are considered to be amounts received as a scholarship or fellowship grant for the purpose of section 117 if the primary purpose of the studies or research is to further the

education and training of the recipient in his individual capacity and the amount provided by the grantor for such purpose does not represent compensation or payment for the services described in subparagraph (1) of this paragraph. Neither the fact that the recipient is required to furnish reports of his progress to the grantor, nor the fact that the results of his studies or research may be of some incidental benefit to the grantor shall, of itself, be considered to destroy the essential character of such amount as a scholarship or fellowship grant.

[SEAL] O. GORDON DELK,
*Acting Commissioner of Internal Revenue.*

Approved: June 26, 1956.

DAN THROOP SMITH,
*Special Assistant to the Secretary in Charge of Tax Policy.*

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

Subchapter B—Carriers by Motor Vehicles

[Ex Parte No. MC-40]

PART 193—PARTS AND ACCESSORIES NECESSARY FOR SAFE OPERATION

RESERVOIRS REQUIRED

At a general session of the Interstate Commerce Commission held at its offices in Washington, D. C., on the 25th day of June A. D. 1956.

It appearing that by our order of May 21, 1956, in this proceeding as amended (21 F. R. 3797; 21 F. R. 4232) we prescribed additional brake regulations applying to combination vehicles, the said order to be effective June 30, 1956;

It further appearing that information has been furnished us by major suppliers of parts and accessories necessary for safe operation to the effect that valves necessary to enable motor carriers to comply with certain provisions of § 193.50 cannot be made available in sufficient quantity to permit compliance with that section on the effective date;

*It is ordered*, that § 193.50 *Reservoirs required* be, and it is hereby, amended by deleting the entire last sentence and substituting in lieu thereof the following: "In addition, on and after January 1, 1957, every truck-tractor and every truck used for towing other vehicles shall when equipped with air or vacuum reservoirs as required by this section, and regardless of date of manufacture, have such air or vacuum reservoirs so safeguarded by a check valve or equivalent device that in the event of failure or leakage in its connection to the source of compressed air or vacuum the air or vacuum supply in the reservoir shall not be depleted by the leak or failure."

Notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission, Washington, D. C., and by filing a copy thereof with the Director, Division of the Federal Register.

(49 Stat. 546, as amended; 49 U. S. C. 304)

By the Commission.

[SEAL] HAROLD D. MCCOY,
*Secretary.*

## TITLE 50—WILDLIFE

### Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter F—Alaska Commercial Fisheries

PART 105—ALASKA PENINSULA AREA

WEEKLY CLOSED PERIOD

*Basis and purpose.* Since the mid-week closed period in the Alaska Peninsula area will fall on the opening date for fishing, it has been determined that the following relaxation can be permitted without jeopardizing proper conservation.

Therefore, effective immediately upon publication in the FEDERAL REGISTER, § 105.5 is amended in paragraph (c) by deleting the dates "July 5" and "July 4" and substituting in lieu thereof "July 3" and "July 2" respectively.

(Sec. 1, 43 Stat. 464, as amended; 48 U. S. C. 221)

JOHN L. FARLEY,
*Director.*

JUNE 27, 1956.

# PROPOSED RULE MAKING

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### [ 26 CFR (1954) Part 1 ]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

INSURANCE CONTRACTS

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U. S. C. 7805).

[SEAL] O. GORDON DELK,
*Acting Commissioner of Internal Revenue.*

The following regulations for taxable years beginning after December 31, 1953, and ending after August 16, 1954, are hereby prescribed under section 264 of the Internal Revenue Code of 1954:

§ 1.264 *Statutory provisions; items not deductible; certain amounts paid in connection with insurance contracts.*

SEC. 264. *Certain amounts paid in connection with insurance contracts*—(a) *General rule.* No deduction shall be allowed for—

(1) Premiums paid on any life insurance policy covering the life of any officer or employee, or of any person financially interested in any trade or business carried on by the taxpayer, when the taxpayer is directly or indirectly a beneficiary under such policy.

(2) Any amount paid or accrued on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment, or annuity contract.

Paragraph (2) shall apply in respect of annuity contracts only as to contracts purchased after March 1, 1954.

(b) *Contracts treated as single premium contracts.* For purposes of subsection (a) (2), a contract shall be treated as a single premium contract—

(1) If substantially all the premiums on the contract are paid within a period of 4 years from the date on which the contract is purchased, or

(2) If an amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract.

§ 1.264-1 *Premiums on life insurance taken out in a trade or business*—(a) *When premiums are deductible.* Premiums paid by a taxpayer on a life insurance policy are not deductible from the taxpayer's gross income, even though they are trade or business expenses, if they are paid on a life insurance policy covering the life of any officer or employee of the taxpayer, or any person (including the taxpayer) who is financially interested in any trade or business carried on by the taxpayer, when the taxpayer is directly or indirectly a beneficiary of the policy. For additional provisions relating to the nondeductibility of premiums paid on life insurance policies (whether under section 162 or any other section of the Internal Revenue Code), see section 262, relating to personal, living, and family expenses, and section 265, relating to expenses allocable to tax-exempt income.

(b) *When taxpayer is a beneficiary.* If a taxpayer takes out a policy for the purpose of protecting himself from loss in the event of the death of the insured, the taxpayer is considered a beneficiary directly or indirectly under the policy. However, if the taxpayer is not a beneficiary under the policy, the premiums so paid will not be disallowed as deductions merely because the taxpayer may derive a benefit from the increased efficiency of

the officer or employee insured. See section 162 and the regulations thereunder. If a taxpayer insures his own life for the benefit of any person financially interested in any trade or business carried on by the taxpayer, the taxpayer is considered to be a beneficiary directly or indirectly under the policy. For example, a taxpayer is considered a beneficiary under a policy where he, as a principal member of a partnership, takes out an insurance policy on his own life irrevocably designating his partner as the sole beneficiary in order to induce his partner to retain his investment in the partnership. Whether or not the taxpayer is a beneficiary under such a policy, the proceeds of the policy paid by reason of the death of the insured may be excluded from gross income whether the beneficiary is an individual or a corporation, except in the case of (1) certain transferees, as provided in section 101 (a) (2); (2) portions of amounts of life insurance proceeds received at a date later than death under the provisions of section 101 (d); and (3) life insurance policy proceeds which are includible in the gross income of a husband or wife under section 71 (relating to alimony) or section 682 (relating to income of an estate or trust in case of divorce, etc.). (See section 101 (e).) For further reference, see, generally, section 101 and the regulations thereunder.

§ 1.264-2 *Single premium life insurance, endowment, or annuity contracts.* Amounts paid or accrued on indebtedness incurred or continued, directly or indirectly, to purchase or to continue in effect a single premium life insurance or endowment contract, or a single premium annuity contract purchased after March 1, 1954, are not deductible under section 163 or any other provision of chapter 1. This prohibition applies even though the insurance is not on the life of the taxpayer and regardless of whether or not the taxpayer is the annuitant or payee of such annuity contract. A contract is considered a single premium life insurance, endowment, or annuity contract, for the purposes of this section, if substantially all the premiums on the contract are paid within four years from the date on which the contract was purchased, or if an amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract.

[F. R. Doc. 56-5210; Filed, June 29, 1956; 8:50 a. m.]

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 927 ]

HANDLING OF MILK IN NEW YORK METROPOLITAN MARKETING AREA

AMENDMENT TO DECISION WITH RESPECT TO PROPOSED AMENDMENT TO TENTATIVE AGREEMENT AND ORDER, AS AMENDED, AND OPPORTUNITY TO FILE EXCEPTIONS

The decision issued on June 15, 1956, and published in the FEDERAL REGISTER on June 20, 1956 (21 F. R. 4317; F. R. Doc. 56-4848), relating to proposed amendment of the tentative agreement and the order, as amended, regulating the handling of milk in the New York metropolitan marketing area, is hereby amended as follows (references are to the FEDERAL REGISTER for June 20, 1956):

1. Delete the fifth paragraph beginning in the second column on page 4320 and substitute in lieu thereof the following: "A motion was filed by the Milk Dealers Association of Metropolitan New York and Sheffield Farms Co., Inc., to vacate and set aside so much of this decision as relates to issues number 2 and 4; to sever said issue number 2 from the other issues in this proceeding; and to issue a recommended decision as to issue number 2 and afford an opportunity to file exceptions thereto.

"The said motion is hereby denied insofar as it relates to the findings and conclusions of this decision with respect to the month of July 1956. The findings and conclusions herein are fully justified by the evidence in the hearing record and the proposed amendment is necessary to effectuate the policy of the act with respect to milk delivered by producers during the month of July 1956. Insofar as such findings and conclusions relate to periods beginning on and after August 1, 1956, this decision shall be considered a tentative decision and interested parties are hereby afforded an opportunity to file exceptions thereto. Such exceptions may be filed in quadruplicate with the Hearing Clerk, U. S. Department of Agriculture, Washington 25, D. C., not later than July 10, 1956."

2. Delete the first paragraph in the second column on page 4321, and insert in lieu thereof the following: *"Order relative to handling.* It is therefore ordered, that for the month of July 1956 the handling of milk in the New York metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:"

Filed at Washington, D. C., this 27th day of June 1956.

E. L. PETERSON,
*Acting Secretary.*

[F. R. Doc. 56-5235; Filed, June 29, 1956; 8:55 a. m.]

### [ 7 CFR Part 1000 ]

[Docket No. AO-266]

HANDLING OF MILK IN CHATTANOOGA, TENN., MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Chattanooga, Tennessee, May 17-25, 1955, pursuant to notice thereof which was issued on April 13, 1955 (20 F. R. 2525).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Agricultural Marketing Service, on February 7, 1956, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision in this proceeding. Said decision containing notice of opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on February 10, 1956 (21 F. R. 956).

Within the period reserved therefor, interested parties filed exceptions to certain of the findings, conclusions and actions recommended by the Deputy Administrator. In arriving at the findings, conclusions and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that findings, conclusions and actions decided upon herein are at variance with any of the exceptions, such exceptions are overruled.

To the extent that suggested findings and conclusions proposed by interested persons are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

The material issues of record related to:

1. Whether the handling of milk in the market is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products;

2. Whether marketing conditions justify the issuance of a marketing agreement or order; and

3. If an order is issued, what its provisions should be with respect to:

(a) The scope of regulation,

(b) The classification of milk,

(c) The level and method of determining class prices,

(d) The method to be used in distributing proceeds to producers, and

(e) Administrative provisions.

*Findings and conclusions.* Upon the evidence adduced at the hearing and the record thereof, it is hereby found and concluded that:

(1) *Character of commerce.* All milk which will be regulated under the proposed marketing agreement and order is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products.

The marketing area specified in the order proposed herein includes all the territory within three counties located in South-Eastern Tennessee. Within this area there is a continuous and substantial interstate commerce in the procurement of milk from producers and the sale of fluid milk and its products to consumers. Distributing plants located in Tennessee regularly deliver fluid milk products in Catoosa, Walker, Dade and five other counties in the State of Georgia. Likewise, distributing plants in such Georgia cities as Rossville and Chicka-

mauga regularly distribute fluid milk products in Hamilton, Bradley, Marion, Polk and Rhea Counties, all in the State of Tennessee, and DeKalb and Jackson Counties, in the State of Alabama. Thus, Chattanooga area handlers are in competition with each other across state lines, and with handlers located in other parts of Georgia and in Alabama as well, in the sale of milk and milk products at the wholesale and retail levels.

The record shows that producers supplying milk to plants in the marketing area are located in two counties in Alabama, three counties in Georgia, and eleven counties in Tennessee. Milk produced in these states is commingled in handlers' plants prior to being processed and sold throughout the areas described above. In addition, this general supply area is intermingled with that of Birmingham, Alabama and Atlanta, Georgia; and with that of the Knoxville, Tennessee, marketing area (which is regulated by Federal Order No. 88, as amended). Many producers supplying Chattanooga area handlers have the alternative of shipping milk to one or more of these markets, and some have so shifted their outlets in recent years.

Substantial quantities of such manufactured dairy products as cottage cheese and ice cream are distributed in the marketing area from sources located in more than one state. Ice cream and cottage cheese is distributed within the area after it is processed and manufactured in company-affiliated plants located in the Knoxville, Tennessee, market (a Federally-regulated area). Also, seasonal surpluses of locally produced Grade A milk are used in the manufacture of such dairy products as nonfat dry milk solids, which in turn are sold in competition with similar products manufactured in areas outside the State of Tennessee.

(2) *The need for regulation.* The marketing and pricing conditions in the Chattanooga, Tennessee, marketing area require the issuance of a Federal milk marketing agreement and order to establish and maintain orderly marketing conditions and effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended.

The problems encountered by producers in the Chattanooga marketing area are typical of those occurring in unregulated fluid milk markets where producers are unorganized or where producer cooperative associations have been unsuccessful in establishing effective bargaining relationships with handlers. The Federal milk marketing order proposed herein for Chattanooga, Tennessee, will implement the declared congressional policy of establishing and maintaining orderly marketing conditions by:

(a) Providing a regular and dependable method for determining minimum prices to producers at levels comparable to those contemplated under the act;

(b) Establishing uniform prices to handlers for milk received from producers according to a classification plan based on the use made of such milk by the handler;

(c) Providing an impartial audit of handlers' records of receipts and utilization to further insure uniform prices for milk purchased;

(d) Establishing uniform returns to producers supplying the area and insuring that the lower returns from the sale of reserve milk are shared equitably among all producers;

(e) Providing all producers with a means whereby the weighing and testing of their milk can be checked to insure accuracy;

(f) Establishing uniform rules for the operation of a market-wide base and excess plan that will (i) acquaint producers with the rules for establishing bases and determining base and excess prices; and (ii) encourage producers to modify seasonal fluctuations in the production of milk; and

(g) Providing market-wide information on the receipts, sales and other data relating to milk market problems in the area.

The hearing record reveals the chaotic marketing conditions in the Chattanooga area created by the wide variety of classification and pricing plans used by different distributors serving the area, the resultant lack of uniformity in prices paid producers for milk, and the ineffectiveness of the producers in protecting themselves against sharp cuts in producer prices during periods of milk price wars among distributors.

These local conditions were aggravated by the sale of milk purchased at distress prices by out-of-area distributors and sold in the proposed marketing area in competition with milk purchased from producers regularly supplying the market. Local handlers were forced to meet this competition by passing the effects of lower resale prices back to individual producers in the form of lower producer prices. The Chattanooga Area Milk Producers Association, the proponent cooperative association of producers in the marketing area, had to meet the situation by granting distributors buying from them price reductions, and by shifting increased quantities of displaced Grade A milk into lower-valued manufactured products. These actions have lowered prices to producers to the point where a continuous and adequate supply of pure and wholesome milk for the area is threatened. The classification and pricing plan of a Federal milk marketing order is the only available means of insuring the uniformity of payments for milk by handlers which is needed to restore and maintain orderly marketing conditions.

The variety of systems used by distributors in purchasing milk has created a wide variation in prices received by producers supplying handlers in and between parts of the marketing area. For a number of years prior to 1953, the producers' association stabilized local marketing conditions by supplying Chattanooga handlers with their daily requirements of Grade A milk and assuming the responsibility for handling any remaining surplus. However, this plan became inadequate by 1953 because (1) only a part of the local handlers supplying the area were under contract with the association and (2) increasing amounts of milk, some of it surplus to other areas, was being sold in the local area. Some handlers operating under contract with the association recognized the vulnerability of their marketing situation by at first refusing to renew their contracts that expired in 1954. They did sign a contract for another year, however, after (1) price concessions by producers and (2) assurances that the chaotic marketing conditions would be corrected locally, or steps taken to secure a Federal milk order to correct them. The classification and pricing plan of the attached order is the only available means of establishing uniform prices among handlers for milk received from producers according to the use made of such milk by each handler. This use-classification plan is equitable and will apply similarly to all handlers. To insure equity among handlers and full accountabiilty to producers, the use-classification plan must be supplemented by an impartial audit of handlers' records of receipts and utilization.

Much of the difference in prices realized by producers throughout the area arises because member-producers of the Chattanooga Area Milk Producers Association provide a major part of the reserve milk for the market and, consequently, carry the major burden of the lower prices realized from the sale of this milk in the form of manufactured dairy products. During 1953 and 1954 handlers participating in the association-operated market-wide pool used over 2 million pounds of other source milk in their operations. At the same time, the producers' association had to market as surplus over 23 million pounds of milk. The market-wide pooling provisions of the order proposed herein will provide a means of insuring uniform returns to producers and equitable sharing of the burden of providing the necessary quantities of reserve milk.

Many producers supplying handlers in parts of the marketing area have no effective means of insuring the accuracy of the weights and tests of their regular deliveries of producer milk. In addition, only part of the handlers in the market permit the auditing of their records for the purpose of establishing the accuracy of (1) the utilization of producer receipts according to a classification plan or (2) proportions of milk paid for as base and surplus under the base-surplus plan now in use in certain parts of the marketing area. Certain handlers, under contract to the association, permitted the association to audit the reports of receipts and utilization submitted to it by them. However, the scope of the audits and the number and size of the handlers involved precluded effective operation of the program. There is need for a Federal milk order to correct these inequities.

A substantial number of producers have no regular and dependable method for participating in the price determining decisions that govern the sale of their milk. Even the producers represented by the cooperative association have been unable to establish a satisfactory classification plan among handlers and protect themselves against the depressed prices resulting from the chaotic marketing conditions mentioned above. There is need for a Federal order to establish a complete and equitable classification plan that applies to all handlers, and to supplement this plan with a

formula for determining minimum prices to producers equivalent to those contemplated under the enabling act. Such prices, together with the classified-use plan of the attached order, should insure a sufficient quantity of pure and wholesome milk for the marketing area, protect the interests of producers, handlers and consumers, and be in the public interest.

Many of the marketing difficulties stem from a lack of complete and accurate information about the supply and demand for milk in the area. The Federal milk order proposed herein will make such information available to all interests in the market and will provide a reliable basis fordecisions on prices and other marketing problems encountered. The availability and dissemination of accurate market-wide information about the fluid milk market will tend to create confidence in the marketing system that does not exist under present conditions.

(3) *Order provisions*—(a) *Scope of regulation.* Federal milk orders achieve marketing and pricing stability by using techniques authorized by the Agricultural Marketing Agreement Act of 1937, as amended. Important among these techniques are the requirements that (1) regulated distributors (handlers) pay at least specified minimum prices to producers in accordance with a classified-use plan established in an order, and (2) these payments be distributed to each producer on a uniform basis through either an individual-handler pool or a market-wide pool. Under the circumstances, it is important to establish clearly which plants and which milk will be subject to all or part of the pricing provisions of the order and, in turn, which producers will participate in the distribution of returns through the market-wide pool. To identify such persons and to facilitate reference to them throughout the proposed order, such terms as "marketing area", "producer", "pool plant", "nonpool plant", "handler", "producer milk", and "other source milk" are defined and are used herein.

*Marketing area.* The Chattanooga, Tennessee, marketing area should be defined to include all of the territory within the boundaries of Hamilton, McMinn and Bradley Counties, all in the State of Tennessee.

Fluid milk products sold for consumption in this area must be approved by health authorities who are governed by health ordinances, practices and procedures generally patterned after the United States Public Health Service Milk Ordinance and Code. Within this defined area the health standards are substantially equal and are under the jurisdiction of operating health authorities. Furthermore, these authorities follow a general policy of reciprocity in administering their several ordinances. These conditions support the adoption of milk marketing regulations that are applied equally within the defined area.

Marketing areas, as defined in Federal milk orders, are designed to cover as nearly as is practicable, areas in which milk is sold to consumers rather than the areas where the milk may be produced. The proposed order would regulate distributing plants that are in substantial sales competition with one another within the defined marketing area. The cities of Chattanooga, Cleveland, East Ridge and Athens, Tennessee, are the major cities involved.

As pointed out earlier in the discussion on interstate commerce, plants located in Chattanooga encounter substantial competition in the sale of Class I products in the Tennessee counties included in the marketing area and in at least two counties in Georgia.

A group of handlers (and later the producers' association) proposed a marketing area larger than that included herein. Their proposal to include Dade, Walker and Catoosa Counties in Georgia in the marketing area was, at first, abandoned on the grounds that Order No. 1198 (Western Milkshed), issued by the Georgia Milk Control Board and made effective May 1, 1955, established minimum prices to producers and obviated the need for further regulation. Later, these parties asked for inclusion of the three counties because of the possibility that the Georgia Milk Control Board order might be withdrawn, and, as a consequence, several handlers operating in the area would be unregulated. Beyond protection against such a contingency, there is no condition existing in those counties that demonstrates a need for correction by issuance of this order. Accordingly, they are not included in the marketing area proposed herein.

Bledsoe, Meigs, Sequatchie, Marion and Rhea Counties also were proposed for inclusion in the area by the same group of handlers (and later by the association). These counties represent relatively minor sales outlets to the nine handlers who distribute about ninety percent of the milk sold in the eleven county area and who would be regulated by this order. For example, these handlers sell no milk in Bledsoe County; dispose of less than one percent of their total sales in Meigs County, 1.7 percent in Sequatchie County, 2.2 percent in Rhea County, and 2.4 percent in Marion County. Furthermore, these five counties are largely rural and the need for regulating sales in them, in order to make effective the regulation in the urban areas, was not established by the record.

The marketing area, as defined above, comprises the markets and the population centers in which milk is marketed by handlers encountering substantial competition with one another. It also is largely coextensive with the area in which marketing conditions are chaotic and unsettled for producers. Accordingly, it appears that the marketing area defined herein includes the territory which will minimize the problems of competition with unregulated distributors and at the same time regulate enough sales area to restore and maintain orderly marketing conditions for producer milk.

*Definitions of plants and milk to be subject to regulation.* The distributing plants located within the Chattanooga, Tennessee, marketing area dispose of the major portion of their milk receipts as fluid milk products. These "fluid milk products" are required to be made from milk produced in compliance with Grade A inspection requirements of the duly constituted health authorities having jurisdiction in the area. The minimum class prices of the order should apply to such milk which is received from dairy farmers at plants primarily and normally engaged in supplying fluid milk products for sale on retail and wholesale routes in the marketing area. Such plants are defined as "pool plants" and such milk is defined as "producer milk".

These definitions are designed to identify the supplies of milk upon which the market regularly and normally depends. However, under terms of the order proposed herein milk may be disposed of for Class I purposes in the marketing area by and from plants not meeting such criteria. It is necessary, therefore, to establish definitive standards of performance which may be used in determining which plants and which milk do, in fact, constitute the regular and normal supply, and thereby becomes fully subject to regulation.

Such standards should be clearly set forth in the order and apply uniformly to all plants, wherever located. Any plant, regardless of location, may bring itself under regulation by performing in the manner required. Any plant may relieve itself of regulation by no longer operating in a way that brings it within the scope of the order. Under the circumstances, the decision as to whether a plant will be fully regulated, partially regulated or entirely unregulated is determined by the decision of the plant operator.

Any milk sold in the marketing area must, of course, conform to the sanitary requirements imposed by the local health authorities. However, handlers may meet these requirements without becoming regular and dependable sources of supply for the market (their milk may have been obtained as a supplemental supply during periods of emergency or their sales may be a small portion of a primary distribution in some other area with which local health authorities have reciprocal agreements). Clearly, it is not possible to identify regular and normal supplies solely on the basis of sanitation requirements.

Neither is the shipment of milk to a marketing area for Class I utilization a practical basis for identifying the milk which should be fully regulated under the order. There are situations in which plant operators may find it economical or desirable to make shipments of small quantities of milk into a marketing area, and with respect to which it is neither necessary nor desirable in terms of effective regulation to bring the operators of such plants under full regulation. For instance, a plant which is associated with another market may find it advantageous to ship milk to a plant regulated by the order in order to have such milk converted into manufactured dairy products. It is quite possible, however, through misunderstanding, or from errors of estimating the utilization of milk, for milk intended for utilization in Class II products to be assigned a Class I classification. If through such

accident or misunderstanding a plant were placed completely under regulation, considerable hardship, unnecessary to effective regulation, might result.

Since neither health regulations nor the possibility that some milk from a plant may be used for Class I purposes in the marketing area provides an adequate measure of a plant's regular status in a market, the pool plant provisions must be based on regular performance. Such regular and substantial supplies are fully priced under the order and participate in the equalization pool.

As indicated elsewhere in this decision, market-wide pooling of producer returns is considered essential to the stable and orderly functioning of this market. Since a market-wide pool results in payment to all producers on an average utilization for the market, individual handlers are relieved of any responsibility for maintaining a high Class I utilization in order to support their pay rates to producers. Whatever utilization of milk a handler may have, his rate of pay to producers will be the same as that of all other handlers in the market because handlers whose proportion of utilization in Class I is greater than the market average, make payments into a producer-settlement fund, and those whose proportion of utilization in Class I is less than the average for the market receive payments out of the same fund. Thus, plants engaged primarily in the manufacture of milk into dairy products or in supplying other fluid markets have, under certain circumstances, an incentive to place their plants under regulation for the sole purpose of obtaining payments out of the producer-settlement fund. If a plant loses fluid sales in another area temporarily, it may seek to join a market pool in order to continue to pay farmers a blended price even though such milk is used in the lower-priced manufactured product uses. A manufacturing plant processing a specialty product for which a regular supply of Grade A milk is desired may seek to join a market pool in order to pay its producers the blended price for Grade A milk, although only a manufacturing value use for the milk is available. If such handlers are entirely free to decide when they will or will not share in the market pool, their decisions normally would be made to join the pool when they would draw payments from the equalization fund. Thus, it is possible that status with respect to the pool may become a determining factor in guiding a handler's operation. The Chattanooga market, however, would gain no advantage from the payment of equalization to such handlers. Such a distribution of equalization payments would, in fact, reduce the blend price to producers regularly supplying the market, thereby having an adverse effect on the milk supplies upon which the market depends. This could result in the need for higher Class I prices than would otherwise be required to supply the market adequately.

The scope of pooling or the rules for distributing the returns from Class I sales under the order, therefore, must be such that the differentials over manufacturing milk values paid by users of Class I milk will serve the purpose for which they are intended. The Class I milk price of the order is fixed at a level which exceeds the value of the milk for manufacturing uses. This premium, or differential, over the manufactured milk price is essential as an incentive to producers to supply milk of the quality and volume required by the market. Extra costs are involved in meeting the sanitary requirements relative to the maintenance of a dairy herd for the production of Grade A milk, in providing milk during the fall and winter months when feed and housing costs are high, in handling it through sanitary utensils and facilities, and in refrigerating and marketing it promptly.

The extra costs thus incurred by Grade A producers must be borne by that share of the milk which is marketed as Class I milk. Reserve or "surplus" milk, although an essential part of a fluid milk business, cannot be expected to return producers more than a manufactured milk value. The only outlet for reserve milk not needed for fluid use is in the form of manufactured products. Such products must be marketed in competition with similar products which can be and are made throughout the country from ungraded milk.

Since the production of high quality milk involves extra expenses, it is important that the amount produced be no more than the minimum necessary to provide the market with an adequate and dependable supply. To encourage unneeded production of such milk would represent an economic waste, since the expenditures involved in producing Grade A milk that is not an essential part of the market supply results in no extra value to consumers. Clearly then, one of the primary problems in setting up a market-wide pool is to establish standards which will provide for the sharing of Class I sales (Class I differentials) among the producers who are an essential and regular part of the milk supply for the marketing area.

Performance standards, therefore, should be such that any plant which has as its major function the supplying of milk to the market would pool its sales and share in the market-wide equalization. On the other hand, performance standards must be flexible enough to allow a plant primarily associated with the market to maintain its status under the changing conditions which occur from year to year, and yet not permit the distribution of equalization payments to plants not part of the essential supply. The performance standards herein provided are such that these objectives should be accomplished.

Because of the difference in marketing practices and in the demand for milk among distributing plants and supply plants, two sets of performance standards are provided. A "distributing plant" under the order would be defined (in § 1000.7 (a)) as a plant in which Grade A milk is received or processed and from which Class I milk (as hereinafter defined) is disposed of during the month on a route(s) (including routes operated by vendors) or from a plant or plant store to retail or wholesale outlets (except pool plants) located in the marketing area. A "supply plant" would be defined (in § 1000.7 (b)) to mean a plant from which fluid milk products acceptable to the appropriate health authority for distribution in the marketing area under a Grade A label is shipped during the month to a distributing plant qualifying as a pool plant.

In order to qualify as a pool plant, a distributing plant should be required to distribute at least 20 percent of its Class I milk during the month as Class I milk in the marketing area. A distributing plant having more than 80 percent of its fluid milk products business outside the marketing area should not be considered as essentially associated with the local fluid market, since only a minor share of its business is in the marketing area. In such a case, full regulation would not be necessary to accomplish the purposes of the order. It might even place such a plant at a competitive disadvantage in supplying the unregulated, but primary, market. As pointed out earlier, such a minimum standard also is necessary to avoid the possibility that a plant otherwise not associated with the market might qualify itself for equalization payments to its own advantage, and to the disadvantage of the market, by means of minor sales in the marketing area.

Combined with the requirement that sales equal to 20 percent of a handler's Class I business be made in the marketing area there is established a requirement that at least 50 percent of the handler's receipts in each month be disposed of in Class I uses. This requirement with respect to total Class I use will exempt from full regulation those plants generally recognized as manufacturing milk plants. In conjunction therewith, provisions for pricing the milk actually disposed of in fluid items in the area should be established to assure that the market is not disrupted by sales of such handlers.

Supply plants which are not primarily associated with the market, and which furnish only incidental shipments of milk to the market or regular shipments of limited quantities during only the shortest production period, need not be fully regulated. Such plants supply the market for a short duration only and may be located at widely scattered points. Such plants should be able to supply milk to the market during such periods of need without becoming fully subject to the order unless they become closely and primarily associated with the Chattanooga marketing area by continuing to supply a substantial part of their producer receipts to the regulated market. Such supply plants are a normal part of milk procurement facilities in many markets; standards recommended herein will provide the framework for their appropriate regulation.

It is recognized, however, that the demand for milk from supply plants may vary seasonally and will be greatest during the season of low production. For sustained periods during the months of flush production supplies of milk received at plants located in or near the marketing area may be sufficient to supply the Class I outlets. During this part of the year, it would be more economical to

leave the most distant milk in the country for manufacture, and use local supplies for Class I use. The performance standards should not force milk to be transported to distributing plants in the summertime where it must be manufactured in order to maintain the eligibility of supply plants to pool.

To avoid this, provision should be made whereby a supply plant may maintain pool plant status throughout the year if it supplies a substantial portion of its producer milk to distributing plants during the months when milk production tends to be lowest. On the other hand, withdrawal from the market of the milk received at a particular supply plant during the months of March through July would not be likely to seriously threaten the marketing area with an insufficient supply. It seems justified, therefore, to permit the voluntary withdrawal from the pool during that period of any supply plant which so requests in writing prior to the first day of a month for such withdrawal. Any distributing plant or supply plant which does not meet the standards for a pool plant should be required to file reports and submit to audits by the market administrator to verify the status of such plant.

These objectives can best be accomplished by defining as a "pool plant" any supply plant that ships to fully regulated distributing plants during the month at least 50 percent of its receipts of producer milk. If a supply plant meets these standards each of the months of August through February, such plant should be designated as a "pool plant" until the end of the following July (unless the plant requests withdrawal of such status). Receipts from plants not qualified under these supply plant standards should be considered as other source milk.

Some milk distributed in the marketing area is from plants which are fully subject to the classification, pricing and pooling provisions of other Federal milk marketing orders. To attempt to extend this order to cover such plants which dispose of a major portion of their receipts in another area would result in unnecessary duplicate regulation. Accordingly, the order proposed herein provides that a distributing plant which would otherwise be subject to the classification and pricing provisions of another order, and which disposes of a greater volume of Class I milk in the other area than in the Chattanooga area, shall be regulated by the other order.

Because the Class I prices in Chattanooga and adjacent markets under Federal regulation will be closely aligned there is little chance that handlers in any one of the markets can achieve a lasting competitive advantage over handlers regulated by any of the other Federal orders. Handlers operating plants regulated by other Federal milk orders could not sell surplus milk in the Chattanooga market for Class I use without accounting for it at the Class I price (because all orders require handlers to pay for producer milk on a classified-use basis). No compensatory payments are required, therefore, on milk, classified and priced as Class I under any other Federal order. However, such plants should be required to report their receipts and utilization to the market administrator as required so their exact status under the order can be determined.

The order should provide that a compensatory payment be made into the producer-settlement fund of the market-wide pool on milk not priced as producer milk under the order which is (1) allocated to Class I milk in a pool plant or (2) distributed on a route(s) within the marketing area by a nonpool plant. It is necessary to require payments on such milk in order to maintain reasonable uniformity of cost of milk and equity among handlers, and to preserve the integrity of the classified price plan for milk in the market-wide pool. Accordingly, there is included in § 1000.70 of the order a provision for including in the value of milk computed for each pool plant a payment (computed at the rates set forth in § 1000.54) on "other source milk" received by it and subtracted from Class I milk pursuant to § 1000.45 (a) (2) and (b) and in § 1000.62, a provision for payment by each nonpool plant at the same rates for butterfat and skim milk disposed of in the form of fluid milk products on a route(s) in the marketing area.

As pointed out previously, the classified price plan and the minimum prices for each such class set forth herein will be fully effective only on producer milk and on plants subject to full regulation under the order. However, milk may be disposed of for Class I utilization by and from plants not subject to full regulation of the order. Such unregulated plants may sell milk in bulk form to pool plants that do, in turn, use it in supplying their Class I outlets, or they may sell Class I milk directly on routes as defined herein. There are no provisions in the order that prohibit any plant from selling milk directly or indirectly in the marketing area. The problem created by sales from unregulated plants similar to those just described is that such plants are not required by terms of any order to pay producers the minimum class prices based on the utilization made (and verified by audit) of the milk. For the reasons set forth in the findings and conclusions relative to what plants and what milk constitutes the regular and essential part of the area's milk supply, some means must be found to offset, or neutralize, the cost advantage an unregulated plant will have in disposing of unpriced milk in the regulated Class I market in competition with plants subject to full regulation under the order.

The role of the compulsory classification system and minimum prices for such classes as set forth in a Federal milk order is to insure that the price competition from reserve and excess milk will not break the market price for Class I milk, thereby destroying the premium prices necessary to encourage Grade A production. The end result of that would be to destroy producers' incentive to supply the milk needed by consumers. Because the classified pricing program of the order is applicable only to fully regulated plants, it is necessary to provide continued stability of the market by neutralizing any advantages unregulated plants may attain with respect to sales in the regulated market. Such plants have a real financial incentive to find means to sell excess milk at prices somewhat less than current Class I levels so long as the price is higher than its value when used in manufactured dairy products. If unregulated plant operators were allowed to dispose of surplus milk for Class I purposes in the regulated marketing area without some compensating or neutralizing provision of the order, it is clear that the disposition of such milk, because of its price advantage relative to fully regulated milk, would displace the fully regulated milk in Class I uses in the marketing area. The plan of Congress, as contemplated under the Agricultural Marketing Agreement Act of 1937, as amended, of returning minimum prices to the producers for the regulated marketing area, would be defeated. Moreover, inefficiencies in the marketing of milk would be encouraged for the regulated market would obtain its Class I milk not from the regular and normal supply for the market but from other sources of supply generated solely as a result of the price advantage created for unregulated milk by the regulation itself.

The compensatory payments applicable to other source milk disposed of in the marketing area from distributing plants which are nonpool plants should be the same as those applicable to other source milk distributed from pool plants. It would not be possible to stabilize the market under the classified pricing program in this market if nonpool plants were allowed to distribute unpriced milk in the marketing area without compensatory payments. Handlers distributing such unpriced milk in the marketing area have the same opportunity to buy milk at the opportunity cost level as do the operators of pool plants who purchase other source milk. In addition, however, the operator of a nonpool plant in all probability has surplus milk in his own plant which he would want to dispose of on any basis which would yield a higher return than the surplus value. It would be particularly easy to dispose of such milk for Class I use in the marketing area by bidding for large contracts such as hospitals, defense establishments or large institutions. With surplus outlets as the alternative, and no compensatory payments to make, the nonpool handlers would have considerable incentive or margin to underbid the seller of priced milk for such sales. A nonpool plant might also use such price advantage in selling his surplus milk to Class I outlets for the purpose of establishing a regular trade on retail or wholesale routes to homes and stores in the marketing area. The nonpool plant might sell up to 25 percent of its Class I milk into the marketing area as Class I without becoming subject to regulation. To allow a nonpool plant to use its surplus milk in this manner for establishing a regular trade in the marketing area without compensatory payments would give him a marked competitive advantage over regulated handlers selling priced milk. Such conditions could readily lead to disorderly marketing conditions. Providing for some method for

compensating for, or neutralizing the effect of, the advantage created for unregulated milk, therefore, is an essential and necessary provision of this order. The payments required by this order on such milk will not bring the operating plant under full regulation yet it will remove any advantage to the unregulated plant.

This rate of compensatory payment is based on the value of unpriced milk under the conditions existing in the area—the difference between the opportunity cost of unregulated milk (its value at the lowest use) and the price under the order for milk going into comparable uses. Such a rate of payment based on the most economical cost of other source milk available to handlers will remove, as far as is administratively possible, any clear advantage one handler may obtain relative to his competitors by obtaining unregulated milk and substituting it for producer milk in Class I.

By the very nature of fluid milk operations, as explained earlier, handlers have milk that is produced for, but is not utilized as Class I milk. In and around the Chattanooga market this surplus milk must be used by being processed into manufactured dairy products. Therefore, the opportunity cost of surplus milk is its alternative value for manufacturing purposes. It is reasonable to conclude that milk could be obtained at prices reflecting its value as surplus milk in these markets during such times as any considerable volume of Grade A milk must be disposed of as surplus by unregulated plants in that general area. Handlers fully regulated under the order seeking to purchase unregulated milk will naturally resort to the lowest cost source from which suitable milk is available. In fixing the rate of compensation payment, it is necessary, therefore, to determine what the lowest cost source may be and to base the payment on the difference between the cost of such milk and the cost of milk priced under the order for similar use. At other times, the opportunity cost of the cheapest other source milk in the general region of the Chattanooga market will be reflected by the prevailing blend prices paid farmers. During such months unregulated handlers will be forced by competition to pay farmers approximately average blend prices.

It is concluded, therefore, that during the months of March through July (when surplus milk may be available in substantial volume to the Chattanooga market from nonpool sources), the compensatory payment on other source milk or milk utilized in Class I should be based on the difference between the minimum price of producer milk used for surplus and the applicable Class I price under the Chattanooga order. The Class II price established by the order is a fair and economic measure of the value of milk in surplus uses in the Chattanooga area.

For the months of August through February, when milk supplies tend to be shorter, it is concluded that (1) other source milk is not likely to be available to handlers at surplus prices and (2) during these months the compensatory payment should be based on the difference between the Class I and the blend prices under the order. Generally speaking, during these months the relationship between the supply of milk in the Chattanooga milkshed area and the demand for such milk will tend to fluctuate considerably from year to year according to production conditions. Those fluctuations will generally tend to be similar in Chattanooga, Knoxville, and surrounding milksheds. Thus, the rate of compensatory payment based on the difference between Class I and blend prices will adjust itself automatically in these months according to the changes in demand for and price of outside supplies. If supplies of producer milk are relatively plentiful, unpriced milk can be expected to be cheaper, and therefore, the rate of compensatory payment should be somewhat higher. On the other hand, as milk supplies in the area tend to be short, it is to be expected that the cost of unregulated milk will increase. Under these circumstances, the rate of compensatory payment will be correspondingly less.

By choosing a rate of compensatory payment which reflects the cost of the cheapest other source milk which may be expected to be available to regulated handlers, any advantage to one handler relative to others, in obtaining such cheap milk and substituting it for producer milk in Class I, is removed insofar as administratively possible and no handler is given the clear opportunity to gain an unfair advantage which otherwise would exist. Although the unfair advantage of obtaining other source milk is removed by the particular rate of payment herein provided, nevertheless, if other source milk is to be purchased, the incentive for purchasing the cheapest of such milk remains, because the lower the price which a handler pays for other source milk, the lower will be his total cost of purchasing such milk.

All funds collected from compensatory payments should be added to the producer-settlement fund. The handler regulated by the order should be obligated to make the compensatory payment to the producer-settlement fund. There will be no difference in actual price paid for milk whether the payment is made by the regulated handler or by the operator of the unregulated plant from which the other source milk was obtained. Because the regulated handler makes the actual distribution of the milk in the marketing area, and because he reports its utilization to the market administrator, he is, from the administrative viewpoint, the logical one to make the payment.

For the reasons set forth later in this decision, Class I milk under the order is priced at the point where the milk is received from producers, hence the compensatory payments on other source milk should be computed at the same stage of the marketing process to be directly comparable. No allowances are made in the order for the costs and profits of handlers in moving producer milk through subsequent stages of marketing; neither should they be made for other source milk.

A "handler" should be defined as any person in his capacity as the operator of one or more pool plants. Such handler is the person to whom the provisions of the order are applicable. The handler receives the milk and thus must be held responsible for reporting the receipt and utilization of it. If the milk is priced, he is responsible for paying producers the specified minimum prices. The definition of a handler should include a cooperative association with respect to milk of producers diverted for the account of such association in accordance with § 1000.6. If a handler also operates an unregulated plant(s) in a separate building, this definition is not intended to include such person in his capacity as an operator of such plant(s). This definition should include the operators of distributing plants and supply plants which do not qualify as pool plants and producer-handlers in order that they may be required to report to the market administrator whenever necessary to determine their status. In the case of distributing plants which are nonpool plants by virtue of insufficient sales in the marketing area, such reports are necessary to determine the amount payable by the operator of such plant on the unpriced milk distributed in the marketing area.

"Producer" should be defined as any person other than a producer-handler who produces milk in compliance with Grade A inspection requirements of a duly constituted health authority and the milk is received at a pool plant. Provision should be made so the milk of producers regularly received at a pool plant may be diverted for the account of a handler to a nonpool plant any day during the months of March through July and on not more than 10 days during any other months. This will allow milk regularly associated with the market to be diverted to manufacturers during periods of flush production and over weekends and holidays when supply-demand relationships require some reserve milk to be manufactured in plants not regulated by an order. Producers whose milk is so diverted will continue to receive the uniform price under the order and their milk will be available for fluid use when needed. Diverted milk shall be deemed to have been received at the plant from which it was diverted.

"Producer milk" should include all skim milk and butterfat contained in milk produced by producers and received at pool plants directly from producers or diverted by a handler from such plant.

"Producer-handler" should be defined as a person who produces Grade A milk under the supervision of any duly constituted health authority, and who operates a distributing plant in which he handles only milk of his own production and milk from pool plants which was priced at such plant, and all or part of which milk is distributed on a route(s) within the marketing area as Class I milk. A producer-handler should be subject to the order only to the extent that he must submit reports to the market administrator, as required, and maintain and make available to the market administrator, accounts, records and facilities so that the market administrator may verify that such person is a producer-handler. It would be meaningless to require under the order that a producer-handler pay any particular price for milk produced on his own farm.

Classification provisions of the proposed order should provide that any milk, skim milk, or cream transferred by a handler to a producer-handler should be Class I milk. Any supplemental supplies of milk which may be obtained from other handlers may, by virtue of the type of operation involved, be presumed to be needed by the producer-handler for fluid use and should be classified in the supplying handler's plant as Class I milk. A producer-handler may receive milk from other handlers and still maintain his status as a producer-handler. Pursuant to the proposed order, any milk which a handler receives from a producer-handler would be other source milk and would, therefore, be allocated to the lowest class utilization at the pool plant(s) of a handler after the allocation of shrinkage on producer milk. This method of allocating producer-handler milk will preserve producers' priority on the Class I sales in the market.

"Other source milk" should be defined as all skim milk and butterfat utilized by the handler in his operations except fluid milk products received from pool plants, inventory and current receipts of producer milk. This includes any nonfluid milk products from any source, including those produced at the handler's plant during the same or an earlier month, which are reprocessed or converted to other products during the month in the plant. Thus, other source milk would represent butterfat and skim milk from sources not subject to the Class A pricing provisions of the attached order. If such other source milk is disposed of in a fluid milk product, partial pricing and regulation is provided under compensatory payments. Defining other source milk in this manner will insure uniformity of treatment among all handlers under the allocation and pricing provisions of the order.

(b) *Classification of milk.* Milk received by regulated handlers should be classified on the basis of skim milk and butterfat according to the form in which, or the purpose for which, it is used, as either Class I milk or Class II milk.

A classified-use plan of this type will insure that minimum prices for milk may be made equal among handlers according to use, that a price may be fixed for the milk disposed of as Class I at a level that will bring forth an adequate supply of pure and wholesome milk, and that a necessary reserve of quality milk may be maintained at all times (and used at prices in line with its value when processed into manufactured dairy products) without disrupting marketing and pricing conditions within and outside the established marketing area.

The products which should be included in Class I milk are those generally required by health authorities in the marketing area to be obtained from milk or milk products from approved "Grade A" sources. The extra cost of getting quality milk produced and delivered to the market in the condition and quantities required makes it necessary to provide a price for milk used in Class I products somewhat above the ungraded or manufacturing milk price. This higher price should be at such a level that it will yield a blend price to producers that will encourage production of enough quality milk to meet market needs for these fluid milk products.

Reserve milk not needed seasonally or at other times for Class I use must be disposed of for use in manufactured products. These products are less perishable and must be sold in competition with products made from unapproved milk. Milk so used should be classified as Class II milk and priced in accordance with its value in such outlets.

In accordance with these standards, Class I milk should comprise all skim milk (including concentrated and reconstituted nonfat milk solids) and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk and skim milk drinks, yogurt, cream or any mixture in fluid form of milk, skim milk and cream (except eggnog, ice cream, ice cream and ice milk mixes, aerated cream and sterilized products contained in hermetically sealed containers); and (2) not accounted for as Class II milk.

Class I products which contain concentrated skim milk solids such as skim milk drinks and buttermilk to which extra solids have been added, or concentrated whole milk disposed of for fluid use, should be included under the Class I milk definition and all the solids therein should be priced at the same rate. Products such as evaporated or condensed milk packaged in bulk or in hermetically sealed cans would not be considered as Class I milk.

Skim milk and butterfat are not used in most products in the same proportions as contained in the milk received from producers, and therefore should be classified separately according to their separate uses. The skim milk and butterfat content of milk products, received and disposed of by a handler, can be determined through certain recognized testing procedures. Some of these products, such as ice cream and condensed products, present a more difficult problem of accounting in that some of the water contained in the milk has been removed. It is necessary, in the case of such products, to provide an acceptable means of ascertaining the amount of skim milk and butterfat contained in, or used to produce, these products. This may be accomplished through the use of adequate plant records made available to the market administrator in the case of products produced by a handler, or by means of standard conversion factors of skim milk and butterfat used to produce such products in the case of products purchased by a handler. The accounting procedure to be used in the case of any condensed milk product should be based on the pounds of milk or skim milk required to produce such product.

Each handler must be held responsible for a full accounting of all his receipts of skim milk or butterfat in any form. A handler who first receives milk from producers should be responsible for establishing the classification of, and making payment to producers for, such milk. Fixing responsibility in this manner is a practice which is followed consistently in Federally regulated markets and it is necessary herein to administer effectively the provisions of the order. The operator of the plant at which milk is first received from producers is the person with whom contractual relations have been made by producers or their representatives. Except for the limited quantities of shrinkage which may be classified in Class II under the certain conditions set forth elsewhere in this decision, all skim milk and butterfat which is received and for which the handler cannot establish utilization should be classified as Class I milk. This provision is necessary to remove any advantage to handlers who fail to keep complete and accurate records and to assure that producers receive full value for their milk on the basis of its use.

All skim milk and butterfat used to produce products other than those classified in Class I milk should be Class II milk. Included as Class II milk are products such as ice cream, ice cream mix and other frozen desserts and mixes; butter, cheese, including cottage cheese; evaporated and condensed milk (plain and sweetened); nonfat dry milk solids, dry whole milk; condensed or dry buttermilk; and any other products not specified as Class I milk. Skim milk and butterfat disposed of to commercial food product manufacturing plants, other than dairy plants, which do not dispose of fluid milk products for fluid consumption, should be Class II milk. The health ordinances applicable in the marketing area do not require that these products be made from locally approved milk.

Cream placed in storage and frozen should be classified as Class II milk. Such cream is intended primarily for use in ice cream and ice cream and ice milk mixes. Skim milk disposed of and used as animal feed also should be classified as Class II. Also, any skim milk which may need to be dumped should be in Class II. Because dumping can be verified only by witnessing the action, the handler is required to give advance notice to the market administrator so he may have the dumping witnessed. Any frozen cream or other Class II products which are used later in a pool plant would be considered as other source milk at the time of such use and assigned to the lowest price utilization in the plant.

Butterfat and skim milk used to produce Class II products should be considered to be disposed of when so used. Handlers will need to maintain stock records on such products, however, to permit audit of their utilization records by the market administrator. Class II products from any source used in the production of products included in Class I milk should be considered to be a receipt of other source milk. This will maintain priority of assignment of current receipts of producer milk to Class I utilization.

Handlers have inventories of milk and milk products at the beginning and end of each month which enter into the accounting for current receipts and utilization. Inventory is intended to include

stocks on hand of bulk milk, skim milk, and cream and bottled milk and other fluid milk products designated as Class I milk. Manufactured products (Class II) on hand are not included in the inventory account because the milk used to produce such products will already have been accounted for as Class II milk. As previously indicated, handlers will need to keep stock records of such products but they will not be included in inventory for the purpose of accounting for current receipts.

It is concluded that inventory should be accounted for as Class II milk. If fluid milk products in inventory are accounted for as Class II milk at the end of the month, it will be necessary to provide a method to deal with the producer milk inventory which is used in the current month for Class I purposes but which the handler accounted for to producers as Class II milk at the end of the previous month. In a plant which engages primarily in a fluid milk business, it is quite possible that a decrease in inventory in any given month may exceed its total utilization of milk in Class II. Handlers, at times, also use other source milk in their operations. Producer milk from inventory should have prior claim on Class I sales over current receipts of other source milk. This can be accomplished by considering the ending inventory in one month as a receipt in the following month and subtracting such receipt (under the allocation procedure) in series starting with Class II milk following the subtraction of other source milk. To the extent that opening inventory is allocated to Class I milk and there was an equivalent amount of producer milk classified in Class II milk in the previous month (after the allocation of other source milk) a reclassification charge should be made at the difference between the Class I price in the current month and the Class II price in the preceding month. This will promote equality in the cost of milk among handlers and returns to producers, irrespective of whether or not such producer milk is from the previous month's ending inventory or is a current receipt.

Shrinkage should be determined by subtracting from the total pounds of skim milk and butterfat received by the handler his total established utilization of skim milk and butterfat, respectively, in various products. Shrinkage not in excess of 2 percent of the handler's receipts of skim milk and butterfat from producers and other source milk should be prorated between producer and other source milk on the basis of the pounds received from each source. None of the shrinkage should be assigned to milk received from other pool plants because shrinkage on such milk will be allowed to the transferring handler. A plant operated in a reasonably efficient manner, and for which complete and accurate records of receipts and utilization are maintained, should be able to keep total shrinkage at less than 2 percent of total receipts. It is concluded, therefore, that shrinkage not in excess of 2 percent of total receipts of producer milk and other source milk should be classified as Class II milk; any in excess of this quantity should be classified as Class I milk.

*Transfers.* Classification of butterfat and skim milk used in the production of Class II milk items should be considered to have been established when the product is made. Classification of Class I milk should be established when the butterfat or skim milk is disposed of. However, since some Class I items may be disposed of to other plants for processing, separate classification procedures should be prescribed for transfers to other plants.

Milk, skim milk, cream or other products designated as Class I milk transferred by a handler to the plant of another handler, except that of a producer-handler, should be classified as Class I milk unless both handlers indicate in their reports to the market administrator that they desire such milk to be classified as Class II milk. However, if Class II is claimed, sufficient Class II utilization must be available at the transferee plant for such assignment after prior allocation of shrinkage and other source milk. Furthermore, the assigning to classes must be such as will result in the maximum amount of producer milk of both handlers being assigned to Class I milk. These actions will carry out the recognized principle that the highest-valued uses should be assigned first to the milk of regular producers.

In order to reduce the administrative expense of verifying the use of milk or skim milk transferred great distances, transfers of milk or skim milk to plants 250 miles or more from the City Hall of Chattanooga, Tennessee (by the shortest hard-surfaced highway distance) should be Class I in all cases. The costs involved in transporting milk or skim milk in fluid form such a distance are such that it would not be economically feasible to move the milk farther for Class II disposition.

Cream presents a somewhat different problem because its value is so much greater in relation to its bulk that it may be transported long distances for manufacture. In order to provide for such transfer and at the same time provide reasonable assurance that the butterfat is being classified according to use, it should be provided that cream may be Class II if the following conditions are met: (1) The transferring handler requests such a classification, (2) it is clearly labeled as manufacturing grade cream and the shipment is so invoiced, (3) if the operator of the nonpool plant maintains books and records of utilization at the plant which are made available on request of the market administrator for verification of usage, (4) if prior notice of the intended shipment is furnished to the market administrator, and (5) the nonpool plant used an equivalent amount of skim milk and butterfat in the use indicated.

The more common form of transfer to a nonpool plant is the movement of excess milk to nearby manufacturing plants. It is provided that transfers of milk, skim milk, or cream from a pool plant to a nonpool plant located within a radius of 250 miles of the City Hall in Chattanooga, Tennessee, be Class I unless Class II use is affirmatively established. Evidence of Class II use consists of a certification by the pool plant operator that the transfer was intended for Class II use, and verification by the market administrator of the records made available by the nonpool plant operator to establish that the milk was utilized for manufacturing purposes.

*Allocation.* Because the order class prices apply only to producer milk, it is necessary, if a pool plant has butterfat or skim milk other than that received in producer milk, to determine the quantities of milk in each class to be assigned to current receipts from producers. The milk of producers should be assigned the Class I utilization first. This is necessary to insure the effectiveness of the classified pricing program of the order. The system of assigning utilization of milk to receipts from different sources which will carry out this objective is set forth in detail in the order.

In general this procedure requires that skim milk and butterfat, respectively, remaining in each class be assigned to producer milk by making the following deductions from the gross utilization of each handler starting with Class II milk, except as otherwise noted:

(1) Class II shrinkage of producer milk;
(2) Other source milk;
(3) Beginning inventory;
(4) Receipts from other handlers (according to classification); and
(5) Overage.

Since uniform prices paid producers by each handler are to be calculated monthly, the assignment of utilization described above should be carried out with respect to all milk received during each month. To apply a shorter accounting period would place an accounting and reporting burden upon handlers and increase the cost of administering the order.

(c) *Class prices.* In order to restore and maintain orderly marketing conditions in the Chattanooga, Tennessee, area, minimum Class I and Class II prices for producer milk must be established at levels that will reflect economic conditions affecting the market supply and demand for milk or its products and assure the maintenance of a supply of quality milk adequate for the needs of the market. The enabling act requires that minimum prices established by Federal milk orders meet this standard. An important point in this requirement is that the prices shall be at level that over a reasonable period of time, due consideration being given the need for a reserve of milk and the seasonal variation in production, the supply of milk meeting the quality standards of a market will be about equal to the needs of the market for milk of that quality. This means, in turn, that the minimum prices provided for in the order can be related to general economic conditions, but cannot be maintained out of line with such conditions. If producer prices are too low, not enough milk of acceptable quality will be produced to supply fully the Class I needs of the market. If such prices are too high, on the other hand, milk production will be over stimulated and fluid consumption will tend to be curtailed. These actions would cause more milk to be produced than is needed to supply the demand for Class I milk, including the necessary reserves, and would eventually result in the shifting of agricultural resources toward the production of unnecessary and uneconomic surpluses and this would depress the blend price to producers.

The concept of adjusting minimum class prices in response to changes in supply and demand conditions, and thereby influencing production of milk through consequent changes in producers' blend prices, has wider geographical implications today than in the past. In earlier days producers were limited to supplying milk to local markets because of inadequate transportation facilities and the local nature of health regulations and milk distribution systems. Today the technological advances in milk production, including the widespread use of milk cooling equipment on farms; the rapid motor transportation from farms to a number of cities instead of one or two, especially through the advent of bulk farm tank milk pickup; the increased efficiency of milk processing equipment and plants; the increasing importance of paper containers for packaging milk; the use of refrigerated delivery trucks; the sale of milk through vendors and stores in distant cities; and the corollary trend among health authorities approving sources of milk derived from a wider supply area under agreements for reciprocal inspection—all these factors enable milk to be transported and sold long distances from the point of production and processing. Record testimony shows that these economic developments and trends have and are influencing the marketing organization and price structure for producer milk and for fluid milk products in the Chattanooga, Tennessee area. Producers and handlers alike recognized the influence of these trends and developments in many ways, most significant of which was the continued reference to the need for aligning any prices to be included in the order with prices currently being paid in such markets as Knoxville and Nashville, Tennessee, both of which presently are regulated by Federal milk orders, and such non-Federally regulated areas as Atlanta, Georgia, and Birmingham, Alabama.

Representatives of the producers' association visualized the Class I pricing problem as one of alignment between two Federally-regulated markets to the North (Knoxville and Nashville) and two markets to the South regulated by State milk control programs (Atlanta, Georgia, and Birmingham, Alabama). These four markets are located within a radius of 113 to 138 miles of Chattanooga. They contended that appropriate alignment of Chattanooga prices with the Georgia and Alabama State milk control price structure is necessary to forestall loss of the available supplies of producer milk to those markets; appropriate alignment with Knoxville and Nashville is necessary to forestall loss of Class I sales of the Chattanooga market to lower-priced milk from those areas. On the basis of these criteria, producers requested a Class I differential of $2.00 per hundredweight over the basic formula price for all months of the year. In support of this level, producers cited the facts that: (1) The Class I differential in the Knoxville order is $1.50 over a basic formula price all months of the year, (2) the cost of transporting milk from Knoxville to Chattanooga is about 25 cents per hundredweight, and (3) the supply-demand adjustment in the Knoxville order has increased the Class I price in that market by an average of 25 cents per hundredweight each month since the provision has been in effect.

Handlers' testimony was that the basic formula price, the Class I differential and the Class I butterfat differential should be identical with those contained in the Knoxville order, at least until such time as adequate market-wide data are available for the Chattanooga market to develop an independent basis for pricing Class I milk. The primary basis for this pricing plan is the fact that a major handler in the Chattanooga area purchases his entire supply of producer milk under the pricing provisions of the Knoxville order. Furthermore, they felt such a price level is in reasonable alignment with the Class I price level in the Nashville, Tennessee, order plus the cost of transporting bulk milk from Nashville to Chattanooga.

The record supports the necessity for a proper alignment of both class prices and the producer blend price with those prevailing in surrounding markets. The problem then reduces itself to this: With what markets should the Chattanooga area be aligned to insure a proper level and relationship of prices, and how can that alignment be achieved?

With respect to the need for aligning Class I prices in Chattanooga with those prevailing in the four surrounding markets mentioned above, record evidence indicates that prices paid under the State milk control plans of Georgia and of Alabama have a far less significant effect in inducing or prompting shifts of producers between such markets and Chattanooga than is the case between the Chattanooga market and the Federally-regulated markets of Knoxville and Nashville. During the last few years, for example, only a few milk producers located in Tennessee have been able to shift their sales to distributors located in Georgia, even though the Class I price levels in the Western Milkshed of Georgia have been higher than Chattanooga area prices.

As a practical matter, then, in seeking a base for price alignment, it is necessary to turn to the Nashville, and more especially, the Knoxville markets. The Class I prices in these markets are established at a specified level over a basic manufacturing milk value. These levels are adjusted by a measure of local supply of milk relative to Class I sales in the Knoxville area at present and will be so adjusted soon in the Nashville area.

As between the two areas, the Chattanooga market is much more closely related to Knoxville than the Nashville area, both in sales of fluid milk and in procurement of milk from producers. The milk supply areas of Chattanooga and Knoxville are intermingled—both markets drawing producers from Loudon, Monroe, Meigs and McMinn Counties, Tennessee. Furthermore, many producers of ungraded milk are located in the over-lapping production area between the Knoxville and Chattanooga markets. Also, there is direct competition between Chattanooga and Knoxville handlers in the sale of fluid milk products as milk moves south from Knoxville (in and through Chattanooga and into Georgia) and north from Chattanooga to Knoxville. The relationship with the Nashville area is not so direct and intermingled as that with Knoxville.

The Class I price in the Knoxville market is calculated by adding a Class I differential of $1.50 to a "basic formula price" for the preceding month. This price is subject to increase or decrease within specific limits, in the event local supply and demand relationships vary beyond a normal range. The Class I pricing formula for the Chattanooga marketing area should reflect the additional cost of transportation from the Knoxville marketing area to Chattanooga. This will be in conformance with the longtime relationship between prices in Knoxville and Chattanooga, and will reflect the higher location value of Class I milk which tends to rise from the major production areas in the Central United States to the South and East. Based on these normal considerations, it is concluded that, for an introductory period of 18 months, the Class I price in Chattanooga should be about 25 cents a hundredweight higher than the Class I price in Knoxville on an annual basis under normal supply-demand relationships in each market. This level of price would be arrived at by adding a differential of $1.75 to the basic formula price.

The record indicates that a level of prices somewhat higher than those prevailing in markets to the north and west is needed to attract sufficient milk from local sources to meet the requirements of the market. On the other hand, the effective price of Class I milk in the Chattanooga area should not, over any extended period of time, exceed the cost of regular dependable supplies of Grade A milk from alternative sources.

In this connection, the relationship to the Nashville market is particularly important, since supplies in that area tend to be more ample than in the Chattanooga area. The Class I price differential of $1.75 for the Chattanooga market would be 50 cents higher than the average of differentials under the Nashville order.

Furthermore, in view of the direct relation of this market to Knoxville, the Knoxville-Nashville price relationship is significant. The Class I price level in the Nashville market is lower than that existing in Knoxville. During 1953 and 1954, for example, the Class I price (including premiums) in Knoxville averaged about 34 cents a hundredweight higher than the corresponding price in Nashville. Official notice is taken of the Class I prices regularly announced by the market administrator for the Knoxville and Nashville marketing areas. During the period January–November 1955, the average Class I price for Knox-

ville exceeded the average Class I price for Nashville by 45 cents per hundredweight. It is apparent from these data that if the Chattanooga price was maintained at a fixed differential of 25 cents over Knoxville in every month, the difference between Chattanooga and Nashville prices could often be considerably more than 50 cents per hundredweight. Such a fixed relationship to the Knoxville market does not appear to be necessary, and could lead to a level of prices too high in relation to the Nashville market.

Under the provisions of the order proposed herein, milk fully priced under any Federal milk order will be enabled to move into the Chattanooga area without being subject to any compensatory payments. Under the circumstances, it is necessary to keep the Chattanooga Class I price in appropriate alignment with that prevailing in Nashville in order not to create an incentive for handlers to cut off local producers who would receive the Chattanooga Class I price and procure milk on a regular basis from plants regulated by the Nashville order.

Because of the lack of comprehensive and accurate market information, it is extremely difficult to determine from this record the exact relationship between producer receipts and Class I sales of regulated handlers during any period. It is clear that more information is needed before an automatic supply-demand adjustment could be developed from local information. It is recognized, however, that the Class I price in both the Knoxville and Nashville areas is subject to adjustment by a supply-demand formula. Under the circumstances, it is quite possible that changes in the Class I price level in these markets, brought on by a supply-demand adjustment, may cause some variations in price relationships between Chattanooga and Knoxville and Nashville. However, it is concluded that, among all alternatives, the best choice is to permit the specified Chattanooga area Class I price level to remain effective as set forth above until such time as information gathered under terms of the order proposed herein can provide a basis for a local supply-demand adjustment. Such a Class I price level in Chattanooga also will be as properly aligned with current Class I prices in Knoxville and Nashville, plus transportation and hauling to Chattanooga, as is possible to establish at this time.

If experience indicates that the proposed level, or the basis or method of pricing, fails to bring forth a satisfactory level of producer milk receipts in the marketing area, it will be appropriate to re-examine these provisions in conjunction with the complete marketing information that will become available after the order has been in effect. In any event, after the accumulation of at least one-year's data, the basis or method of pricing should be re-examined at a public hearing called for that purpose. For this reason the Class I price structure adopted herein will be effective for a period of only eighteen months. A period of eighteen months after the effective date of this order should be sufficient time to develop the needed data relating to the Chattanooga market and to re-examine the pricing mechanism and price level for Chattanooga in light of the economic evidence accumulated under the Chattanooga order.

*Class II prices.* Every fluid milk market needs a "reserve" supply of Grade A milk to meet day to day fluctuations in receipts from producers and in Class I sales. In the Chattanooga area, as in other fluid milk markets, consumers desire adequate and dependable supplies of Class I products in quantities which, while they vary considerably on a daily basis, do not change greatly from season to season. Milk producers on the other hand, because of the seasonal variations in milk production, generally deliver more milk during the spring and summer months than during the fall and winter months. The result is that handlers must process on a year-round basis the reserve milk, and during the months of flush production quantities of seasonal excess into various manufactured products. Since milk going into these products must be paid for at the Class II price, this price should be fixed at a level which will induce handlers to accept and market whatever quantities of such milk may be offered from month to month by the producers who provide the market's regular fluid supply. It is of equal importance to establish a price that will return producers full value for their milk. The Class II prices recommended herein will permit the economical conversion of reserve milk into manufactured products.

All products included in Class II may be made from unapproved milk. Approved milk which may be used in such products by regulated handlers in the Chattanooga area should be priced in line with the cost of alternative supplies of milk or milk products used by dairy products manufacturers in this general area.

Many handlers in the proposed area have limited facilities for handling any milk above that needed for their fluid operations. A few handlers manufacture such by-products as cottage cheese and ice cream mix, principally for the needs of their own trade. The remaining milk not needed for fluid distribution must be transferred or diverted from the plant at which it is usually received to a plant having adequate facilities.

The producers' cooperative association recently constructed a large milk plant for the processing of any milk, surplus to the needs of handlers or the market. Butter and powder are the primary products of this plant. The variety of products into which surplus milk is manufactured contributes to the value of such milk insofar as each product offers an alternative outlet.

Prices paid by manufacturing plants may differ because of changes in the relative prices of the products which they manufacture. Handlers will tend to dispose of surplus milk to those plants paying the highest price at the time of such disposal. Because of small volume and inefficient means of handling, some handlers may, at times, incur losses in handling their necessary supply of reserve milk. The handling of such reserve milk is necessary and incidental, however, to the handling of fluid milk products.

During the months of flush production, milk should be priced at the rate at which seasonal reserves will not disrupt the orderly marketing of all milk. The level of such pricing, however, should not be below that paid for ungraded milk, since such prices represent the lowest value in the milkshed for milk used for manufacturing purposes. Handlers who need and desire the entire output of producers during periods of short supply should assume the responsibility of paying producers at least the competitive manufacturing prices for Class II milk during the months of flush production. Accordingly, the Class II price for the months of February through August should be the average of the prices paid for milk received from dairy farmers by selected manufacturing plants in the area. The four plants whose pay prices should be so used are: Kraft Foods Company, Fayetteville, Tennessee; Pet Milk Company, Greeneville, Tennessee; Carnation Company, Murfreesboro, Tennessee; and Borden Company, Lewisburg, Tennessee. These plants are the principal buyers of ungraded milk in the production area of the proposed marketing area.

During the months of short production (September through January), a higher level of prices for Class II milk should be provided in order to encourage the transfer or allocation of available supplies of milk from manufacturing uses to fluid uses. During the months of September through January, therefore, the Class II price should be the higher of either (1) the price computed pursuant to a butter-nonfat dry milk solids formula which will reflect changes in the value of manufactured products in the general area and on the national market or (2) the average of the prices paid by the four local manufacturing plants mentioned above. The butter-powder formula is identical with that used for the same purpose in the Knoxville, Tennessee, marketing area. The calculations, with respect to butter, give appropriate allowances for the costs of manufacturing butter, for the overrun involved, and for the pounds of butterfat contained in the milk. The calculations, with respect to spray and roller nonfat dry milk, give appropriate allowances for the costs of manufacturing, for the pounds of solids obtained from a hundredweight of skim milk, and for the pounds of skim milk in a hundredweight of milk containing 4.0 percent butterfat.

In order that the Class II price may be kept in line with current changes in manufacturing values, the prices paid for manufacturing milk and the central market prices for butter and nonfat milk solids during the current month should be used for determining the Class II price under the order.

*Location differentials.* Class I milk products, because of their bulky, perishable nature, incur a relatively high transportation cost if such products or the milk used to produce them is moved a considerable distance. Milk delivered directly by farmers to plants in or near the urban centers in the defined marketing area is therefore worth more to a handler than milk which is received from farmers at a plant located many

miles from the market. This is so because in the latter instance the handler must incur the additional costs of moving that milk into the central market. The producer, in turn, receives less for milk delivered to points distant from the central market in lieu of incurring the additional costs of hauling his milk into the central market. Under these conditions the value of producer milk delivered to plants located some distance from the central market is reduced in proportion to the distance (and cost of transporting such milk) from the point of receipt to the central market.

In order to allow for the cost of moving Class I milk from distant plants that are, or might become, regular sources of supply for Chattanooga, it is necessary to establish the Class I price for milk delivered to plants at a point in the marketing area and then provide a schedule of deductions from the Class I milk price as location differentials or adjustments. The city of Chattanooga is the principal consuming area and, at the same time, represents a central point at which producer prices should be the highest. Accordingly, the distances used in determining the location differentials should be measured from the City Hall of Chattanooga, Tennessee, and should apply at plants located 65 miles or more away by the shortest hard-surfaced highway distance as determined by the market administrator.

The rates should begin with 15 cents at plants located in the 65–75 mile zone and be 1.5 cents more for each additional 10 miles or fraction thereof as measured from the City Hall in Chattanooga. Handlers can be expected to move milk into the market in the most efficient and feasible manner. In the Chattanooga marketing area this means hauling in bulk by tank truck. The location differentials proposed herein are based on the record data relating to the actual cost of hauling milk by bulk tank from outlying plants into the marketing area. They also are comparable with those contained in other Federal milk marketing orders. The rates should apply in each market to all milk assigned to or otherwise classified as Class I.

A method is provided for determining, if necessary, the priority of milk from various plants in allocating milk to Class I for purposes of computing the aggregate of location adjustments to be allowed. Such adjustments would be made for each handler in sequence beginning with those plants nearest Chattanooga.

The value of milk used in manufactured dairy products is affected little, if any, by the location of the plant receiving and processing such milk (in contrast to the situation with respect to Class I fluid milk products). This phenomenon occurs because of a very significant difference in the costs of transporting the two types of dairy products—fluid milk products are bulky, whereas such manufactured products as butter, powder, and cheese, for example, have a high value relative to the cost of transporting them. Hence, prices for Class II products vary little as distance from the consuming market becomes greater. These phenomena are borne out in the record by noting the tendency for comparable prices to be paid for ungraded milk going into similar uses in different parts of the Tennessee milksheds. Accordingly, no adjustment should be made in the Class II price for reason of location of the plant to which the producer milk is delivered.

In line with the economic considerations which affect the value of milk for fluid market uses when it is delivered by farmers to plants located some distance from the consuming market, it is necessary and appropriate that the uniform prices paid producers delivering milk to plants to which location differentials apply also should be reduced by the same rate applicable to Class I milk to reflect the lower value of such milk f. o. b. the point of actual delivery (in contrast to its value when delivered to plants in the marketing area).

*Butterfat differentials.* In an earlier section of this decision it was concluded that butterfat and skim milk should be accounted for separately for classification purposes. It will be necessary, therefore, to adjust Class I and Class II milk prices in accordance with the average test of milk in each class by a butterfat differential that will reflect differences of value due to variations in the butterfat content in each product. As pointed out earlier in this decision, the basing point from which such adjustments are made should be 4.0 percent butterfat. This is the basing point used in the Federal milk marketing areas with which the Chattanooga market must be aligned. Since the actual cost to a handler for a given quantity of milk will be the same regardless of what basing point is used, it seems desirable to have them stated in terms comparable with those used for most of the other milk distributed in nearby areas.

Because of the necessity for appropriate price alignment, the butterfat differentials for Class I milk, Class II milk and uniform price to producers should be equivalent to the values provided in nearby Federal order markets for adjusting the specified prices for variations in butterfat content. This is necessary and desirable since the level of class prices proposed in this decision are in alignment with those in the nearby regulated market of Knoxville, Tennessee. For each one-tenth of one percent of butterfat above or below 4.0 percent, the Class I price would be increased or decreased, respectively, by the value obtained by multiplying the Chicago butter price for the preceding month by 0.13. The Class II butterfat differential would be determined by multiplying the Chicago butter price for the current month by 0.115. The butterfat differential used in making payments to producers should be calculated by multiplying the Chicago butter price during the month by 0.12.

The use of butterfat differentials in this manner follows standard practices in most fluid milk markets for adjusting for butterfat variations. In order that the Class I butterfat differentials may be announced early each month, it is provided that the Class I differential be based on the average price of butter in the preceding month. This will permit the announcement of the Class I differential at the same time that the Class I price is announced.

Class II prices and butterfat differentials will not be announced until after the end of the month. Although handlers will not know the cost of such milk as it is utilized, they will know that their cost will follow that of their principal competitors for manufactured outlets.

The producer butterfat differential in no way affects the differentials used in calculating a handler's obligation at class prices but merely prorates returns among producers whose milk differs in butterfat test.

*Payments to producers*—(a) *Type of pool.* The order should provide that the proceeds from the sale of milk in both classes by all handlers be combined and distributed to producers through a "market-wide" type of equalization pool. Under this type of pool each producer will receive minimum prices that are uniform with those received by all producers delivering milk to the Chattanooga area, subject of course, to butterfat and location differentials. The "blend" price, and the "base" and "excess" prices during the months of March through July, will be a weighting of the proportions of all producers' milk paid for at Class I and Class II prices, and will, in effect, return to each producer his share of the sales of the market.

In the Chattanooga market the Chattanooga Area Milk Producers Association, the proponent producers' cooperative association, has for many years sold the milk of its member-producers under a classification pricing and pooling plan generally founded on the same principles as underlie market-wide equalization of producer prices under a Federal milk order program. The proceeds from the sale of milk under the cooperative price plan were combined and distributed through a cooperative-wide pool of their producers. Under the marketing conditions and the organizational structure of the industry, in this market, it is clear that the market-wide type of equalization pool is a necessary part of any effective program to establish and maintain orderly marketing and pricing conditions.

A market-wide pool will permit any handler to bid on such business as that offered by military and government installations and other public institutions and to obtain the supplies for such sales without upsetting the market whenever the business might shift from one handler to another.

Several handlers in the market are not equipped to process reserve and surplus milk in their own plants. Consequently, they must shift any surplus that arises in their plants to other plants for manufacture. It is imperative, therefore, that a pool be established that will provide for an equitable sharing, particularly during the flush production season, of the lower returns that are inevitable with an adequate and necessary reserve of milk. Because many plants do not have facilities for processing reserve and surplus milk, the

adoption of an individual-handler pool wherein plants operating on a Class I basis pay a higher blend price than those who carry the reserve needs of the market, would automatically deter handlers from handling such milk or from equipping their plants for that purpose. The burden of carrying the necessary reserve supplies of milk would continue to be shouldered by only a part of the producers who share in the year around Class I sales in the area.

The producers' cooperative association owns a milk processing plant and assumes the responsibility for, and markets some of, the reserve and surplus milk. A market-wide pool will facilitate the movement of milk supplies by the association between handlers to meet their individual needs or to those nonpool processing plants that can make the most efficient use of such milk. These factors, taken in conjunction with the variations in amount of reserve supplies among plants, all support the adoption of a market-wide pool.

*Base-excess plan.* A base and excess plan of distributing among producers returns for milk should be employed in connection with the market-wide pool established herein. Although data with respect to receipts of milk are inadequate to determine the exact seasonal variation for the marketing area, the record evidence does indicate that receipts vary widely relative to Class I sales between the summer and winter months. In addition, some handlers have difficulty in utilizing efficiently all milk delivered to them during periods of seasonally high production. Consequently, there is a need for an added incentive to maintain production in the fall and winter months relative to that of the spring and summer months. Base and excess plans are effective means of improving the seasonal pattern of milk deliveries because they relate producer returns directly to delivery of additional milk in the fall and winter as compared with usual deliveries in the spring and summer.

The market has a history of producer participation in base-excess plans and both producers and handlers indicated their approval of this type of incentive for encouraging more even seasonal production.

The base-excess plan proposed herein would establish for each producer a base equal to his average daily deliveries during the five months of September through January. If a producer did not deliver milk to the market during the entire period, the days of actual delivery from the first day of delivery but not less than 120 would be used.

During the months March through July separate uniform prices would be computed for base milk and excess milk for the purpose of allocating Class I sales first to base milk. Base milk would be that quantity of milk delivered by each producer up to his average daily base multiplied by the number of days in the month during which he delivers milk to any pool plant. The excess milk price would be the Class II price except in those months when the total Class I sales exceed the total quantity of base milk. During such months the excess milk price would be a blend of Class I and Class II usage of excess milk. Provision is made for producers who may enter the market after the start of the base-forming period to establish a full base by delivering milk a minimum of 120 days during the specified period. Producers delivering milk for less than 120 days will have their bases calculated by dividing their total deliveries during the base-forming period by 120. The base-operating period (when payments are made for base milk and excess milk) should be limited to the 5-month period, March–July. These are the months in which the production of milk and the use of surplus processing facilities combine to create difficult marketing conditions.

Any producer should be permitted to transfer his entire base provided the market administrator is given advance notice and the transfer is made as of the first of a month. Permitting bases to be so transferred will alleviate situations wherein a producer discontinues the production of milk before the end of the base-paying period of March–July. Such a provision will give a producer added incentive to increase production during the September–January period because he can benefit from all the base he can establish even though he discontinues milk production in the spring. This action will encourage a more level pattern of seasonal production, and is, therefore, compatible with the need for and the purposes of a base-excess plan.

It was proposed that a cooperative association be assigned the collective base of its members so that such base might be pooled. Under this arrangement any under-base deliveries by one member could be used to benefit other members who delivered over-base milk.

This proposal does not conform with the primary purpose of the base-excess plan, namely to encourage even production. There is little reason to believe that any individual producer-member of an association would make a serious effort to increase fall production solely for the benefit of the other members. Nor does the fact that other members would receive base prices for over-base deliveries appear to give them added incentive to level production. It might, in fact, have the opposite effect.

(b) *Payments to individual producers and to members of cooperative associations.* Handlers should make payments to each producer for milk delivered by such producer at the appropriate uniform price. Provision also has been made for partial payments to producers on or before the last day of each month for milk delivered during the first 15 days of that month. Payments due any producer for milk should be paid by the handler to a cooperative association that makes a written request for such payments if the producer has given the cooperative association written authorization, in the form of a contract or in any other form, to collect such payments. The association's request should also agree to indemnify the handler for any loss incurred because of an improper claim. In making such payments for producer milk to a cooperative association the handler should, at the same time, furnish the cooperative association with a statement showing the name of each producer for whom payment is being made to the cooperative association, the volume and average butterfat content of milk delivered by each such producer, and the amount of and reasons for any deductions which the handler withheld from the amount payable to each producer. This statement is necessary so the cooperative association can make proper distribution of the money it collects to the producer-members for whom it makes collections.

Qualified cooperative associations of dairymen, if they so request, should be permitted to receive payment from handlers for their producer-members as a group. A provision authorizing handlers to make payment directly to such qualified cooperative associations for milk received from producer-members is necessary to enable the associations to carry out their essential functions authorized by the enabling act. A cooperative association, if it is to carry out these essential functions, must have full authority in the collective bargaining and selling of members' milk.

The record shows that the cooperative association operating in the Chattanooga area markets surplus producer milk during months of flush production. This milk may be sold within or outside the marketing area or used within the association's own plant. Such sales or use may result in financial losses or gains to the association, hence the association must be in a position to spread such losses or gains over the entire membership if it is to handle such milk effectively and efficiently. The Agricultural Marketing Agreement Act authorizes a qualified association to collect payments on behalf of all its members for milk caused to be marketed by such association and to reblend the entire sales. The order should provide that payment to such a cooperative association is a proper satisfaction of the payments required by the order to be made to individual producer-members.

(c) *Producer-settlement fund.* Since the amount which the order requires a particular handler to pay for his milk may be more or less than the amount he is required to pay to producers or cooperative associations, some method of balancing these amounts is necessary. A producer-settlement fund should be established for this purpose. All handlers who are required to pay more for their milk on the basis of their utilization than they are required to pay to producers or cooperative associations should pay the difference into the producer-settlement fund; and all handlers who are required to pay more to producers or cooperative associations than they are required to pay for their milk on the basis of utilization should receive the difference from the producer-settlement fund. Amounts paid into and out of the producer-settlement fund for this purpose will be equal, except for minor differences that may result from rounding of uniform prices. In order to permit this rounding of prices, to allow for unavoidable delays in receiving payments from handlers, and to permit payments to be made to any handler which audit by the market administrator reveals is due such handler from the producer-settlement fund, a reasonable reserve should be held in the producer-settlement fund at all times. The reserve, which would be adjusted each month, is established in the attached order at not less than four nor more than five cents per hundredweight of producer milk in the pool for the month. The unobligated balance remaining in the fund from the preceding month would be added to the values used in calculating the uniform prices each month. The amount of the reserve should be sufficient to enable the producer-settlement fund to perform its function efficiently.

If, at any time, the balance in the producer-settlement fund is insufficient to cover payments due to all handlers from the producer-settlement fund, payments to such handlers should be reduced uniformly per hundredweight of milk. The handlers may then reduce payments to producers by an equivalent amount per hundredweight. Amounts remaining due such handlers from the producer-settlement fund should be paid as soon as the balance in the fund is sufficient, and handlers should then complete payments to producers. In order to reduce the possibility of this occurring, milk received by any handler who has not made payments required of him into the producer-settlement fund should not be considered in the computation of the uniform price in subsequent months until such handler has completed all delinquent payments.

(e) *Other administrative provisions.* Certain other provisions are needed in the order to carry out the administrative steps necessary to accomplish the purposes of the proposed regulation.

*Terms and definitions.* In addition to the definitions discussed earlier in this decision which define the scope of the regulation, certain other terms and definitions are desirable in the interest of brevity and to assure that each usage of the term implies the same meaning. Definitions for base and excess milk are included. Other terms defined in the proposed order, such as "Act", "Secretary", "Department of Agriculture", "Person", "Cooperative association", and "Chicago butter price", are common to many other Federal milk orders.

*Market Administrator.* Provision should be made for the appointment by the Secretary of a market administrator to administer the order and to set forth the powers and duties for such agency essential to the proper functioning of his office.

*Records and reports.* Provisions should be included in the order to advise handlers that they are required to maintain adequate records of their operations and to make the reports necessary to establish classification of producer milk and payments due for such milk. Time limits must be prescribed for filing such reports and for making payments to producers. Dates must also be established for the announcement of prices by the market administrator.

It should be provided that the market administrator report to each cooperative association, which so requests, the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report, the utilization of members' milk in each handler's plant will be prorated to each class in the proportion that total receipts of producer milk were used in each class by such handler. In addition to the regular reports of handlers, provision is made for the handler, prior to the diversion of the milk of a producer, to notify the market administrator and the cooperative association, if such producer is a member of an association, of his intention to divert such milk. These reports are necessary if a cooperative association or the market administrator are to carry out marketing services for producers.

Handlers should maintain and make available to the market administrator all records and accounts of their operations, and such facilities as are necessary to determine the accuracy of the information reported to the market administrator as he may deem necessary or any other information upon which the classification of producer milk depends. The market administrator must likewise be permitted to check the accuracy of weights and tests of milk and milk products received and handled and to verify all payments required under the order.

It is necessary that handlers retain records to prove the utilization of the milk received from producers and that proper payments were made therefor. Since the books of all handlers associated with the market cannot be audited immediately after the milk has been delivered to a plant, it is necessary that such records be kept for a reasonable period of time.

The order should provide for specific limitations of the time that handlers should be required to retain their books and records and of the period of time in which obligations under the order should terminate. Provision made in this regard is identical in principle with the general amendment made to all milk orders in operation on July 30, 1947, following the Secretary's decision of January 26, 1949 (14 F. R. 444). That decision covering the retention of records and limitations of claims is equally applicable in this situation and is adopted as a part of this decision.

*Expenses of administration.* Each handler should be required to pay the market administrator as his pro rata share of the cost of administering the order not more than 4 cents per hundredweight or such lesser amounts as the Secretary may, from time to time, prescribe on (a) producer milk (including such handler's own production), (b) other source milk in pool plants which is allocated to Class I milk and (c) Class I milk disposed of in the marketing area (except to a pool plant) from a nonpool plant.

The market administrator must have sufficient funds to enable him to administer properly the terms of the order. The act provides that such cost of administration shall be financed through an assessment on handlers. One of the duties of the market administrator is to verify the receipts and disposition of milk from all sources. Equity in sharing the cost of administration of the order among handlers will be achieved, therefore, by applying the administrative assessment to all producer milk (including handlers' own production) and other source milk allocated to Class I milk.

Plants not subject to the classification and pricing provisions of the order may distribute limited quantities of Class I milk in the marketing area. These plants must be checked to verify their status under the order. Assessment of administrative expense on such milk sold in the marketing area will help defray the costs of such checking.

In view of the anticipated volume of milk and the costs of administering orders in markets of comparable circumstances, it is concluded that an initial rate of 4 cents per hundredweight is necessary to meet the expenses of administration. Provision should be made to enable the Secretary to reduce the rate of assessment below the 4 cents per hundredweight maximum without necessitating an amendment to the order. This should be done at any time experience in the market reveals that a lesser rate will produce sufficient revenue to administer the order properly.

*Marketing services.* A provision should be included in the order for furnishing market services to producers, such as verifying the tests and weights of producer milk and furnishing market information. These should be provided by the market administrator and the cost should be borne by the producer receiving the service. If a cooperative association is performing such services for any member producers and is approved for such activities by the Secretary, the market administrator may accept this in lieu of his own service.

There is need for a marketing service program in connection with the administration of the order in this area. Orderly marketing will be promoted by assuring individual producers that payments received for their milk are in accordance with the pricing provisions of the order and reflect accurate weights and tests of such milk. To accomplish this fully, it is necessary that the butterfat tests and weights of individual producer deliveries of milk as reported by the handler be verified for accuracy.

An additional phase of the marketing service program is to furnish producers with correct market information. Efficiency in the production, utilization and marketing of milk will be promoted by the dissemination of current information on a market-wide basis to all producers.

To enable the market administrator to furnish these marketing services, provision should be made for a maximum deduction of 6 cents per hundredweight with respect to receipts of milk from producers for whom he renders marketing services. This maximum rate of deduction is the same as the maximum rate provided for in the Knoxville and Nashville marketing areas. If later experience indicates that marketing services can be performed at a lesser rate, provision is made for the Secretary to adjust the rate downward without the necessity of a hearing.

*General findings.* (a) The proposed marketing agreement and the order and

all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order of the Secretary Directing That a Referendum Be Conducted Among the Producers Supplying Milk to the Chattanooga, Tennessee, Marketing Area; Determination of a Representative Period and Designation of an Agent To Conduct Such Referendum*

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c 19), it is hereby directed that a referendum be conducted among the producers (as defined in the proposed order regulating the handling of milk in the Chattanooga, Tennessee marketing area) who, during the month of April 1956, were engaged in the production of milk for sale in the marketing area specified in the aforesaid proposed order to determine whether such producers favor the issuance of an order which is part of the decision of the Secretary of Agriculture filed herewith.

The month of April 1956 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order regulating the handling of milk in the Chattanooga, Tennessee marketing area in the manner set forth in the attached order is approved or favored by producers who, during such period, were engaged in the production of milk for sale in the marketing area specified in such marketing order.

A. T. Radigan is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177), such referendum to be completed on or before the 20th day from the date this referendum order is issued.

*Marketing Agreement and Order.* Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Chattanooga, Tennessee Marketing Area", and "Order Regulating the Handling of Milk in the Chattanooga, Tennessee Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders, have been met.

It is hereby ordered that all of this decision, except the marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 26th day of June 1956.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

*Order[1] Regulating the Handling of Milk in the Chattanooga, Tennessee, Marketing Area*

Sec.
1000.0 Findings and determinations.

DEFINITIONS

1000.1 Act.
1000.2 Secretary.
1000.3 Department of Agriculture.
1000.4 Chattanooga, Tennessee, marketing area.
1000.5 Person.
1000.6 Producer.
1000.7 Pool plant.
1000.8 Nonpool plant.
1000.9 Handler.
1000.10 Producer-handler.
1000.11 Producer milk.
1000.12 Fluid milk product.
1000.13 Other source milk.
1000.14 Route.
1000.15 Cooperative association.
1000.16 Chicago butter price.
1000.17 Base milk.
1000.18 Excess milk.

MARKET ADMINISTRATOR

1000.25 Designation.
1000.26 Powers.
1000.27 Duties.

REPORTS, RECORDS AND FACILITIES

1000.30 Reports of sources and utilization.
1000.31 Other reports.
1000.32 Records and facilities.
1000.33 Retention of records.

CLASSIFICATION OF MILK

1000.40 Skim milk and butterfat to be classified.
1000.41 Classes of utilization.
1000.42 Responsibility of handlers.
1000.43 Transfers.
1000.44 Computation of skim milk and butterfat in each class.
1000.45 Allocation of skim milk and butterfat classified.

MINIMUM PRICES

1000.50 Basic formula price.
1000.51 Class prices.
1000.52 Butterfat differentials to handlers.
1000.53 Location differentials to handlers.
1000.54 Rate of compensatory payments.
1000.55 Use of equivalent prices.

APPLICATION OF PROVISIONS

1000.60 Producer-handlers.
1000.61 Plants subject to other Federal orders.
1000.62 Operators of nonpool plants.

DETERMINATION OF PRICES TO PRODUCERS

1000.70 Computation of the value of producer milk for each handler.
1000.71 Computation of the uniform price.
1000.72 Computation of uniform prices for base milk and excess milk.
1000.73 Butterfat differential to producers.
1000.74 Location differential to producers.
1000.75 Notification of handlers.

PAYMENTS

1000.80 Time and method of payment for producer milk.
1000.81 Producer-settlement fund.
1000.82 Payments to the producer-settlement fund.
1000.83 Payments out of the producer-settlement fund.
1000.84 Adjustment of errors in payment.
1000.85 Marketing services.
1000.86 Expenses of administration.
1000.87 Termination of obligations.

DETERMINATION OF BASE

1000.90 Computation of daily average base for each producer.
1000.91 Base rules.
1000.92 Announcement of established bases.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

1000.100 Effective time.
1000.101 Suspension or termination.
1000.102 Continuing obligations.
1000.103 Liquidation.

MISCELLANEOUS PROVISIONS

1000.110 Agents.
1000.111 Separability of provisions.

§ 1000.0 *Findings and determinations*—(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and order regulating the handling of milk in the Chattanooga, Tennessee, marketing area. Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order regulates the handling of milk in the same manner as, and is applicable only to, persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in this order, are in the current of interstate commerce or directly burden, obstruct or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler as his pro rata share of such expenses, 4 cents per hundredweight, or such amount not exceeding 4 cents per hundredweight, as the Secretary may prescribe with respect to all butterfat and skim milk contained in (i) producer milk, (ii) other source milk allocated to Class I milk pursuant to § 1000.41 (a), or (c) Class I milk disposed of in the marketing area (except to a pool plant) from a nonpool plant as determined pursuant to § 1000.62.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof, the handling of milk in the Chattanooga, Tennessee marketing area shall be in conformity to and in compliance with the following terms and conditions:

DEFINITIONS

§ 1000.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as re-enacted and amended by the Agricultural Markting Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 1000.2 *Secretary.* "Secretary" means the Secretary of Agriculture or any officer or employee of the United States authorized to exercise the powers and to perform the duties of the Secretary of Agriculture.

§ 1000.3 *Chattanooga, Tennessee, marketing area.* "Chattanooga, Tennessee, marketing area", hereinafter called the "marketing area", means all of the territory included within the boundaries of Hamilton, McMinn and Bradley counties, all in the State of Tennessee.

§ 1000.4 *Person.* "Person" means any individual, partnership, corporation, association or any other business unit.

§ 1000.5 *Approved dairy farmer.* "Approved dairy farmer" means any person who produces milk in compliance with Grade A inspection requirements of a duly constituted health authority.

§ 1000.6 *Producer.* "Producer" means any approved dairy farmer who produces milk which is received during the month at a pool plant: *Provided*, That if such milk is diverted from a pool plant by a handler to a nonpool plant for his account any day during the months of March through July or on not more than 10 days during any other month, the milk so diverted shall be deemed to have been received by the diverting handler at a pool plant at the location of the plant from which diverted.

§ 1000.7 *Pool plant.* "Pool plant" means any:

(a) Milk distributing plant approved or recognized by any health authority having jurisdiction in the marketing area for the receiving or processing of Grade A milk and from which Class I milk equal to not less than 50 percent of its receipts of milk from other pool plants and from approved dairy farmers is disposed of during the month on a route(s) and from which Class I milk equal to not less than 20 percent of its total Class I disposition is disposed of during the month on a route(s) in the marketing area.

(b) Milk supply plant which, during the month, ships fluid milk products approved by any health authority having jurisdiction in the marketing area as eligible for distribution under a Grade A label in a volume equal to not less than 50 percent of its receipts of milk from approved dairy farmers to a plant specified in paragraph (a) of this section: *Provided*, That any plant which qualifies as a pool plant pursuant to this paragraph in each of the months of August through February shall be designated as a pool plant for the following months of March through July: *And provided further*, That any such plant may withdraw from pool plant status for any month in the March–July period if the operator of such plant files with the market administrator prior to the first day of such month a written request for such withdrawal.

§ 1000.8 *Nonpool plant.* "Nonpool plant" means any milk plant other than a pool plant.

§ 1000.9 *Handler.* "Handler" means: (a) Any person in his capacity as the operator of one or more pool plants; or (b) a cooperative association with respect to milk of producers diverted for the account of such association from a pool plant to a nonpool plant in accordance with the provisions of § 1000.6.

§ 1000.10 *Producer-handler.* "Producer-handler" means any approved dairy farmer who operates a distributing plant in which he processes milk from his own production, and distributes all or a portion of such milk within the marketing area as Class I milk, but who receives no milk from other dairy farmers or from nonpool plants.

§ 1000.11 *Producer milk.* "Producer milk" means only that skim milk and butterfat contained in milk (a) received at the pool plant directly from producers, or (b) diverted from a pool plant to a nonpool plant (except a nonpool plant which is fully subject to the pricing provisions of another order issued pursuant to the act) in accordance with the provisions of § 1000.6.

§ 1000.12 *Fluid milk product.* "Fluid milk product" means milk, skim milk, buttermilk, flavored milk, flavored milk and skim milk drinks, yogurt, cream or any mixture in fluid form of milk, skim milk and cream (except sterilized products packaged in hermetically sealed containers, eggnog, ice cream and ice milk mix and aerated cream).

§ 1000.13 *Other source milk.* "Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month of said milk products except (1) fluid milk products received from pool plants, or (2) producer milk; and

(b) Products, other than fluid milk products, from any source (including those produced at the plant) which are reprocessed or converted to another product in the plant during the month.

§ 1000.14 *Route.* "Route" means any delivery (including delivery by a vendor or a sale from a plant or plant store) of milk or any milk product classified as Class I milk pursuant to § 1000.41 (a) other than a delivery to any milk processing plant.

§ 1000.15 *Cooperative association.* "Cooperative association" means any cooperative association of producers which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have and to be exercising full authority in the sale of milk of its members.

§ 1000.16 *Chicago butter price.* "Chicago butter price" means the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of 92-score bulk creamery butter at Chicago as reported during the month by the Department of Agriculture.

§ 1000.17 *Base milk.* "Base milk" means milk received at pool plants from a producer during any of the months of March through July which is not in excess of such producer's daily average base computed pursuant to § 1000.90, multiplied by the number of days in such month.

§ 1000.18 *Excess milk.* "Excess milk" means milk received at pool plants from a producer during any of the months of March through July which is in excess of the base milk of such producer for such month, and shall include all milk received during such months from a producer for whom no daily average base can be computed pursuant to § 1000.90.

§ 1000.19 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture or any other Federal agency that may be authorized by act of Congress or by executive order to perform the price reporting functions of the United States Department of Agriculture.

MARKET ADMINISTRATOR

§ 1000.25 *Designation.* The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 1000.26 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To make rules and regulations to effectuate its terms and provisions;

(c) To receive, investigate, and report to the Secretary complaints of violations; and

(d) To recommend amendments to the Secretary.

§ 1000.27 *Duties.* The market administrator shall perform all duties necessary to administer the terms and

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

provisions of this part, including, but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon his duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds received pursuant to § 1000.86: (1) The cost of his bond and of the bonds of his employees, (2) his own compensation, and (3) all other expenses, except those incurred under § 1000.85 necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this section, and upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly disclose to handlers and producers, at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any handler who, after the date on which he is required to perform such acts, has not made reports pursuant to §§ 1000.30 and 1000.31 or payments pursuant to §§ 1000.80 through 1000.86;

(g) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(h) On or before the 12th day after the end of each month, report to each cooperative association which so requests, the percentage of producer milk delivered by members of such association which was used in each class by each handler receiving such milk. For the purpose of this report the milk so received shall be prorated to each class in accordance with the total utilization of producer milk by such handler;

(i) Verify all reports and payments of each handler by audit if necessary, of such handler's records and the records of any other handler or person upon whose utilization the classification of skim milk and butterfat for such handler depends; and by such other means as are necessary;

(j) Prepare and make available for the benefit of producers, consumers, and handlers, general statistics and information concerning the operation of this order which do not reveal confidential information; and

(k) On or before the date specified publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, and mail to each handler at his last known address a notice of, the following:

(1) The 5th day of each month, the Class I milk price and the Class I butterfat differential, both for the current month; and the Class II milk price, and the Class II butterfat differential, both for the preceding month, and

(2) The 10th day of each month, the uniform prices, computed pursuant to §§ 1000.71 and 1000.72, and the producer butterfat differential, both for the preceding month.

REPORTS, RECORDS AND FACILITIES

§ 1000.30 *Reports of sources and utilization.* On or before the 6th day after the end of each month each handler, except a producer-handler, shall report for each of his pool plants for such month to the market administrator in the detail and on forms prescribed by the market administrator as follows:

(a) The quantities of skim milk and butterfat contained in:

(1) Producer milk;

(2) Fluid milk products received from other pool plants;

(3) Other source milk;

(4) Inventories of fluid milk products on hand at the beginning of the month; and

(5) The utilization of all skim milk and butterfat required to be reported pursuant to this paragraph, including separate statements as to the disposition of Class I milk outside the marketing area, and inventories of fluid milk products on hand at the end of the month.

§ 1000.31 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe;

(b) Each handler, except a producer-handler, shall report to the market administrator, in the detail and on forms prescribed by the market administrator:

(1) On or before the 6th day of each of the months of April through August, the aggregate quantity of base milk received at his pool plant(s) for the preceding month,

(2) On or before the 20th day after the end of the month, for each of his pool plants, his producer payroll for such month which shall show for each producer: (i) His name and address, (ii) the total pounds of milk received from such producer, including for the months of March through July, the pounds of base milk, (iii) the days for which milk was received from such producer if less than the entire month, (iv) the average butterfat content of such milk, and (v) the net amount of such handler's payment to the producer, together with the price paid and the amount and nature of any deductions,

(3) On or before the day prior to diverting producer milk pursuant to § 1000.6, his intention to divert such milk, the date or dates of such diversion and the nonpool plant to which such milk is to be diverted, and

(4) Such other information with respect to his sources and utilization of butterfat and skim milk as the market administrator may prescribe.

§ 1000.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data for each month with respect to:

(a) The receipt and utilization of all skim milk and butterfat handled in any form;

(b) The weights and tests for butterfat and other content of all products handled;

(c) The pounds of skim milk and butterfat contained in or represented by all items of products on hand at the beginning and end of each month; and

(d) Payments to producers, including any deductions authorized by producers and disbursement of money so deducted.

§ 1000.33 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION OF MILK

§ 1000.40 *Skim milk and butterfat to be classified.* The skim milk and butterfat to be reported for pool plants pursuant to § 1000.30 (a) shall be classified each month pursuant to the provisions of §§ 1000.41 through 1000.45.

§ 1000.41 *Classes of utilization.* Subject to the conditions set forth in §§ 1000.42 through 1000.45, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat (1) disposed of from the plant in the form of fluid milk products, except those classified pursuant to paragraph (b) (3) of this section, and (2) not specifically accounted for as Class II milk; and

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat (1) used to produce any product other than a fluid milk product; (2) contained in inventories of fluid milk products on hand at the end of the month; (3) skim milk disposed of and used for livestock feed or skim milk dumped subject to prior notification to and inspection (at his discretion) by the market administrator; and (4) in shrinkage not to exceed 2 percent, respectively, of the skim milk and butterfat contained in producer milk (except that diverted pursuant to § 1000.6) and other source milk: *Provided*, That if shrinkage of skim milk or butterfat is less than such 2 percent it shall be assigned pro rata to the skim milk or butterfat contained in producer milk (except that diverted pursuant to § 1000.6) and other source milk respectively.

§ 1000.42 *Responsibility of handlers.* All skim milk and butterfat to be classified pursuant to this order shall be classified Class I milk, unless the handler who first receives such skim milk and butterfat establishes to the satisfaction of the market administrator that it should be classified as Class II milk.

§ 1000.43 *Transfers.* (a) Skim milk and butterfat transferred to a pool plant of another handler (except a producer-handler) in the form of fluid milk products shall, to the extent required, be classified so as to result in the maximum assignment of the producer milk of both handlers to Class I milk. Any additional amounts of skim milk and butterfat shall be classified Class I milk, unless the operators of both plants claim utilization thereof in Class II milk in their reports submitted pursuant to § 1000.30: *Provided*, That the skim milk or butterfat so assigned to Class II milk for any month shall be limited to the respective amounts thereof remaining in Class II milk for such month at the pool plant(s) of the receiving handler after the subtraction of other source milk pursuant to § 1000.45;

(b) Skim milk and butterfat transferred to the plant of a producer-handler in the form of fluid milk products, shall be classified Class I milk;

(c) Skim milk and butterfat transferred or diverted in bulk form as milk or skim milk to a nonpool milk plant shall be classified Class I milk unless, (1) the transferee-plant is located less than 250 miles from the City Hall in Chattanooga, Tennessee, by the shortest hard-surfaced highway distance, as determined by the market administrator, (2) the transferring or diverting handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 1000.30 for the month within which such transaction occurred, (3) the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and (4) not less than an equivalent amount of skim milk and butterfat was actually utilized in the nonpool plant in the use indicated in such report: *Provided*, That if it is found that an equivalent amount of skim milk and butterfat was not actually used in such plant during the month in such indicated use, the pounds transferred in excess of such actual use shall be classified Class I milk; and

(d) Skim milk and butterfat transferred in bulk form as cream to a nonpool plant shall be classified Class I milk unless, (1) the transferring handler claims classification in Class II milk in his report submitted to the market administrator pursuant to § 1000.30, (2) the handler attaches tags or labels to each container of such cream bearing the words "for manufacturing uses only" and the shipment is so invoiced, (3) the handler gives the market administrator sufficient notice to allow him to verify such shipment, (4) the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and (5) not less than an equivalent amount of skim milk and butterfat was actually utilized in the nonpool plant in the use indicated in such report: *Provided*, That if it is found that an equivalent amount of skim milk and butterfat was not actually used in such plant during the month in such indicated use, the pounds transferred in excess of such actual use shall be classified Class I milk.

§ 1000.44 *Computation of skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and other obvious errors, the reports submitted by each handler pursuant to § 1000.30 and compute the total pounds of skim milk and butterfat respectively, in Class I milk and Class II milk at all of the pool plants of such handler: *Provided*, That the skim milk contained in any product utilized, produced, or disposed of by the handler during the month shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water originally associated with such solids.

§ 1000.45 *Allocation of skim milk and butterfat classified.* (a) The pounds of skim milk remaining in each class after making the following computations each month with respect to the pool plant(s) of each handler, shall be the pounds of skim milk in such class allocated to the producer milk of such handler for such month.

(1) Subtract from the total pounds of skim milk in Class II milk the shrinkage of skim milk in producer milk classified as Class II milk pursuant to § 1000.41 (b),

(2) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk in other source milk which was not subject to the Class I pricing provisions of an order issued pursuant to the act: *Provided*, That if the pounds of skim milk to be subtracted are greater than the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk in Class I milk,

(3) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk in other source milk which was subject to the Class I pricing provisions of another order issued pursuant to the act: *Provided*, That if the pounds of skim milk to be subtracted are greater than the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk in Class I milk,

(4) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk contained in inventories of fluid milk products on hand at the beginning of the month: *Provided*, That if the pounds of skim milk in such inventory exceed the remaining pounds of skim milk in Class II milk the balance shall be subtracted from the pounds of skim milk remaining in Class I milk,

(5) Subtract the pounds of skim milk in fluid milk products received from pool plants of other handlers from the pounds of skim milk remaining in the class to which assigned, pursuant to § 1000.43 (a),

(6) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph,

(7) If the pounds of skim milk remaining in all classes exceed the pounds of skim milk in milk received from producers, subtract such excess from the pounds of skim milk remaining in the various classes in series beginning with Class II milk. Any amount so subtracted shall be known as "overage".

(b) Determine the pounds of butterfat in each class to be allocated to producer milk in the manner prescribed in paragraph (a) of this section for determining the allocation of skim milk to producer milk; and

(c) Add the pounds of skim milk and the pounds of butterfat in each class calculated pursuant to paragraphs (a) and (b) of this section and determine the percentage of butterfat in the producer milk allocated to each class.

MINIMUM PRICES

§ 1000.50 *Basic formula price.* The basic formula price per hundredweight (computed to the nearest cent) to be used in determining the price for Class I milk pursuant to § 1000.51 (a) shall be the highest of the prices per hundredweight for milk of 4.0 percent butterfat content computed pursuant to paragraph (a), (b), or (c) of this section, or § 1000.51 (b) (1).

(a) To the arithmetical average of the basic (or field) prices reported to have been paid or to be paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture on or before the 6th day after the end of the month:

| *Company and Location* |
|---|
| Borden Co., Mount Pleasant, Mich. |
| Borden Co., New London, Wis. |
| Borden Co., Orfordville, Wis. |
| Carnation Co., Oconomowoc, Wis. |
| Carnation Co., Richland Center, Wis. |
| Carnation Co., Sparta, Mich. |
| Pet Milk Co., Belleville, Wis. |
| Pet Milk Co., Coopervile, Mich. |
| Pet Milk Co., Hudson, Mich. |
| Pet Milk Co., New Glarus, Wis. |
| Pet Milk Co., Wayland, Mich. |
| White House Milk Co., Manitowoc, Wis. |
| White House Milk Co., West Bend, Wis. |

and an amount computed by multiplying the butterfat differential computed pursuant to § 1000.73, by 5.

(b) The price per hundredweight computed as follows:

(1) Multiply the Chicago butter price by 6;

(2) Add an amount equal to 2.4 times the arithmetical average of the weekly

prevailing price per pound of "Twins" during the month on the Wisconsin Cheese Exchange at Plymouth, Wisconsin: *Provided*, That if the price of "Twins" is not quoted on such Exchange, the weekly prevailing price per pound of "Cheddars" shall be used; and

(3) Divide by 7, add 30 percent thereof, and then multiply by 4.

(c) The price per hundredweight computed as follows: Multiply the Chicago butter price by 4.0, add 20 percent thereof, and add to such sum 3¾ cents for each full one-half cent that the arithmetical average of carlot prices per pound of nonfat dry milk solids, spray and roller process, for human consumption, f. o. b. Chicago area manufacturing plants, for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department of Agriculture, is above 5 cents.

§ 1000.51 *Class prices.* Subject to the provisions of §§ 1000.52 and 1000.53, the minimum prices per hundredweight of milk containing 4 percent butterfat, to be paid by each handler for milk received at his pool plant from producers, during the month, shall be as follows:

(a) *Class I milk price.* For each month during an eighteen month period following the effective date of this order, the minimum price per hundredweight of Class I milk shall be the basic formula price for the preceding month, plus $1.75.

(b) *Class II milk price.* For the months of February through August, the Class II milk price shall be the price computed pursuant to subparagraph (1) of this paragraph, rounded to the nearest cent. For all other months, it shall be the price computed pursuant to subparagraph (1) of this paragraph, or the price computed pursuant to § 1000.50 (c), whichever is higher.

(1) The average of the basic or field prices reported to have been paid or to be paid per hundredweight for milk of 4.0 percent butterfat content received from dairy farmers during the month at the following plants or places, for which prices have been reported to the market administrator or to the Department on or before the 6th day after the end of the month:

*Company and Location*

Kraft Foods Co., Fayetteville, Tenn.
Pet Milk Co., Greensville, Tenn.
Carnation Co., Murfreesboro, Tenn.
Borden Co., Lewisburg, Tenn.

§ 1000.52 *Butterfat differentials to handlers.* For milk containing more or less than 4.0 percent butterfat, the class prices calculated pursuant to § 1000.51 shall be increased or decreased, respectively, for each one-tenth percent butterfat at the appropriate rate, rounded to the nearest one-tenth cent, determined as follows:

(a) *Class I milk price.* Multiply the Chicago butter price for the preceding month by 0.13; and

(b) *Class II milk price.* Multiply the Chicago butter price for the month by 0.115: *Provided*, That such butterfat differential shall not exceed the result obtained by dividing the Class II price, pursuant to § 1000.51 (b), by 40.

§ 1000.53 *Location differentials to handlers.* For that milk which is received from producers at a pool plant located 65 miles or more from the City Hall of Chattanooga, Tennessee, by shortest hard-surfaced highway distance, as determined by the market administrator, and which is assigned to Class I milk pursuant to the proviso of this section, or otherwise classified as Class I milk, the price specified in § 1000.51 (a) shall be reduced at the rate set forth in the following schedule according to the location of the pool plant where such milk is received from producers:

| Distance from the City Hall of Chattanooga, Tenn. (miles): | *Rate per hundred weight (cents)* |
|---|---|
| 65 but not more than 75 | 15.0 |
| For each additional 10 miles or fraction thereof an additional | 1.5 |

*Provided*, That for the purpose of calculating such location differential, fluid milk products which are transferred between pool plants shall be assigned to any remainder of Class II milk in the plant to which transferred after making the calculations prescribed in § 1000.45 (a) (1) through (4), and the comparable steps in § 1000.45 (b) for such plant, such assignment to the transferring plants to be made in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential.

§ 1000.54 *Rate of compensatory payments.* The rate of compensatory payment per hundredweight shall be calculated as follows:

(a) For the months of March through July, subtract the Class II price, adjusted by the Class II butterfat differential, from the Class I price, adjusted by the Class I butterfat differential, and the Class I location differential of the plant at which the milk was received from farmers.

(b) For the months of August through February, subtract the uniform price to producers from the Class I price.

§ 1000.55 *Use of equivalent prices.* If for any reason a price quotation required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATION OF PROVISIONS

§ 1000.60 *Producer-handlers.* Sections 1000.40 through 1000.45, 1000.50 through 1000.53, 1000.61 and 1000.62, 1000.70 through 1000.75, and 1000.80 through 1000.87 shall not apply to a producer-handler.

§ 1000.61 *Plants subject to other Federal orders.* Upon application to the market administrator and a subsequent determination by the Secretary, a plant specified in paragraph (a) or (b) of this section shall be treated as a nonpool plant except that the operator of such plant shall, with respect to the total receipts and utilization or disposition of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(a) Any distributing plant which would otherwise be subject to the classification and pricing provisions of another order issued pursuant to the act, unless a greater volume of Class I milk is disposed of from such plant to retail or wholesale outlets (except pool plants or nonpool plants) in the Chattanooga, Tennessee, marketing area than in the marketing area regulated pursuant to such order; and

(b) Any supply plant which would otherwise be subject to the classification and pricing provisions of another order issued pursuant to the act, unless such plant qualified as a pool plant for each of the preceding months of August through February.

§ 1000.62 *Operators of nonpool plants.* An operator of a nonpool plant which is not subject to the classification and pricing provisions of another order issued pursuant to the act, shall, on or before the 12th day after the end of the month, pay to the market administrator for deposit into the producer-settlement fund an amount calculated by multiplying the total hundredweight of butterfat and skim milk disposed of in the form of fluid milk products from such nonpool plant to retail or wholesale outlets (including deliveries by vendors and sales through plant stores) in the marketing area during the month by the rate of compensatory payment calculated pursuant to § 1000.54.

DETERMINATION OF PRICES TO PRODUCERS

§ 1000.70 *Computation of the value of producer milk for each handler.* For each month, the market administrator shall compute the value of producer milk for each handler as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to § 1000.45 by the applicable class price, total the resulting amounts, and add any amount necessary to reflect adjustments in location differential allowance required pursuant to the proviso of § 1000.53;

(b) Add an amount computed by multiplying the hundredweight of skim milk and butter fat subtracted from Class I milk pursuant to § 1000.45 (a) (2) and (b) by the rate of compensatory payment as determined pursuant to § 1000.54 for the nearest plant(s) from which an equivalent amount of other source milk was received in the form of fluid milk products;

(c) Add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 1000.45 (a) (7) and (b) by the applicable class price; and

(d) Add the amount computed by multiplying the difference between the appropriate Class II price for the preceding month and the appropriate Class I milk price for the current month by the hundredweight of skim milk and butterfat remaining in Class II milk after the calculations pursuant to § 1000.45 (a) (5) and (b) for the preceding month or the hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 1000.45 (a) (4) and (b) for the current month, whichever is less, respectively.

§ 1000.71 *Computation of the uniform price.* For each of the months of August through February, the market administrator shall compute the uniform price per hundredweight of producer milk of 4.0 percent butterfat content, f. o. b. market, as follows:

(a) Combine into one total the values computed pursuant to § 1000.70 for the producer milk of all handlers who submit reports prescribed in § 1000.30 and who are not in default of payments pursuant to § 1000.80 or § 1000.82;

(b) Subtract, if the average butterfat content of the producer milk included under paragraph (a) of this section is greater than 4.0 percent, or add, if such average butterfat content is less than 4.0 percent, an amount computed as follows: Multiply the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 1000.73, and multiply the result by the total hundredweight of such milk;

(c) Add an amount equal to the sum of the deductions to be made from producer payments for location differentials pursuant to § 1000.80 (a) (2);

(d) Add an amount equal to one-half of the unobligated balance on hand in the producer-settlement fund;

(e) Add the total amount of payment due pursuant to § 1000.62;

(f) Divide the resulting amount by the total hundredweight of producer milk included under paragraph (a) of this section; and

(g) Subtract not less than 4 cents nor more than 5 cents.

§ 1000.72 *Computation of uniform prices for base milk and excess milk.* For each of the months of March through July, the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk, each of 4.0 percent butterfat content, f. o. b. market, as follows:

(a) Compute the aggregate value of excess milk for all handlers who submit reports pursuant to § 1000.30, and who are not in default of payments pursuant to § 1000.80 or § 1000.82 as follows: (1) Multiply the hundredweight quantity of such milk which does not exceed the total quantity of producer milk assigned to Class II milk in the pool plants of such handlers by the Class II milk price, (2) multiply the remaining hundredweight quantity of excess milk by the Class I milk price, and (3) add together the resulting amounts;

(b) Divide the total value of excess milk obtained in paragraph (a) of this section by the total hundredweight of such milk, adjust to the nearest cent and subtract 4 cents. The resulting figure shall be the uniform price for excess milk of 4.0 percent butterfat content received from producers;

(c) Subtract the total value of excess milk determined by multiplying the uniform price obtained in paragraph (b) of this section, plus 4 cents, times the hundredweight of excess milk from the total value of producer milk for the month as determined according to the calculations set forth in § 1000.71 (a) through (e);

(d) Divide the amount calculated pursuant to paragraph (c) of this section by the total hundredweight of base milk included in these computations; and

(e) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (d) of this section. The resulting figure shall be the uniform price for base milk of 4.0 percent butterfat content f. o. b. market.

§ 1000.73 *Butterfat differential to producers.* The applicable uniform prices to be paid each producer shall be increased or decreased for each one-tenth of one percent which the average butterfat content of his milk is above or below 4.0 percent, respectively, at the rate determined by multiplying by 0.12 the Chicago butter price during the month, adjusted to the nearest one-tenth of a cent.

§ 1000.74 *Location differential to producers.* The applicable uniform prices to be paid for producer milk received at a pool plant located 65 miles or more from the City Hall of Chattanooga, Tennessee, by the shortest hard-surfaced highway distance, as determined by the market administrator, shall be reduced according to the location of the pool plant where such milk was received at the rates set forth in § 1000.53.

§ 1000.75 *Notification of handlers.* On or before the 10th day after the end of each month, the market administrator shall mail to each handler, who submitted the report(s) prescribed in § 1000.30, at his last known address, a statement showing:

(a) The amount and value of his producer milk in each class and the totals thereof;

(b) For the months of March through July the amounts and value of his base and excess milk respectively, and the totals thereof;

(c) The uniform price(s) computed pursuant to §§ 1000.71 and 1000.72 and the butterfat differential computed pursuant to § 1000.73; and

(d) The amounts to be paid by such handler pursuant to §§ 1000.82, 1000.85 and 1000.86, or § 1000.62 and the amount due such handler pursuant to § 1000.83.

PAYMENTS

§ 1000.80 *Time and method of payment for producer milk.* (a) Except as provided in paragraph (b) of this section, each handler shall make payment to each producer from whom milk is received during the month as follows:

(1) On or before the last day of each month to each producer who did not discontinue shipping milk to such handler before the 25th day of the month, an amount equal to not less than the Class II price for the preceding month multiplied by the hundredweight of milk received from such producer during the first 15 days of the month, less proper deductions authorized by such producer to be made from payments due pursuant to this paragraph,

(2) On or before the 15th day of the following month, an amount equal to not less than the appropriate uniform price(s) adjusted by the butterfat and location differentials to producers multiplied by the hundredweight of milk or base milk and excess milk received from such producer during the month, subject to the following adjustments: (i) Less payments made to such producer pursuant to subparagraph (1) of this paragraph, (ii) less marketing service deductions made pursuant to § 1000.85, (iii) plus or minus adjustments for errors made in previous payments made to such producers, and (iv) less proper deductions authorized in writing by such producer: *Provided*, That if by such date such handler has not received full payment from the market administrator pursuant to § 1000.83 for such month, he may reduce pro rata his payments to producers by not more than the amount of such underpayment. Payments to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following after the receipt of the balance due from the market administrator;

(b) In the case of a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk and which has so requested any handler in writing, such handler shall on or before the 2d day prior to the date on which payments are due individual producers pay the cooperative association for milk received during the month from the producer members of such association as determined by the market administrator an amount equal to not less than the amount due such producer members as determined pursuant to paragraph (a) of this section; and

(c) Each handler who receives milk during the month from producers for which payment is to be made to a cooperative association pursuant to paragraph (b) of this section shall report to such cooperative association or to the market administrator for transmittal to such cooperative association for each such producer as follows:

(1) On or before the 25th day of the month, the total pounds of milk received during the first 15 days of such month, and

(2) On or before the 7th day of the following month (i) the pounds of milk received each day and the total for the month, together with the butterfat content of such milk, (ii) for the months of March through July the total pounds of base milk received, (iii) the amount or rate and nature of any deductions to be made from payments, and (iv) the amount and nature of payments due pursuant to § 1000.84.

§ 1000.81 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1000.62, 1000.82 and 1000.84, and out of which he shall make all payments pursuant to §§ 1000.83 and 1000.84: *Provided*, That any payments due to any handler shall be offset by any payments due from such handler.

§ 1000.82 *Payments to the producer-settlement fund.* On or before the 12th day after the end of each month, each handler shall pay to the market administrator any amount by which the value

of his producer milk as computed pursuant to § 1000.70 for such month, is greater than the amount owed by him for such milk at the appropriate uniform price(s) adjusted by the producer butterfat and location differentials.

§ 1000.83 *Payments out of the producer-settlement fund.* On or before the 13th day after the end of each month, the market administrator shall pay to each handler any amount by which the total value of his producer milk, computed pursuant to § 1000.70, for such month is less than the amount owed by him for such milk at the appropriate uniform price(s) adjusted by the producer butterfat and location differentials. If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the appropriate funds are available.

§ 1000.84 *Adjustment of errors in payment.* Whenever verification by the market administrator of payments by any handler discloses errors made in payments to the producer-settlement fund pursuant to § 1000.82, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 15 days, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, pursuant to § 1000.83, the market administrator shall, within 15 days, make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer or cooperative association for milk received by such handler discloses payment of less than is required by § 1000.80, the handler shall pay such balance due such producer or cooperative association not later than the time of making payment to producers or cooperative associations next following such disclosure.

§ 1000.85 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers for milk (other than milk of his own production) pursuant to § 1000.80, shall deduct 6 cents per hundredweight, or such amount not exceeding 6 cents per hundredweight as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 15th day after the end of the month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such service from a cooperative association;

(b) In the case of producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall (in lieu of the deduction specified in paragraph (a) of this section), make such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers, and on or before the 13th day after the end of each month, pay such deductions to the cooperative association of which such producers are members, furnishing a statement showing the amount of any such deductions and the amount of milk for which such deduction was computed for each producer.

§ 1000.86 *Expenses of administration.* On or before the 15th day after the end of each month, each handler shall pay to the market administrator for each of his pool plants, 4 cents or such lesser amount as the Secretary may prescribe, for each hundredweight of butterfat and skim milk contained in (a) producer milk, (b) other source milk allocated to Class I milk pursuant to § 1000.45 (a) (2) and (b), or (c) Class I milk disposed of in the marketing area (except to a pool plant) from a nonpool plant as determined pursuant to § 1000.62.

§ 1000.87 *Termination of obligations.* The provisions of this section shall apply to any obligations under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate 2 years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such 2-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation,

(2) The month(s) during which the milk, with respect to which the obligation exists was received or handled, and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid;

(b) If a handler fails or refuses, with respect to any obligation under this order, to make available to the market administrator or his representative all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representative;

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this order to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed; and

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the payment (including deduction or setoff by the market administrator) was made by the handler, if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

DETERMINATION OF BASE

§ 1000.90 *Computation of daily average base for each producer.* Subject to the rules set forth in § 1000.91, the daily average base for each producer shall be an amount calculated by dividing the total pounds of milk received from such producer at all pool plants during the months of September through January immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of January, inclusive, or by 120, whichever is more.

§ 1000.91 *Base rules.* The following rules shall apply in connection with the establishment and assignment of bases:

(a) Subject to the provisions of paragraph (b) of this section, the market administrator shall assign a base calculated pursuant to § 1000.90 to each person for whose account producer milk was delivered to pool plants during the months of September through January; and

(b) An entire base shall be transferred from a person holding such base to any other person effective as of the end of any month during which an application for such transfer is received by the market administrator, such application to be on forms approved by the market administrator and signed by the baseholder, or his heirs, and by the person to whom such base is to be transferred: *Provided,* That if a base is held jointly, the entire base shall be transferrable only upon the receipt of such application signed by all joint holders or their heirs, and by the person to whom such base is to be transferred.

§ 1000.92 *Announcement of established bases.* On or before March 1 of each year, the market administrator shall notify each producer, and the handler receiving milk from such producer, of the daily average base established by such producer.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 1000.100 *Effective time.* The provisions of this part, or any amendment thereto, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 1000.101 *Suspension or termination.* The Secretary shall, whenever he finds that any or all provisions of this part, or any amendment thereto, obstruct or do not tend to effectuate the declared policy of the act, terminate or suspend the operation of any or all provisions of this part or any amendment thereto.

§ 1000.102 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part, or any amendment thereto, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 1000.103 *Liquidation.* Upon the suspension or termination of any or all provisions of this part, the market administrator, or such other liquidating agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidating and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1000.110 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent and representative in connection with any of the provisions of this part.

§ 1000.111 *Separability of provisions.* If any provisions of this part, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

## FEDERAL COMMUNICATIONS COMMISSION

### [ 47 CFR Part 3 ]

[Docket No. 11677]

RADIO BROADCAST SERVICES

NOTICE OF EXTENSION OF TIME FOR FILING COMMENTS

In the matter of amendment of §§ 3.66, 3.274 and 3.572 of the Commission's rules and regulations relating to remote control operation of certain standard, FM and noncommercial educational FM broadcast stations.

1. The Commission has before it for consideration the request of the National Association of Broadcast Employees and Technicians filed June 14, 1956, for extension of time in which to file comments in the above-entitled proceeding.

2. In support of its request the NABET states that it proposes to file comments in this proceeding; that it has elicited information from transmitter operators in a number of key stations throughout the country in connection with the rule making proposal; and that a further extension of time for filing comments is necessary in this connection.

3. The Commission is of the view that a further extension of time for the filing of comments in this proceeding would serve the public interest, convenience and necessity.

4. In view of the foregoing: *It is ordered,* That the time for filing comments in the above-entitled proceeding is extended to August 2, 1956; and that the time for filing replies to such comments is extended to 20 days thereafter.

Adopted: June 25, 1956.

Released: June 26, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

### [ 21 CFR Part 120 ]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF WITHDRAWAL OF PETITION FOR ESTABLISHMENT OF TOLERANCES FOR RESIDUES OF LINDANE

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

In accordance with § 120.8 *Withdrawal of petitions without prejudice* of the general regulations for setting tolerances and granting exemptions from tolerances for pesticide chemicals in or on raw agricultural commodities (21 CFR 120.8), the Benzene Hexachloride Committee of the National Agricultural Chemicals Association, P. O. Box 333, Falls Church, Virginia, has withdrawn its petition for establishment of tolerances for residues of lindane, notice of which was published in the FEDERAL REGISTER of February 10, 1956 (21 F. R. 975). This withdrawal is without prejudice to a future filing.

Dated: June 26, 1956.

[SEAL] JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITION FOR EXEMPTION FROM THE NECESSITY OF TOLERANCES FOR RESIDUES OF ALLETHRIN

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

A petition has been filed by Food Machinery and Chemical Corporation, Middleport, New York, and McLaughlin Gormley King Company, Minneapolis, Minnesota, proposing that the pesticide chemical allethrin (allyl homolog of cinerin I) be exempted from the requirement of tolerances for residues from use after harvest on the following raw agricultural commodities: Apples, blackberries, blueberries, boysenberries, cherries, crabapples, currants, dewberries, figs, gooseberries, grapes, guavas, huckleberries, loganberries, mangoes, muskmelons, oranges, peaches, pears, pineapples, plums, prunes, raspberries, tomatoes.

The analytical method proposed in the petition for determining residues of allethrin is "Estimation of Micro Quantities of Pyrethroids," published in Analytical Chemistry, Volume 26, pages 604–607 (1954).

Dated: June 26, 1956.

[Docket No. 11670; FCC 56M-625]

NEWS ON THE AIR, INC.

ORDER CONTINUING HEARING CONFERENCE

In re application of News on the Air, Inc., Port Clinton, Ohio, for construction permit; Docket No. 11670; File No. BP-9977.

The Hearing Examiner has under consideration a pleading filed June 20, 1956, by the above-entitled applicant requesting that the date presently specified for the exchange of certain exhibits be changed from June 21 to July 30, 1956, and that the date for further pre-hearing conference be changed from July 9 to August 6, 1956.

While the proper number of copies of this request were not filed with the Commission, copies were served on all parties to the proceeding. The Hearing Examiner is advised that there is no objection to the granting of the request for additional time. The Hearing Examiner's schedule, however, is such that a date other than the one requested for further pre-hearing must be specified.

*It is ordered,* This the 21st day of June 1956, that the date for the exchange of the engineering exhibits in this proceeding is changed from June 21, 1956 to July 30, 1956 and the date for further pre-hearing conference is changed from July 9, 1956 to September 20, 1956.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 1-3938]

STANDARD SULPHUR CO.

NOTICE OF APPLICATION TO WITHDRAW FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

JUNE 26, 1956.

In the matter of Standard Sulphur Company, common stock, File No. 1-3938.

The above named issuer, pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2-1 (b) promulgated thereunder, has made application to withdraw the specified security from listing and registration on the American Stock Exchange.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The listing application for this stock was approved by the American Stock Exchange on February 2, 1956, on which date said Exchange forwarded to the Commission its certification of the Form 10 registration application. Registration pursuant to said certification became effective by lapse of the usual 30 day waiting period, on or about March 5, 1956. The stock was never admitted to dealings on the American Stock Exchange, pending the revision of Form 10 application. The issuer states that in order to verify the reserves claimed in such application, it would be necessary to drill many exploratory wells, the cost of which would be extensive, and in areas where it would not be prepared to produce for a long time.

Upon receipt of a request, on or before July 12, 1956, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington 25, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 56-5188; Filed, June 29, 1956; 8:46 a. m.]

[File No. 31-633]

LINCOLN CORP.

NOTICE OF FILING OF APPLICATION FOR EXEMPTION

JUNE 26, 1956.

Notice is hereby given that Lincoln Corporation ("Lincoln") has filed with this Commission an application under sections 3 (a) (3) and/or 3 (a) (5) of the Public Utility Holding Company Act of 1935 ("act") for an order exempting it as a holding company, and each of its subsidiary companies as such, from the provisions of the act.

All interested persons are referred to the application on file in the office of the Commission for a statement of the basis for the request for exemption, which is summarized below.

Lincoln, a Delaware corporation, is a holding company which through wholly-owned subsidiaries is engaged in coal mining operations in the State of Wyoming. Its principal subsidiary, The Kemmerer Coal Company ("Kemmerer Coal"), conducts the mining operations. Electricity required by Kemmerer Coal in its coal mining operations is obtained from Lincoln's subsidiary, Lincoln Service Corporation ("Service Corporation"). Service Corporation, a Wyoming corporation organized in 1929, is a public-utility company, and is subject to the jurisdiction of the Wyoming Public Service Commission.

Prior to 1929, Kemmerer Coal operated a steam plant and small electric generating units in connection with its coal mining operations, and furnished limited electric service to the town of Kemmerer, Wyoming. For reasons of accounting under the Wyoming utility statutes, it was deemed expedient to separate the utility operations from the coal operations. Accordingly, Service Corporation was organized in 1929 and acquired the electric utility properties of Kemmerer Coal and associated companies. All of Service Corporation's stock is owned by Lincoln.

Service Corporation, in addition to supplying the electric energy requirements of Kemmerer Coal and certain other minor industries, provides electric utility services to the towns of Kemmerer, Diamondsville, and Frontier, and environs, all in the State of Wyoming.

By reason of Kemmerer Coal's change from underground mining to open-cut stripping operations, and a consequent decrease in its electric power requirements, the revenues received by Service Corporation from Kemmerer Coal have declined steadily over the years from 52 percent in the period 1931-35 to 12.1 percent in 1955. During the year 1955 the only transaction between Service Corporation and Lincoln and its other subsidiaries was the sale of electric energy to Kemmerer Coal. The total revenues from such sale aggregated $25,000. During the years 1951-55 the percentage of Service Corporation's net income to the aggregate income of all Lincoln's subsidiaries ranged from 2.6 percent in 1951 to 13.7 percent in 1953. In 1954 the percentage was 3.1 percent, and in 1955 Service Corporation experienced a net loss of $18,133.

At December 31, 1955, the book value of the assets of all of Lincoln's subsidiaries aggregated $7,842,434, of which those of Kemmerer Coal amounted to $5,508,804, or approximately 70 percent, and those of Service Corporation amounted to $819,886, or approximately 10.5 percent. As at the same date, the book value of the fixed assets of all subsidiaries aggregated $1,549,183, of which those of Kemmerer Coal amounted to $957,172, or approximately 61.7 percent, and those of Service Corporation amounted to $482,572, or approximately 31.2 percent. In this connection, it is stated that to improve and extend its service to rural areas adjacent to its present service area, Service Corporation, in October 1955, undertook a construction program the cost of which is estimated at approximately $1,250,000, to be financed by the private sale of debt securities to institutional investors.

All of the stock of Lincoln is owned by Sea Bright Corporation ("Sea Bright") and Penn Forest Corporation ("Penn Forest"). All of the stocks of Sea Bright and Penn Forest are beneficially owned by not exceeding sixteen members of the Kemmerer family. Service Corporation is the only public utility company owned directly or indirectly by Lincoln, Sea Bright and Penn Forest.

Notice is further given that any interested person may, not later than July 16, 1956, at 5:30 p. m., e. d. s. t., request in writing that a hearing be held in respect of the above matter, stating the nature of his interest, the reasons for the request, the issues of fact or law which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date said application may be granted or the Commission may take such other action as it may deem appropriate under the circumstances.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 56-5189; Filed, June 29, 1956; 8:46 a. m.]

## GENERAL SERVICES ADMINISTRATION

[Project 3-DC-01]

FEDERAL OFFICE BUILDINGS

PROSPECTUS FOR PROPOSED BUILDINGS IN SOUTHWEST REDEVELOPMENT AREA OF DISTRICT OF COLUMBIA

EDITORIAL NOTE: This prospectus of proposed Project Number 3-DC-01 is published pursuant to section 412 (f) of the Public Buildings Purchase Contract Act of 1954 as amended by Public Law 150, 84th Congress, which requires publication in the FEDERAL REGISTER, for a period of ten consecutive days from date of submission to the Committees on Public Works of the Senate and House of Representatives.

Project Number 3-DC-01 (Revised)

MARCH 14, 1956.

FORMAL PROSPECTUS FOR PROPOSED BUILDING UNDER TITLE I PUBLIC LAW 519, 83D CONGRESS, 2D SESSION

FEDERAL OFFICE BUILDING, WASHINGTON, D. C.

1. *Brief description of proposed building.* The project contemplates the erection of a group of three Federal Office Buildings on a site to be acquired by the Government facing on the proposed Tenth Street Mall in the southwest redevelopment area of Washington, D. C. Each building will be multi-storied. An aggregate of approximately 643,000 square feet of net assignable space will be provided.

2. *Estimated maximum cost and financing.* a. Maximum cost of site and buildings, $25,250,000.

b. Proposed contract term, 30 years.

c. Maximum rate of interest on purchase contract, 4 percent.

3. *Certificates of need.* As the project is intended to provide relocation of numerous Federal agencies now in temporary buildings, no specific allocation of space can be made at this time. Upon completion of the facility, assignment and reassignment will be made in accordance with existing law. Therefore, requirement for Certificate of Need otherwise required by section 411 (e) of the Public Buildings Purchase Contract Act of 1954 was waived in Public Law 150, 84th Congress. Certification is hereby made as to the need for service and garage space.

4. *Non-availability of existing space.* Suitable space owned by the Government is not available; and suitable rental space is not available at a price commensurate with that to be afforded through the contract proposed.

5. *Estimated annual managerial, custodial, heat, and utility costs.* (Services to be supplied by Government), $675,000.

6. *Estimated annual tax liability, upkeep and maintenance.* a. Taxes, post construction (contract period), $321,625.

b. Upkeep and maintenance (to be provided by Government), $96,000.

7. *Current annual housing costs.* Rents and other housing costs currently paid by the Government for agencies to be housed in the building to be erected, $509,000 p. a.

*Determination of need.* It has been determined that (1) the needs for space for the permanent activities of the Federal Government in this particular area cannot be satisfied by utilization of any existing suitable property now owned by the Government, and (2) the best interests of the United States will be served by taking action hereunder.

Submitted at Washington, D. C., on June 1, 1956.

Approved:

FRANKLIN G. FLOETE,
*Administrator of General Services.*

8. *Statement of Director, Bureau of the Budget.* Reflected in letter (copy attached).

EXECUTIVE OFFICE OF THE PRESIDENT
BUREAU OF THE BUDGET
WASHINGTON 25, D. C.

JUNE 13, 1956.

Project 3-DC-01 (Revised 3-14-56).
3 Multi-storied Federal Office Buildings.
Southwest Redevelopment Area, Washington, D. C.

MY DEAR MR. FLOETE: Pursuant to section 411 (e) (8) of the Public Buildings Purchase Contract Act of 1954 (Public Law 519), the (Revised March 14, 1956) proposal for a group of three Federal Office Buildings, transmitted with your letter of June 1, 1956, has been examined and in my opinion "is necessary and in conformity with the policy of the President." This approval is given with the following understanding:

1. Revision reflects the application of more definite plans for integration of the facility with the proposed Tenth Street Mall developed subsequent to approval of the project last July. Effective integration requires construction of three building units in lieu of one, as originally proposed. Garage space of 134,250 square feet not contemplated in original project is provided. Number of employees, utilization of space and cost factors are relatively the same.

2. That the stated project cost of $25,250,000 (including $2,500,000 for a site to be acquired) is a maximum figure.

3. That the reported annual operating cost of existing Tempos 4, 5, and T; 1. e., $1.00 per square foot, represents minimum maintenance in anticipation of demolition, and that temporary Government buildings actually cost more to maintain than the proposed new buildings.

4. That the proposed buildings will house approximately 10% of Federal employees presently housed in temporary buildings, and that the specific allocation of agencies in the proposed buildings is to be determined later by General Services Administration.

5. That every effort will be made to design and construct space conducive to maximum efficient utilization of both site and buildings and to take advantage of any revision of cost downward which may be found possible as the plans develop and negotiations are advanced.

6. That this approval supersedes Mr. Hughes' letter of July 22, 1955.

You appreciate, of course, that this project will receive a more detailed review as to cost and space utilization prior to the approval of the lease-purchase agreement.

Sincerely yours,

(Signed) PERCIVAL BRUNDAGE,
*Director.*

HON. FRANKLIN G. FLOETE,
*Administrator,*
*General Services Administration,*
*Washington 25, D. C.*

## INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

JUNE 27, 1956.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 32268: *Canned goods in official territory.* Filed by C. W. Boin, Agent, for interested rail carriers. Rates on canned or preserved foodstuffs, carloads between points in official (including Illinois) territory.

Grounds for relief: Short-line distance formula, truck competition and circuitous routes.

Tariffs: Agent Boin's tariff I. C. C. A-1105; Supplement 3 to Agent Raasch's I. C. C. 857.

FSA No. 32269: *Boxes, fibreboard, etc.—Gastonia, N. C.* Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on fibreboard, pulpboard or strawboard boxes, carloads from Gastonia, N. C., to St. Louis, Mo., Belleville, Cairo, East St. Louis, Ill., and other specified points in Illinois grouped therewith.

Grounds for relief: Circuitous routes in part west of the Mississippi River.

FSA No. 32270: *Coal—Illinois, Indiana, and Kentucky to Sibley, Iowa.* Filed by R. G. Raasch, Agent, for interested rail carriers. Rates on bituminous fine coal, carloads from Mines and stations in Illinois, Indiana and western Kentucky coal districts to Sibley, Iowa.

Grounds for relief: Market competition and circuitous routes.

Tariffs: Schedules listed in exhibit 1 of the application.

FSA No. 32271: *Wallboard—Central Territory to Kansas and Missouri.* Filed by H. R. Hinsch, Agent, for interested rail carriers. Rates on wallboard, building, wall or insulating boards, viz.: fibreboard or pulpboard or strawboard, or such boards and wood combined, carloads from points in Indiana, Michigan, New York, Ohio, Pennsylvania and West Virginia to specified points in Kansas and Missouri.

Grounds for relief: Circuitous routes.

Tariff: Supplement 137 to Agent Hinsch's I. C. C. 4238.

FSA No. 32272: *Export and import rates to southern and Gulf ports.* Filed by H. M. Engdahl, Agent, for interested rail carriers. Rates on various commodities moving on export class and commodity rates from specified points on the Pennsylvania Railroad Company in Illinois, Indiana, Ohio, Kentucky, and Missouri on export traffic, and to the same points on import traffic, when destined to or originating at southern and Gulf ports.

Grounds for relief: Circuitous routes through higher-rated intermediate origin or destination groups.

FSA No. 32273: *Logs—Norton, Va., to North Carolina.* Filed by O. W. South, Jr., Agent, for interested rail carriers. Rates on logs, carloads from Norton, Va., to High Point and Statesville, N. C.

Grounds for relief: Circuitous routes.

Tariff: Supplement 123 to Agent Spaninger's I. C. C. 1297.

FSA No. 32274: *Iron and steel articles—Steelton, Minn., to Illinois Territory.* Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on iron and steel articles, carloads from Steelton (Duluth), Minn., to specified points in Illinois territory.

Grounds for relief: Short-line distance formula and circuitous routes.

Tariff: Supplement 40 to Agent W. J. Prueter's I. C. C. A–3821.

FSA No. 32275: *Crushed stone, etc.—West Chelmsford, Mass., to Canastota, N. Y.* Filed by C. W. Boin, Agent, for interested rail carriers. Rates on crushed stone, grout and riprap, carloads from West Chelmsford, Mass., to Canastota, N. Y.

Grounds for relief: Circuitous routes.

Tariff: Supplement 56 to Boston and Maine Railroad tariff I. C. C. A–3230.

FSA No. 32276: *Animal and poultry feed—Augusta, Ga., to Georgia.* Filed by O. W. South, Jr., Agent, for interested rail carriers. Rates on animal or poultry feed, carloads from Augusta, Ga., to Athens and Atlanta, Ga.

Grounds for relief: Circuitous routes.

Tariff: Supplement 144 to Agent Spaninger's I. C. C. 1325.

FSA No. 32277: *Caustic soda—Louisiana points to Foley, Fla.* Filed by O. W. South, Jr., Agent, for interested rail carriers. Rates on liquid caustic soda, tank-car loads from Baton Rouge and North Baton Rouge, La., to Foley, Fla.

Grounds for relief: Circuitous routes.

Tariff: Supplement 9 to Agent Spaninger's I. C. C. 1526.

FSA No. 32278: *Superphosphate—Southern points to Madison, Minn.* Filed by O. W. South, Jr., Agent, for interested rail carriers. Rates on superphosphate, carloads from specified points in southern territory to Madison, Minn.

Grounds for relief: Short-line distance formula and circuitous routes.

Tariff: Supplement 16 to Agent Spaninger's I. C. C. 1522.

By the Commission.

[SEAL] HAROLD D. McCOY,
*Secretary.*
